

LilyPond

Frammenti

Il compositore tipografico per la musica

Il team di sviluppo di LilyPond

Questo documento contiene una selezione di frammenti LilyPond tratti dal LilyPond Snippet Repository (<http://lsr.di.unimi.it>) (LSR). I frammenti sono nel pubblico dominio.

Desideriamo ringraziare Sebastiano Vigna per la gestione del sito web e del database dell'LSR, e l'università di Milano per l'hosting.

Questo documento non è un sottoinsieme esatto dell'LSR: alcuni frammenti vengono dalla directory `input/new` dei sorgenti di LilyPond; i frammenti tratti dall'LSR vengono convertiti con `convert-ly`, perché l'LSR usa una versione stabile di LilyPond, mentre questo manuale è valido per la versione 2.22.0.

I frammenti sono raggruppati per categorie; le categorie elencate nell'indice corrispondono a una sezione del manuale di notazione di LilyPond. Un frammento potrebbe avere più di una categoria, e non tutte le categorie dell'LSR saranno presenti in questo documento.

Nella versione HTML di questo manuale, si può fare clic sul nome del file o sull'immagine di ciascun esempio per vedere il corrispondente file di input.

Questo manuale è disponibile in altri formati ed è integrato col resto della documentazione. Maggiori informazioni in Sezione “Manuali” in *Informazioni generali*.

La documentazione completa si trova all'indirizzo <http://lilypond.org/>.

Questo documento è stato posto nel pubblico dominio.

Per la versione di LilyPond 2.22.0

Sommario

Pitches	1
Un ambitus per voce	1
Aggiungere un segno di ottava a una sola voce	1
Aiken head thin variant noteheads	2
Altering the length of beamed stems	2
Ambitus after key signature	3
Ambitus su più voci	3
Ambitus	4
Applicazione degli stili delle teste di nota in base al grado della scala	4
Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia	5
Changing ottava text	6
Modifica dell'intervallo dell'ambitus	6
Changing the interval of lines on the stave	7
Clefs can be transposed by arbitrary amounts	8
Coloring notes depending on their pitch	8
Creating a sequence of notes on various pitches	9
Creating custom key signatures	9
Force a cancellation natural before accidentals	10
Forcing a clef symbol to be displayed	10
Generating random notes	11
Nascondere le alterazioni delle note con legatura di valore	11
Keep change clefs full sized	12
Esempio di makam	12
Modificare l'inclinazione dell'estensore dell'ottava	12
Armature di chiave non tradizionali	13
Numeri dentro le teste di nota	14
Modello per orchestra, coro e pianoforte	15
Impedire l'inserimento automatico dei bequadri supplementari	18
Impedire l'inserimento dei segni di bequadro quando cambia l'armatura di chiave	19
Quoting another voice with transposition	19
Separating key cancellations from key signature changes	20
Trasposizione delle altezze con numero minimo di alterazioni	20
Turkish Makam example	22
Modifiche manuali della proprietà della chiave	22
Using autochange with more than one voice	24
 Rhythms	 26
Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms	26
Adding drum parts	26
Adjusting grace note spacing	27
Allineare i numeri di battuta	27
Note brevi alternative	28
Appoggiatura or grace note before a bar line	28
Automatic beam subdivisions	29
Automatically change durations	29
Estremità delle travature nel contesto Score	30
Travature che attraversano le interruzioni di linea	31

Modificare la distanza delle travature angolari	31
Modificare la forma delle pause multiple.....	32
Modifica del numero di punti di aumentazione per nota.....	32
Modificare il tempo senza mostrare l'indicazione metronomica	32
Modifica del numero del gruppo irregolare	33
Changing time signatures inside a polymetric section using \scaleDurations	33
Notazione per canti e salmi	34
Compound time signatures.....	35
Segni per la conduzione, segni di raggruppamento della misura.....	35
Consistently left aligned bar numbers	36
Controllare la visibilità della parentesi del gruppo irregolare	37
Creare indicazioni metronomiche in modalità testuale.....	38
Disegnare manualmente le legature di valore.....	38
Engraving tremolos with floating beams	39
Inserire vari gruppi irregolari usando una sola volta il comando \tuple	39
Code e punte delle travature	40
Forcing rehearsal marks to start from a given letter or number.....	41
Generating custom flags.....	41
Ritmi di accompagnamento per chitarra	43
Heavily customized polymetric time signatures	44
Making an object invisible with the 'transparent property	45
Legature di portamento con complesse strutture di tratteggio.....	45
Manually controlling beam positions	46
Merging multi-measure rests in a polyphonic part	46
Modifying tuplet bracket length	47
Spostare le note puntate in polifonia	47
Regolazione della lunghezza delle pause multiple.....	48
Testo a margine delle pause multiple	48
Numeri non predefiniti per i gruppi irregolari.....	49
Numbering single measure rests	49
PartCombine e autoBeamOff.....	50
Percussion example	51
Consentire l'interruzione del rigo all'interno di gruppi irregolari con travature	52
Positioning grace note beams at the height of normal note beams	53
Posizionare gli abbellimenti con dello spazio fluttuante.....	53
Posizionamento delle pause multiple.....	53
Preventing final mark from removing final tuplet	55
Mostrare i numeri di battuta a intervalli regolari	55
Numeri di battuta racchiusi in rettangoli o cerchi	56
Stampare i numeri di battuta a intervalli regolari variabili	56
Posizionare il metronomo e i numeri di chiamata sotto il rigo	57
Printing music with different time signatures	57
Mostrare il numero di battuta nella prima misura	61
Ridefinire le impostazioni predefinite globali degli abbellimenti.....	61
Togliere i numeri di battuta da uno spartito	62
Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff.....	62
Stili di pausa	63
Reverting default beam endings	64
Rhythmic slashes	64
Skips in lyric mode (2).....	65
Skips in lyric mode	65
Stemlets	66
Travatura che segue strettamente il battito	66
Suddividere le travature	66

Tam-tam example	67
Three-sided box.....	68
Time signature in parentheses - method 3	69
Time signature in parentheses.....	69
Indicazione di tempo che mostra solo il numeratore (invece della frazione).....	69
Modificare l'aspetto degli abbellimenti di un intero brano.....	70
User defined time signatures	70
Using alternative flag styles	71
Usare il gambo barrato degli abbellimenti con le teste normali	71
Usare le legature di valore con un arpeggio	72
Expressive marks	73
Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms.....	73
Adding parentheses around an expressive mark or chordal note	73
Aggiungere i segni di tempo per i glissandi lunghi	73
Cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto.....	74
Note brevi alternative.....	75
Asymmetric slurs	75
Breathing signs	75
Broken Crescendo Hairpin	76
Caesura ("railtracks") with fermata	77
Center text below hairpin dynamics	77
Modifica della dimensione del segno di \flageolet	79
Nascondere la linea di estensione per le dinamiche testuali	79
Changing the appearance of a slur from solid to dotted or dashed.....	80
Cambiare il simbolo del segno di respiro	80
Modifica del numero di punti di aumentazione per nota	80
Combining dynamics with markup texts.....	81
Glissando contemporaneo	81
Controlling spanner visibility after a line break	81
Controllo dell'ordine verticale degli script.....	82
Creare un gruppetto ritardato.....	82
Creare degli arpeghi che attraversano note appartenenti a voci diverse	83
Creare degli arpeghi che attraversano il rigo del pianoforte.....	83
Creare degli arpeghi che attraversano i righi in altri contesti	84
Creating double-digit fingerings	85
Creating "real" parenthesized dynamics	85
Creating simultaneous rehearsal marks	85
Creating slurs across voices	86
Creating text spanners	87
Estensore testuale della dinamica personalizzato	88
Estensore testuale della dinamica personalizzato	88
Glissandi can skip grobs	89
Hairpins with different line styles.....	89
Nascondere la linea di estensione per le dinamiche testuali	89
Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p")	90
How to print two rehearsal marks above and below the same barline (method 1)	93
How to print two rehearsal marks above and below the same barline (method 2)	94
Inserire una cesura.....	95
Laissez vibrer ties	95
Line arrows	96
Legature di portamento con complesse strutture di tratteggio	96
Modificare i valori predefiniti per le abbreviazioni delle articolazioni.....	97
Moving slur positions vertically	97

Spostare le estremità delle forcelle	98
Positioning arpeggios	99
Posizionare il testo a margine dentro le legature di portamento	99
Stampare le forcelle in vari stili	99
Forcelle con notazione al niente	100
Posizionare il metronomo e i numeri di chiamata sotto il rigo	100
Impostare il comportamento delle forcelle sulle stanghette	101
Impostare la lunghezza minima delle forcelle	101
Showing the same articulation above and below a note or chord	101
Snap-pizzicato or Bartok pizzicato	102
Usare un segno di spunta come simbolo di respiro	102
Usare arpeggioBracket per rendere i divisi più visibili	103
Uso delle doppie legature di portamento per gli accordi legati	103
Using the whiteout property	104
Vertical line as a baroque articulation mark	104
Vertically aligning dynamics across multiple notes	104
Repeats	106
Aggiungere le parentesi delle volte a altri righi	106
Centered measure numbers	106
Changing the default bar lines	107
Tremoli attraverso i righi	108
Engraving tremolos with floating beams	108
Ripetizioni con segni di percentuale isolati	109
Measure counter	109
Numbering groups of measures	110
Visibilità del conto della ripetizione con segno percentuale	111
Contatore della ripetizione con segno percentuale	111
Positioning segno and coda (with line break)	112
Impostare la doppia ripetizione predefinita per le volte	114
Accorciare le parentesi delle volte	114
Volta sotto gli accordi	115
Volta multi staff	115
Volta text markup using repeatCommands	116
Simultaneous notes	118
Voci ulteriori per evitare le collisioni	118
Changing a single note's size in a chord	118
Modificare le indicazioni testuali di partCombine	119
Clusters	119
Combinare due parti sullo stesso rigo	120
Displaying complex chords	121
Forzare lo spostamento orizzontale delle note	121
Making an object invisible with the 'transparent' property	122
Spostare le note puntate in polifonia	122
Suppressing warnings for clashing note columns	123
Two \partCombine pairs on one staff	123

Staff notation	126
Un ambitus per voce	126
Adding an extra staff at a line break	126
Adding an extra staff	127
Adding indicators to staves which get split after a break	128
Aggiungere citazioni orchestrali a una partitura vocale	132
Aggiungere i segni di tempo per i glissandi lunghi	134
Numeri di battuta alternativi	134
Ambitus after key signature	135
Centered measure numbers	136
Changing the default bar lines	137
Changing the number of lines in a staff	137
Changing the staff size	138
Creating blank staves	139
Creating custom key signatures	140
Creating double-digit fingerings	141
Cross staff stems	141
Mostrare la parentesi anche se c'è un solo rigo nel sistema	142
Extending a TrillSpanner	143
Estendere i glissandi sulle volte delle ripetizioni	143
Flat Ties	144
Forcing measure width to adapt to MetronomeMark's width	147
Glissandi can skip grobs	147
How to print two rehearsal marks above and below the same barline (method 1)	148
How to print two rehearsal marks above and below the same barline (method 2)	148
Incipit	149
Inserting score fragments above a staff, as markups	154
Let TabStaff print the topmost string at bottom	155
Letter tablature formatting	155
Lasciare che i glissandi vadano a capo	156
Rendere alcune linee del rigo più spesse delle altre	157
Measure counter	157
Formattazione mensurale (stanghette tra i righi)	157
Modificare l'inclinazione dell'estensore dell'ottava	158
Annidare i righi	158
Armature di chiave non tradizionali	159
Numbering groups of measures	160
Modello per orchestra, coro e pianoforte	161
Putting lyrics inside the staff	164
Quoting another voice with transposition	165
Quoting another voice	166
Removing brace on first line of piano score	167
Eliminare la prima linea vuota	168
Setting system separators	169
Tick bar lines	171
Time signature in parentheses - method 3	171
Time signature in parentheses	171
Modifiche manuali della proprietà della chiave	171
Two \partCombine pairs on one staff	173
Usare una parentesi quadra all'inizio di un gruppo di righi	175
Using autochange with more than one voice	175
Using marklines in a Frenched score	176
Vertical aligned StaffGroups without connecting SystemStartBar	179
Volta sotto gli accordi	187

Volta multi staff	188
Editorial annotations	189
Adding fingerings to a score.....	189
Adding links to objects	189
Adding markups in a tablature.....	190
Far sì che la diteggiatura appaia dentro il rigo.....	191
Numeri di battuta alternativi	192
Parentesi analitiche sopra il rigo	193
Parentesi analitiche con etichette.....	193
Applicazione degli stili delle teste di nota in base al grado della scala	194
Blanking staff lines using the \whiteout command.....	195
Changing a single note's size in a chord	195
Changing the appearance of a slur from solid to dotted or dashed.....	195
Coloring notes depending on their pitch.....	196
Controllare il posizionamento delle diteggiature di un accordo	197
Creare un gruppetto ritardato.....	197
Creating blank staves	198
Creating double-digit fingerings	200
Direzione predefinita dei gambi sulla linea centrale del rigo	200
Different font size settings for instrumentName and shortInstrumentName	200
Drawing boxes around grobs	202
Drawing circles around note heads	202
Drawing circles around various objects	203
Embedding native PostScript in a \markup block	203
Modificare l'aspetto delle linee della griglia.....	203
Grid lines: emphasizing rhythms and notes synchronization	204
Martellato e strappato usando accordi.....	206
Martellato e strappato usando le voci	206
Martellato e strappato	206
How to print two rehearsal marks above and below the same barline (method 1)	207
How to print two rehearsal marks above and below the same barline (method 2)	207
Rendere alcune linee del rigo più spesse delle altre.....	208
Marking notes of spoken parts with a cross on the stem	209
Measure counter	209
Numbering groups of measures	210
Positioning fingering indications precisely	211
Posizionare il testo a margine dentro le legature di portamento	212
Printing text from right to left	212
String number extender lines.....	212
Using PostScript to generate special note head shapes	213
Using the whiteout property	213
Text	215
Adding markups in a tablature.....	215
Adding the current date to a score	215
Adjusting lyrics vertical spacing.....	216
Aligning and centering instrument names	217
Aligning objects created with the \mark command	218
Aligning syllables with melisma	219
Blanking staff lines using the \whiteout command	219
Center text below hairpin dynamics	220
Changing ottava text	221

Changing the default text font family	222
Combining dynamics with markup texts.....	222
Combinare due parti sullo stesso rigo.....	223
Creating "real" parenthesized dynamics	224
Creating simultaneous rehearsal marks	225
Creating text spanners.....	225
Demonstrating all headers	226
Embedding native PostScript in a \markup block	227
Formattazione delle sillabe del testo vocale	228
How to put ties between syllables in lyrics.....	228
Allineamento del testo vocale	228
Markup list	229
Testo a margine delle pause multiple	231
Of the ubiquity of markup objects	231
Outputting the version number	232
Modello per pianoforte con testo al centro.....	233
Stampare i numeri di battuta a intervalli regolari variabili	233
Posizionare le indicazioni alla fine di una linea.....	234
Stampare le indicazioni su ogni rigo	234
Printing text from right to left	235
Putting lyrics inside the staff.....	235
Testo separato su due colonne.....	236
String number extender lines.....	236
Three-sided box	237
UTF-8.....	238
Modello per gruppo vocale con testo allineato sotto e sopra i righi	240
Volta text markup using repeatCommands	241
Vocal music	242
Un ambitus per voce.....	242
Adding indicators to staves which get split after a break.....	242
Aggiungere citazioni orchestrali a una partitura vocale.....	246
Adjusting lyrics vertical spacing.....	248
Aligning syllables with melisma	248
Ambitus after key signature.....	249
Ambitus su più voci	249
Ambitus	250
Modello per notazione antica – trascrizione moderna di musica gregoriana	251
Modello per salmo anglicano	251
Arranging separate lyrics on a single line	254
Changing stanza fonts	255
Notazione per canti e salmi	256
Forcing hyphens to be shown.....	256
Formattazione delle sillabe del testo vocale	257
How to put ties between syllables in lyrics.....	257
Modello per inno	258
Allineamento del testo vocale	260
Marking notes of spoken parts with a cross on the stem	260
Ottenere la spaziatura del testo della vecchia versione 2.12.....	261
Modello per orchestra, coro e pianoforte	263
Modello per pianoforte con melodia e testo	267
Putting lyrics inside the staff.....	268
Modello per coro SATB - quattro righi	269
Modello di rigo singolo con note, testo e accordi	270

Single staff template with notes, lyrics, chords and frets	271
Modello di rigo singolo con note e testo	272
Skips in lyric mode (2).....	273
Skips in lyric mode	273
Usare arpeggioBracket per rendere i divisi più visibili.....	273
Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente	274
Allineare verticalmente gli ossia e il testo vocale	276
Vertically centered common lyrics.....	276
Modello per gruppo vocale con riduzione per pianoforte automatica.....	278
Modello per gruppo vocale con testo allineato sotto e sopra i righi	280
Modello per gruppo vocale con strofa e ritornello.....	281
Modello per complesso vocale	283
Chords.....	286
Adding a figured bass above or below the notes.....	286
Aggiungere stanghette al contesto ChordNames	286
Bar chords notation for Guitar (with Text Spanner).....	287
Modifica del separatore dell'accordo.....	288
Changing the chord names to German or semi-German notation	288
Cambiare la posizione delle alterazioni del basso continuo.....	289
Eccezioni dei nomi degli accordi.....	289
Nome dell'accordo di settima maggiore	290
Chord names alternative	290
Chords with stretched fingering for FretBoards and TabVoice	300
Clusters	301
Controllare il posizionamento delle diteggiature di un accordo	301
Cross-staff chords - beaming problems workaround	302
Displaying complex chords	303
Manually break figured bass extenders for only some numbers	303
Mostrare gli accordi nei cambi	304
Canzoniere semplice	304
Modello di rigo singolo con note, testo e accordi	304
Single staff template with notes, lyrics, chords and frets	305
Modello di rigo singolo con note e accordi	306
Vertically centering paired figured bass extenders.....	307
Volta sotto gli accordi	307
Keyboards.....	309
Accordion-discant symbols	309
Simboli di registro della fisarmonica	312
Changing the text for sustain markings.....	313
Clusters	314
Controllare il posizionamento delle diteggiature di un accordo	314
Creating slurs across voices	315
Cross-staff chords - beaming problems workaround	315
Tremoli attraverso i righi	316
Fine-tuning pedal brackets.....	317
Indicare accordi trasversali al rigo con la parentesi quadrata dell'arpeggio.....	317
Modello per combo jazz.....	318
Laissez vibrer ties.....	324
Modello per pianoforte (semplice)	325
Modello per pianoforte con testo al centro	325
Modello per pianoforte con melodia e testo	326

Removing brace on first line of piano score	327
Using autochange with more than one voice	328
Modello per gruppo vocale con riduzione per pianoforte automatica.....	329
Percussion	332
Adding drum parts	332
Customized drum notation in printed and MIDI output	333
Heavily customized polymetric time signatures	335
Modello per combo jazz.....	336
Percussion beaters	342
Percussion example	345
Printing music with different time signatures	346
Tam-tam example	350
Fretted strings	351
Adding fingerings to a score.....	351
Adding fingerings to tablatures.....	351
Adding markups in a tablature.....	352
Far sì che la diteggiatura appaia dentro il rigo	352
Barres in automatic fretboards	353
Bar chords notation for Guitar (with Text Spanner).....	353
Cambiare l'orientamento della tastiera	354
Glissando di accordi in intavolatura	355
Cambi di accordo nei diagrammi dei tasti	356
Chords with stretched fingering for FretBoards and TabVoice	357
Controllare il posizionamento delle diteggiature di un accordo	357
Personalizzare la tastiera del diagramma dei tasti	358
Personalizzare il diagramma dei tasti di tipo markup	359
Definire diagrammi dei tasti predefiniti per altri strumenti.....	361
Faking a hammer in tablatures	363
Diteggiature, indicazioni di corda e diteggiature della mano destra	363
Flamenco notation	363
Fret diagrams explained and developed.....	367
Tabelle alternative per i diagrammi dei tasti.....	374
Armonici su corde premute in intavolatura	376
Guitar slides	377
Ritmi di accompagnamento per chitarra	378
Martellato e strappato usando accordi	379
Martellato e strappato usando le voci	379
Martellato e strappato	380
How to change fret diagram position	380
Modello per combo jazz	381
Laissez vibrer ties	387
Let TabStaff print the topmost string at bottom	388
Letter tablature formatting	388
Armonici su corde a vuoto in intavolatura	389
Posizionamento delle diteggiature della mano destra	391
Polifonia in intavolatura	392
Slides in tablature	392
Comportamento di gambi e travature in intavolatura	393
String number extender lines	394

Unfretted strings	395
Creating slurs across voices	395
Dotted harmonics.....	395
Snap-pizzicato or Bartok pizzicato	396
Modello per quartetto d'archi (semplice)	396
Modello per quartetto d'archi con parti separate.....	397
Winds	401
Cambiare la dimensione dei diagrammi per legni	401
Simboli di diteggiatura per strumenti aerofoni.....	401
Flute slap notation	402
Diagrammi grafici e testuali per i legni	403
Grafico della diteggiatura per flauto dolce.....	403
Elenco delle chiavi dei diagrammi per legni.....	404
Elenco dei diagrammi per i legni	405
Ancient notation.....	408
Adding a figured bass above or below the notes.....	408
Ancient fonts	408
Modello per notazione antica – trascrizione moderna di musica gregoriana	413
Ancient time signatures	414
Notazione per canti e salmi	414
Custodes	415
Incipit	416
Formattazione mensurale (stanghette tra i righi)	420
Stili di pausa	421
Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente	422
Vertical line as a baroque articulation mark	423
World music	425
Improvvisazione araba	425
Esempio di makam	425
Armature di chiave non tradizionali	425
Printing text from right to left	426
Turkish Makam example	426
Contexts and engravers	428
Adding a figured bass above or below the notes.....	428
Adding an extra staff at a line break	428
Adding an extra staff	429
Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia	430
Centered measure numbers.....	431
Impostare l'output MIDI su un canale per voce.....	431
Changing time signatures inside a polymetric section using \scaleDurations	432
Notazione per canti e salmi	433
Creating blank staves	434
Creating custom key signatures	436
Cross staff stems.....	436
Defining an engraver in Scheme: ambitus engraver	437
Displaying a whole GrandStaff system if only one of its staves is alive.....	443
Engravers one-by-one	445

Formattazione mensurale (stanghette tra i righi)	450
Annidare i righi.....	451
Numbering groups of measures.....	452
Togliere i numeri di battuta da uno spartito.....	453
Usare una parentesi quadra all'inizio di un gruppo di righi.....	453
Using marklines in a Frenched score.....	454
Modello per gruppo vocale con testo allineato sotto e sopra i righi	456
Modello per gruppo vocale con strofa e ritornello.....	458
Tweaks and overrides	461
Aggiungere un segno di ottava a una sola voce	461
Adding links to objects	461
Adding markups in a tablature.....	463
Aggiungere i segni di tempo per i glissandi lunghi	464
Adjusting grace note spacing.....	464
Adjusting lyrics vertical spacing.....	465
Altering the length of beamed stems	465
Numeri di battuta alternativi	466
Parentesi analitiche sopra il rigo	467
Parentesi analitiche con etichette.....	467
Asymmetric slurs	468
Caesura ("railtracks") with fermata	469
Changing a single note's size in a chord	469
Changing beam thickness and spacing.....	469
Modificare la forma delle pause multiple.....	470
Changing properties for individual grobs	470
Nascondere la linea di estensione per le dinamiche testuali	471
Changing the default text font family	471
Changing the staff size.....	472
Modificare il tempo senza mostrare l'indicazione metronomica	473
Changing the text for sustain markings.....	473
Controlling spanner visibility after a line break	473
Controllo dell'ordine verticale degli script	474
Controllare la visibilità della parentesi del gruppo irregolare	475
Creare un gruppetto ritardato.....	475
Creating custom key signatures	476
Creating double-digit fingerings	477
Creating simultaneous rehearsal marks	477
Creating text spanners.....	478
Cross-staff chords - beaming problems workaround	478
Cross staff stems.....	479
Custodes	480
Personalizzare la tastiera del diagramma dei tasti	481
Personalizzare il diagramma dei tasti di tipo markup	482
Mostrare la parentesi anche se c'è un solo rigo nel sistema	484
Displaying grob ancestry	484
Dotted harmonics.....	486
Drawing boxes around grobs	487
Drawing circles around various objects	487
Estensore testuale della dinamica personalizzato.....	488
Estensore testuale della dinamica personalizzato.....	488
Extending a TrillSpanner	489
Estendere i glissandi sulle volte delle ripetizioni	489
Fine-tuning pedal brackets	490

Flat Ties	491
Force a cancellation natural before accidentals.....	493
Forzare lo spostamento orizzontale delle note.....	494
Fret diagrams explained and developed.....	494
Generating custom flags	501

Pitches

Sezione “Pitches” in *Guida alla Notazione*

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Aggiungere un segno di ottava a una sola voce

Se il rigo ha più di una voce, l’ottavazione in una voce trasporrà la posizione delle note in tutte le voci per la durata della parentesi dell’ottava. Se si intende applicare l’ottavazione a una sola voce, si possono impostare esplicitamente middleCPosition e la parentesi di ottava. In questo frammento, la chiave di basso ha di norma il MiddleCPosition impostato su 6, ovvero sei posizioni sopra la linea centrale, dunque nella porzione con l’ottava il MiddleCPosition è più alto di sette posizioni (un’ottava).

```
{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \set Staff.ottavation = #"8vb"
    \once \override Staff.OttavaBracket.direction = #DOWN
    \set Voice.middleCPosition = #(+ 6 7)
    <b,,, b,,,>4 ~ |
    q2
    \unset Staff.ottavation
    \unset Voice.middleCPosition
```

```

<c e>2
}
>>
}

8vb

```

Aiken head thin variant noteheads

Aiken head white notes get harder to read at smaller staff sizes, especially with ledger lines. Losing interior white space makes them appear as quarter notes.

```

\score {
{
    \aikenHeads
    c''2 a' c' a

    % Switch to thin-variant noteheads
    \set shapeNoteStyles = ##(doThin reThin miThin
                                faThin sol laThin tiThin)
    c'' a' c' a
}
}

% END EXAMPLE

```

Altering the length of beamed stems

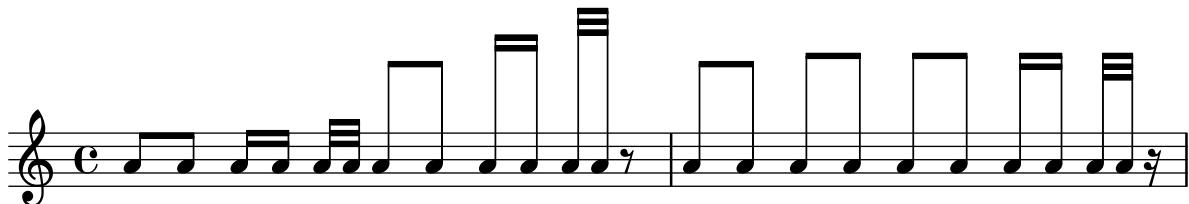

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the `details` of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```

\relative c' {
    \override Stem.details.beamed-lengths = #'(2)
    a8[ a] a16[ a] a32[ a]
    \override Stem.details.beamed-lengths = #'(8 10 12)
    a8[ a] a16[ a] a32[ a] r8
    \override Stem.details.beamed-lengths = #'(8)
    a8[ a]
    \override Stem.details.beamed-lengths = #'(8.5)
    a8[ a]
    \revert Stem.details
    a8[ a] a16[ a] a32[ a] r16
}

```

}

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface` (see Sezione “Graphical Object Interfaces” in *Guida al Funzionamento Interno* for a list of possible values for `grob-interface`). A common use case is printing the ambitus between key signature and time signature.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Ambitus su più voci

Se si aggiunge l’incisore `Ambitus_engraver` al contesto `Staff` viene creato un solo ambitus per il rigo, anche nel caso di righi che hanno più voci.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}
<<
  \new Voice \relative c'' {
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

```
\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>
```

Applicazione degli stili delle teste di nota in base al grado della scala

La proprietà `shapeNoteStyles` può essere usata per definire vari stili di teste di nota per ogni grado della scala (definita dall'armatura di chiave o dalla proprietà `tonic`). Questa proprietà richiede un insieme di simboli, che può essere puramente arbitrario (sono messe a disposizione espressioni geometriche come `triangle`, `cross` e `xcircle`) o basato sull'antica tradizione tipografica americana (sono consentiti anche alcuni nomi di nota latini).

Detto questo, per imitare gli antichi canzoni americani, ci sono vari stili predefiniti disponibili attraverso dei comodi comandi come `\aikenHeads` o `\sacredHarpHeads`.

Questo esempio mostra modi diversi di ottenere teste di nota di varie forme e illustra la possibilità di trasporre una melodia senza perdere la corrispondenza tra le funzioni armoniche e gli stili delle teste.

```
fragment = {
  \key c \major
  c2 d
```

```

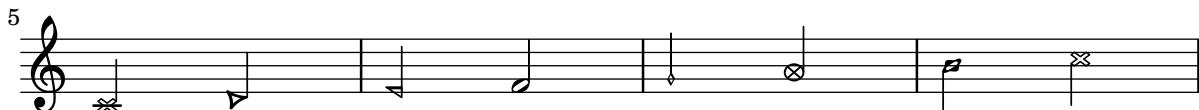

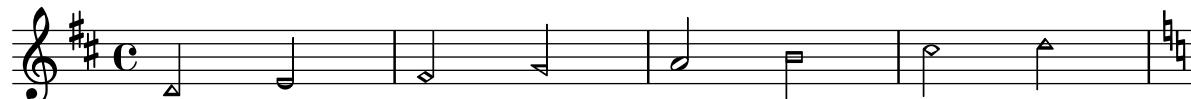

e2 f
g2 a
b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                           #f la ti)
    \fragment
  }
}

\break

\relative c' {
  \set shapeNoteStyles = ##(cross triangle fa #f
                           mensural xcircle diamond)
  \fragment
}
}
}

```

Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia

LilyPond può modificare la direzione del gambo della nota centrale di un rigo in modo che segua la melodia: occorre aggiungere l'incisore `Melody_engraver` al contesto `Voice` e sovrascrivere la proprietà `neutral-direction` di `Stem`.

```

\relative c'' {
  \time 3/4
  a8 b g f b g |
  c   b d c b c |
}

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
    \override Stem.neutral-direction = #'()
  }
}

```

Changing ottava text

Internally, \ottava sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```
{
    c'2
    \ottava #1
    \set Staff.ottavation = #"8"
    c''2
    \ottava #0
    c'1
    \ottava #1
    \set Staff.ottavation = #"Text"
    c'''1
}
```

Modifica dell'intervallo dell'ambitus

È possibile cambiare le impostazioni predefinite dell'intervallo tra le teste di nota dell'ambitus e la linea che le collega.

```
\layout {
    \context {
        \Voice
        \consists "Ambitus_engraver"
    }
}

\new Staff {
    \time 2/4
    % Default setting
    c'4 g''
}

\new Staff {
    \time 2/4
    \override AmbitusLine.gap = #0
    c'4 g''
}

\new Staff {
    \time 2/4
    \override AmbitusLine.gap = #1
    c'4 g''
}
```

```
\new Staff {
    \time 2/4
    \override AmbitusLine.gap = #1.5
    c'4 g'''
}
```

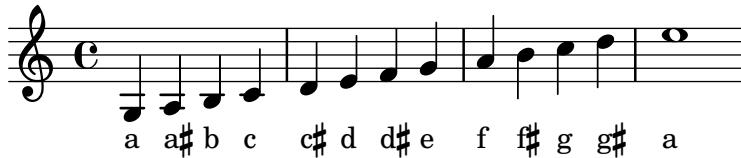

Changing the interval of lines on the stave

`staffLineLayoutFunction` is used to change the position of notes. This snippet shows setting its value to `ly:pitch-semitones` in order to produce a chromatic scale with the distance between each space and line of the stave equal to one semitone.

```
scale = \relative c' {
    a4 ais b c
    cis4 d dis e
    f4 fis g gis
    a1
}

\new Staff \with {
    \remove "Accidental_engraver"
    staffLineLayoutFunction = #ly:pitch-semitones
}
{
    <<
        \scale
        \context NoteNames {
            \set printOctaveNames = ##f
            \scale
        }
    >>
}
```

Clefs can be transposed by arbitrary amounts

Clefs can be transposed by arbitrary amounts, not just by octaves.

```
\relative c' {
    \clef treble
c4 c c c
\clef "treble_8"
c4 c c c
\clef "treble_5"
c4 c c c
\clef "treble^3"
c4 c c c
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

```
%Association list of pitches to colors.
#define color-mapping
(list
  (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
  (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
  (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
  (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
  (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
  (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
  (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
  (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
  (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
  (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
  (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
  (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
  (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
  (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
  (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
  (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue)))))

%Compare pitch and alteration (not octave).
#define (pitch>equals? p1 p2)
(and
  (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
  (= (ly:pitch-notename p1) (ly:pitch-notename p2))))
```

```

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
        (cdr color)))

#(define (color-notehead grob)
  (pitch-to-color
    (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}

```

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used. This example creates the rhythm used throughout Mars, from Gustav Holst's The Planets.

```

rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}

```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```

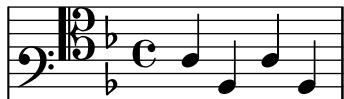

\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))

```

```
\override KeyCancellation.sharp-positions = #'((-6 . 7))

\override Clef.stencil = #
(lambda (grob)(grob-interpret-markup grob
#{ \markup\combine
  \musicglyph "clefs.C"
  \translate #'(-3 . -2)
  \musicglyph "clefs.F"
#})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Force a cancellation natural before accidentals

The following example shows how to force a natural sign before an accidental.

```
\relative c' {
  \key es \major
  bes c des
  \tweak Accidental.restore-first ##t
  eis
}
```

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the \clef command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command \set Staff.forceClef = ##t.

```
\relative c' {
  \clef treble
  c1
  \clef treble
  c1
  \set Staff.forceClef = ##t
  c1
  \clef treble
  c1
}
```

Generating random notes

This Scheme-based snippet generates 24 random notes (or as many as required), based on the current time (or any randomish number specified instead, in order to obtain the same random notes each time): i.e., to get different random note patterns, just change this number.

```
\score {
{
  $(let ((random-state (seed->random-state (current-time))))
    (make-sequential-music
      (map (lambda (x)
        (let ((idx (random 12 random-state)))
          (make-event-chord
            (list
              (make-music 'NoteEvent
                'duration (ly:make-duration 2 0 1/1)
                'pitch (ly:make-pitch
                  (quotient idx 7)
                  (remainder idx 7)
                  0))))))
        (make-list 24))))}
}
```

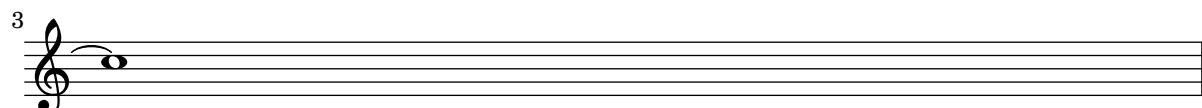

Nascondere le alterazioni delle note con legatura di valore

all'inizio di un nuovo sistema

Questo frammento mostra come nascondere le alterazioni delle note unite alla figura precedente mediante una legatura di valore all'inizio di un nuovo sistema

```
\relative c' {
  \override Accidental.hide-tied-accidental-after-break = ##t
  cis1~ cis~
  \break
  cis
}
```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

```
\relative c' {
    \clef "treble"
    c1
    \clef "bass"
    c1
    \clef "treble"
    c1
    \override Staff.Clef.full-size-change = ##t
    \clef "bass"
    c1
    \clef "treble"
    c1
    \revert Staff.Clef.full-size-change
    \clef "bass"
    c1
    \clef "treble"
    c1
}
```

Esempio di makam

Makam è un tipo di melodia proveniente dalla Turchia che usa alterazioni microtonali di 1/9. Consultare il file di inizializzazione ‘`ly/makam.ly`’ per vedere come sono definiti i nomi delle altezze e le alterazioni.

```
% Initialize makam settings
\include "makam.ly"

\relative c' {
    \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
    c4 cc db fk
    gbm4 gfc gfb efk
    fk4 db cc c
}
```

Modificare l'inclinazione dell'estensore dell'ottava

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

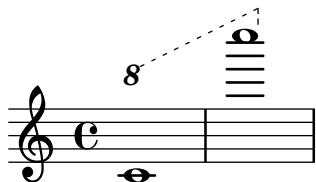

```
\relative c'' {
    \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
    \override Staff.OttavaBracket.bound-details =
```

```

#`((left . ((Y . 0) ; Change the integer here
            (attach-dir . ,LEFT)
            (padding . 0)
            (stencil-align-dir-y . ,CENTER)))
    (right . ((Y . 5) ; Change the integer here
              (padding . 0)
              (attach-dir . ,RIGHT)
              (text . ,(make-draw-dashed-line-markup
                        (cons 0 -1.2))))))

\override Staff.OttavaBracket.left-bound-info =
  #ly:line-spanner::calc-left-bound-info-and-text
\override Staff.OttavaBracket.right-bound-info =
  #ly:line-spanner::calc-right-bound-info
\ottava #1
c1
c'''1
}

```

Armature di chiave non tradizionali

Il comando `\key` comunemente usato imposta la proprietà `keyAlterations` del contesto `Staff`. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```
\set Staff.keyAlterations = #`(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)
```

dove, per ogni elemento della lista, `ottava` indica l'ottava (0 è l'ottava dal Do centrale al Si precedente), `grado` indica la nota all'interno dell'ottava (0 significa Do e 6 significa Si) e `alterazione` può essere `,SHARP`, `,FLAT`, `,DOUBLE-SHARP` etc.

Altrimenti, usando il formato breve per ogni elemento della lista, `(grado . alterazione)`, ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonali dove un “diesis” non è 100 centesimi, `alterazione` si riferisce alla proporzione di un duecentesimo di tono intero.

```

\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))
%
% \set Staff.extraNatural = ##f
  re reb \dwn reb resd
  dod dob dosd \dwn dob |
  dobsb dods d o do |
}

```

Numeri dentro le teste di nota

Le teste di nota con nome della nota usano la proprietà `note-names` dell'oggetto `NoteHead` per determinare cosa appaia all'interno della testa. È possibile sovrascrivere questa proprietà e mostrare numeri corrispondenti ai gradi della scala.

Si può creare un semplice incisore che faccia questo per ogni oggetto testa di nota che incontra.

```
#(define Ez_numbers_engraver
  (make-engraver
    (acknowledgers
      ((note-head-interface engraver grob source-engraver)
        (let* ((context (ly:translator-context engraver))
               (tonic-pitch (ly:context-property context 'tonic))
               (tonic-name (ly:pitch-notename tonic-pitch))
               (grob-pitch
                 (ly:event-property (event-cause grob) 'pitch))
               (grob-name (ly:pitch-notename grob-pitch))
               (delta (modulo (- grob-name tonic-name) 7)))
               (note-names
                 (make-vector 7 (number->string (1+ delta))))))
          (ly:grob-set-property! grob 'note-names note-names)))))

```

The first staff (line 3) has a treble clef and a key signature of one sharp (F#). The notes are numbered 1 through 7 from left to right. The second staff (line 5) has a treble clef and a key signature of no sharps or flats. The notes are also numbered 1 through 7.

Modello per orchestra, coro e pianoforte

Questo modello mostra come usare i contesti annidati `StaffGroup` e `GrandStaff` per creare sottogruppi degli strumenti dello stesso tipo. Mostra anche come usare `\transpose` in modo che le variabili mantengano la musica per gli strumenti traspositori nell'intonazione reale.

```

The musical score consists of 16 staves. The instruments listed from top to bottom are: Flute, Clarinet in B-flat, Horn in F, Trumpet in C, Percussion, Piano (two staves), Soprano, Alto I, Alto II, Tenor, Violin I, Violin II, Viola, Cello, and Double Bass. The score is in common time with a key signature of one sharp (F#). The notes are mostly quarter notes, with some eighth notes and rests. The vocal parts (Soprano, Alto I, Alto II, Tenor) have lyrics: 'Lyr - ics' for Alto I and Alto II, and 'Ah - ah' for Tenor.

Impedire l'inserimento automatico dei bequadri supplementari

Secondo le norme tipografiche tradizionali, un segno di bequadro viene inserito prima di un diesis o di un bemolle se un precedente doppio diesis o bemolle sulla stessa nota è cancellato. Per cambiare questo comportamento e seguire la pratica contemporanea, si imposta la proprietà `extraNatural` su `f` (falso) nel contesto `Staff`.

```
\relative c' {
  aeses4 aes ais a
  \set Staff.extraNatural = ##f
  aeses4 aes ais a
}
```

Impedire l'inserimento dei segni di bequadro quando cambia l'armatura di chiave

Quando l'armatura di chiave cambia, vengono inseriti automaticamente i segni di bequadro per annullare le alterazioni di precedenti armature. Si può evitare questo comportamento impostando su `f` (falso) la proprietà `printKeyCancellation` nel contesto `Staff`.

```
\relative c' {
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
    \set Staff.printKeyCancellation = ##f
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
}
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
    \transposition bes
    \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
    \transposition es'
    \repeat unfold 16 { a8 }
}

quoteTest = {
    % french horn
    \transposition f
    g'4
    << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
    << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
    g'4
}

{
    \new Staff \with {
        instrumentName = \markup { \column { Horn "in F" } }
    }
    \quoteTest
    \transpose c' d' << \quoteTest s4_ "up a tone" >>
```

}

Horn in F

clar. sax. clar. sax.

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `'break-align-orders` property of the `BreakAlignment` grob.

The value of `'break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving `key-cancellation` before `staff-bar`; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

```
\new Staff {
    \override Score.BreakAlignment.break-align-orders =
        ##((left-edge ambitus breathing-sign clef staff-bar
            key-cancellation key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
            staff-bar key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
            key-signature staff-bar time-signature custos))

    \key des \major
    c'1
    \bar "|"
    \key bes \major
    c'1
}
```

Trasposizione delle altezze con numero minimo di alterazioni

Questo esempio usa del codice Scheme per imporre delle modifiche enarmoniche alle note che permettano di avere il numero minimo di alterazioni. In questo caso si applica la seguente regola:

Le doppie alterazioni devono essere eliminate

Si diesis -> Do

Mi diesis -> Fa

Do bemolle -> Si

Fa bemolle -> Mi

In questo modo vengono scelti i suoni enarmonici più semplici.

```
#(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

{

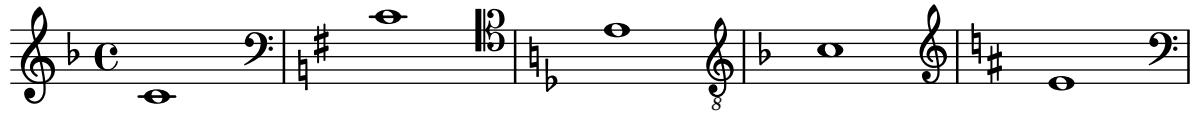

```
% The default treble clef
\key f \major
c'1

Rhythms

Sezione “Rhythms” in *Guida alla Notazione*

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8} ]
  g16( a \tuplet 3/2 { b d e' } )
  g8[( a \tuplet 3/2 { b d' } e' ] ~ }
  \time 2/4
  \tuplet 5/4 { e'32\(( a b d' e' } a'4.\)}
}
```

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```

drh = \drummode {
    cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
    hhc4 r4 r2
}
drl = \drummode {
    bd4 sn8 bd bd4 << bd ss >>
    bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
    timh4 ssh timl8 ssh r timh r4
    ssh8 timl r4 cb8 cb
}

\score {
  <<
  \new DrumStaff \with {
    instrumentName = "timbales"
}
```

```

drumStyleTable = #timbales-style
\override StaffSymbol.line-count = #2
\override BarLine.bar-extent = #'(-1 . 1)
}
<<
\timb
>>
\new DrumStaff \with { instrumentName = "drums" }
<<
\new DrumVoice { \stemUp \drh }
\new DrumVoice { \stemDown \drl }
>>
>>
\layout { }
\midi { \tempo 4 = 120 }
}

```

A musical score for two instruments: timbales and drums. The timbales part consists of a single staff with a common time signature. It features a variety of note heads, including solid black dots, crosses, and 'x' marks, along with grace notes indicated by small vertical strokes. The drums part is on a lower staff, also in common time, featuring a mix of eighth and sixteenth note patterns. Dynamic instructions such as 'crash' and 'h.h.' are placed above certain notes in the timbales part.

Adjusting grace note spacing

The space given to grace notes can be adjusted using the `spacing-increment` property of `Score.GraceSpacing`.

```

graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}

```

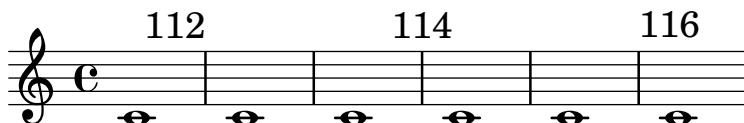

Allineare i numeri di battuta

Per impostazione predefinita i numeri di battuta sono allineati a destra rispetto al loro oggetto genitore. Di solito si tratta del margine sinistro della linea oppure, se i numeri appaiono

all'interno della linea, del lato sinistro della stanghetta. I numeri possono essere posizionati anche direttamente sopra la stanghetta oppure allineati a sinistra della stanghetta.

```
\relative c' {
    \set Score.currentBarNumber = #111
    \override Score.BarNumber.break-visibility = #all-visible
    % Increase the size of the bar number by 2
    \override Score.BarNumber.font-size = #2
    % Print a bar number every second measure
    \set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
    c1 | c1
    % Center-align bar numbers
    \override Score.BarNumber.self-alignment-X = #CENTER
    c1 | c1
    % Left-align bar numbers
    \override Score.BarNumber.self-alignment-X = #LEFT
    c1 | c1
}
```

Note brevi alternative

Le note brevi sono disponibili anche con due linee verticali su ciascun lato della testa invece di una sola e in stile barocco.

```
\relative c'' {
    \time 4/2
    c\breve |
    \override Staff.NoteHead.style = #'altdefault
    b\breve
    \override Staff.NoteHead.style = #'baroque
    b\breve
    \revert Staff.NoteHead.style
    a\breve
}
```

Appoggiatura or grace note before a bar line

By default, appoggiaturas and grace notes that occur on the first beat of a measure are printed after the bar line. They can however be printed before, simply by adding an invisible BarLine and then the visible one, as demonstrated here.

```
{
    R1
    %% default
    \appoggiatura d''8 c''4 r2.
    %% cheated
```

```
\appoggiatura { \bar "" d''8 \bar "|" } c''4 r2.
}
```

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided at beat positions (as specified in `baseMoment`).

```
\new Staff {
  \relative c' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32[ a g f c' b a g
      b32^"subdivide beams" a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
    }
  >>
  \oneVoice
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  b32^"baseMoment 1 8"[ a g f c' b a g]
  \set baseMoment = #(ly:make-moment 1/16)
  \set beatStructure = 4,4,4,4
  b32^"baseMoment 1 16"[ a g f c' b a g]
}
}
```

A musical staff in common time (C) illustrating automatic beam subdivisions. It shows four groups of eighth notes:

- default:** No subdivision.
- subdivide beams:** Subdivided into sixteenth notes.
- baseMoment 1 8:** Subdivided into thirty-second notes.
- baseMoment 1 16:** Subdivided into sixty-fourth notes.

Automatically change durations

`shiftDurations` can be used to change the note lengths of a piece of music.

It takes two arguments - the scaling factor as a power of two, and the number of dots to be added as a positive integer.

```
\paper { indent = 0 }
```

```
music = \relative c' { a1 b2 c4 d8 r }
```

```
\score {
  \new Voice {
    \time 4/2
    \music
    \time 4/4
    \shiftDurations #1 #0 { \music }
    \time 2/4
    \shiftDurations #2 #0 { \music }
    \time 4/1
    \shiftDurations #-1 #0 { \music }
    \time 8/1
    \shiftDurations #-2 #0 { \music }
    \time 6/2
    \shiftDurations #0 #1 { \music }
    \time 7/2
    \shiftDurations #0 #2 { \music }
  }
}
```

The image shows three staves of musical notation. The first staff starts with a common time (4/4) and a 'shiftDurations' setting of #1 #0. It then changes to 2/4, 4/1, 8/1, 6/2, and 7/2, each with a different 'shiftDurations' setting. The second staff starts with 4/4, then changes to 8/1, and finally to 6/2. The third staff starts with 6/2.

Estremità delle travature nel contesto Score

Le regole relative alle estremità delle travature definite nel contesto **Score** si applicano a tutti i righi, ma possono essere modificate anche ai livelli **Staff** e **Voice**:

```
\relative c' {
  \time 5/4
  % Set default beaming for all staves
  \set Score.baseMoment = #(ly:make-moment 1/8)
  \set Score.beatStructure = 3,4,3
  <<
  \new Staff {
    c8 c c c c c c c c
  }
  \new Staff {
    % Modify beaming for just this staff
    \set Staff.beatStructure = 6,4
    c8 c c c c c c c c
  }
  \new Staff {
    % Inherit beaming from Score context
  }
}
```

```

<<
{
  \voiceOne
  c8 c c c c c c c c
}
% Modify beaming for this voice only
\new Voice {
  \voiceTwo
  \set Voice.beatStructure = 6,4
  a8 a a a a a a a a
}
>>
}
>>
}

```

Travature che attraversano le interruzioni di linea

Le interruzioni di linea sono di norma proibite quando le travature attraversano la stanghetta di una battuta. Si può cambiare questo comportamento nel modo seguente:

```

\relative c' {
  \override Beam.breakable = ##t
  c8 c[ c] c[ c] c[ c] c[ \break
  c8] c[ c] c[ c] c[ c] c
}

```

Modificare la distanza delle travature angolari

Le travature angolari vengono inserite automaticamente quando viene rilevata un'ampia distanza tra le teste di nota. Questo comportamento può essere regolato attraverso la proprietà `auto-knee-gap`. Viene disegnata una travatura angolare se la distanza è più grande del valore di `auto-knee-gap` più la larghezza della travatura (che dipende dalla durata delle note e dall'inclinazione della travatura). Il valore predefinito di `auto-knee-gap` è 5.5 spazi rigo.

```
{

```

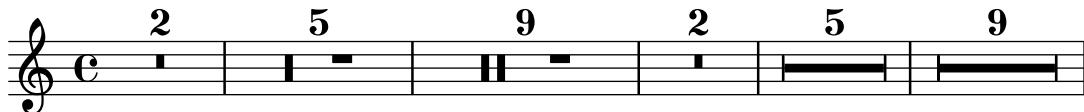

```
f8 f''8 f8 f''8
\override Beam.auto-knee-gap = #6
f8 f''8 f8 f''8
}
```

Modificare la forma delle pause multiple

Se la pausa multipla dura dieci misure o un numero inferiore a dieci, nel rigo apparirà una serie di pause di longa e di breve (chiamate in tedesco “Kirchenpausen” - pause ecclesiastiche); altrimenti apparirà una semplice linea. Il numero predefinito di dieci può essere cambiato sovrascrivendo la proprietà `expand-limit`.

```
\relative c' {
  \compressMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = #3
    R1*2 | R1*5 | R1*9
  }
}
```

Modifica del numero di punti di aumentazione per nota

Il numero di punti di aumentazione su una singola nota può essere modificato in modo indipendente dai punti posizionati dopo la nota.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = #4
  c4.. a16 r2 |
  \override Dots.dot-count = #0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}
```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
```

```
\new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
}
\layout { }
\midi { }
}
```

Modifica del numero del gruppo irregolare

Di norma compare sulla parentesi del gruppo irregolare solo il numeratore del numero del gruppo irregolare, ovvero il numeratore dell'argomento del comando `\tuplet`. Ma è possibile mostrare la frazione *num:den* del numero del gruppo irregolare oppure nascondere del tutto il numero.

```
\relative c'' {
    \tuplet 3/2 { c8 c c }
    \tuplet 3/2 { c8 c c }
    \override TupletNumber.text = #tuplet-number::calc-fraction-text
    \tuplet 3/2 { c8 c c }
    \omit TupletNumber
    \tuplet 3/2 { c8 c c }
}
```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

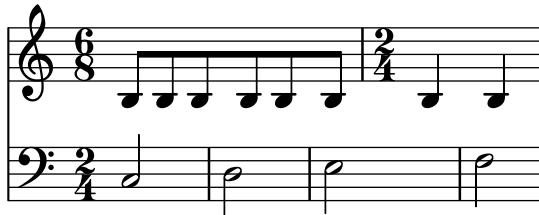

```
\layout {
    \context {
        \Score
        \remove "Timing_translator"
        \remove "Default_bar_line_engraver"
    }
    \context {
        \Staff
```

```

\consists "Timing_translator"
\consists "Default_bar_line_engraver"
}
}

<<
\new Staff {
  \scaleDurations 8/5 {
    \time 6/8
    \set Timing.measureLength = #(ly:make-moment 6/5)
    b8 b b b b b
    \time 2/4
    \set Timing.measureLength = #(ly:make-moment 4/5)
    b4 b
  }
}
\new Staff {
  \clef bass
  \time 2/4
  c2 d e f
}
>>

```

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```

stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff

\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn

    \stemOn a'2 \bar "||"
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \bar "||"
    \stemOff a'\breve^\markup { \italic flexe }
    \stemOn g'2 \bar "||"
  }
}

```

Compound time signatures

Odd 20th century time signatures (such as "5/8") can often be played as compound time signatures (e.g. "3/8 + 2/8"), which combine two or more unequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the compound time signatures and adapting the automatic beaming behavior.

```
\relative c' {
  \compoundMeter #'((2 8) (3 8))
  c8 d e fis gis
  c8 fis, gis e d
  c8 d e4 gis8
}
```

Segni per la conduzione, segni di raggruppamento della misura

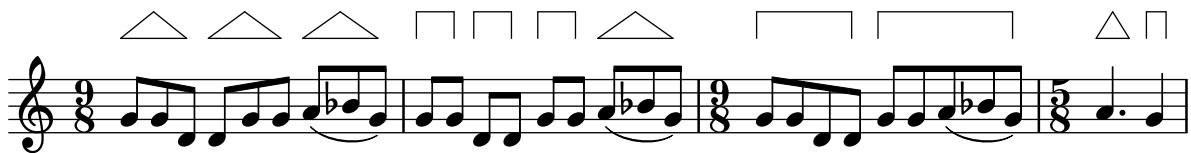

Il raggruppamento delle pulsazioni all'interno della misura è regolato dalla proprietà di contesto `beatStructure`. I valori di `beatStructure` per varie indicazioni di tempo vengono stabiliti in `scm/time-signature-settings.scm`. Questi valori possono essere impostati o modificati con `\set`. Altrimenti, si può usare `\time` per impostare sia l'indicazione di tempo che la struttura delle pulsazioni. Per farlo si specifica il raggruppamento interno delle pulsazioni in una misura in una lista di numeri (nella sintassi di Scheme) prima dell'indicazione di tempo.

`\time` agisce nel contesto `Timing`, dunque non reimposterà i valori di `beatStructure` e `baseMoment` che sono impostati in altri contesti di più basso livello, come `Voice`.

Se si include l'incisore `Measure_grouping_engraver` in uno dei contesti che regolano l'aspetto, appariranno i segni di raggruppamento della misura. Tali segni facilitano la lettura di musica moderna ritmicamente complessa. Nell'esempio la misura di 9/8 è raggruppata in due diversi schemi usando due metodi differenti, mentre la misura di 5/8 è raggruppata in base alle impostazioni predefinite in `scm/time-signature-settings.scm`:

```
\score {
  \new Voice \relative c'' {
    \time 9/8
    g8 g d d g g a( bes g) |
    \set Timing.beatStructure = 2,2,2,3
    g8 g d d g g a( bes g) |
    \time 4,5 9/8
    g8 g d d g g a( bes g) |
    \time 5/8
    a4. g4 |
  }
  \layout {
    \context {
      \Staff
      \consists "Measure_grouping_engraver"
    }
  }
}
```

```
}
```

Consistently left aligned bar numbers

When left aligning bar numbers, overlapping problems may occur with Staves brackets.

The snippet solves this by keeping right aligned the first bar number following line breaks.

```
consistentlyLeftAlignedBarNumbers = {
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \override Score.BarNumber.self-alignment-X =
        #(lambda (grob)
            (let ((break-dir (ly:item-break-dir grob)))
                (if (= break-dir RIGHT) RIGHT LEFT)))
}

\new ChoirStaff <<
    \new Staff {
        \relative c' {
            \set Score.barNumberVisibility = #(every-nth-bar-number-visible 3)
            \bar ""
            \consistentlyLeftAlignedBarNumbers

            \set Score.currentBarNumber = #112
            \repeat unfold 8 { R1 }
            \break
            \repeat unfold 9 { R1 }
            \break
            \repeat unfold 7 { R1 }
        }
    }
    \new Staff {
        \relative c' {
            \repeat unfold 24 { R1 }
        }
    }
>>

\layout {
    indent = #0
    ragged-right = ##t
    ragged-last = ##t
}
```

The image shows three staves of musical notation. The top staff has two measures of a 3/2 tuplet (three eighth notes) followed by a measure of a 5/8 tuplet (five eighth notes). Measure numbers 114 and 117 are above the staff. The middle staff has two measures of a 3/2 tuplet (three eighth notes) followed by a measure of a 7/8 tuplet (seven eighth notes). Measure numbers 120 and 123 are above the staff. The bottom staff has two measures of a 3/2 tuplet (three eighth notes) followed by a measure of a 5/8 tuplet (five eighth notes). Measure numbers 126 and 132 are above the staff. The staff numbers 129 and 135 are also present.

Controllare la visibilità della parentesi del gruppo irregolare

Il comportamento predefinito relativo alla visibilità della parentesi quadra del gruppo irregolare è di mostrare una parentesi a meno che non ci sia una travatura della stessa lunghezza del gruppo.

Per controllare la visibilità di tale parentesi, si imposta la proprietà 'bracket-visibility' su `#t` (mostra sempre la parentesi), `'if-no-beam'` (mostra la parentesi solo se non c'è una travatura, che è il comportamento predefinito) o `#f` (non mostrare mai la parentesi). L'ultima opzione equivale a omettere l'oggetto `@code{TupletBracket}` dall'output.

```
music = \relative c' {
    \tuplet 3/2 { c16[ d e } f8]
    \tuplet 3/2 { c8 d e }
    \tuplet 3/2 { c4 d e }
}

\new Voice {
    \relative c' {
        << \music s4"default" >>
        \override TupletBracket.bracket-visibility = #'if-no-beam
        << \music s4"'if-no-beam" >>
        \override TupletBracket.bracket-visibility = ##t
        << \music s4"#t" >>
        \override TupletBracket.bracket-visibility = ##f
        << \music s4"#f" >>
        \omit TupletBracket
        << \music s4"omit" >>
    }
}
```

Creare indicazioni metronomiche in modalità testuale

Si possono creare nuove indicazioni metronomiche in modalità testuale, ma non modificheranno il tempo del file MIDI.

```
\relative c' {
  \tempo \markup {
    \concat {
      (
      \smaller \general-align #Y #DOWN \note {16.} #1
      " = "
      \smaller \general-align #Y #DOWN \note {8} #1
    )
  }
  c1
  c4 c' c,2
}
```

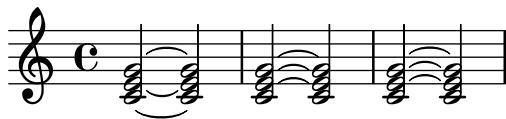

Disegnare manualmente le legature di valore

Le legature di valore possono essere disegnate a mano cambiando la proprietà `tie-configuration` dell'oggetto `TieColumn`. Il primo numero indica la distanza dal centro del rigo nell'unità di metà spazio rigo, mentre il secondo numero indica la direzione (1 = su, -1 = giù).

Si noti che LilyPond fa una distinzione tra valori precisi e imprecisi per il primo numero. Se si usa un valore preciso (ovvero un intero o una frazione come $(/ 4 5)$), il valore serve come posizione verticale approssimata che viene ulteriormente aggiustata da LilyPond per far sì che la legatura di valore eviti le linee del rigo. Se si usa un valore impreciso, come una virgola mobile, viene usato per la posizione verticale senza ulteriori regolazioni.

```
\relative c' {
  <c e g>2~ <c e g>
  \override TieColumn.tie-configuration =
  #'((0.0 . 1) (-2.0 . 1) (-4.0 . 1))
  <c e g>2~ <c e g>
  \override TieColumn.tie-configuration =
  #'((0 . 1) (-2 . 1) (-4 . 1)))
  <c e g>2~ <c e g>
}
```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the '`gap-count`' property of the `Beam` object, and the size of the gaps between beams and stems is set with the '`gap`' property.

```
\relative c' {
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #1
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #2
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #3
    \repeat tremolo 8 { a32 f }

    \override Beam.gap-count = #3
    \override Beam.gap = #1.33
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #1
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #0.67
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #0.33
    \repeat tremolo 8 { a32 f }
}
```

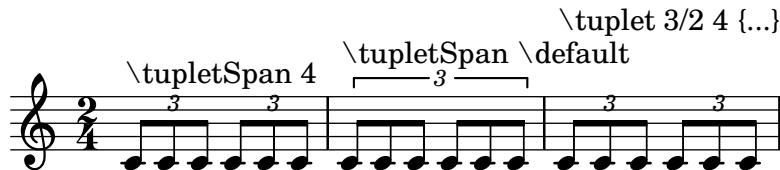

Inserire vari gruppi irregolari usando una sola volta il comando `\tuplet`

La proprietà `tupletSpannerDuration` imposta la durata di ognuno dei gruppi irregolari compresi tra parentesi dopo il comando `\tuplet`. In questo modo si possono inserire molti gruppi irregolari consecutivi all'interno di una singola espressione `\tuplet`, risparmiando così tempo e spazio.

Ci sono vari modi per impostare `tupletSpannerDuration`. Il comando `\tupletSpan` la imposta su una certa durata e poi la annulla quando invece di una durata viene specificato `\default`. Altrimenti si può usare un argomento opzionale con `\tuplet`.

```
\relative c' {
    \time 2/4
    \tupletSpan 4
    \tuplet 3/2 { c8^"\tupletSpan 4" c c c c c }
    \tupletSpan \default
    \tuplet 3/2 { c8^"\tupletSpan \default" c c c c c }
    \tuplet 3/2 4 { c8^"\tuplet 3/2 4 {...}" c c c c c }
}
```

Code e punte delle travature

È possibile ottenere delle codette su note isolate e dei tratti di suddivisione all'estremità della travatura con una combinazione di `stemLeftBeamCount`, `stemRightBeamCount` e una coppia di indicatori della travatura `[]`.

Per ottenere delle codette rivolte a destra, si usa la coppia di indicatori `[]` e si imposta `stemLeftBeamCount` a zero (vedi Example 1).

Per ottenere delle codette rivolte a sinistra, si imposta invece `stemRightBeamCount` (Example 2).

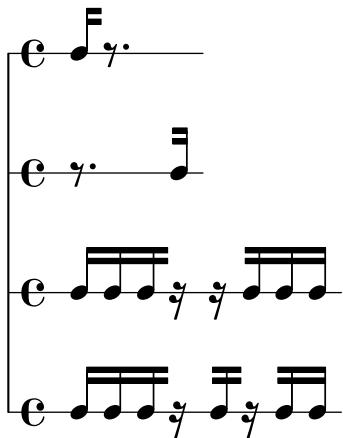

Perché i tratti di suddivisione alla fine di un gruppo di note unite da travatura siano rivolti a destra, si imposta `stemRightBeamCount` su un valore positivo. Perché i tratti di suddivisione all'inizio di un gruppo di note unite da travatura siano rivolti a sinistra, si imposta invece `stemLeftBeamCount` (Example 3).

Talvolta, ad esempio per una nota isolata circondata da pause, ha senso avere una coda che punti sia a destra che a sinistra. Lo si può fare con una coppia di indicatori di travatura `[]` da soli (Example 4).

(Nota che `\set stemLeftBeamCount` è sempre equivalente a `\once \set`. In altre parole, le impostazioni che definiscono il conteggio delle travature non “permangono”, quindi la coppia di code attaccate al `16 []` solitario nell'ultimo esempio non hanno nulla a che fare con l'impostazione `\set` di due note prima.)

```
\score {
  <<
  % Example 1
  \new RhythmicStaff {
    \set stemLeftBeamCount = #0
    c16[]
    r8.
  }
  % Example 2
  \new RhythmicStaff {
    r8.
    \set stemRightBeamCount = #0
    16[]
  }
  % Example 3
  \new RhythmicStaff {
    16 16
    \set stemRightBeamCount = #2
    16 r r
    \set stemLeftBeamCount = #2
    16 16 16
  }
  % Example 4
  \new RhythmicStaff {
    16 16
    \set stemRightBeamCount = #2
    16 r16
    16[]
  }
}
```

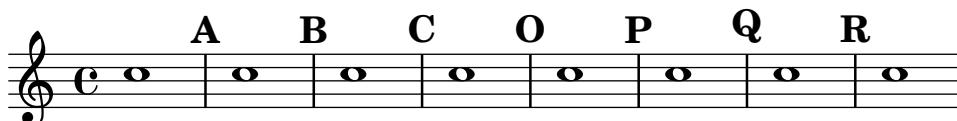

```
r16
\set stemLeftBeamCount = #2
16 16
}
>>
}
```

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```
\relative c' {
  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1 \mark #14
  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1 }
```

Generating custom flags

The `stencil` property of the `Flag` grob can be set to a custom scheme function to generate the glyph for the flag.

```
 #(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (log (- (ly:grob-property stem-grob 'duration-log) 2)))
         (is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
         (yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8)))))
         (flag-stencil (make-filled-box-stencil '(-0.4 . 0.4) yext))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stroke-stencil (if (equal? stroke-style "grace")
```

```

          (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
          empty-stencil)))
(ly:stencil-add flag-stencil stroke-stencil))

% Create a flag stencil by looking up the glyph from the font
#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
         (flag (retrieve-glyph-flag "" dir "" grob))
         (line-thickness (ly:staff-symbol-line-thickness grob))
         (stem-thickness (ly:grob-property stem-grob 'thickness))
         (stem-width (* line-thickness stem-thickness))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stencil (if (null? stroke-style)
                      flag
                      (add-stroke-glyph flag stem-grob dir stroke-style "")))
         (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0)))
         (ly:stencil-translate rotated-flag (cons (- (/ stem-width 2)) 0))))
  (ly:stencil-add rotated-flag))

    f2. r4
    g2. a4
    e4 c2.
  }
}
\new Lyrics {
  \lyricsto "melody" {
    This is my song.
    I like to sing.
  }
}
>>
```

The diagram illustrates four chords: C, F, G, and C. Each chord is shown with its finger placement on a guitar neck and its corresponding musical notation on two staves. The first staff uses eighth-note patterns, while the second staff uses quarter-note patterns. The lyrics "This is my song. I like to sing." are written below the notation.

Heavily customized polymetric time signatures

Though the polymetric time signature shown was not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song!).

```
melody = \relative c' {
    \key g \major
    \compoundMeter #'((3 8) (2 8) (2 8) (3 8) (2 8) (2 8)
                      (2 8) (2 8) (3 8) (2 8) (2 8))
    c8 c c d4 c8 c b c b a4 g fis8 e d c b' c d e4-^ fis8 g \break
    c,4. d4 c4 d4. c4 d c2 d4. e4-^ d4
    c4. d4 c4 d4. c4 d c2 d4. e4-^ d4 \break
    c4. d4 c4 d4. c4 d c2 d4. e4-^ d4
    c4. d4 c4 d4. c4 d c2 d4. e4-^ d4 \break
}

drum = \new DrumStaff \drummode {
    \bar ".|:" bd4.^ \markup { Drums } sn4 bd \bar ";" sn4.
    bd4 sn \bar ";" bd sn bd4. sn4 bd \bar ":|. "
}

\new Staff \with {
    instrumentName = \markup { \concat { "B" \flat " Sop." } }
}

{
    \melody
    \drum
}
```

The musical score for B-flat Soprano (Sop.) consists of three staves. The first staff begins with a 3/8 time signature, followed by a 2/8 time signature. The second staff begins with a 2/8 time signature. The third staff begins with a 4/8 time signature. All staves feature eighth-note patterns.

Making an object invisible with the 'transparent' property

Setting the `transparent` property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
  >>
}
```

Legature di portamento con complesse strutture di tratteggio

Le legature di portamento possono avere schemi di tratteggio complessi definendo la proprietà `dash-definition`. `dash-definition` è una lista di `dash-elements`. Un `dash-element` è una lista di parametri che definiscono il comportamento del tratteggio per un segmento della legatura.

La legatura di portamento è definita come il parametro `t` della curva di bezier che va da 0 sul margine sinistro della legatura fino a 1 su quello destro. `dash-element` è una lista di (`inizio-t fine-t frazione-trattino punto-trattino`). La regione della legatura di portamento che va da `inizio-t` a `fine-t` avrà una frazione `frazione-trattino` di ogni `punto-trattino` nero. `punto-trattino` viene definito in spazi rigo. `frazione-trattino` è impostato su 1 per una legatura di portamento continua.

```
\relative c' {
  \once \override
    Slur.dash-definition = #'((0 0.3 0.1 0.75)
                               (0.3 0.6 1 1)
                               (0.65 1.0 0.4 0.75))
```

```
c4( d e f)
\once \override
  Slur.dash-definition = #'((0 0.25 1 1)
                           (0.3 0.7 0.4 0.75)
                           (0.75 1.0 1 1))
c4( d e f)
}
```

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the `positions` setting of the `Beam` grob.

```
\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}
```

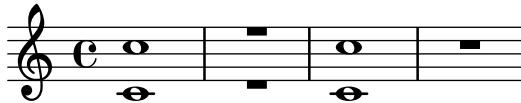

Merging multi-measure rests in a polyphonic part

When using multi-measure rests in a polyphonic staff, the rests will be placed differently depending on the voice they belong to. However they can be printed on the same staff line, using the following setting.

```
normalPos = \revert MultiMeasureRest.direction

{
  <<
  {
    c''1
    R1
    c''1
    \normalPos
    R1
  }
  \\
  {
    c'1
    R1
    c'1
  }
```

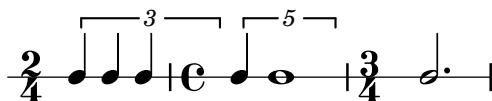

```
\normalPos
R1
}
>>
}
```

Modifying tuplet bracket length

Tuplet brackets can be made to run to prefatory matter or the next note. Default tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

```
\new RhythmicStaff {
    % Set tuplets to be extendable...
    \set tupletFullLength = ##t
    % ...to cover all items up to the next note
    \set tupletFullLengthNote = ##t
    \time 2/4
    \tuplet 3/2 { c4 4 4 }
    % ...or to cover just whitespace
    \set tupletFullLengthNote = ##f
    \time 4/4
    \tuplet 5/4 { 4 1 }
    \time 3/4
    2.
}
```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un'altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà `prefer-dotted-right` di `NoteCollision`.

```
\new Staff \relative c' <<
{
    f2. f4
    \override Staff.NoteCollision.prefer-dotted-right = ##f
    f2. f4
    \override Staff.NoteCollision.prefer-dotted-right = ##t
    f2. f4
}
\\
```

```
{ e4 e e e e e e e e }
```

>>

Regolazione della lunghezza delle pause multiple

Le pause multiple hanno una lunghezza che dipende dalla loro durata totale e tale lunghezza è regolata da `MultiMeasureRest.space-increment`. Nota che il valore predefinito è 2.0.

```
\relative c' {
    \compressEmptyMeasures
    R1*2 R1*4 R1*64 R1*16
    \override Staff.MultiMeasureRest.space-increment = 2.5
    R1*2 R1*4 R1*64 R1*16
}
```

Testo a margine delle pause multiple

Il testo a margine di una pausa multipla viene centrato sopra o sotto di essa. Se il testo è lungo, la misura non si espanderà. Per espandere la pausa multipla in modo che si allinei col testo, conviene usare un accordo vuoto con del testo attaccato prima della pausa multipla.

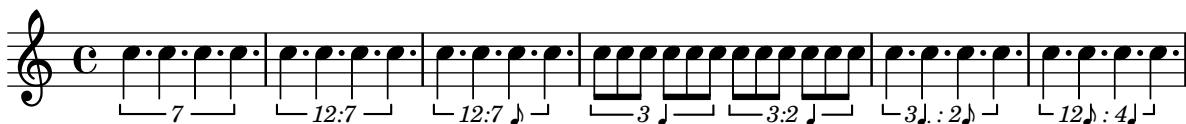

Il testo così attaccato a una nota spaziatrice viene allineato a sinistra della posizione in cui la nota sarebbe posta nella misura, ma se la lunghezza della misura è determinata dalla lunghezza del testo, il testo verrà centrato.

```
\relative c' {
    \compressMMRests {
        \textLengthOn
        <>^\markup { [MAJOR GENERAL] }
        R1*19
        <>_^\markup { \italic { Cue: ... it is yours } }
        <>^\markup { A }
        R1*30^\markup { [MABEL] }
        \textLengthOff
        c4^\markup { CHORUS } d f c
    }
}
```

Numeri non predefiniti per i gruppi irregolari

LilyPond fornisce anche funzioni di formattazione che permettono di creare numeri di gruppi irregolari diversi dalla frazione vera e propria, così come di aggiungere un valore di nota al numero o alla frazione di un gruppo irregolare.

```
\relative c' {
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-denominator-text 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-fraction-text 12 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      (tuplet-number::non-default-tuplet-fraction-text 12 7)
      (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-denominator-text
      (ly:make-duration 2 0))
  \tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-fraction-text
      (ly:make-duration 2 0))
  \tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    #(tuplet-number::fraction-with-notes
      (ly:make-duration 2 1) (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-fraction-with-notes 12
      (ly:make-duration 3 0) 4 (ly:make-duration 2 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
}
```

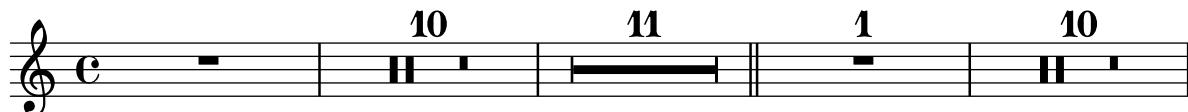

Numbering single measure rests

Multi measure rests show their length by a number except for single measures. This can be changed by setting `restNumberThreshold`.

```
{
  \compressEmptyMeasures
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 0
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 10
  R1 R1*10 R1*11
```

}

PartCombine e autoBeamOff

La funzione `\autoBeamOff`, se usata insieme a `\partCombine`, può essere difficile da comprendere.

È preferibile usare invece

```
\set Staff.autoBeaming = ##f
```

per assicurarsi che la disposizione delle travature sia disabilitata per tutto il rigo.

`\partCombine` funziona con 3 voci – gambo in su singolo, gambo in giù singolo, gambo in su unito.

L'uso di `\autoBeamOff` all'interno del primo argomento di `partCombine` ha effetto sulla voce che è attiva al momento in cui la funzione viene elaborata, ovvero sul gambo in su singolo o sul gambo in giù unito. L'uso di `\autoBeamOff` nel secondo argomento avrà effetto sulla voce che ha il gambo in giù singolo.

Per poter usare `\autoBeamOff` per impedire tutte le disposizioni automatiche delle travature, se usato con `\partCombine`, è necessario richiamare tre volte la funzione `\autoBeamOff`.

```
{
  %\set Staff.autoBeaming = ##f % turns off all autobeaming
  \partCombine
  {
    \autoBeamOff % applies to split up stems
    \repeat unfold 4 a'16
    %\autoBeamOff % applies to combined up stems
    \repeat unfold 4 a'8
    \repeat unfold 4 a'16
  }
  {
    \autoBeamOff % applies to down stems
    \repeat unfold 4 f'8
    \repeat unfold 8 f'16 |
  }
}
```

Percussion example

A short example taken from Stravinsky's L'histoire du Soldat.

```
#(define mydrums '((bassdrum    default #t  4)
                  (snare      default #t -4)
                  (tambourine default #t  0)))

Consentire l'interruzione del rigo all'interno di gruppi irregolari con travature

Questo esempio artificioso mostra come permettere interruzioni del rigo sia manuali che automatiche all'interno di un gruppo irregolare con travature. Si noti che le travature di questi gruppi irregolari fuori dal ritmo devono essere disposte manualmente.

```
\layout {
  \context {
    \Voice
    % Permit line breaks within tuplets
    \remove "Forbid_line_break_engraver"
    % Allow beams to be broken at line breaks
    \override Beam.breakable = ##t
  }
}
\relative c' {
  a8
  \repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
  % Insert a manual line break within a tuplet
  \tuplet 3/2 { c[ b \bar "" \break a] }
  \repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
  c8
}
```

Positioning grace note beams at the height of normal note beams

When notes are placed on ledger lines, their beams are usually centred on the stave. Grace notes beams are shorter and grace notes on ledger lines may well have beams outside the stave. You can override this beaming for grace notes.

```
\relative c {
    f8[ e]
    \grace {
        f8[ e]
        \override Stem.no-stem-extend = ##f
        f8[ e]
        \revert Stem.no-stem-extend
    }
    f8[ e]
}
```

Posizionare gli abbellimenti con dello spazio fluttuante

Se si imposta la proprietà 'strict-grace-spacing', le colonne musicali degli abbellimenti 'fluttuano', ovvero si scollegano dalle note normali: prima vengono spaziate le note normali, poi le colonne musicali degli abbellimenti vengono messe a sinistra delle colonne delle note principali.

```
\relative c' {
    <<
    \override Score.SpacingSpanner.strict-grace-spacing = ##t
    \new Staff \new Voice {
        \afterGrace c4 { c16[ c8 c16] }
        c8[ \grace { b16 d } c8]
        c4 r
    }
    \new Staff {
        c16 c c c c c c c4 r
    }
    >>
}
```

The image displays two staves. The top staff shows a single eighth note followed by a grace note on a ledger line above the fourth line, with a beam extending to the right. The bottom staff shows a series of eighth notes connected by a single horizontal beam, demonstrating how grace notes are positioned relative to the main note column.

Posizionamento delle pause multiple

Diversamente dalle pause normali, non esiste un comando predefinito per cambiare la posizione sul rigo di un simbolo di pausa multipla di qualsiasi tipo connettendolo a una nota. Tuttavia,

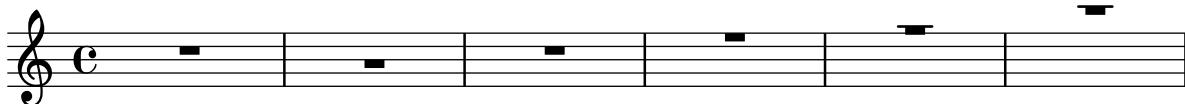

nella musica polifonica le pause multiple nelle voci dispari e pari sono separate verticalmente. Il posizionamento delle pause multiple si controlla nel modo seguente:

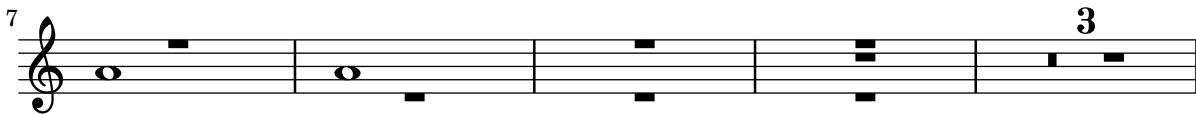

```
\relative c' {
    % Multi-measure rests by default are set under the fourth line
    R1
    % They can be moved using an override
    \override MultiMeasureRest.staff-position = #-2
    R1
    \override MultiMeasureRest.staff-position = #0
    R1
    \override MultiMeasureRest.staff-position = #2
    R1
    \override MultiMeasureRest.staff-position = #3
    R1
    \override MultiMeasureRest.staff-position = #6
    R1
    \revert MultiMeasureRest.staff-position
    \break

    % In two Voices, odd-numbered voices are under the top line
    << { R1 } \\ { a1 } >>
    % Even-numbered voices are under the bottom line
    << { a1 } \\ { R1 } >>
    % Multi-measure rests in both voices remain separate
    << { R1 } \\ { R1 } >>

    % Separating multi-measure rests in more than two voices
    % requires an override
    << { R1 } \\ { R1 } \\
        \once \override MultiMeasureRest.staff-position = #0
        { R1 }
    >>

    % Using compressed bars in multiple voices requires another override
    % in all voices to avoid multiple instances being printed
    \compressMMLRests
    <<
        \revert MultiMeasureRest.direction
        { R1*3 }
        \\
        \revert MultiMeasureRest.direction
        { R1*3 }
    >>
}
```

Preventing final mark from removing final tuplet

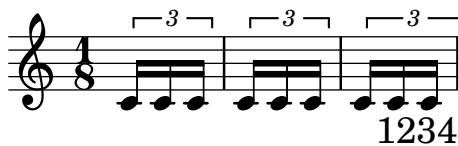

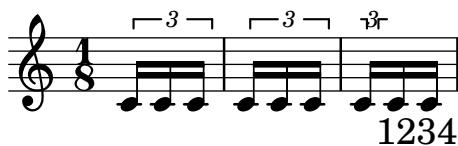

The addition of a final `mark` can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket.full-length-to-extent` to `false`.

```
% due to issue 2362 a long mark such as
%   \mark "Composed Feb 2007 - Feb 2008"
% cannot be used here.
```

```
\new Staff {
    \set tupletFullLength = ##t
    \time 1/8
    \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
    \override Score.RehearsalMark.break-visibility = ##(##t ##t ##t)
    \override Score.RehearsalMark.direction = #DOWN
    \override Score.RehearsalMark.self-alignment-X = #RIGHT
    \mark "1234"
}

\new Staff {
    \set tupletFullLength = ##t
    \override TupletBracket.full-length-to-extent = ##f

    \time 1/8
    \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
    \override Score.RehearsalMark.break-visibility = ##(##t ##t ##t)
    \override Score.RehearsalMark.direction = #DOWN
    \override Score.RehearsalMark.self-alignment-X = #RIGHT
    \mark "1234"
}
```

Mostrare i numeri di battuta a intervalli regolari

I numeri di battuta possono essere resi visibili a intervalli regolari attraverso la proprietà `barNumberVisibility`. In questo esempio vengono mostrati ogni due misure eccetto alla fine della linea.

```
\relative c' {
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \set Score.currentBarNumber = #11
    % Permit first bar number to be printed
    \bar ""
```

```
% Print a bar number every second measure
\set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
c1 | c | c | c | c
\break
c1 | c | c | c | c
}
```

Numeri di battuta racchiusi in rettangoli o cerchi

I numeri di battuta possono apparire anche all'interno di rettangoli o cerchi.

```
\relative c' {
    % Prevent bar numbers at the end of a line and permit them elsewhere
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

    % Increase the size of the bar number by 2
    \override Score.BarNumber.font-size = #2

    % Draw a box round the following bar number(s)
    \override Score.BarNumber.stencil
        = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \repeat unfold 5 { c1 }

    % Draw a circle round the following bar number(s)
    \override Score.BarNumber.stencil
        = #(make-stencil-circlear 0.1 0.25 ly:text-interface::print)
    \repeat unfold 4 { c1 } \bar "|."
}
```

Stampare i numeri di battuta a intervalli regolari variabili

L'intervallo dei numeri di battuta può essere modificato cambiando la funzione di contesto `{set-bar-number-visibility}`.

```
\relative c' {
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \context Score \applyContext #(set-bar-number-visibility 4)
    \repeat unfold 10 c'1
    \context Score \applyContext #(set-bar-number-visibility 2)
    \repeat unfold 10 c
```

}

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```
\layout {
    indent = 0
    ragged-right = ##f
}

{
    % Metronome marks below the staff
    \override Score.MetronomeMark.direction = #DOWN
    \tempo 8. = 120
    c'''1

    % Rehearsal marks below the staff
    \override Score.RehearsalMark.direction = #DOWN
    \mark \default
    c'''1
}
```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the `Score` level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
\paper {
    indent = #0
    ragged-right = ##t
}
```

```

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Default_bar_line_engraver"
    \remove "Bar_number_engraver"
    \override SpacingSpanner.uniform-stretching = ##t
    \override SpacingSpanner.strict-note-spacing = ##t
    proportionalNotationDuration = #(ly:make-moment 1/64)
  }

```

Musical score for Bassclarinet and Percussion. The top staff shows a melodic line with various note heads and rests, including a bass clef, a 3/8 time signature, and a 2 overline indicating a grace note. The bottom staff shows rhythmic patterns for the percussion, with a bass clef, a 3/4 time signature, and a 2 overline.

(4) 3 — 3 — | 3/8 | 4 — 6 | 3/4 | 3/8 | 3/4 |

Musical score continuation. The top staff starts with a 3 overline followed by a 3/8 time signature, then a 4 overline followed by a 6 overline. The bottom staff continues with rhythmic patterns for the percussion.

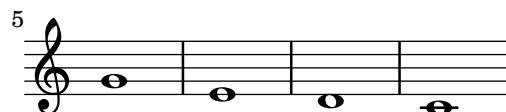

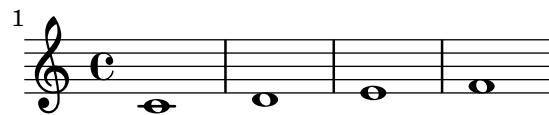

Mostrare il numero di battuta nella prima misura

Il primo numero di battuta di una partitura viene soppresso se è inferiore o uguale a ‘1’. Se si imposta `barNumberVisibility` su `all-bar-numbers-visible`, verrà mostrato il numero di battuta della prima misura e di tutte quelle successive. Si noti che perché funzioni è necessario inserire una stanghetta invisibile prima della prima nota.

```
\layout {
    indent = 0
    ragged-right = ##t
}

\relative c' {
    \set Score.barNumberVisibility = #all-bar-numbers-visible
    \bar ""
    c1 | d | e | f \break
    g1 | e | d | c
}
```

Ridefinire le impostazioni predefinite globali degli abbellimenti

Le impostazioni globali predefinite degli abbellimenti sono salvate negli identificatori `startGraceMusic`, `stopGraceMusic`, `startAcciaccaturaMusic`, `stopAcciaccaturaMusic`, `startAppoggiaturaMusic` e `stopAppoggiaturaMusic`, che sono definiti nel file `ly/grace-init.ly`. Ridefinendoli si possono ottenere effetti diversi.

```
startAcciaccaturaMusic = {
    <>(
    \override Flag.stroke-style = #"grace"
    \slurDashed
}

stopAcciaccaturaMusic = {
    \revert Flag.stroke-style
    \slurSolid
    <>
}
```

```
\relative c' {
    \acciaccatura d8 c1
}
```

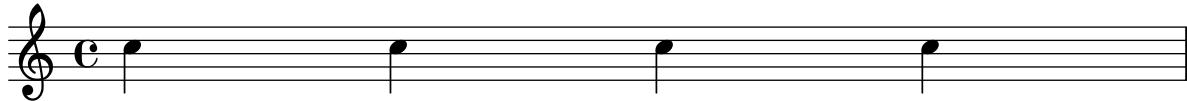

Togliere i numeri di battuta da uno spartito

I numeri di battuta possono essere tolti rimuovendo l'incisore `Bar_number_engraver` dal contesto `Score`.

```
\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    \%remove "Bar_number_engraver"
  }
}

\relative c' {
  c4 c c c \break
  c4 c c c
}
```

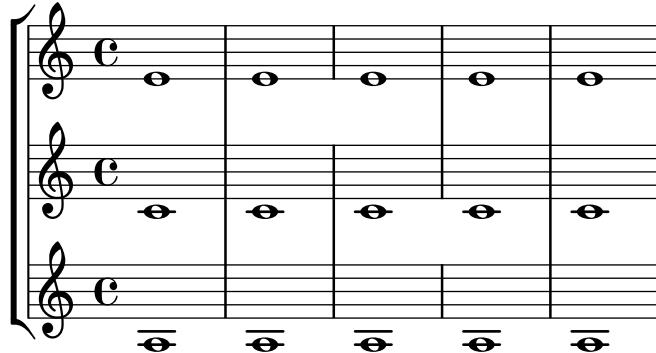

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves, i.e. a SpanBar is printed. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
}
```

```
\new Staff {
    a1 | a | a | a | a
}
>>
}
```

Stili di pausa

Esistono vari stili di pausa.

```
\new Staff \relative c {
    \omit Score.TimeSignature
    \cadenzaOn

    \override Staff.Rest.style = #'mensural
    r\maxima^\markup \typewriter { mensural }
    r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'neomensural

    \bar ""
    \break

    \override Staff.Rest.style = #'default
    r\maxima^\markup \typewriter { default }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}

}
```

Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

A musical staff in treble clef and common time (indicated by '12' over '8'). The staff consists of two measures separated by a vertical bar line. Each measure contains eight eighth notes, all of which are grouped together by a bracket underneath them.

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

The standard support for this using \repeat percent is unsuitable here since the first beat has to be an ordinary note or rest.

This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the **r4** in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash  
rs = {
```

```
\once \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
\once \override Rest.thickness = #0.48
\once \override Rest.slope = #1.7
r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?))
#{{
  \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
  \override Rest.thickness = #0.48
  \override Rest.slope = #1.7
  \repeat unfold $count { r4 }
  \revert Rest.stencil
}}
)

\score {
  \relative c' {
    c4 d e f |
    \rs \rs \rs \rs |
    \comp #4 |
  }
}
```

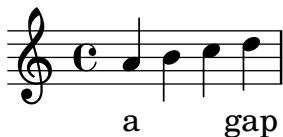

Skips in lyric mode (2)

Although `s` skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (") or underscores (_) are available.

So for example:

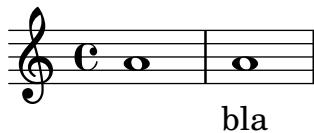

```
<<
  \relative c'' { a4 b c d }
  \new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Skips in lyric mode

The `s` syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
  \relative c'' { a1 | a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

Stemlets

In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop 'stemlets' to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the 'stemlet-length' property of `Staff`, while rests are hidden by setting '`transparent = ##t`'.

Some `\markup` elements are included in the source to highlight the different notations.

```
\paper { ragged-right = ##f }
```

```
{
  c'16^\markup { traditional } d' r f'
  g'16[^\markup { beams over rests } f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[^\markup { stemlets over rests } d' r f']
  g'16[^\markup { stemlets and no rests } f'
    \once \hide Rest
    r16 d'
}
```

Travatura che segue strettamente il battito

Si possono impostare i tratti di suddivisione della travatura in modo che siano rivolti verso la relativa pulsazione. La prima travatura fa sì che non spuntino i tratti di suddivisione (comportamento predefinito); la seconda travatura è orientata verso la pulsazione.

```
\relative c'' {
  \time 6/8
  a8. a16 a a
  \set strictBeatBeaming = ##t
  a8. a16 a a
}
```

Suddividere le travature

Le travature di note consecutive di un sedicesimo (o più brevi) non vengono suddivise, ovvero i tre (o più) tratti della travatura si estendono, senza spezzarsi, sugli interi gruppi di note.

Questo comportamento può essere modificato in modo da suddividere le travature in sottogruppi attraverso la proprietà `subdivideBeams`. Se impostata, le travature che comprendono più sottogruppi verranno suddivise a intervalli definiti dal valore attuale di `baseMoment`, riducendo le travature multiple al numero di travature che indica il valore metrico della suddivisione. Se il gruppo successivo alla suddivisione è più breve del valore metrico corrente (di solito perché la travatura è incompleta), il numero di travature riflette il gruppo di suddivisione più lungo possibile. Tuttavia, se rimane una sola nota dopo la divisione, questa restrizione non viene applicata. Si noti che `baseMoment`, se non impostata esplicitamente, equivale a uno fratto il denominatore dell'attuale indicazione di tempo. Deve quindi essere impostata su una frazione che stabilisca la durata del sottogruppo di travature; lo si può fare usando la funzione `ly:make-moment`, come è mostrato in questo frammento di codice. Inoltre quando `baseMoment` cambia, anche `beatStructure` deve essere modificato per accordarsi con `baseMoment`:

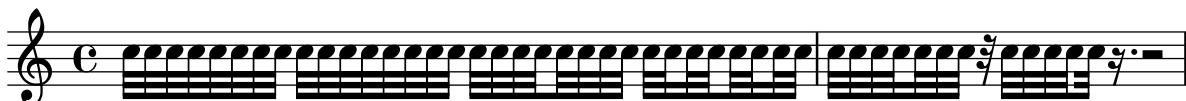

```
\relative c' {
    c32[ c c c c c c c]
    \set subdivideBeams = ##t
    c32[ c c c c c c c]

    % Set beam sub-group length to an eighth note
    \set baseMoment = #(ly:make-moment 1/8)
    \set beatStructure = 2,2,2,2
    c32[ c c c c c c c]

    % Set beam sub-group length to a sixteenth note
    \set baseMoment = #(ly:make-moment 1/16)
    \set beatStructure = 4,4,4,4
    c32[ c c c c c c c]

    % Shorten beam by 1/32
    \set baseMoment = #(ly:make-moment 1/8)
    \set beatStructure = 2,2,2,2
    c32[ c c c c c] r32

    % Shorten beam by 3/32
    \set baseMoment = #(ly:make-moment 1/8)
    \set beatStructure = 2,2,2,2
    c32[ c c c c] r16.
    r2
}
```

Tam-tam example

A tam-tam example, entered with 'tt'

```
#(define mydrums '((tamtam default #t 0)))

\new DrumStaff \with { instrumentName = #"Tamtam" }

\drummode {
    \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
```

```
\override Staff.StaffSymbol.line-positions = #'( 0 )
\override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)

tt 1 \pp \laissezVibrer
}
```

Three-sided box

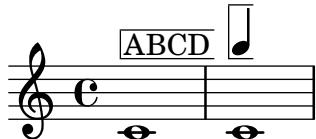

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```
% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil
                   (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?))
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad))

% Test it:

\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note {4} #1.0 }
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c'' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
        (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
    \time 2/4
    a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c'' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
        (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
    \time 2/4
    a4 b8 c
}
```

Indicazione di tempo che mostra solo il numeratore (invece della frazione)

Talvolta un'indicazione di tempo non deve mostrare la frazione intera (ad esempio 7/4), ma solo il numeratore (7 in questo caso). Si può ottenere facilmente con `\override Staff.TimeSignature.style = #'single-digit`, che cambia lo stile in modo permanente. Con `\revert Staff.TimeSignature.style`, questa impostazione può essere annullata. Per applicare lo stile a una sola indicazione di tempo, si usa il comando `\override` preceduto da `\once`.

```
\relative c'' {
    \time 3/4
    c4 c c
    % Change the style permanently
    \override Staff.TimeSignature.style = #'single-digit
    \time 2/4
    c4 c
    \time 3/4
    c4 c c
    % Revert to default style:
    \revert Staff.TimeSignature.style
    \time 2/4
    c4 c
    % single-digit style only for the next time signature
    \once \override Staff.TimeSignature.style = #'single-digit
```

```
\time 5/4
c4 c c c c
\time 2/4
c4 c
}
```

Modificare l'aspetto degli abbellimenti di un intero brano

L'aspetto di tutte le espressioni contenute nei blocchi `\grace` di un brano può essere modificato con le funzioni `add-grace-property` e `remove-grace-property`. L'esempio seguente toglie la definizione della direzione di `Stem` nell'abbellimento, in modo che gli abbellimenti non siano sempre rivolti in su, e barra le teste di nota.

```
\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}
```

User defined time signatures

New time signature styles can be defined. The time signature in the second measure should be upside down in both staves.

```
#{add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction))))}

<<
\new Staff {
  \time 3/4 f'2.
  \override Score.TimeSignature.style = #'topsy-turvy
  \time 3/4 R2. \bar "|."
}
\new Staff {
  R2. e''
}
>>
```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```
testnotes = {
    \autoBeamOff
    c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
    \relative c' {
        \time 2/4
        \testnotes

        \override Flag.stencil = #modern-straight-flag
        \testnotes

        \override Flag.stencil = #old-straight-flag
        \testnotes

        \override Flag.stencil = #flat-flag
        \testnotes

        \revert Flag.stencil
        \testnotes
    }
    \layout {
        indent = 0
        \context {
            \Score
            \override NonMusicalPaperColumn.line-break-permission = ##f
        }
    }
}
```

Usare il gambo barrato degli abbellimenti con le teste normali

Il gambo barrato presente nelle acciaccature può essere applicato in altre situazioni.

```
\relative c'' {
    \override Flag.stroke-style = #"grace"
    c8( d2) e8( f4)
}
```

Usare le legature di valore con un arpeggio

Le legature di valore vengono usate talvolta per scrivere un arpeggio. In questo caso, le due note da legare devono non essere consecutive. Per ottenere tale risultato occorre impostare la proprietà `tieWaitForNote` su `#t`. Questa funzionalità serve anche a legare un tremolo a un accordo e in generale qualsiasi coppia di note consecutive.

```
\relative c' {
    \set tieWaitForNote = ##t
    \grace { c16[ ~ e ~ g] ~ } <c, e g>2
    \repeat tremolo 8 { c32 ~ c' ~ } <c c,>1
    e8 ~ c ~ a ~ f ~ <e' c a f>2
    \tieUp
    c8 ~ a
    \tieDown
    \tieDotted
    g8 ~ c g2
}
```

Expressive marks

Sezione “Expressive marks” in *Guida alla Notazione*

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8} ]
  g16( a \tuplet 3/2 { b d e' } )
  g8[( a \tuplet 3/2 { b d' } e') ~ ]
  \time 2/4
  \tuplet 5/4 { e'32\(\ a b d' e' \) a'4.\)
}
```

Adding parentheses around an expressive mark or chordal note

The `\parenthesize` function is a special tweak that encloses objects in parentheses. The associated grob is `ParenthesesItem`.

```
\relative c' {
  c2-\parenthesize ->
  \override ParenthesesItem.padding = #0.1
  \override ParenthesesItem.font-size = #-4
  <d \parenthesize f a>2
}
```

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.
`glissandoSkipOn = {`

```

\override NoteColumn.glissando-skip = ##t
\hide NoteHead
\override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
    \revert NoteColumn.glissando-skip
    \undo \hide NoteHead
    \revert NoteHead.no-ledgers
}

\relative c' {
    r8 f8\glissando
    \glissandoSkipOn
    f4 g a a8\noBeam
    \glissandoSkipOff
    a8

    r8 f8\glissando
    \glissandoSkipOn
    g4 a8
    \glissandoSkipOff
    a8 |

    r4 f\glissando \
    \glissandoSkipOn
    a4\f \>
    \glissandoSkipOff
    b8!\r |
}

```

The musical score consists of two staves. The top staff shows a treble clef, a common time signature, and a key signature of one sharp. It contains six measures of music, ending with a fermata over the final note. The bottom staff begins with a bass clef and a common time signature, continuing the musical line from the top staff.

Cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto

La proprietà `shortest-duration-space` può essere modificata per cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto.

```
\relative c' {
    \override Score.SpacingSpanner.shortest-duration-space = #4.0
    c2-\bendAfter #5
    c2-\bendAfter #-4.75
    c2-\bendAfter #8.5
    c2-\bendAfter #-6
}
```

A musical staff with a treble clef, a key signature of C major (no sharps or flats), and a common time signature. The first measure contains four eighth notes with stems pointing right, connected by vertical bar lines. The second measure also contains four eighth notes with stems pointing right, connected by vertical bar lines.

Note brevi alternative

Le note brevi sono disponibili anche con due linee verticali su ciascun lato della testa invece di una sola e in stile barocco.

```
\relative c'' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}
```

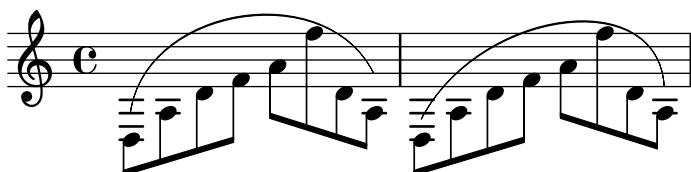

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```
\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}
```

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

```
\new Staff \relative c'' {
  \key es \major
  \time 3/4
  % this bar contains no \breathe
  << { g4 as g } \\ { es4 bes es } >> |
  % Modern notation:
  % by default, \breathe uses the rcomma, just as if saying:
  % \override BreathingSign.text = #(make-musicglyph-markup "scripts.rcomma")
  << { g4 as g } \\ { es4 \breathe bes es } >> |
```

```
% rvarcomma and lvarcomma are variations of the default rcomma and lcomma
% N.B.: must use Staff context here, since we start a Voice below
\override Staff.BreathingSign.text =
  \markup { \musicglyph "scripts.rvarcomma" }
<< { g4 as g } \\ { es4 \breathe bes es } >> |

% vee
\override BreathingSign.text = \markup { \musicglyph "scripts.upbow" }
es8[ d es f g] \breathe f |

% caesura
\override BreathingSign.text =
  \markup { \musicglyph "scripts.caesura.curved" }
es8[ d] \breathe es[ f g f] |
es2 r4 \bar "||"
}
```

Broken Crescendo Hairpin

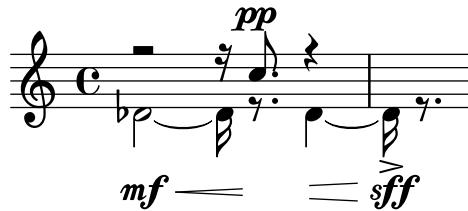

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as postscript code within a text markup.

The markup command `with-dimensions` tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property `staff-padding` prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```
\relative c' {
  <<
  {
    \dynamicUp
    r2 r16 c'8.\pp r4
  }
  \\
  {
    \override DynamicLineSpanner.layer = #0
    des,2\mf\< ~
    \override TextScript.layer = #2
    \once\override TextScript.staff-padding = #6
    \once\override TextScript.vertical-skylines = #'()
    des16_\markup \with-dimensions #'(2 . 7) #'(0 . 0)
      \with-color #white
      \filled-box #'(2 . 7) #'(0 . 2) #0
    r8. des4 ~ des16->\sff r8.
  }
  >>
```

}

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breath c4
  % set the breathe mark back to normal
  \revert BreathingSign.text
  c2. \breath c4
  \bar "|."
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
hairpinWithCenteredText =
#(define-music-function (text) (markup?))
#{%
  \once \override Voice.Hairpin.after-line-breaking =
  #(lambda (grob)
    (let* ((stencil (ly:hairpin::print grob))
           (par-y (ly:grob-parent grob Y))
           (dir (ly:grob-property par-y 'direction)))
```

```

(new-stencil (ly:stencil-aligned-to
  (ly:stencil-combine-at-edge
    (ly:stencil-aligned-to stencil X CENTER)
    Y dir
    (ly:stencil-aligned-to
      (grob-interpret-markup grob text) X CENTER))
  X LEFT))
(staff-space (ly:output-def-lookup
  (ly:grob-layout grob) 'staff-space))
(staff-line-thickness
  (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
(par-x (ly:grob-parent grob X))
(dyn-text (grob::has-interface par-x 'dynamic-text-interface))
(dyn-text-stencil-x-length
  (if dyn-text
    (interval-length
      (ly:stencil-extent (ly:grob-property par-x 'stencil) X))
    0))
(x-shift
  (if dyn-text
    (-
      (+ staff-space dyn-text-stencil-x-length)
      (* 0.5 staff-line-thickness)) 0)))

(ly:grob-set-property! grob 'Y-offset 0)
(ly:grob-set-property! grob 'stencil
  (ly:stencil-translate-axis
    new-stencil
    x-shift X)))
#})

hairpinMolto =
\hairpinWithCenteredText \markup { \italic molto }

hairpinMore =
\hairpinWithCenteredText \markup { \larger moltissimo }

\layout { ragged-right = ##f }

\relative c' {
  \hairpinMolto
  c2< c\f
  \hairpinMore
  c2\ppppp< c\f
  \break
  \hairpinMolto
  c2^< c\f
  \hairpinMore
  c2\ppppp< c\f
}

```

The image shows three staves of musical notation. The first two staves are identical, each consisting of a treble clef, a 'C' key signature, and a common time signature. The first note on each staff has a dynamic marking 'molto' with a long horizontal line underneath. The second note on each staff has a dynamic marking 'f'. The third staff is similar, starting with a note and 'molto' dynamic, followed by a note and 'f' dynamic, then continuing with another note and 'moltissimo' dynamic, followed by a final note and 'f' dynamic.

Modifica della dimensione del segno di \flageolet

Per ridurre la dimensione del cerchio di \flageolet, usare la seguente funzione Scheme.

```
smallFlageolet = \tweak font-size -3 \flageolet

\layout { ragged-right = ###f }

\relative c' {
  d4^{\smallFlageolet_\markup { default size } d_\flageolet
    c4^{\smallFlageolet_\markup { smaller } c_\smallFlageolet
  }
}
```

The image shows two notes on a single staff. The first note is a quarter note with a vertical stem pointing down. It has a large, solid black circle at its center, labeled 'default size' below it. The second note is also a quarter note with a vertical stem pointing down. It has a much smaller, solid black circle at its center, labeled 'smaller' below it.

Nascondere la linea di estensione per le dinamiche testuali

Il testo usato per i *crescendo* e i *decrescendo* può essere cambiato modificando le proprietà di contesto `crescendoText` e `decrescendoText`.

Lo stile della linea dell'estensore può essere cambiato modificando la proprietà `'style` di `DynamicTextSpanner`. Il valore predefinito è `'dashed-line`; gli altri valori possibili sono `'line`, `'dotted-line` e `'none`.

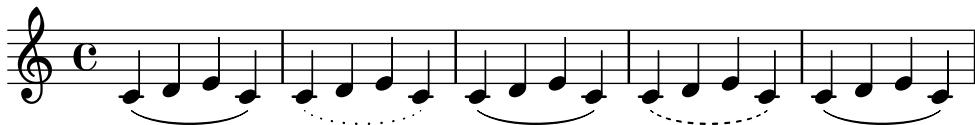

```
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a
  a2 a\mf
}
```

The image shows four notes on a single staff. The first two notes are eighth notes with vertical stems pointing up. They both have a dynamic marking 'cresc. poco' written below them. The third note is an eighth note with a vertical stem pointing up, and the fourth note is a quarter note with a vertical stem pointing down. Both of these notes have a dynamic marking 'mf' written below them.

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
    c4( d e c)
    \slurDotted
    c4( d e c)
    \slurSolid
    c4( d e c)
    \slurDashed
    c4( d e c)
    \slurSolid
    c4( d e c)
}
```

Cambiare il simbolo del segno di respiro

Il glifo del respiro può essere modificato sovrascrivendo la proprietà `text` dell'oggetto di formattazione `BreathingSign` con qualsiasi testo incluso in un blocco markup.

```
\relative c'' {
    c2
    \override BreathingSign.text =
        \markup { \musicglyph "scripts.rvarcomma" }
    \breathe
    d2
}
```

Modifica del numero di punti di aumentazione per nota

Il numero di punti di aumentazione su una singola nota può essere modificato in modo indipendente dai punti posizionati dopo la nota.

```
\relative c' {
    c4.. a16 r2 |
    \override Dots.dot-count = #4
    c4.. a16 r2 |
    \override Dots.dot-count = #0
    c4.. a16 r2 |
    \revert Dots.dot-count
    c4.. a16 r2 |}
```

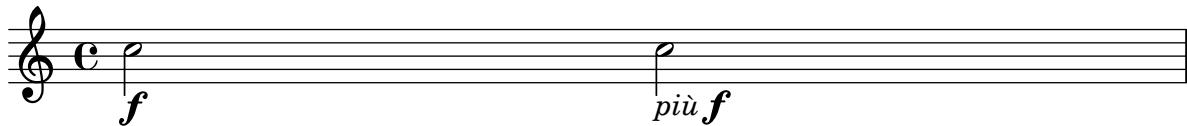

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a \markup block.

```
piuF = \markup { \italic più \dynamic f }

\layout { ragged-right = ##f }

\relative c' {
  c2\f c-\piuF
}
```

Glissando contemporaneo

Un glissando contemporaneo senza una nota finale può essere creato usando una nota nascosta e un tempo di cadenza.

```
\relative c' {
  \time 3/4
  \override Glissando.style = #'zigzag
  c4 c
  \cadenzaOn
  c4\glissando
  \hideNotes
  c,,4
  \unHideNotes
  \cadenzaOff
  \bar "|"
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the `after-line-breaking` callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper { ragged-right = ##t }

\relative c' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
```

```
% show hairpin
\override Hairpin.after-line-breaking = ##t
% hide text span
\override TextSpanner.after-line-breaking =
#ly:spanner::kill-zero-spanned-time
e2\<\startTextSpan
% show glissando
\override Glissando.after-line-breaking = ##t
f2\glissando
\break
f,1\!\stopTextSpan
}
```

Controllo dell'ordine verticale degli script

L'ordine verticale degli script è determinato dalla proprietà 'script-priority'. Più il numero è piccolo, più sarà posto vicino alla nota. In questo esempio, il simbolo di *diesis* (oggetto `TextScript`) ha prima la priorità più bassa, dunque è posto più in basso nel primo esempio. Nel secondo, il *trillo* (oggetto `Script`) ha la priorità più bassa, quindi si trova all'interno. Quando due oggetti hanno la stessa priorità, l'ordine in cui sono inseriti determina quale viene prima.

```
\relative c''' {
  \once \override TextScript.script-priority = #-100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = #-100
  a2^\prall^\markup { \sharp }
}
```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `#f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando le frazioni 2/3 e 1/3 si aggiusta la posizione orizzontale.

```
\relative c'' {
  c2*2/3 ( s2*1/3\turn d4) r
  <<
```

```

{ c4.( d8) }
{ s4 s\turn }

>>
\transpose c d \relative c' <<
{ c4.( d8) }
{
  s4
  \once \set suggestAccidentals = ##t
  \once \override AccidentalSuggestion.outside-staff-priority = ##f
  \once \override AccidentalSuggestion.avoid-slur = #'inside
  \once \override AccidentalSuggestion.font-size = -3
  \once \override AccidentalSuggestion.script-priority = -1
  \single \hideNotes
  b8-\turn \noBeam
  s8
}
>>
}

```

Creare degli arpeggi che attraversano note appartenenti a voci diverse

Si può disegnare un *arpeggio* che attraversa delle note in voci diverse dello stesso rigo se si aggiunge l'incisore `Span_arpeggio_engraver` nel contesto `Staff`:

```

\new Staff \with {
  \consists "Span_arpeggio_engraver"
}

\relative c' {
  \set Staff.connectArpeggios = ##t
  <<
  { <e' g>4\arpeggio <d f> <d f>2 }
  \\
  { <d, f>2\arpeggio <g b>2 }
  >>
}

```

Creare degli arpeggi che attraversano il rigo del pianoforte

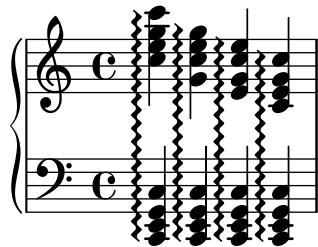

In un rigo per pianoforte (`PianoStaff`), è possibile far sì che un *arpeggio* attraversi i righi impostando la proprietà `PianoStaff.connectArpeggios`.

```

\new PianoStaff \relative c' <<
  \set PianoStaff.connectArpeggios = ##t

```

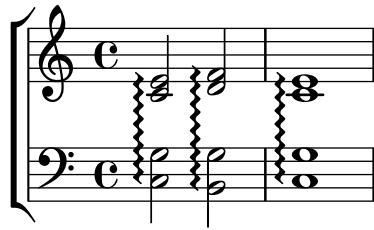

```
\new Staff {
    <c e g c>4\arpeggio
    <g c e g>4\arpeggio
    <e g c e>4\arpeggio
    <c e g c>4\arpeggio
}
\new Staff {
    \clef bass
    \repeat unfold 4 {
        <c,, e g c>4\arpeggio
    }
}
>>
```

Creare degli arpeggi che attraversano i righi in altri contesti

Si possono creare *arpeggi* che attraversano i righi in contesti diversi da `GrandStaff`, `PianoStaff` e `StaffGroup` se l'incisore `Span_arpeggio_engraver` è incluso nel contesto `Score`.

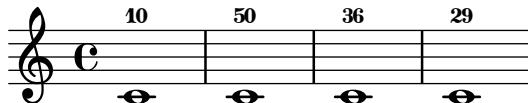

```
\score {
    \new ChoirStaff {
        \set Score.connectArpeggios = ##t
        <<
        \new Voice \relative c' {
            <c e>2\arpeggio
            <d f>2\arpeggio
            <c e>1\arpeggio
        }
        \new Voice \relative c {
            \clef bass
            <c g'>2\arpeggio
            <b g'>2\arpeggio
            <c g'>1\arpeggio
        }
        >>
    }
    \layout {
        \context {
            \Score
            \consists "Span_arpeggio_engraver"
        }
    }
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
    c1-10
    c1-50
    c1-36
    c1-29
}
```

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{
      \markup \concat {
        \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
      }
    #})))
\relative c'' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one `RehearsalMark` object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column.

This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

```
{
    \key a \major
    \set Score.markFormatter = #format-mark-box-letters
    \once \override Score.RehearsalMark.outside-staff-priority = #5000
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
    \mark \markup { \bold { Senza denti } }

    % the hidden measure and bar line
    % \cadenzaOn turns off automatic calculation of bar numbers
    \cadenzaOn
    \once \override Score.TimeSignature.stencil = ##f
    \time 1/16
    s16 \bar ""
    \cadenzaOff

    \time 4/4
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark \markup { \box \bold Intro }
    d'1
    \mark \default
    d'1
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaconna from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
    <<
    {
        d16( a') s a s a[ s a] s a[ s a]
    }
    \\
    {
        \slurUp
        bes,16[ s e]( \hideNotes a)
        \unHideNotes f[( \hideNotes a)
        \unHideNotes fis]( \hideNotes a)
```

```

\unHideNotes g[(
  \hideNotes a)
  \unHideNotes gis]( 
  \hideNotes a)
}

>>
}

```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```

\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . -2) }
  \once \override TextSpanner.bound-details.right.padding = #-2

  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \set Staff.middleCPosition = #-13
  \override TextSpanner.dash-period = #10
  \override TextSpanner.dash-fraction = #0.5
  \override TextSpanner.thickness = #10
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}

```

Estensore testuale della dinamica personalizzato

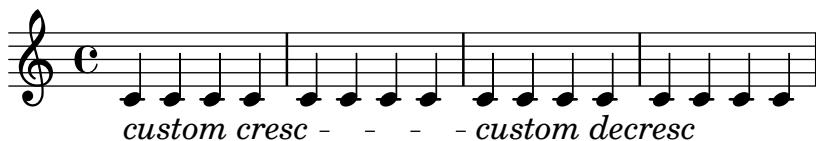

Funzioni postfix per estensori testuali personalizzati del crescendo. Gli estensori devono iniziare sulla prima nota della misura; e bisogna usare `\mycresc`, altrimenti l'inizio dell'estensore viene assegnato alla nota successiva.

```
% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.
```

```
mycresc =
#define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))

mydecresc =
#define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))
```

```
\relative c' {
  c4-\mycresc "custom cresc" c4 c4 c4 |
  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}
```

Estensore testuale della dinamica personalizzato

Si possono definire estensori testuali personalizzati che fanno uso delle forcine e dei crescendo testuali. `\<` e `\>` generano le forcine, `\cresc` etc. generano gli estensori testuali.

```
% Some sample text dynamic spanners, to be used as postfix operators
crpoco =
```

```
(#(make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text "cresc. poco a poco"))

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decresc c4\!
}
```

}

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

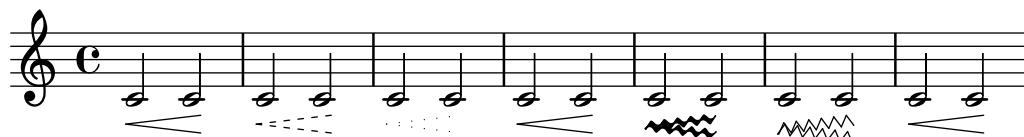

```
\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f'''4 d,
}
```

Hairpins with different line styles

Hairpins can take any style from line-interface - dashed-line, dotted-line, line, trill or zigzag.

```
\relative c' {
  c2\< c\!
  \override Hairpin.style = #'dashed-line
  c2\< c\!
  \override Hairpin.style = #'dotted-line
  c2\< c\!
  \override Hairpin.style = #'line
  c2\< c\!
  \override Hairpin.style = #'trill
  c2\< c\!
  \override Hairpin.style = #'zigzag
  c2\< c\!
  \revert Hairpin.style
  c2\< c\!
}
```

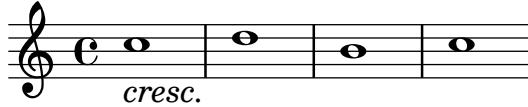

Nascondere la linea di estensione per le dinamiche testuali

I cambi di dinamica in stile testuale (come *cresc.* e *dim.*) appaiono con una linea tratteggiata che mostra la loro estensione. Questa linea può essere soppressa nel modo seguente:

```
\relative c'' {
  \override DynamicTextSpanner.style = #'none
  \crescTextCresc
```

```
c1\< | d | b | c\!
}
```

Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p")

Some dynamic expressions involve additional text, like "sempre pp". Since dynamics are usually centered under the note, the \pp would be displayed way after the note it applies to.

To correctly align the "sempre pp" horizontally, so that it is aligned as if it were only the \pp, there are several approaches:

- * Simply use \once\override DynamicText.X-offset = #-9.2 before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- * Add some padding (#:hspace 7.1) into the definition of your custom dynamic mark, so that after lilypond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- * Shift the dynamic script \once\overrideX-offset = ... Drawback: \once\override is needed for every invocation!

* Set the dimensions of the additional text to 0 (using #:with-dimensions '(0 . 0) '(0 . 0)). Drawback: To LilyPond "sempre" has no extent, so it might put other stuff there and create collisions (which are not detected by the collision detection!). Also, there seems to be some spacing, so it's not exactly the same alignment as without the additional text

* Add an explicit shifting directly inside the scheme function for the dynamic-script.

* Set an explicit alignment inside the dynamic-script. By default, this won't have any effect, only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of pp.

```
\paper {
    ragged-right = ##f
    indent = 2.5\cm
}

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }

% Solution 2: Using a dynamic script & shifting with
%             \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
```

```

  #:dynamic "pp")))

% Solution 3: Padding the dynamic script so the center-alignment
%           puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
 (markup #:line
        (#:normal-text
         #:italic "sempre"
         #:dynamic "pp"
         #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
semppM =
#(make-dynamic-script
 (markup #:line
        (#:with-dimensions '(0 . 0) '(0 . 0)
                           #:right-align
                           #:normal-text
                           #:italic "sempre"
                           #:dynamic "pp")))

% Solution 5: Dynamic with explicit shifting inside the scheme function
semppG =
#(make-dynamic-script
 (markup #:hspace 0
        #:translate '(-18.85 . 0)
        #:line (#:normal-text
                #:italic "sempre"
                #:dynamic "pp")))

% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
semppMII =
#(make-dynamic-script
 (markup #:line (#:right-align
                 #:normal-text
                 #:italic "sempre"
                 #:dynamic "pp")))

Normal

Normal markup

Explicit shifting

Right padding

Set dimension to zero

Shift inside dynamics

Alignment inside dynamics

The figure consists of seven horizontal staves of music. Each staff has a treble clef and a key signature of one flat. The first staff is labeled 'Normal' and shows standard dynamic markings: 'pp', 'p', 'ff', and 'pp'. The second staff is labeled 'Normal markup' and shows 'sempre pp' followed by 'p', then 'ff' followed by 'sempre pp'. The third staff is labeled 'Explicit shifting' and shows 'sempre pp' followed by 'p', then 'ff' followed by 'sempre pp'. The fourth staff is labeled 'Right padding' and shows 'sempre pp' followed by 'p', then 'ff' followed by 'sempre pp'. The fifth staff is labeled 'Set dimension to zero' and shows 'sempre pp' followed by 'p', then 'ff' followed by 'sempre pp'. The sixth staff is labeled 'Shift inside dynamics' and shows 'sempre pp' followed by 'p', then 'ff', and finally 'sempre pp'. The seventh staff is labeled 'Alignment inside dynamics' and shows 'sempre pp' followed by 'p', then 'ff', and finally 'sempre pp'. The staves are separated by vertical lines.

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

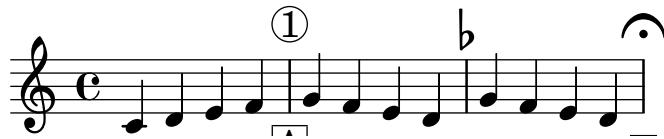

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 (<http://lsr.di.unimi.it/LSR/Item?id=1>) will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
  c d e f |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \circle 1 \box A }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \flat { \bold \small \italic Fine. } }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
  \mark \markup \center-column { \fermata \box z }
}
```

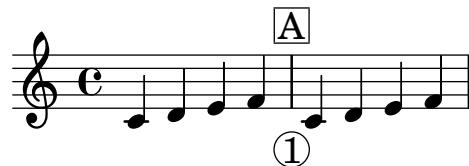

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```
\score {
  \relative c'
  <<
  \new Staff {
    <<
    \new Voice \with {
      \consists Mark_engraver
      \consists "Staff_collecting_engraver"

        \Score
        \remove "Mark_engraver"
        \remove "Staff_collecting_engraver"
    }
}
}
```

Inserire una cesura

I segni di cesura possono essere creati sovrascrivendo la proprietà 'text' dell'oggetto BreathingSign. È disponibile anche un segno di cesura curvo.

```
\relative c' {
    \override BreathingSign.text = \markup {
        \musicglyph "scripts.caesura.straight"
    }
    c8 e4. \breathe g8. e16 c4

    \override BreathingSign.text = \markup {
        \musicglyph "scripts.caesura.curved"
    }
    g8 e'4. \breathe g8. e16 c4
}
```

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration'.

```
\relative c' {
    <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
```

```
<c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

<c d e f>4\laissezVibrer r
\override LaissezVibrerTieColumn.tie-configuration
= #`((-7 . ,DOWN)
  (-5 . ,DOWN)
  (-3 . ,UP)
  (-1 . ,UP))
<c d e f>4\laissezVibrer r
}
```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```
\relative c'' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6

  \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

  \override Glissando.bound-details.right.arrow = ##t
  \override Glissando.arrow-length = #0.5
  \override Glissando.arrow-width = #0.25

  a8\startTextSpan gis a4 b\glissando b,
  g'4 c\stopTextSpan c2
}
```

Legature di portamento con complesse strutture di tratteggio

Le legature di portamento possono avere schemi di tratteggio complessi definendo la proprietà `dash-definition`. `dash-definition` è una lista di `dash-elements`. Un `dash-element` è una lista di parametri che definiscono il comportamento del tratteggio per un segmento della legatura.

La legatura di portamento è definita come il parametro `t` della curva di bezier che va da 0 sul margine sinistro della legatura fino a 1 su quello destro. `dash-element` è una lista di (`inizio-t fine-t frazione-trattino punto-trattino`). La regione della legatura di portamento che va da `inizio-t` a `fine-t` avrà una frazione `frazione-trattino` di ogni `punto-trattino` nero.

punto-trattino viene definito in spazi rigo. `frazione-trattino` è impostato su 1 per una legatura di portamento continua.

```
\relative c' {
  \once \override
    Slur.dash-definition = #'((0 0.3 0.1 0.75)
                                (0.3 0.6 1 1)
                                (0.65 1.0 0.4 0.75))

  c4( d e f)
  \once \override
    Slur.dash-definition = #'((0 0.25 1 1)
                                (0.3 0.7 0.4 0.75)
                                (0.75 1.0 1 1))

  c4( d e f)
}
```

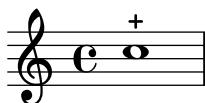

Modificare i valori predefiniti per le abbreviazioni delle articolazioni

Le abbreviazioni sono definite in ‘ly/script-init.ly’, dove sono assegnati valori predefiniti alle variabili `dashHat`, `dashPlus`, `dashDash`, `dashBang`, `dashLarger`, `dashDot` e `dashUnderscore`. Questi valori predefiniti possono essere modificati. Ad esempio, per associare l’abbreviazione `-+` (`dashPlus`) al simbolo del *trillo* invece che al simbolo `+` predefinito, si assegna il valore `trill` alla variabile `dashPlus`:

```
\relative c'' { c1-+ }

dashPlus = "trill"

\relative c'' { c1-+ }
```

Moving slur positions vertically

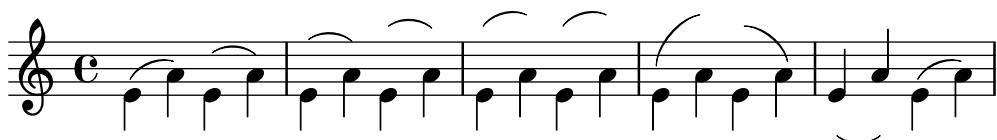

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```
\relative c' {
  \stemDown
```

```

e4( a)
\override Slur.positions = #'(1 . 1)
e4( a)
\override Slur.positions = #'(2 . 2)
e4( a)
\override Slur.positions = #'(3 . 3)
e4( a)
\override Slur.positions = #'(4 . 4)
e4( a)
\override Slur.positions = #'(5 . 5)
e4( a)
\override Slur.positions = #'(0 . 5)
e4( a)
\override Slur.positions = #'(5 . 0)
e4( a)
\stemUp
\override Slur.positions = #'(-5 . -5)
e4( a)
\stemDown
\revert Slur.positions
e4( a)
}

```

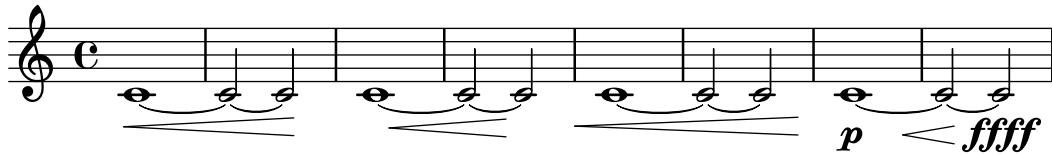

Spostare le estremità delle forcelle

Le estremità delle forcelle possono essere spostate in modo relativo alla loro posizione pre-definita (offset) impostando la proprietà `shorten-pair` dell'oggetto `Hairpin`. Valori positivi spostano le estremità a destra, valori negativi le spostano a sinistra. Diversamente dalla proprietà `minimum-length`, questa proprietà modifica solo l'aspetto della forcetta; non cambia la spaziatura orizzontale (inclusa la posizione delle dinamiche confinanti). Questo metodo è quindi utile per ritoccare una forcetta entro lo spazio ad essa allocato.

```

{
  c'1~\<
  c'2~ c'!\!
\once \override Hairpin.shorten-pair = #'(2 . 2)
  c'1~\<
  c'2~ c'!\!
\once \override Hairpin.shorten-pair = #'(-2 . -2)
  c'1~\<
  c'2~ c'!\!
  c'1~\p-\tweak shorten-pair #'(2 . 0)\<
  c'2~ c'!\fffff
}

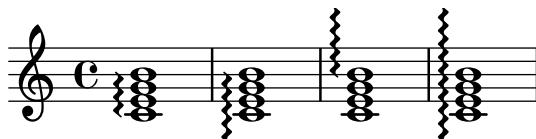

```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

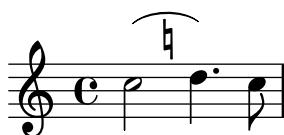

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su false per poter apparire dentro le legature di portamento.

```
\relative c'' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(^\markup { \halign #-10 \natural } d4.) c8
}
```

Stampare le forcille in vari stili

Il segno di dinamica della forcella può avere diversi stili

```
\relative c'' {
  \override Hairpin.stencil = #flared-hairpin
  a4< a a a\f
  a4\p< a a a\ff
  a4\sfz< a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4< a a a\f
  a4\p< a a a\ff
  a4\sfz< a a a\!
  \override Hairpin.stencil = #flared-hairpin
  a4> a a a\f
  a4\p> a a a\ff
```

```
a4\sfz> a a a\!
\override Hairpin.stencil = #constante-hairpin
a4\> a a a\f
a4\p\> a a a\ff
a4\sfz\> a a a\!
}
```

The image shows a musical score with two staves. Both staves are in common time (indicated by 'C') and use a treble clef. The first staff begins with a dynamic marking 'f' followed by a hairpin leading to 'p', then another hairpin leading to 'ff' which is followed by 'sfz'. This pattern repeats. The second staff follows a similar sequence. Measure numbers '6' and '7' are positioned above the staves.

Forcelle con notazione al niente

Le forcelle di dinamica possono essere rappresentate con una punta tonda (notazione “al niente”) impostando la proprietà `circled-tip` dell’oggetto Hairpin su `#t`.

```
\relative c' {
  \override Hairpin.circled-tip = ##t
  c2\< c\!
  c4\> c\< c2\!
}
```

The image shows a musical score with two staves. Both staves are in common time (indicated by 'C') and use a treble clef. The first staff begins with a hairpin that ends in a small circle (representing 'circled-tip'), followed by a standard hairpin. The second staff begins with a hairpin that ends in a small circle, followed by another hairpin that also ends in a small circle.

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```
\layout {
  indent = 0
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}
```

A musical staff in common time (indicated by 'C') with a tempo of 120 BPM (indicated by 'J.= 120'). A hairpin starts at the beginning of the first measure, ending at the barline. The letter 'A' is placed below the barline.

Impostare il comportamento delle forcelle sulle stanghette

Se la nota che termina una forcetta si trova sul primo battito di una battuta, la forcetta si ferma prima della stanghetta che precede la nota. Si può controllare questo comportamento modificando la proprietà 'to-barline'.

```
\relative c' {
  e4< e2.
  e1\!
  \override Hairpin.to-barline = ##f
  e4< e2.
  e1\!
}
```

A musical staff in common time (indicated by 'C') with a tempo of 120 BPM (indicated by 'J.= 120'). A hairpin starts at the beginning of the first measure, ending at the barline. The hairpin is explicitly continued across the barline, as indicated by the code.

Impostare la lunghezza minima delle forcelle

Se le forcette sono troppo corte, possono essere allungate modificando la proprietà `minimum-length` dell'oggetto `Hairpin`.

```
\relative c' {
  c4< c\! d\> e\!
  << f1 { s4 s< s\> s\! } >>
  \override Hairpin.minimum-length = #5
  << f1 { s4 s< s\> s\! } >>
}
```

A musical staff in common time (indicated by 'C') with a tempo of 120 BPM (indicated by 'J.= 120'). A hairpin starts at the beginning of the first measure, ending at the barline. The hairpin is explicitly given a minimum length, as indicated by the code.

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_fermata^\fermata` will only show a fermata below. The fermata above will simply be ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support' would be required.

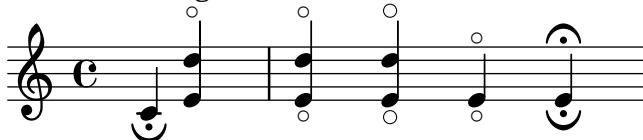

So, the solution is to write the note as a chord and add the articulations inside the `<...>`. The direction will always be above, but one can tweak this via a `\tweak: <c-\tweak direction #DOWN-\fermata^\fermata>`

```
% The same as \flageolet, just a little smaller
smallFlageolet = \tweak font-size #-2 \flageolet
```

```
\relative c' {
    s4^"Wrong:"
    c4_ \fermata^ \fermata % The second fermata is ignored!
    <e d'>4^ \smallFlageolet_ \smallFlageolet

    s4^"Works if written inside a chord:"
    <e_ \smallFlageolet d' ^ \smallFlageolet>4
    <e_ \flageolet d' ^ \flageolet>4
    <e_ \smallFlageolet^ \smallFlageolet>4
    <e_ \fermata^ \fermata>4
}
```

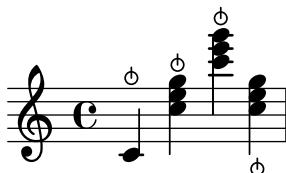

Wrong: Works if written inside a chord:

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
    c4 \snappizzicato
    <c' e g>4 \snappizzicato
    <c' e g>4^ \snappizzicato
    <c, e g>4_ \snappizzicato
}
```

Usare un segno di spunta come simbolo di respiro

La musica vocale e per fiati usa frequentemente il segno di spunta come segno di respiro. Questo indica un respiro che sottrae un po’ di tempo alla nota precedente invece di prendere una piccola pausa, indicata dal segno di respiro rappresentato dalla virgola. Il segno può essere spostato un po’ su per allontanarlo dal rigo.

```
\relative c'' {
    c2
    \breathe
    d2
    \override BreathingSign.Y-offset = #2.6
    \override BreathingSign.text =
        \markup { \musicglyph "scripts.tickmark" }
    c2
    \breathe
    d2
```

}

Usare arpeggioBracket per rendere i divisi più visibili

Si può usare `arpeggioBracket` per indicare la divisione delle voci quando non ci sono gambi che forniscano questa informazione. Questo caso è frequente nella musica corale.

```
\include "english.ly"
```

```
\score {
    \relative c' {
        \key a \major
        \time 2/2
        <<
        \new Voice = "upper"
        <<
        { \voiceOne \arpeggioBracket
            a2( b2
            <b d>1\arpeggio)
            <cs e>\arpeggio ~
            <cs e>4
        }
        \addlyrics { \lyricmode { A -- men. } }
        >>
        \new Voice = "lower"
        { \voiceTwo
            a1 ~
            a
            a ~
            a4 \bar "| ."
        }
        >>
    }
    \layout { ragged-right = ##t }
}
```

Uso delle doppie legature di portamento per gli accordi legati

Alcuni compositori scrivono due *legature di portamento* per indicare gli accordi legati. Si può ottenere questo risultato impostando `doubleSlurs`.

```
\relative c' {
    \set doubleSlurs = ##t
    <c e>4( <d f> <c e> <d f>)
}
```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the `layer` property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the `whiteout` property of `TimeSignature`. To do this `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer of 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

```
{
\override Score.StaffSymbol.layer = #4
\override Staff.TimeSignature.layer = #3
b'2 b'~
\once \override Staff.TimeSignature.whiteout = ##t
\time 3/4
b' r4
}
```

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
\tweak stencil
#(lambda (grob)
  (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
\stopped

\relative c' {
  a'4^\upline a( c d')_\upline
}
```

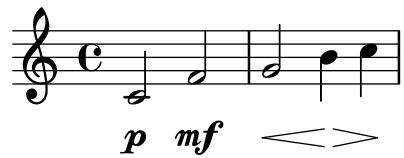

Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the `staff-padding` property of the `DynamicLineSpanner` object.

```
\relative c' {
```

```
\override DynamicLineSpanner.staff-padding = #4
c2\p f\mf
g2\< b4\> c\!
}
```

Repeats

Sezione “Repeats” in *Guida alla Notazione*

Aggiungere le parentesi delle volte a altri righi

L’incisore `Volta_engraver` risiede nel contesto `Score`, quindi le parentesi delle ripetizioni appaiono di norma soltanto sul rigo superiore. Questo comportamento può essere modificato aggiungendo l’incisore `Volta_engraver` al contesto `Staff` in cui si desidera far apparire le parentesi; si veda anche il frammento “Volta multirigo”.

<<

```
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff \with { \consists "Volta_engraver" } { c'2 g' e' a' }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
```

>>

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
```

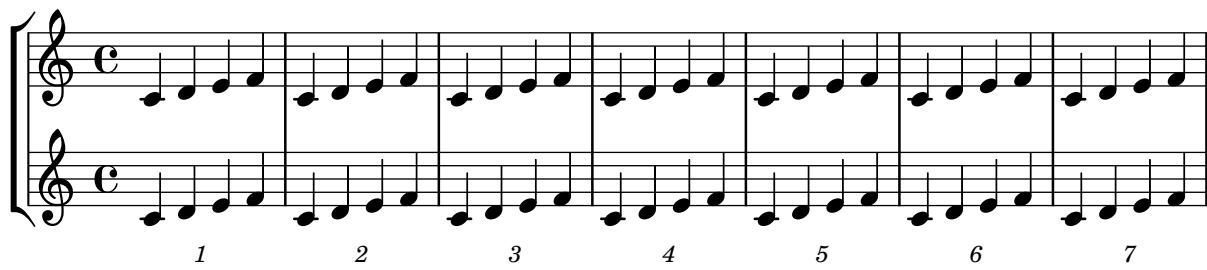

```

}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <-
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

```
% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357
```

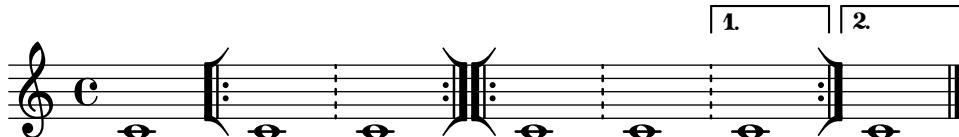

```

\layout {
  \context {
    \Score
    % Changing the defaults from engraver-init.ly
    defaultBarType = "#!"
    startRepeatType = "#[|:"
    endRepeatType = "#:|]"
    doubleRepeatType = "#:|[]|:"
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {
    { c' }
  }
}

```

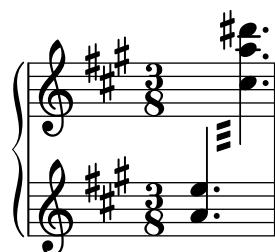

```
{
  %% v2.18 workaround
  \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
  c'
}
}
\bar "|."
}
```

Tremoli attraverso i righi

Dato che `\repeat tremolo` si aspetta esattamente due argomenti musicali per i tremoli di accordi, la nota o l'accordo che cambiano rigo in un tremolo che attraversa i righi devono essere posti tra parentesi graffe insieme al comando `\change Staff`.

```
\new PianoStaff <<
  \new Staff = "up" \relative c' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
>>
```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain

engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the 'gap-count' property of the Beam object, and the size of the gaps between beams and stems is set with the 'gap' property.

```
\relative c'' {
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #1
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #2
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #3
    \repeat tremolo 8 { a32 f }

    \override Beam.gap-count = #3
    \override Beam.gap = #1.33
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #1
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #0.67
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #0.33
    \repeat tremolo 8 { a32 f }
}
```

Ripetizioni con segni di percentuale isolati

Si possono stampare anche segni di percentuale isolati.

```
makePercent =
#(define-music-function (note) (ly:music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
              'length (ly:music-length note)))

\relative c'' {
    \makePercent s1
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
\context Voice = "foo" {
```

```
\clef bass
c4 r g r
c4 r g r
c4 r g r
c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "|"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
}
```

```
\break
e'4 d'
\repeat unfold 7 {
    g'4 f' e' d'
}
\stopMeasureCount
}
```

A musical score in common time (C) and C major. It consists of 14 measures of eighth notes. Measures 1 through 7 are grouped by a brace, and measures 8 through 14 are grouped by another brace. Measure numbers 1, 2, 3, 4, 5, 6, and 7 are placed above the first group of measures. Measure numbers 8, 9, 10, 11, 12, 13, and 14 are placed above the second group of measures.

Visibilità del conto della ripetizione con segno percentuale

I contatori della ripetizione con segno percentuale possono essere mostrati a intervalli regolari impostando la proprietà di contesto `repeatCountVisibility`.

```
\relative c'' {
    \set countPercentRepeats = ##t
    \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
    \repeat percent 10 { c1 } \break
    \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
    \repeat percent 6 { c1 d1 }
}
```

A musical score in common time (C) and C major. It consists of 16 measures of quarter notes. Measures 1 through 10 are grouped by a brace, and measures 11 through 16 are grouped by another brace. Measure numbers 5 and 10 are placed above the first group of measures. Measure numbers 11, 12, 13, 14, and 16 are placed above the second group of measures.

Contatore della ripetizione con segno percentuale

Le ripetizioni di misura che hanno più di due ripetizioni possono avere un contatore se si cambia la proprietà opportuna, come mostra questo esempio:

```
\relative c'' {
    \set countPercentRepeats = ##t
    \repeat percent 4 { c1 }
}
```

A musical score in common time (C) and C major. It consists of 4 measures of quarter notes. Measures 2, 3, and 4 are grouped by a brace. Measure numbers 2, 3, and 4 are placed above the first group of measures.

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
{
    \clef treble
    \key g \major
    \time 4/4
    \relative c'' {
        \repeat unfold 4 {
            c4 c c c
        }

        % Set segno sign as rehearsal mark and adjust size if needed
        % \once \override Score.RehearsalMark.font-size = #3
        \mark \markup { \musicglyph "scripts.segno" }
        \repeat unfold 2 {
            c4 c c c
        }

        % Set coda sign as rehearsal mark and adjust size if needed

\mark \markup { \musicglyph "scripts.coda" }

% The coda
\repeat unfold 6 {
  c4 c c c
}
\bar "| ."
}
```

Impostare la doppia ripetizione predefinita per le volte

Esistono tre diversi stili di doppie ripetizioni per le volte, che si possono impostare con `doubleRepeatType`.

```
\relative c' {
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = "#":...:""
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = "#":|.|""
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = "#":|.:"
  \repeat volta 1 { c1 }
}
```

Accorciare le parentesi delle volte

Per impostazione predefinita, le parentesi delle volte si estendono per tutta l'alternativa, ma si possono accorciare impostando `voltaSpannerDuration`. Nell'esempio seguente, la parentesi dura una misura, che ha una durata di 3/4.

```
\relative c' {
```

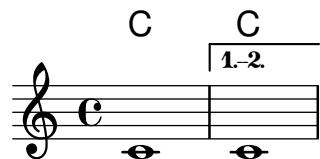

```
\time 3/4
c4 c c
\set Score.voltaSpannerDuration = #(ly:make-moment 3/4)
\repeat volta 5 { d4 d d }
\alternative {
{
  e4 e e
  f4 f f
}
{ g4 g g }
}
```

Volta sotto gli accordi

Aggiungendo l'incisore **Volta_engraver** al rigo, è possibile inserire le volte sotto gli accordi.

```
\score {
<<
  \chords {
    c1
    c1
  }
  \new Staff \with {
    \consists "Volta_engraver"
  }
  {
    \repeat volta 2 { c'1 }
    \alternative { c' }
  }
>>
\layout {
  \context {
    \Score
    \remove "Volta_engraver"
  }
}
```

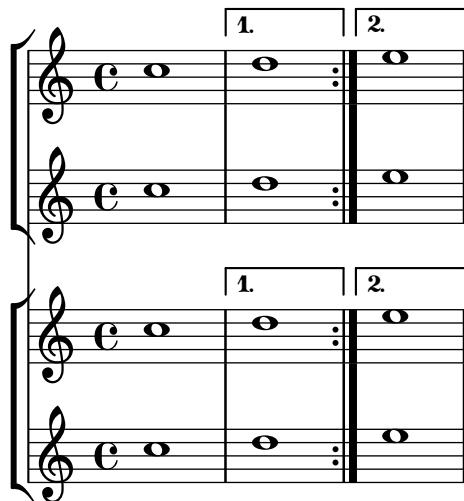

Volta multi staff

By adding the **Volta_engraver** to the relevant staff, volte can be put over staves other than the topmost one in a score.

```
voltaMusic = \relative c' {
```

```
\repeat volta 2 {
    c1
}
\alternative {
    d1
    e1
}
}

<<
\new StaffGroup <<
    \new Staff \voltaMusic
    \new Staff \voltaMusic
>>
\new StaffGroup <<
    \new Staff \with { \consists "Volta_engraver" }
        \voltaMusic
    \new Staff \voltaMusic
>>
>>
```

Volta text markup using repeatCommands

Though volte are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' {
    c1
    \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
    c4 b d e
    \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
```

```
f1
  \set Score.repeatCommands = #'((volta #f))
}
}
```

Simultaneous notes

Sezione “Simultaneous notes” in *Guida alla Notazione*

Voci ulteriori per evitare le collisioni

In alcuni casi di musica polifonica complessa sono necessarie delle voci ulteriori per evitare le collisioni tra note. Se servono più di quattro voci parallele, si possono aggiungere altre voci definendo una variabile con la funzione Scheme function `context-spec-music`.

```
voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)
```

```
\relative c' {
    \time 3/4
    \key d \minor
    \partial 2
    <<
        \new Voice {
            \voiceOne
            a4. a8
            e'4 e4. e8
            f4 d4. c8
        }
        \new Voice {
            \voiceTwo
            d,2
            d4 cis2
            d4 bes2
        }
        \new Voice {
            \voiceThree
            f'2
            bes4 a2
            a4 s2
        }
        \new Voice {
            \voiceFive
            s2
            g4 g2
            f4 f2
        }
    >>
}
```

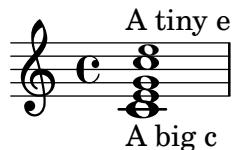

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by font-size and define the proper size like #-2 (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ^\markup { A tiny e }_\markup { A big c }
}
```

Modificare le indicazioni testuali di partCombine

Quando si usa la funzionalità di combinazione automatica delle parti, si può modificare il testo delle sezioni soliste e dell'unisono:

```
\new Staff <<
  \set Staff.soloText = #"girl"
  \set Staff.soloIIText = #"boy"
  \set Staff.aDueText = #"together"
  \partCombine
    \relative c'' {
      g4 g r r
      a2 g
    }
    \relative c' {
      r4 r a( b)
      a2 g
    }
  >>
```

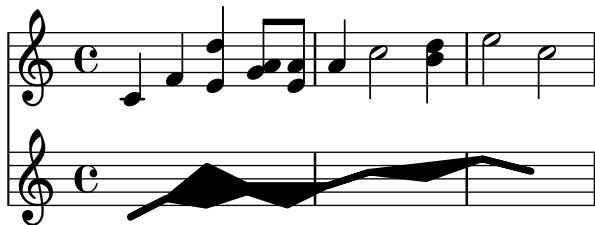

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Combinare due parti sullo stesso rigo

Lo strumento di unione delle parti (il comando `\partCombine`) permette di combinare varie parti sullo stesso rigo. Indicazioni testuali come “solo” e “a2” sono aggiunte automaticamente; per toglierele basta impostare la proprietà `printPartCombineTexts` su `f`. Per le partiture vocali (inni), non c’è bisogno di aggiungere i testi “solo/a2”, quindi dovrebbero essere disattivati. Tuttavia potrebbe convenire non usarlo se c’è una qualche parte solista, perché non verrebbe indicata. In tali casi è preferibile usare la notazione polifonica normale.

Questo frammento illustra i tre modi con cui due parti possono essere stampate su uno stesso rigo: normale polifonia, `\partCombine` senza testo e `\partCombine` con testo.

```
%% Combining pedal notes with clef changes
```

```
musicUp = \relative c' {
    \time 4/4
    a4 c4.( g8) a4 |
    g4 e' g,( a8 b) |
    c b a2.
}

musicDown = \relative c' {
    g4 e4.( d8) c4 |
    r2 g'4( f8 e) |
    d2 \stemDown a
}

\score {
    <<
    \new Staff \with { instrumentName = "Standard polyphony" }

    << \musicUp \\ \musicDown >>

    \new Staff \with {
        instrumentName = "PartCombine without text"
        printPartCombineTexts = ##f
    }

    \partCombine \musicUp \musicDown

    \new Staff \with { instrumentName = "PartCombine with text" }
        \partCombine \musicUp \musicDown
    >>
}

\layout {
    indent = 6.0\cm
    \context {
        \Score
        \override SystemStartBar.collapse-height = #30
    }
}
```

```
}
```

```
}
```

Standard polyphony

PartCombine without text

PartCombine with text

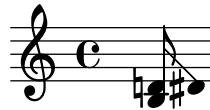

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```
fixA = {
    \once \override Stem.length = #11
}

fixB = {
    \once \override NoteHead.X-offset = #1.7
    \once \override Stem.length = #7
    \once \override Stem.rotation = #'(45 0 0)
    \once \override Stem.extra-offset = #'(-0.1 . -0.2)
    \once \override Flag.style = #'no-flag
    \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
    << { \fixA <b d!>8 } \\ { \voiceThree \fixB dis } >> s
}
```

Forzare lo spostamento orizzontale delle note

Quando il motore tipografico non riesce a risolvere una situazione, si può usare la sintassi che sovrascrive le decisioni tipografiche. L'unità di misura usata è lo spazio del rigo.

```
\relative c' <<
{
    <d g>2 <d g>
}
\\
{
    <b f'>2
```

```
\once \override NoteColumn.force-hshift = #1.7
<b f'>2
}
>>
```

Making an object invisible with the 'transparent' property

Setting the `transparent` property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
  >>
}
```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un’altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà `prefer-dotted-right` di `NoteCollision`.

```
\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
```

```
\override Staff.NoteCollision.prefer-dotted-right = ##t
f2. f4
}
\\
{ e4 e e e e e e e e }
>>
```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```
\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}
```

Two \partCombine pairs on one staff

The \partCombine function takes two music expressions each containing a part, and distributes them among four Voices named “two” “one” “solo” and “chords” depending on when and how the parts merged into a common voice. The voices output from \partCombine can have their layout properties adjusted in the usual way. Here we define extensions of \partCombine to make it easier to put four voices on a staff.

```
soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

\new Staff <<
  \key b\minor
  \clef alto
  \partial 4
  \transpose b b'
  \partCombineUp \soprano \alto
  \partCombineDown \tenor \bass
```

```

>>

Staff notation

Sezione “Staff notation” in *Guida alla Notazione*

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Adding an extra staff at a line break

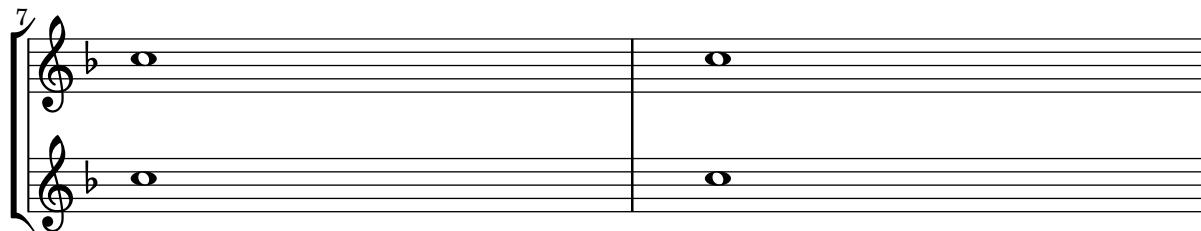

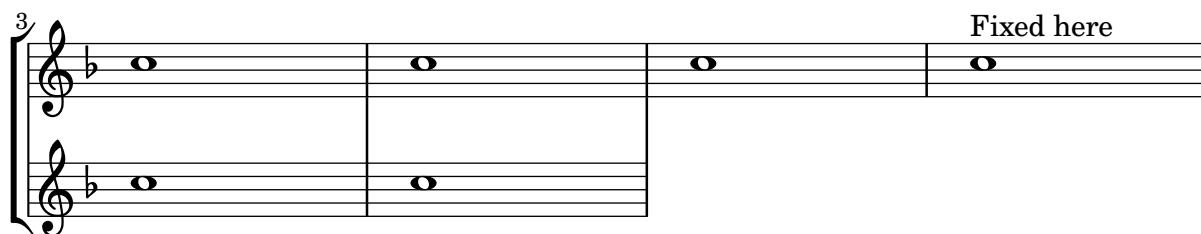

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```
\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
>>
c1 | c^"Fixed here" \break
<< { c1 | c }
\new Staff {
```

```

\once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
\key f \major
\once \omit Staff.TimeSignature
c1 | c
}
>>
}
}

```

Adding an extra staff

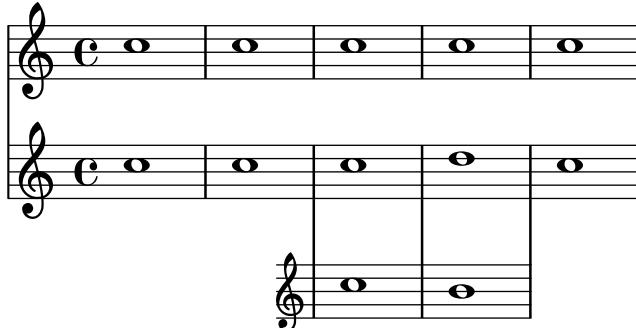

An extra staff can be added (possibly temporarily) after the start of a piece.

```

\score {
  <<
    \new Staff \relative c' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c' {
      \new Staff {
        c1 | c
        <<
        {
          c1 | d
        }
        \new Staff {
          \once \omit Staff.TimeSignature
          c1 | b
        }
      }
    >>
    c1
  }
}

```

```
>>
}
```

Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `convUpStaffBarLine` and `convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
  (interpret-markup layout props
    (markup
      #:translate (cons (/ target-x 2) (/ target-y 2)))
      #:rotate angle-deg
      #:translate (cons (/ length -2) 0)
      #:concat (#:draw-line (cons length 0)
        #:arrow-head X RIGHT fill)))))

        \override VerticalAxisGroup.remove-first = ##t
    }
}
}

```

A musical score for two voices, Soprano I (SopI) and Tenor/Bass (T B). The score is divided into two systems by a double bar line. In each system, there are two staves. The top staff for both voices is in common time with a treble clef. The bottom staff for both voices is in common time with a bass clef. The vocal parts are as follows:

- SopI (Top Staff):** The first system has four notes labeled 'a', 'b', 'c', and 'd' from left to right. The second system also has four notes labeled 'a', 'b', 'c', and 'd' from left to right.
- T B (Bottom Staff):** The first system has four notes labeled 'a', 'b', 'c', and 'd' from left to right. The second system also has four notes labeled 'a', 'b', 'c', and 'd' from left to right.

The image shows musical staff notation. On the left, there are labels: 'SI SII' above the first two staves, 'AI AII' above the second two staves, and 'T B' below the last two staves. The first two staves (SI SII) have a treble clef and four notes labeled 'e', 'f', 'g', 'h'. The next two staves (AI AII) also have a treble clef and four notes labeled 'e', 'f', 'g', 'h'. The last two staves (T B) have a bass clef and four notes labeled 'e', 'f', 'g', 'h'. To the right of these, another set of staves is shown: 'SA' at the top with four notes labeled 'i', 'j', 'k', 'l', and 'TB' at the bottom with four notes labeled 'i', 'j', 'k', 'l'. This indicates that the notes 'i', 'j', 'k', and 'l' correspond to the notes 'e', 'f', 'g', and 'h' respectively across the different staves.

Aggiungere citazioni orchestrali a una partitura vocale

L'esempio seguente mostra un approccio per semplificare l'aggiunta di citazioni orchestrali a una riduzione per pianoforte di una partitura vocale. La funzione musicale `\cueWhile` prende quattro argomenti: la musica da cui prendere la citazione, come è definita da `\addQuote`, il nome da inserire prima delle notine, poi o `#UP` o `#DOWN` per specificare o `\voiceOne` col nome sopra il rigo o `\voiceTwo` col nome sotto il rigo, e infine la musica per pianoforte che deve apparire in parallelo alle notine. Il nome dello strumento citato è posto a sinistra delle notine. Molti passaggi possono essere citati, ma non possono sovrapporsi l'un l'altro nel tempo.

```

cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
      <>-markup { \tiny #name }
      $music
    }
  #})
}

flute = \relative c' {
  \transposition c'
  s4 s4 e g
}
\addQuote "flute" { \flute }

clarinet = \relative c' {

```

```

\transposition bes
fis4 d d c
}
\addQuote "clarinet" { \clarinet }

singer = \relative c' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c' {
  \transposition c'
  \cueWhile "clarinet" "Clar." #DOWN { c4. g8 }
  \cueWhile "flute" "Flute" #UP { g4 bes4 }
}
pianoLH = \relative c { c4 <c' e> e, <g c> }

\score {
  <<
  \new Staff {
    \new Voice = "singer" {
      \singer
    }
  }
  \new Lyrics {
    \lyricsto "singer"

  }
  \new PianoStaff <<
    \new Staff {
      \new Voice {
        \pianoRH
      }
    }
    \new Staff {
      \clef "bass"
      \pianoLH
    }
  >>
  >>
}

```

The musical score consists of three staves. The top staff is for the piano RH, showing a melody in C major. The middle staff is for the piano LH, showing a bassline in G major. The bottom staff is for the vocal part, which includes lyrics. The piano RH staff starts with a quarter note followed by an eighth note, then a dotted half note. The piano LH staff starts with a quarter note followed by an eighth note. The vocal part starts with a quarter note followed by an eighth note, then a dotted half note. The piano RH staff ends with a quarter note followed by an eighth note. The piano LH staff ends with a quarter note followed by an eighth note. The vocal part ends with a quarter note followed by an eighth note.

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
    \revert NoteColumn.glissando-skip
    \undo \hide NoteHead
    \revert NoteHead.no-ledgers
}

\relative c' {
    r8 f8\glissando
    \glissandoSkipOn
    f4 g a a8\noBeam
    \glissandoSkipOff
    a8

    r8 f8\glissando
    \glissandoSkipOn
    g4 a8
    \glissandoSkipOff
    a8 |

    r4 f\glissando \l
    \glissandoSkipOn
    a4\f \r
    \glissandoSkipOff
    b8!\r |
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```
\relative c'{
    \set Score.alternativeNumberingStyle = #'numbers
    \repeat volta 3 { c4 d e f | }
    \alternative {
        { c4 d e f | c2 d \break }
```

```

{ f4 g a b | f4 g a b | f2 a | \break }
{ c4 d e f | c2 d }
}
c1 \break
\set Score.alternativeNumberingStyle = #'numbers-with-letters
\repeat volta 3 { c,4 d e f | }
\alternative {
  { c4 d e f | c2 d \break }
  { f4 g a b | f4 g a b | f2 a | \break }
  { c4 d e f | c2 d }
}
}
c1
}

```

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface` (see Sezione “Graphical Object Interfaces” in *Guida al Funzionamento Interno* for a list of possible values for `grob-interface`). A common use case is printing the ambitus between key signature and time signature.

```

\new Staff \with {
  \consists Ambitus_engraver
} \relative {

```

```
\ambitusAfter key-signature
\key d \major
es'8 g bes cis d2
}
```

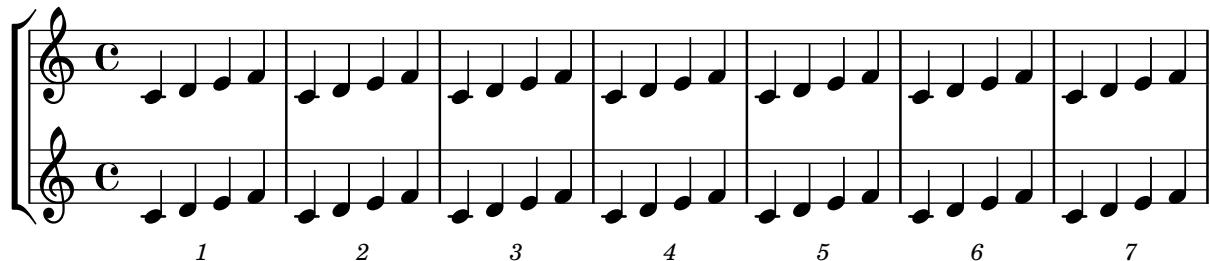

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
\new Dynamics {
  \startMeasureCount
  s1*7
  \stopMeasureCount
}
>>
```

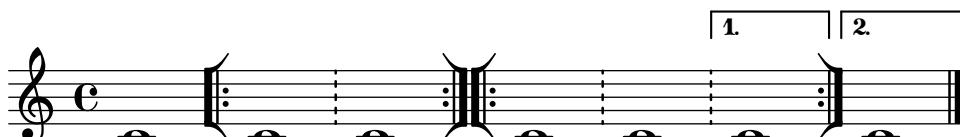

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

```
% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357
```

```
\layout {
  \context {
    \Score
    % Changing the defaults from engraver-init.ly
    defaultBarType = "#!"
    startRepeatType = "#[|:"
    endRepeatType = "#:|]"
    doubleRepeatType = "#:|[]|:"
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {
    { c' }
    {
      %% v2.18 workaround
      \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
      c'
    }
  }
  \bar "|."
}
```

Changing the number of lines in a staff

The number of lines in a staff may be changed by overriding the `StaffSymbol` property `line-count`.

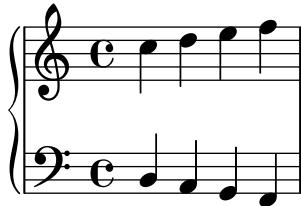

```
upper = \relative c' {
  c4 d e f
}
```

```

lower = \relative c {
  \clef bass
  c4 b a g
}

\score {
  \context PianoStaff <<
    \new Staff {
      \upper
    }
    \new Staff {
      \override Staff.StaffSymbol.line-count = #4
      \lower
    }
  >>
}

```

Changing the staff size

Though the simplest way to resize staves is to use #(set-global-staff-size xx), an individual staff's size can be changed by scaling the properties 'staff-space and fontSize.

```

<<
\new Staff {
  \relative c' {
    \dynamicDown
    c8\ff c c c c c c c
  }
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\f c c c
}
>>

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

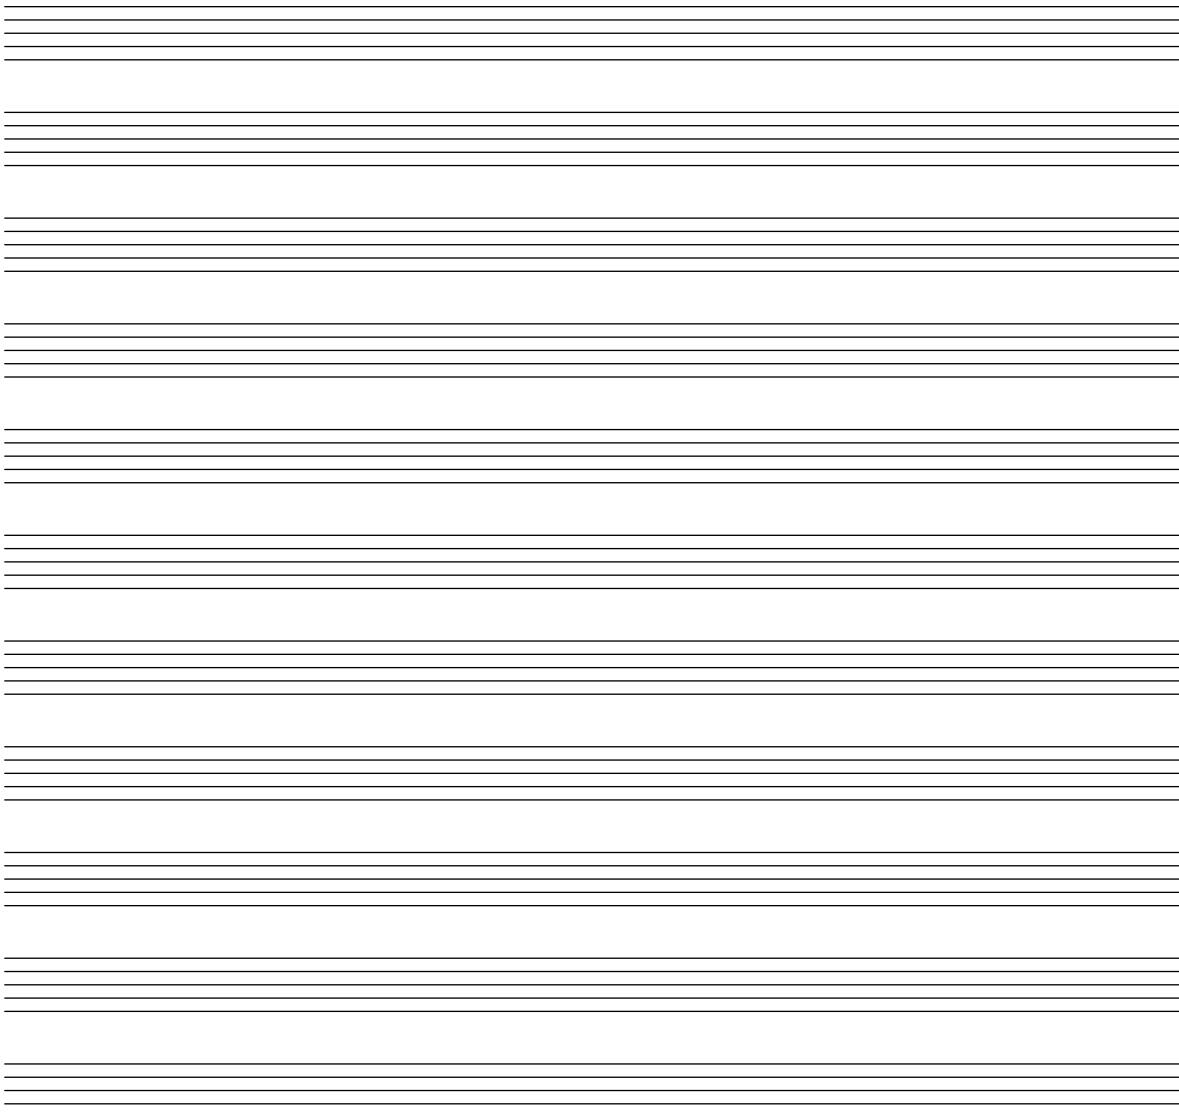

```
#(set-global-staff-size 20)

\score {
{
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (\lambda (grob)(grob-interpret-markup grob
  #{
    \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
  #})))
  clefPosition = #3
```

```

middleCPosition = #3
middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}

```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

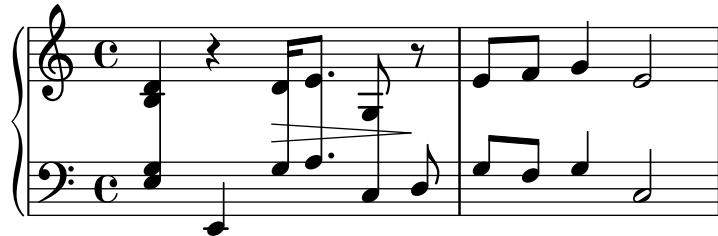

```
\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

{
  \new PianoStaff <<
    \new Staff {
      <b d'>4 r d'16> e'8. g8 r\!
      e'8 f' g'4 e'2
    }
    \new Staff {
      \clef bass
      \voiceOne
      \autoBeamOff
      \crossStaff { <e g>4 e, g16 a8. c8} d
      \autoBeamOn
    }
  >>
}
```

```

g8 f g4 c2
}
>>
}

```

Mostrare la parentesi anche se c'è un solo rigo nel sistema

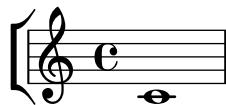

Se c'è un solo rigo in uno dei tipi di rigo `ChoirStaff` o `StaffGroup`, la parentesi e la stanghetta iniziale non appaiono. Si può modificare questo comportamento predefinito sovrascrivendo `collapse-height` e impostando un valore inferiore al numero di linee del rigo.

Nei contesti `PianoStaff` e `GrandStaff`, dove i sistemi iniziano con una parentesi graffa invece di una parentesi quadra, occorre impostare un'altra proprietà, come si vede nel secondo sistema dell'esempio.

```

\score {
    \new StaffGroup <<
        % Must be lower than the actual number of staff lines
        \override StaffGroup.SystemStartBracket.collapse-height = #4
        \override Score.SystemStartBar.collapse-height = #4
        \new Staff {
            c'1
        }
    >>
}
\score {
    \new PianoStaff <<
        \override PianoStaff.SystemStartBrace.collapse-height = #4
        \override Score.SystemStartBar.collapse-height = #4
        \new Staff {
            c'1
        }
    >>
}

```

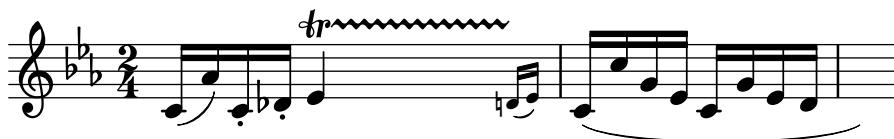

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `#ly:spanner::set-spacing-rods`.

```
\relative c' {
\key c\minor
\time 2/4
c16( as') c,-. des-.
\once\override TrillSpanner.minimum-length = #15
\once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
\afterGrace es4
\startTrillSpan { d16[( \stopTrillSpan es)] }
c( c' g es c g' es d
\hideNotes
c8)
}
```

Estendere i glissandi sulle volte delle ripetizioni

Un glissando che si estende in vari blocchi `\alternative` può essere simulato aggiungendo all'inizio di ogni blocco `\alternative` una nota di abbellimento nascosta da cui inizia un glissando. La nota di abbellimento deve avere la stessa altezza della nota da cui parte il glissando iniziale. In questo frammento si usa una funzione musicale che prende come argomento l'altezza della nota di abbellimento.

Attenzione: nella musica polifonica la nota di abbellimento deve avere una nota di abbellimento corrispondente in tutte le altre voci.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = #3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
\relative c'' {
\repeat volta 3 { c4 d e f\glissando }
\alternative {
{ g2 d }
{ \repeatGliss f g2 e }
{ \repeatGliss f e2 d }
}}
```

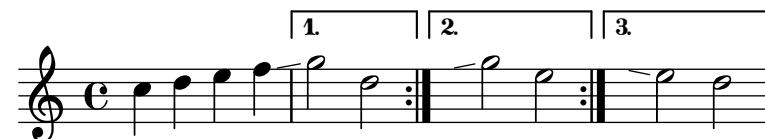

```

        }
    }
}

music = \relative c' {
    \voiceOne
    \repeat volta 2 {
        g a b c\glissando
    }
    \alternative {
        { d1 }
        { \repeatGliss c \once \omit StringNumber e1\2 }
    }
}

\score {
    \new StaffGroup <<
        \new Staff <<
            \new Voice { \clef "G_8" \music }
        >>
        \new TabStaff <<
            \new TabVoice { \clef "moderntab" \music }
        >>
    >>
}
}

```

A tablature staff with three measures. The first measure shows two open strings (0, 2). The second measure shows a tie from the first string to the third string (0-1-3), followed by a quarter note (5). The third measure shows a tie from the second string to the fourth string (4-5).

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

```
%% http://lsr.di.unimi.it/LSR/Item?id=1031

  a4~a
}
```

The musical score consists of three staves of music. Staff 1 begins with a quarter note, followed by a tie to another quarter note, then two eighth notes. Staff 2 begins with a quarter note, followed by a tie to another quarter note. Staff 3 begins with a quarter note, followed by a tie to another quarter note. The music is in common time, with a key signature of one sharp.

Forcing measure width to adapt to MetronomeMark's width

By default, metronome marks do not influence horizontal spacing. This can be solved through a simple override, as shown in the second half of the example.

```
example = {
    \tempo "Allegro"
    R1*6
    \tempo "Rall."
    R1*2
    \tempo "A tempo"
    R1*8
}

{
    \compressMMRests {
        \example
        R1
        R1
        \override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)
        \example
    }
}
```

Allegro 6 **Rall.** 2 **A tempo**

Allegro 6 **Rall.** 2 **A tempo**

Glissandi can skip grobs

`NoteColumn` grobs can be skipped over by glissandi.

```
\relative c' {
    a2 \glissando
    \once \override NoteColumn.glissando-skip = ##t
    f'''4 d,
}
```

A musical staff consisting of five horizontal lines. A treble clef is positioned at the top left. In the center, there is a sharp sign (C#) above a vertical bar line. To the right of the bar line is a note with a vertical stem and a small circle at its top.

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

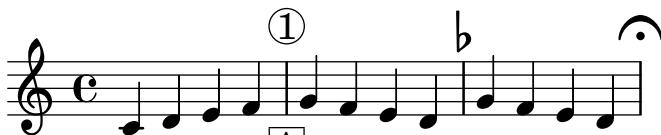

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 (<http://lsr.di.unimi.it/LSR/Item?id=1>) will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsals marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
  c d e f |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \circle 1 \box A }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \flat { \bold \small \italic Fine. } }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
  \mark \markup \center-column { \fermata \box z }
}
```

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

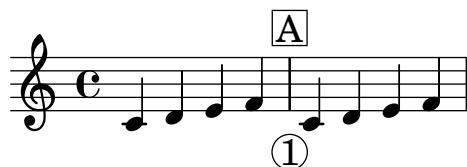

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```

Incipit

Quando si trascrive musica mensurale, un incipit all'inizio del brano è utile per indicare il tempo e l'armatura di chiave originali. I musicisti oggi sono abituati alle stanghette, ma queste non erano note all'epoca della musica mensurale. Come compromesso, spesso le stanghette vengono poste tra i righi, uno stile di formattazione chiamato mensurstriche.

Discantus

Altus

Tenor

Bassus

The image shows a musical score for cello, consisting of three staves. The top staff uses a treble clef, the middle staff uses a bass clef, and the bottom staff uses a bass clef with a '8' indicating eighth note time. The music is divided into measures by vertical bar lines. Below each staff, there are lyrics written in a simple font. The lyrics correspond to the notes and rests in the music. The first staff's lyrics are 'o, om - nis ter - ra, om- ... -us.'. The second staff's lyrics are 'De - o, om - nis ter - ra, ... -us.'. The third staff's lyrics are 'Ju - bi - la - te ... -us.'. The fourth staff's lyrics are 'Ju - bi- ... -us.'.

Inserting score fragments above a staff, as markups

The `\markup` command is quite versatile. In this snippet, it contains a `\score` block instead of texts or marks.

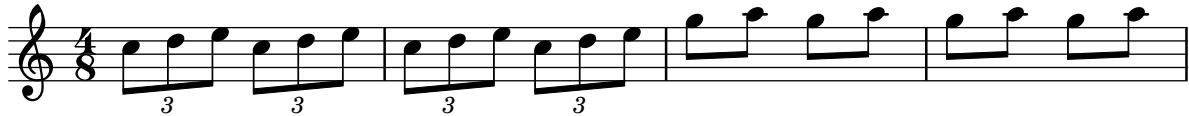

```
tuning = \markup {
  \score {
    \new Staff \with { \remove "Time_signature_engraver" }
    {
      \clef bass
      <c, g, d g>1
    }
    \layout { ragged-right = ##t indent = 0\cm }
  }
}

\header {
  title = "Solo Cello Suites"
  subtitle = "Suite IV"
  subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning }
}

\layout { ragged-right = ##f }

\relative c' {
  \time 4/8
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  g8 a g a
  g8 a g a
}
```

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in `layout` as well.

```
%\layout {
%  \context {
%    \Score
%      stringOneTopmost = ##f
%  }
%  \context {
%    \TabStaff
%      tablatureFormat = #fret-letter-tablature-format
%  }
%}

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "|"
}

<<
\new Staff { \clef "G_8" >_ "default" \m >_ "italian (historic)" \m }
\new TabStaff
{
  \m
  \set Score.stringOneTopmost = ##f
  \set TabStaff.tablatureFormat = #fret-letter-tablature-format
  \m
}
>>
```

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
music = \relative c {
  c4 d e f
  g4 a b c
  d4 e f g
```

```
}
```

```
<<
```

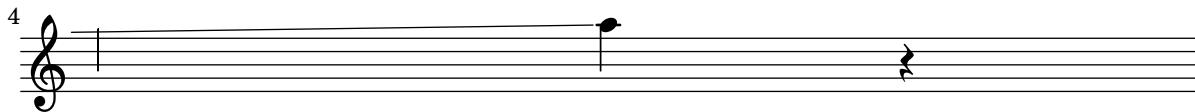

```
\new Staff {
    \clef "G_8"
    \music
}
\new TabStaff \with {
    tablatureFormat = #fret-letter-tablature-format
}
{
    \music
}
>>
```

Lasciare che i glissandi vadano a capo

Per permettere a un glissando di andare a capo se capita su un'interruzione di riga, si impostano le proprietà `breakable` e `after-line-breaking` su `#t`:

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

\relative c' {
    \override Glissando.breakable = ##t
    \override Glissando.after-line-breaking = ##t
    f1\glissando |
    \break
    a4 r2. |
    f1\glissando
    \once \glissandoSkipOn
    \break
    a2 a4 r4 |
}
```

Rendere alcune linee del rigo più spesse delle altre

In ambito didattico può essere utile rendere più spesso una linea del rigo (per esempio, la linea centrale, o per sottolineare la linea della chiave di Sol). Per farlo si possono aggiungere altre linee e posizionarle molto vicino alla linea che deve essere evidenziata, usando la proprietà `line-positions` dell'oggetto `StaffSymbol`.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
\context Voice = "foo" {
  \clef bass
  c4 r g r
  c4 r g r
  c4 r g r
  c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>
```

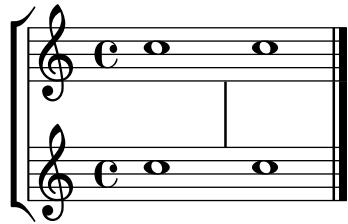

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui righi viene nascosta con `\hide`.

```
global = {
  \hide Staff.BarLine
  s1 s
  % the final bar line is not interrupted
  \undo \hide Staff.BarLine
```

```
\bar "|."
}

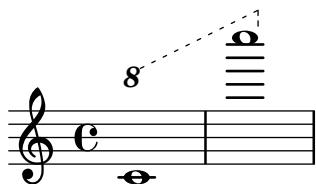

\new StaffGroup \relative c' {
  <<
    \new Staff { << \global { c1 c } >> }
    \new Staff { << \global { c c } >> }
  >>
}
```

Modificare l'inclinazione dell'estensore dell'ottava

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

```
\relative c' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #'((left . ((Y . 0) ; Change the integer here
                 (attach-dir . ,LEFT)
                 (padding . 0)
                 (stencil-align-dir-y . ,CENTER)))
        (right . ((Y . 5) ; Change the integer here
                  (padding . 0)
                  (attach-dir . ,RIGHT)
                  (text . ,(make-draw-dashed-line-markup
                            (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =
    #ly:line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info =
    #ly:line-spanner::calc-right-bound-info
\ottava #1
c1
c'''1
}
```

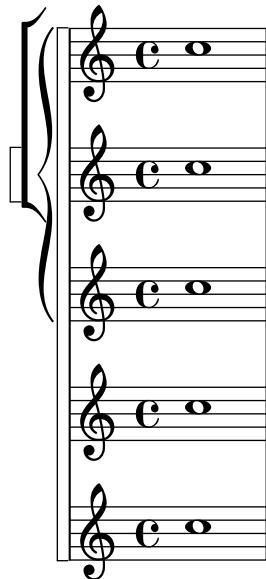

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come

argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
\relative c' <<
  \override StaffGroup.SystemStartSquare.collapse-height = #4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
                                              (SystemStartSquare b) ) c ) d)
  \new Staff { c1 }
  \new Staff { c1 }
>>
```

Armature di chiave non tradizionali

Il comando `\key` comunemente usato imposta la proprietà `keyAlterations` del contesto `Staff`. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```
\set Staff.keyAlterations = #'(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)
```

dove, per ogni elemento della lista, `ottava` indica l'ottava (0 è l'ottava dal Do centrale al Si precedente), `grado` indica la nota all'interno dell'ottava (0 significa Do e 6 significa Si) e `alterazione` può essere `,SHARP`, `,FLAT`, `,DOUBLE-SHARP` etc.

Altrimenti, usando il formato breve per ogni elemento della lista, `(grado . alterazione)`, ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonali dove un “diesis” non è 100 centesimi, `alterazione` si riferisce alla proporzione di un duecentesimo di tono intero.

```
\include "arabic.ly"
```

```
\relative do' {
    \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                  (1 . ,SEMI-FLAT)
                                  (2 . ,FLAT)
                                  (5 . ,FLAT)
                                  (6 . ,SEMI-FLAT))
% \set Staff.extraNatural = ##f
    re reb \dwn reb resd
    dod dob dosd \dwn dob |
    dobsb dods d o do |
}
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

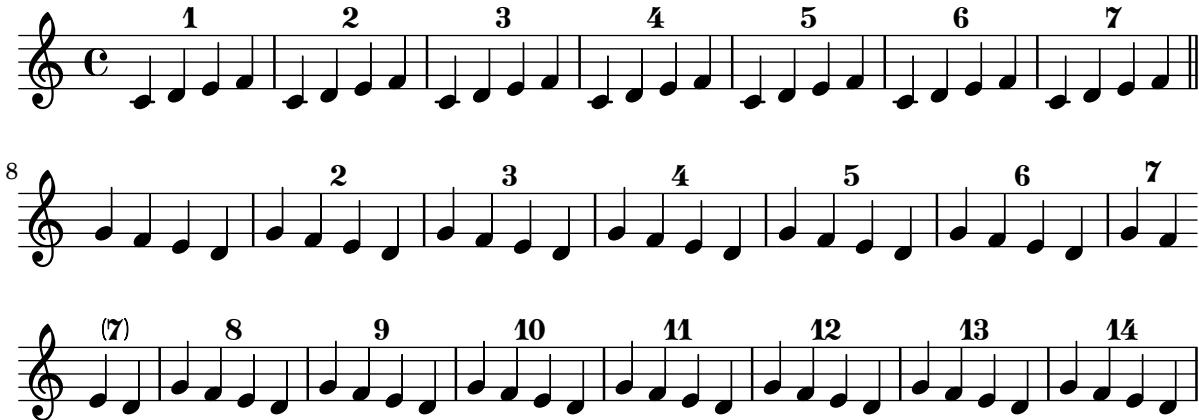

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
    \context {
        \Staff
        \consists #Measure_counter_engraver
    }
}

\new Staff {
    \startMeasureCount
    \repeat unfold 7 {
        c'4 d' e' f'
    }
    \stopMeasureCount
    \bar "||"
    g'4 f' e' d'
    \override Staff.MeasureCounter.count-from = #2
    \startMeasureCount
    \repeat unfold 5 {
        g'4 f' e' d'
    }
    g'4 f'
    \bar ""
    \break
```

```
e'4 d'  
\repeat unfold 7 {  
    g'4 f' e' d'  
}  
\stopMeasureCount  
}
```

Modello per orchestra, coro e pianoforte

Questo modello mostra come usare i contesti annidati `StaffGroup` e `GrandStaff` per creare sottogruppi degli strumenti dello stesso tipo. Mostra anche come usare `\transpose` in modo che le variabili mantengano la musica per gli strumenti traspositori nell'intonazione reale.

```
#(set-global-staff-size 17)  
\paper {  
    indent = 3.0\cm % add space for instrumentName  
    short-indent = 1.5\cm % add less space for shortInstrumentName  
}  
  
fluteMusic = \relative c' { \key g \major g'1 b }

\layout { }
}
```

The image shows a musical score with 15 staves. The instruments listed on the left are: Flute, Clarinet in B-flat, Horn in F, Trumpet in C, Percussion, Piano, Soprano, Alto I, Alto II, Tenor, Violin I, Violin II, Viola, Cello, and Double Bass. The score is in common time with a key signature of one sharp. Notes are mostly quarter notes (open circles). Some lyrics are placed above the staff, such as 'Lyr - ics' for Alto I, Alto II, and Tenor, and 'Ah - ah' for Tenor. A measure number '8' is at the bottom left.

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```
<<
\new Staff <-
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
```

```
\override LyricText.extra-offset = #'(0 . 8.6)
\override LyricExtender.extra-offset = #'(0 . 8.6)
\override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }
>>
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 { a8 }
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_ "up a tone" >>
}
```

A musical staff in common time with a key signature of one sharp (F#). It shows two voices: 'clar.' and 'sax.'. Both voices play eighth notes. The 'clar.' voice starts with a quarter note followed by an eighth note pair (one sharp), another eighth note pair (one sharp), and a final eighth note. The 'sax.' voice follows a similar pattern. Below the staff, the text 'up a tone' is centered under the notes.

Quoting another voice

The `quotedEventTypes` property determines the music event types which should be quoted. The default value is (`note-event rest-event tie-event beam-event tuplet-span-event`), which means that only the notes, rests, ties, beams and tuplets of the quoted voice will appear in the `\quoteDuring` expression. In the following example, a 16th rest is not quoted since `rest-event` is not in `quotedEventTypes`.

For a list of event types, consult the “Music classes” section of the Internals Reference.

```
quoteMe = \relative c' {
    fis4 r16 a8.-> b4\ff c
}
\addQuote quoteMe \quoteMe

original = \relative c'' {
    c8 d s2
    \once \override NoteColumn.ignore-collision = ##t
    es8 gis8
}

<<
\new Staff \with { instrumentName = "quoteMe" }
\quoteMe

\new Staff \with { instrumentName = "orig" }
\original

\new Staff \with {
    instrumentName = "orig+quote"
    quotedEventTypes = #'(note-event articulation-event)
}
\relative c''
<<
\original
\new Voice {
    s4
    \set fontSize = #-4
    \override Stem.length-fraction = #(magstep -4)
    \quoteDuring "quoteMe" { \skip 2. }
}
>>
>>
```

The musical score consists of three staves. The top staff, labeled "quoteMe", starts with a note, followed by a 16th rest, then a note with a fermata over it, and finally a dynamic marking "ff". The middle staff, labeled "orig", has two eighth-note pairs. The bottom staff, labeled "orig+quote", also has two eighth-note pairs and includes a 16th note.

Removing brace on first line of piano score

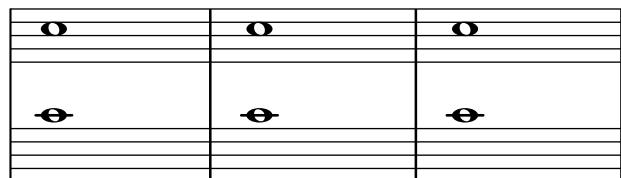

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`.

It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```
someMusic = {
    \once \override Staff.Clef.stencil = ##f
    \once \override Staff.TimeSignature.stencil = ##f
    \repeat unfold 3 c1 \break
    \repeat unfold 5 c1 \break
    \repeat unfold 5 c1
}

\score {
    \new PianoStaff
    <<
        \new Staff = "right" \relative c' \someMusic
        \new Staff = "left" \relative c' { \clef F \someMusic }
    >>
    \layout {
        indent=75
        \context {
            \PianoStaff
            \alterBroken transparent #'(##t) SystemStartBrace
        }
    }
}
```

4

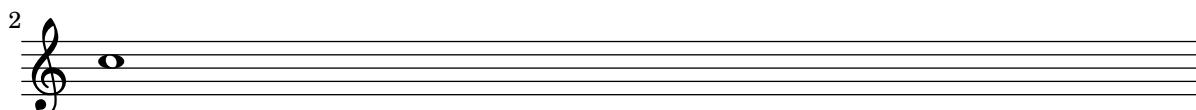

9

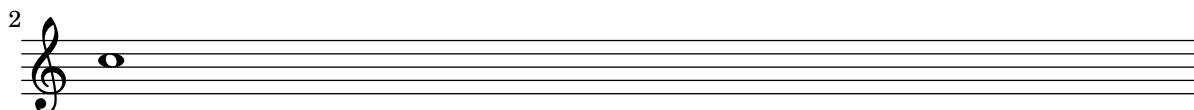

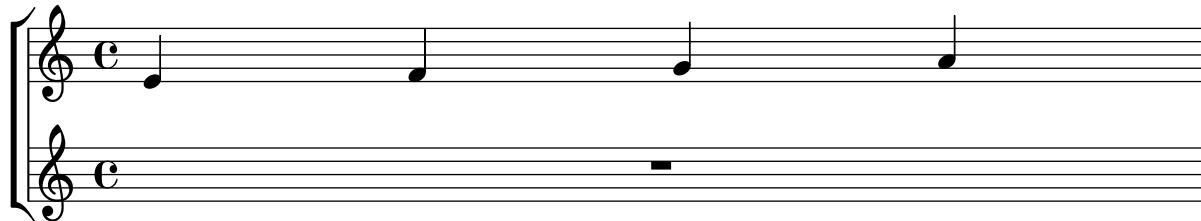

Eliminare la prima linea vuota

Il primo rigo vuoto si può togliere dalla partitura impostando la proprietà `remove-first` di `VerticalAxisGroup`. Questa impostazione agisce a livello globale se posta nel blocco `\layout`, a livello locale se posta nel rigo specifico che deve essere tolto. Nel secondo caso, si deve specificare il contesto (`Staff` si applica solo al rigo corrente) prima della proprietà.

Il rigo inferiore del secondo gruppo di righi non viene rimosso, perché l'impostazione ha effetto solo sul rigo in cui si trova.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>
```

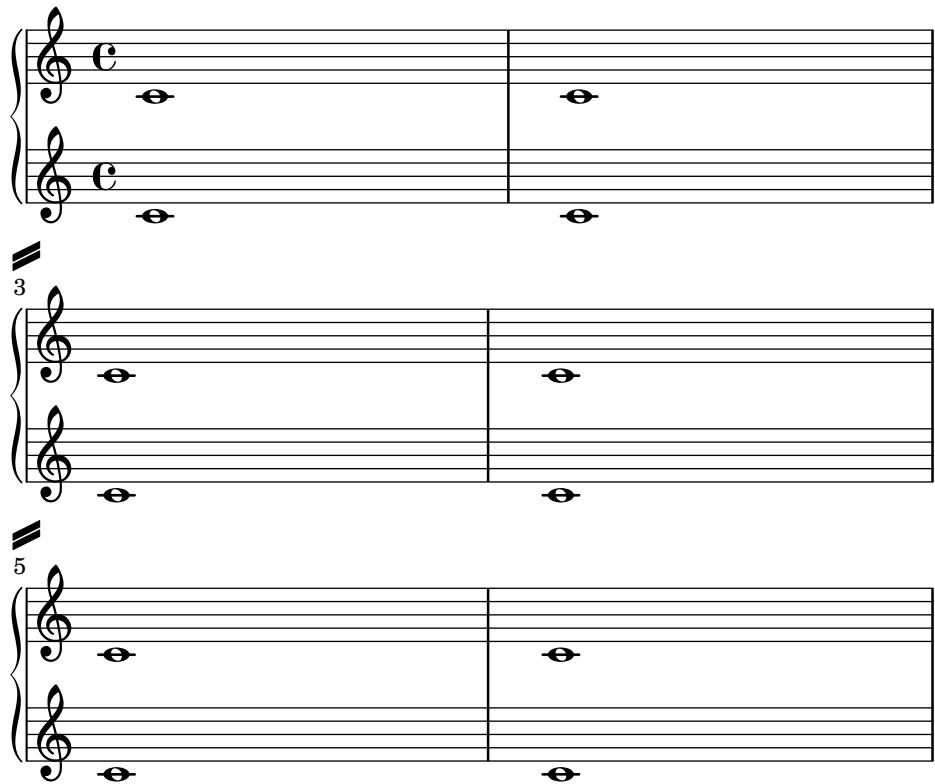

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
    system-separator-markup = \slashSeparator
    line-width = 120
}

notes = \relative c' {
    c1 | c \break
    c1 | c \break
    c1 | c
}

\book {
    \score {
        \new GrandStaff <-
            \new Staff \notes
            \new Staff \notes
        >>
    }
}
```

Tick bar lines

'Tick' bar lines are often used in music where the bar line is used only for coordination and is not meant to imply any rhythmic stress.

```
\relative c' {
  \set Score.defaultBarType = #"""
  c4 d e f
  g4 f e d
  c4 d e f
  g4 f e d
  \bar "|."
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

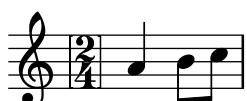

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```
{
% The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = #"clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = #0
\set Staff.clefTransposition = #0
\set Staff.middleCPosition = #-4
\set Staff.middleCClefPosition = #-4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
c'1
\set Staff.clefGlyph = #"clefs.G"
c'1
\set Staff.clefGlyph = #"clefs.C"
c'1
```

```
\set Staff.clefTransposition = #7
c'1
\set Staff.clefTransposition = #0
\set Staff.clefPosition = #0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = #0
c'1
}
```

The first measure shows a C-clef (G-clef) and a flat sign. The second measure shows a sharp sign. The third measure shows a bass F-clef. The fourth measure shows a sharp sign. The fifth measure shows a bass B-clef. The sixth measure shows a flat sign. The seventh measure shows a G-clef and a flat sign. The eighth measure shows a sharp sign.

The first measure shows a bass F-clef and a sharp sign. The second measure shows a G-clef. The third measure shows a bass B-clef. The fourth measure shows a sharp sign. The fifth measure shows a bass F-clef. The sixth measure shows a sharp sign.

Two \partCombine pairs on one staff

The `\partCombine` function takes two music expressions each containing a part, and distributes them among four Voices named “two” “one” “solo” and “chords” depending on when and how the parts merged into a common voice. The voices output from `\partCombine` can have their layout properties adjusted in the usual way. Here we define extensions of `\partCombine` to make it easier to put four voices on a staff.

```
soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }
```

```
\new Staff <<
  \key b\minor
  \clef alto
  \partial 4
  \transpose b b'
  \partCombineUp \soprano \alto
  \partCombineDown \tenor \bass
>>
```

```
\layout {

Usare una parentesi quadra all'inizio di un gruppo di righi

Si può usare il segno `SystemStartSquare` (uno dei segni che delimitano l'inizio del sistema) impostandolo esplicitamente in un contesto `StaffGroup` o `ChoirStaff`.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```

Using autochange with more than one voice

Using `autochange` with more than one voice.

```
\score
{
  \new PianoStaff
  <<
    \new Staff = "up" {
      <<
        \set Timing.beamExceptions = #'()
        \set Timing.beatStructure = #'(4)
        \new Voice {
          \voiceOne
          \autoChange
          \relative c' {
            g8 a b c d e f g
            g,,8 a b c d e f g
          }
        }
      \new Voice {
```

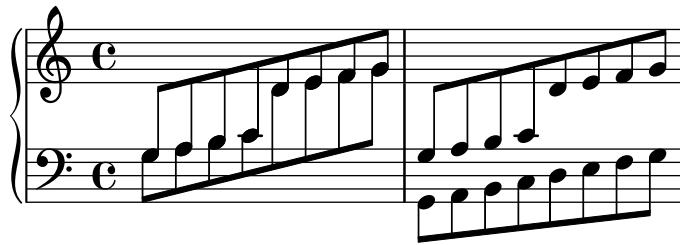

```

    \clef bass
}
>>
}

```

Using marklines in a Frenched score

Using `MarkLine` contexts (such as in LSR1010 (<http://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```

bars = {
    \tempo "Allegro" 4=120
    s1*2
    \repeat unfold 5 { \mark \default s1*2 }
    \bar "|"
    \tempo "Adagio" 4=40
    s1*2
    \repeat unfold 8 { \mark \default s1*2 }
    \bar "|."
}

winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }
strings = \repeat unfold 240 { c''8 }

Musical score for orchestra, page 11, measures 11-12. The score includes parts for Winds (Flute, Clarinet), Tuba (Tbn), and Strings. The key signature is B-flat major (two flats). The tempo is Adagio ($\text{♩} = 40$). Measure 11 starts with the Winds playing eighth-note patterns. Measure 12 begins with a dynamic change, indicated by a circled 'o' over the strings' notes.

16

Winds

G H

Strings

The image contains two musical score snippets. The top snippet, labeled '21', shows three staves: 'Winds' (two staves), 'Tpt' (one staff), and 'Strings' (one staff). The 'Winds' staves have rehearsal marks 'J', 'K', and 'L' above them. The 'Tpt' staff has 'J', 'K', and 'L' below it. The 'Strings' staff has 'J', 'K', and 'L' below it. The bottom snippet, labeled '26', shows 'Winds' and 'Strings' staves. The 'Winds' staff has 'M' and 'N' above it. The 'Strings' staff has 'M' and 'N' below it.

Vertical aligned StaffGroups without connecting SystemStartBar

This snippet shows how to achieve vertically aligned StaffGroups with a SystemStartBar for each StaffGroup, but without connecting them.

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

A musical staff for two voices (Soprano and Bass) in common time. The key signature is C major. The soprano part consists of quarter notes, while the bass part consists of half notes. The lyrics are: Wer nur den lieben Gott lässt wal-

Pupil: Here's my version!

A musical staff for two voices (Soprano and Bass) in common time. The key signature is C major. The soprano part includes eighth-note patterns and sixteenth-note patterns, while the bass part consists of half notes. The lyrics are: Wer nur den lieben Gott lässt wal-

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

A musical staff for two voices (Soprano and Bass) in common time. The key signature is C major. The soprano part includes eighth-note patterns and sixteenth-note patterns, while the bass part includes eighth-note patterns and sixteenth-note patterns. The lyrics are: Wer nur den lieben Gott lässt wal-

The image shows three staves of musical notation, each consisting of a treble clef staff and a bass clef staff. The notation is in common time (indicated by a '3' at the beginning of each staff). The lyrics are:

ten und hof - fet auf ihn al - le Zeit

Staff 1: Shows simple vertical bar lines under each note, indicating a single voltaic change.

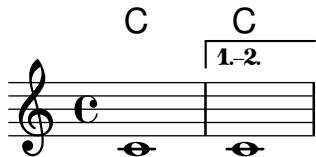

Staff 2: Shows horizontal bar lines connecting the notes of the first measure to the notes of the second measure, indicating a repeat of the first section.

Staff 3: Shows horizontal bar lines connecting the notes of the first measure to the notes of the second measure, and also includes vertical bar lines under each note, indicating a repeat of the first section.

Volta sotto gli accordi

Aggiungendo l'incisore `Volta_engraver` al rigo, è possibile inserire le volte sotto gli accordi.

```

Editorial annotations

Sezione “Editorial annotations” in *Guida alla Notazione*

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' {
    c4-1 d-2 f-4 e-3
}
```

Adding links to objects

To add a link to a grob-stencil you could use `add-link` as defined here. Works with `\override` and `\tweak`.

Drawback: `point-and-click` will be disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```
#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (begin
            (let* (
                  (x-ext (ly:stencil-extent stil X))
                  (y-ext (ly:stencil-extent stil Y))
                  (url-expr `(url-link url-strg ,x-ext ,y-ext))
                  (new-stil (ly:stencil-add
                               (ly:make-stencil url-expr x-ext y-ext) stil)))
              (new-stil (ly:grob-set-property! grob 'stencil new-stil)))
            #f))))
  %%% test

```

```
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }
```

```
\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\\low \\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #(ly:make-moment 1/8)
    }
  }
}
```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gandi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gandi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gandi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##t
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = #only-if-beamed
  a[-1 b]-2 g-0 r
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```

\relative c'{
  \set Score.alternativeNumberingStyle = #'numbers
  \repeat volta 3 { c4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1 \break
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \repeat volta 3 { c,4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1
}

```

A musical staff in common time with a treble clef. The key signature is C major. The melody begins with a quarter note, followed by a series of eighth notes. The first measure ends with a vertical bar line and a Roman numeral 'I' above it.

A musical staff in G clef and common time. The first six notes are eighth notes on the first six lines, followed by a quarter note on the first line, a half note on the second line, and a whole note on the fourth line.

A musical staff in G clef. Measure 2 consists of four eighth notes on the first, second, third, and fourth lines. Measure 3 begins with a fermata over the first note, followed by three eighth notes on the first, second, and third lines.

Musical score for piano, page 5, system 1. The score consists of two staves. The top staff uses a treble clef and has a key signature of one sharp (F#). The bottom staff uses a bass clef and has a key signature of one sharp (F#). The music begins with a forte dynamic (F) and consists of eighth-note patterns. Measure 1 starts with a forte dynamic (F), followed by a half note. Measure 2 starts with a half note. Measure 3 starts with a half note. Measure 4 starts with a half note. Measure 5 starts with a half note. Measure 6 starts with a half note. Measure 7 starts with a half note. Measure 8 starts with a half note. Measure 9 starts with a half note. Measure 10 starts with a half note. Measure 11 starts with a half note. Measure 12 starts with a half note. Measure 13 starts with a half note. Measure 14 starts with a half note. Measure 15 starts with a half note. Measure 16 starts with a half note. Measure 17 starts with a half note. Measure 18 starts with a half note. Measure 19 starts with a half note. Measure 20 starts with a half note. Measure 21 starts with a half note. Measure 22 starts with a half note. Measure 23 starts with a half note. Measure 24 starts with a half note. Measure 25 starts with a half note. Measure 26 starts with a half note. Measure 27 starts with a half note. Measure 28 starts with a half note. Measure 29 starts with a half note. Measure 30 starts with a half note. Measure 31 starts with a half note. Measure 32 starts with a half note. Measure 33 starts with a half note. Measure 34 starts with a half note. Measure 35 starts with a half note. Measure 36 starts with a half note. Measure 37 starts with a half note. Measure 38 starts with a half note. Measure 39 starts with a half note. Measure 40 starts with a half note. Measure 41 starts with a half note. Measure 42 starts with a half note. Measure 43 starts with a half note. Measure 44 starts with a half note. Measure 45 starts with a half note. Measure 46 starts with a half note. Measure 47 starts with a half note. Measure 48 starts with a half note. Measure 49 starts with a half note. Measure 50 starts with a half note. Measure 51 starts with a half note. Measure 52 starts with a half note. Measure 53 starts with a half note. Measure 54 starts with a half note. Measure 55 starts with a half note. Measure 56 starts with a half note. Measure 57 starts with a half note. Measure 58 starts with a half note. Measure 59 starts with a half note. Measure 60 starts with a half note. Measure 61 starts with a half note. Measure 62 starts with a half note. Measure 63 starts with a half note. Measure 64 starts with a half note. Measure 65 starts with a half note. Measure 66 starts with a half note. Measure 67 starts with a half note. Measure 68 starts with a half note. Measure 69 starts with a half note. Measure 70 starts with a half note. Measure 71 starts with a half note. Measure 72 starts with a half note. Measure 73 starts with a half note. Measure 74 starts with a half note. Measure 75 starts with a half note. Measure 76 starts with a half note. Measure 77 starts with a half note. Measure 78 starts with a half note. Measure 79 starts with a half note. Measure 80 starts with a half note. Measure 81 starts with a half note. Measure 82 starts with a half note. Measure 83 starts with a half note. Measure 84 starts with a half note. Measure 85 starts with a half note. Measure 86 starts with a half note. Measure 87 starts with a half note. Measure 88 starts with a half note. Measure 89 starts with a half note. Measure 90 starts with a half note. Measure 91 starts with a half note. Measure 92 starts with a half note. Measure 93 starts with a half note. Measure 94 starts with a half note. Measure 95 starts with a half note. Measure 96 starts with a half note. Measure 97 starts with a half note. Measure 98 starts with a half note. Measure 99 starts with a half note. Measure 100 starts with a half note.

Musical staff 6b, measure 1 through measure 8. The staff begins with a treble clef, a key signature of one sharp (F#), and a common time signature. Measure 1 consists of eighth notes on the A, C, E, and G strings. Measures 2 and 3 also consist of eighth notes on the same four strings. Measures 4 and 5 begin with sixteenth-note patterns on the A and C strings. Measures 6 and 7 continue with sixteenth-note patterns on the A and C strings. Measure 8 concludes with a single eighth note on the G string.

Musical staff 6c, measures 3-10. The staff begins with a treble clef, a key signature of one sharp, and a common time signature. Measure 3 starts with a quarter note on the A line, followed by eighth notes on the G line, F line, E line, and D line. Measures 4-10 show a repeating pattern of eighth notes on the D line, G line, C line, and F line.

Parentesi analitiche sopra il rigo

Delle semplici parentesi analitiche orizzontali vengono aggiunte, per impostazione predefinita, sotto il rigo. L'esempio seguente mostra un modo per posizionarle sopra il rigo.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

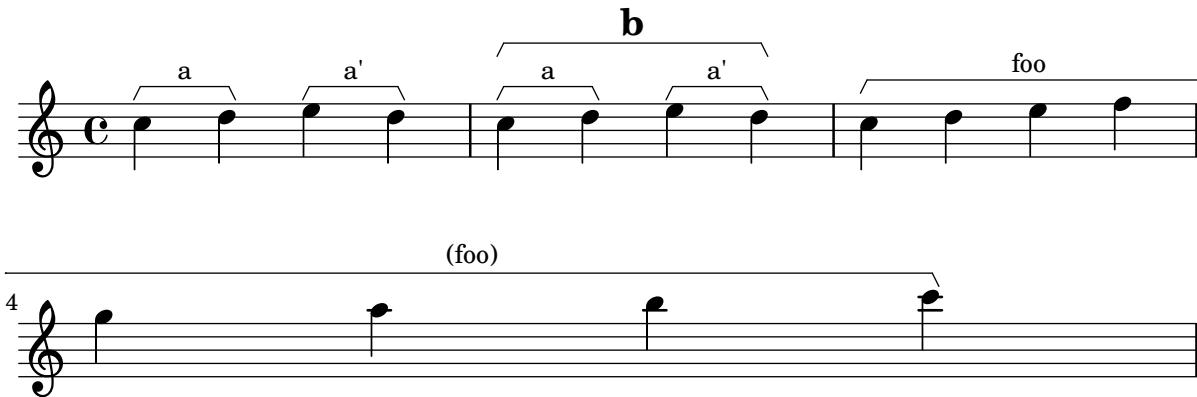

Parentesi analitiche con etichette

Si può aggiungere del testo alle parentesi analitiche tramite la proprietà `text` del grob `HorizontalBracketText`. L'aggiunta di vari frammenti di testo alle parentesi che iniziano nello stesso momento musicale richiede l'uso del comando `\tweak`. Dopo un'interruzione di linea il testo viene messo tra parentesi.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a''"
  e''\startGroup d''\stopGroup |
  c''-\tweak HorizontalBracketText.text
    \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
  d''\stopGroup
  e''-\tweak HorizontalBracketText.text "a'" \startGroup
  d''\stopGroup\stopGroup |
  c''-\tweak HorizontalBracketText.text foo \startGroup
    d' ' e' ' f' ' | \break
  g' ' a' ' b' ' c''' \stopGroup
}
```

Applicazione degli stili delle teste di nota in base al grado della scala

La proprietà `shapeNoteStyles` può essere usata per definire vari stili di teste di nota per ogni grado della scala (definita dall'armatura di chiave o dalla proprietà `tonic`). Questa proprietà richiede un insieme di simboli, che può essere puramente arbitrario (sono messe espressioni geometriche come `triangle`, `cross` e `xcircle`) o basato sull'antica tradizione tipografica americana (sono consentiti anche alcuni nomi di nota latini).

Detto questo, per imitare gli antichi canzionieri americani, ci sono vari stili predefiniti disponibili attraverso dei comodi comandi come `\aikenHeads` o `\sacredHarpHeads`.

Questo esempio mostra modi diversi di ottenere teste di nota di varie forme e illustra la possibilità di trasporre una melodia senza perdere la corrispondenza tra le funzioni armoniche e gli stili delle teste.

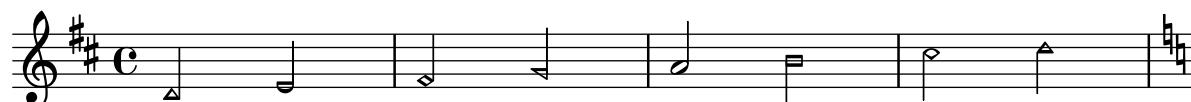

```

fragment = {
    \key c \major
    c2 d
    e2 f
    g2 a
    b2 c
}

\new Staff {
    \transpose c d
    \relative c' {
        \set shapeNoteStyles = ##(do re mi fa
                                #f la ti)
        \fragment
    }
    \break

    \relative c' {
        \set shapeNoteStyles = ##(cross triangle fa #f
                                mensural xcircle diamond)
        \fragment
    }
}

```

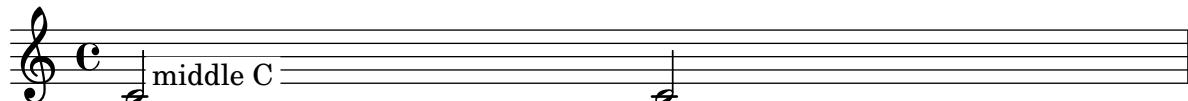

Blanking staff lines using the \whiteout command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
    ragged-right = ##f
}

\relative c' {
    \override TextScript.extra-offset = #'(2 . 4)
    c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

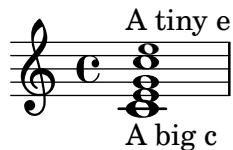

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
    <\tweak font-size #-2 c e g c
    \tweak font-size #+2 e>1
    ^\markup { A tiny e }_\markup { A big c }
}
```

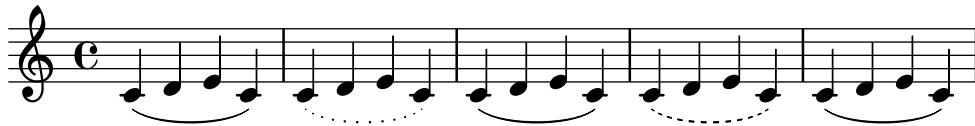

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
    c4( d e c)
    \slurDotted
    c4( d e c)
    \slurSolid
    c4( d e c)
    \slurDashed
    c4( d e c)
    \slurSolid
    c4( d e c)
```

}

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

```
%Association list of pitches to colors.
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue)))))

%Compare pitch and alteration (not octave).
#(define (pitch>equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2)))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch>equals?)))
    (if color
        (cdr color)))))

#(define (color-notehead grob)
  (pitch-to-color
    (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi <> anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
    \set fingeringOrientations = #'(left)
    <c-1 e-3 a-5>4
    \set fingeringOrientations = #'(down)
    <c-1 e-3 a-5>4
    \set fingeringOrientations = #'(down right up)
    <c-1 e-3 a-5>4
    \set fingeringOrientations = #'(up)
    <c-1 e-3 a-5>4
    \set fingeringOrientations = #'(left)
    <c-1>2
    \set fingeringOrientations = #'(down)
    <e-3>2
    \set stringNumberOrientations = #'(up left down)
    <f\3 a\2 c\1>1
    \set strokeFingerOrientations = #'(down right up)
    <c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari \override. La proprietà **outside-staff-priority** deve essere impostata su #f, perché altrimenti questa avrebbe la precedenza sulla proprietà **avoid-slur**. Cambiando le frazioni 2/3 e 1/3 si aggiusta la posizione orizzontale.

```
\relative c' {
  c2*2/3 ( s2*1/3\turn d4) r
  <<
  { c4.( d8) }
  { s4 s\turn }
>>
\transpose c d \relative c' <<
  { c4.( d8) }
  {
    s4
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
```

```
\once \override AccidentalSuggestion.avoid-slur = #'inside
\once \override AccidentalSuggestion.font-size = -3
\once \override AccidentalSuggestion.script-priority = -1
\single \hideNotes
b8-\turn \noBeam
s8
}
>>
}
```

Creating blank staves

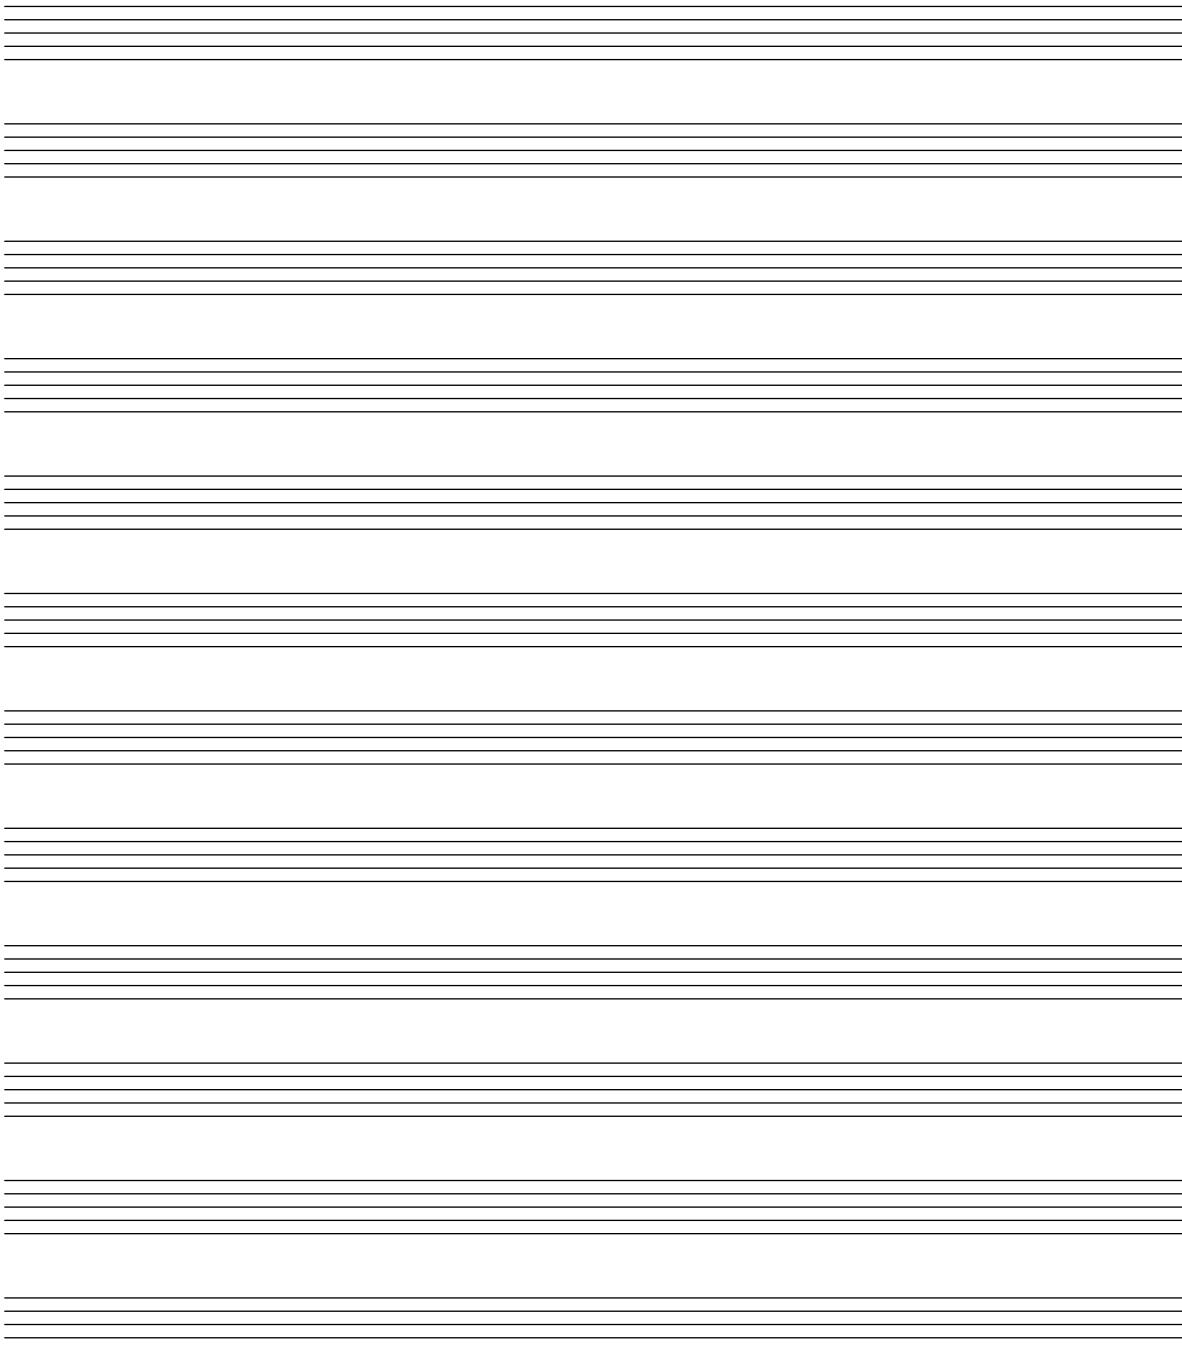

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```
#(set-global-staff-size 20)
```

```
\score {
{
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}
```

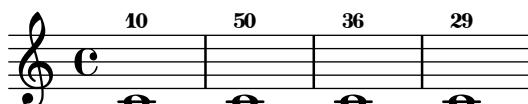

```
% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
    c1-10
    c1-50
    c1-36
    c1-29
}
```

Direzione predefinita dei gambi sulla linea centrale del rigo

La direzione predefinita dei gambi sulla linea centrale del rigo si imposta con la proprietà `neutral-direction` dell'oggetto `Stem`.

```
\relative c'' {
    a4 b c b
    \override Stem.neutral-direction = #up
    a4 b c b
    \override Stem.neutral-direction = #down
    a4 b c b
}
```

Different font size settings for `instrumentName` and `shortInstrumentName`

Choose different font sizes for `instrumentName` and `shortInstrumentName` as a context override.

```
InstrumentNameFontSize =
#(define-music-function (font-size-pair)(pair?)
  "Sets the @code{font-size} of @code{InstrumentName}.
  The font-size for the initial @code{instrumentName} is taken from the first
  value in @var{font-size-pair}.  @code{shortInstrumentName} will get the second
  value of @var{font-size-pair}.
  "

  ; This code could be changed/extended to set different values for each
  ; occurrence of `shortInstrumentName'
```

```
#{
\override InstrumentName.after-line-breaking =
  #(lambda (grob)
    (let* ((orig (ly:grob-original grob))
           (siblings (if (ly:grob? orig)
                         (ly:spanner-broken-into orig)
                         '())))
      ...))}
```

```

(if (pair? siblings)
  (begin
    (ly:grob-set-property!
      (car siblings)
      'font-size
      (car font-size-pair))
    (for-each
      (lambda (g)
        (ly:grob-set-property! g 'font-size (cdr font-size-pair)))
      (cdr siblings))))))
#}

\layout {
  \context {
    \Staff
    \InstrumentNameFontSize #'(6 . -3)
  }
}

\new StaffGroup <<
\new Staff
\with {
  instrumentName = "Flute"
  shortInstrumentName = "Fl."
}
{ c''1 \break c' \break c' }

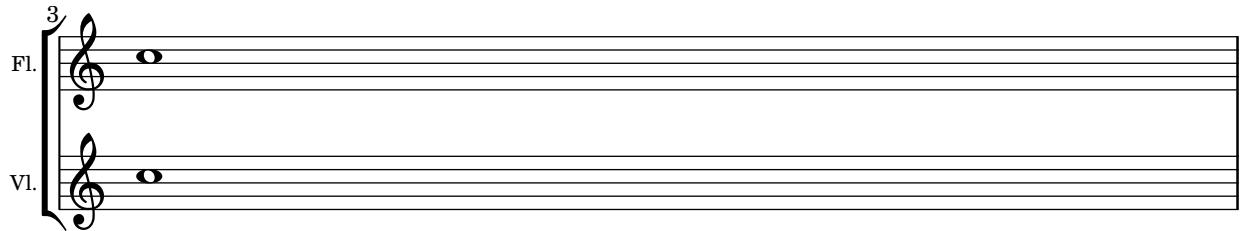

\new Staff
\with {
  instrumentName = "Violin"
  shortInstrumentName = "Vl."
}
{ c''1 \break c' \break c' }

>>

```

A musical score consisting of two staves. The top staff is labeled 'Flute' and the bottom staff is labeled 'Violin'. Both staves begin with a quarter note (c) followed by a half note (c'). The music is in common time.

A musical score consisting of two staves. The top staff is labeled 'Fl.' and the bottom staff is labeled 'Vl.'. Both staves begin with a half note (c') followed by a quarter note (c). The music is in common time.

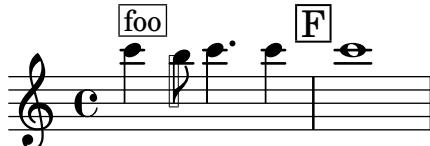

Drawing boxes around grobs

The `print`-function can be overridden to draw a box around an arbitrary grob.

```
\relative c' {
    \override TextScript.stencil =
        #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
    c'4^"foo"

    \override Stem.stencil =
        #(make-stencil-boxer 0.05 0.25 ly:stem::print)
    \override Score.RehearsalMark.stencil =
        #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
    b8

    \revert Stem.stencil
    \revert Flag.stencil
    c4. c4
    \mark "F"
    c1
}
```

Drawing circles around note heads

Here is how to circle a note.

```
circle =
\once \override NoteHead.stencil = #(lambda (grob)
  (let* ((note (ly:note-head::print grob))
         (combo-stencil (ly:stencil-add
                           note
                           (circle-stencil note 0.1 0.8))))
    (ly:make-stencil (ly:stencil-expr combo-stencil)
                    (ly:stencil-extent note X)
                    (ly:stencil-extent note Y)))))

{ \circle c' }
```

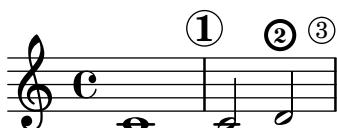

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
  c1
  \set Score.markFormatter =
  #(lambda (mark context)
    (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d^\markup {
    \override #'(thickness . 3) {
      \circle \finger 2
    }
  }
  \override Score.BarNumber.break-visibility = #all-visible
  \override Score.BarNumber.stencil =
  #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Embedding native PostScript in a `\markup` block

PostScript code can be directly inserted inside a `\markup` block.

% PostScript is a registered trademark of Adobe Systems Inc.

```
\relative c'' {
  a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
  -\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke" }

  b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
  s2
  a'1
}
```

Modificare l'aspetto delle linee della griglia

L'aspetto delle linee della griglia può essere modificato sovrascrivendo alcune delle loro proprietà.

```
\score {
  \new ChoirStaff <<
    \new Staff {
      \relative c'' {
```

```

\stemUp
c'4. d8 e8 f g4
}
}
\new Staff {
\relative c {
% this moves them up one staff space from the default position
\override Score.GridLine.extra-offset = #'(0.0 . 1.0)
\stemDown
\clef bass
\once \override Score.GridLine.thickness = #5.0
c4
\once \override Score.GridLine.thickness = #1.0
g'4
\once \override Score.GridLine.thickness = #3.0
f4
\once \override Score.GridLine.thickness = #5.0
e4
}
}
>>
\layout {
\context {
\Staff
% set up grids
\consists "Grid_point_engraver"
% set the grid interval to one quarter note
gridInterval = #(ly:make-moment 1/4)
}
\context {
\Score
\consists "Grid_line_span_engraver"
% this moves them to the right half a staff space
\override NoteColumn.X-offset = #-0.5
}
}
}
}
```

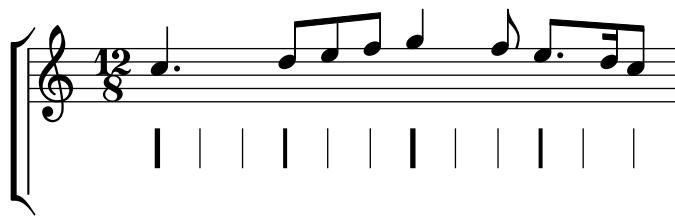

Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second stave invisible, and make the lines shorter like in this snippet.

```
\score {
    \new ChoirStaff {
        \relative c' {
            \new Staff {
                \time 12/8
                \stemUp
                c4. d8 e8 f g4 f8 e8. d16 c8
            }
            \new Staff {
                % hides staff and notes so that only the grid lines are visible
                \hideNotes
                \hide Staff.BarLine
                \override Staff.StaffSymbol.line-count = #0
                \hide Staff.TimeSignature
                \hide Staff.Clef

                % dummy notes to force regular note spacing
                \once \override Score.GridLine.thickness = #4.0
                c8 c c
                \once \override Score.GridLine.thickness = #3.0
                c8 c c
                \once \override Score.GridLine.thickness = #4.0
                c8 c c
                \once \override Score.GridLine.thickness = #3.0
                c8 c c
            }
        }
        >>
    }
    \layout {
        \context {
            \Score
            \consists "Grid_line_span_engraver"
            % center grid lines horizontally below note heads
            \override NoteColumn.X-offset = #-0.5
        }
        \context {
            \Staff
            \consists "Grid_point_engraver"
            gridInterval = #(ly:make-moment 1/8)
            % set line length and positioning:
            % two staff spaces above center line on hidden staff
            % to four spaces below center line on visible staff
            \override GridPoint.Y-extent = #'(2 . -4)
        }
        ragged-right = ##t
    }
}
```

Martellato e strappato usando accordi

Quando il martellato o lo strappato si applicano a delle note in un accordo, viene disegnato un solo arco. Ma è possibile avere un “doppio arco” impostando la proprietà `doubleSlurs` su `#t`.

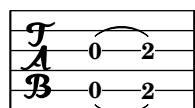

```
\new TabStaff {
    \relative c' {
        % chord hammer-on and pull-off
        \set doubleSlurs = #t
        <g' b>8( <a c> <g b>
    }
}
```

Martellato e strappato usando le voci

L’arco del martellato o dello strappato è rivolto in alto nella prima e terza voce, mentre è rivolto in basso nella seconda e quarta voce.

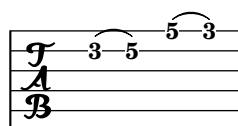

```
\new TabStaff {
    \relative c' {
        << { \voiceOne g2( a ) }
        \\ { \voiceTwo a,( b ) }
        >> \oneVoice
    }
}
```

Martellato e strappato

Il martellato (hammer on) e lo strappato (pull off) si possono ottenere con le legature di portamento.

```
\new TabStaff {
    \relative c' {
        d4( e\2)
        a( g)
    }
}
```

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

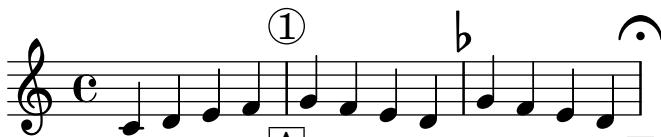

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 (<http://lsr.di.unimi.it/LSR/Item?id=1>) will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsals marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
  c d e f |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \circle 1 \box A }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \flat { \bold \small \italic Fine. } }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
  \mark \markup \center-column { \fermata \box z }
}
```

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

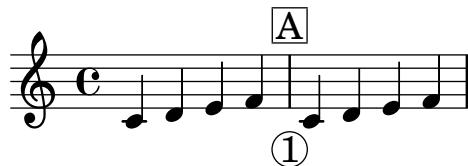

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```
\score {
  \relative c'
  <<
  \new Staff {
```

```

<<
  \new Voice \with {
    \consists Mark_engraver
    \consists "Staff_collecting_engraver"

\layout {
  \context {
    \Score
    \remove "Mark_engraver"
    \remove "Staff_collecting_engraver"
  }
}
}
}

```

Rendere alcune linee del rigo più spesse delle altre

In ambito didattico può essere utile rendere più spessa una linea del rigo (per esempio, la linea centrale, o per sottolineare la linea della chiave di Sol). Per farlo si possono aggiungere altre linee e posizionarle molto vicino alla linea che deve essere evidenziata, usando la proprietà `line-positions` dell'oggetto `StaffSymbol`.

```

{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}

```

Marking notes of spoken parts with a cross on the stem

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

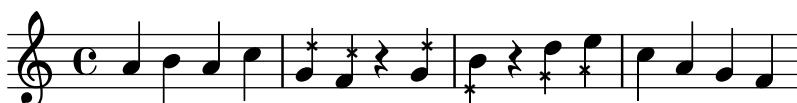

```

speakOn = {
    \override Stem.stencil =
    #(lambda (grob)
        (let* ((x-parent (ly:grob-parent grob X))
               (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
        (if is-rest?
            empty-stencil
            (ly:stencil-combine-at-edge
             (ly:stem::print grob)
             Y
             (- (ly:grob-property grob 'direction))
             (grob-interpret-markup grob
                 (markup #:center-align #:fontsize -4
                         #:musicglyph "noteheads.s2cross"))
             -2.3))))
    )
}

speakOff = {
    \revert Stem.stencil
    \revert Flag.stencil
}

\score {
    \new Staff {
        \relative c' {
            a4 b a c
            \speakOn
            g4 f r g
            b4 r d e
            \speakOff
            c4 a g f
        }
    }
}

```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```

<<
\context Voice = "foo" {
    \clef bass
    c4 r g r
    c4 r g r
}

```

```

c4 r g r
c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>

```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "|"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {

```

```

g'4 f' e' d'
}
\stopMeasureCount
}

```

The image shows three staves of musical notation. The top staff has measures 1 through 7. The middle staff has measures 8 through 13. The bottom staff has measure 14, which is labeled '(7)' above the staff. Each measure contains a single note.

Positioning fingering indications precisely

Generally the options available for positioning the fingering of chords work well by default, but if one of the indications needs to be positioned more precisely the following tweak may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 d-2 a'-5>4
  <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>4
  \set fingeringOrientations = #'(down)
  <c-1 d-2 a'-5>4
  <c-\tweak extra-offset #'(0 . -1.1)-1
  d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
  <c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>4
  \set fingeringOrientations = #'(up)
  <c-1 d-\tweak extra-offset #'(0 . 1.1)-2
  a'-\tweak extra-offset #'(0 . 1)-5>4
  <c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
  a'-\tweak extra-offset #'(0 . 1.4)-5>4
}

```

The image shows a staff of musical notation. The notes are numbered 1, 2, 3, 4, 5, 5, 1, 2, 2, 1, 2, 1. The first two notes have '2' over them. The third note has '5' over it. The fourth note has '5' over it. The fifth note has '1' over it. The sixth note has '2' over it. The seventh note has '1' over it. The eighth note has '2' over it. The ninth note has '2' over it. The tenth note has '1' over it. The eleventh note has '2' over it. The twelfth note has '1' over it.

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su false per poter apparire dentro le legature di portamento.

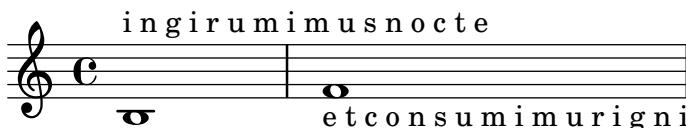

```
\relative c' {
    \override TextScript.avoid-slur = #'inside
    \override TextScript.outside-staff-priority = ##f
    c2(^\markup { \halign #-10 \natural } d4.) c8
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

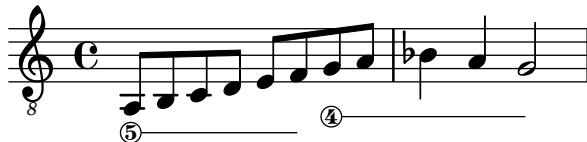

```
stringNumberSpanner =
#(define-music-function (StringNumber) (string?)
#{{
  \override TextSpanner.style = #'solid
  \override TextSpanner.font-size = #-5
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.text =
    \markup { \circle \number $StringNumber }
#})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
```

```

b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

parallelogram =
#(ly:make-stencil (list 'embedded-ps
  "gsave
  currentpoint translate
  newpath
  0 0.25 moveto
  1.3125 0.75 lineto
  1.3125 -0.25 lineto
  0 -0.75 lineto
  closepath
  fill
  grestore" )
  (cons 0 1.3125)
  (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}

```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the `layer` property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the `whiteout` property of `TimeSignature`. To do this `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer of 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

```
{
\override Score.StaffSymbol.layer = #4
\override Staff.TimeSignature.layer = #3
b'2 b'~
\once \override Staff.TimeSignature.whiteout = ##t
\time 3/4
b' r4
}
```

Adding markups in a tablature

By default markups does not show in a tablature.

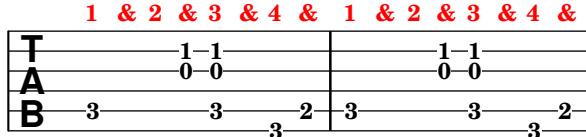

```
To make them appear, simply use the command \revert TabStaff.TextScript.stencil
%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014
```

```
high = { r4 r8 <g c'> q r8 r4 }

low = { c4 r4 c8 r8 g,8 b, }

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\ \low \\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #(ly:make-moment 1/8)
    }
  }
}
```

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
% first, define a variable to hold the formatted date:
date = #(strftme "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
```

```

    subtitle = \date
}

\score {
    \relative c' {
        c4 c c c
    }
}
% and use it in a \markup block:
\markup {
    \date
}

```

Including the date!

14-01-2021

14-01-2021

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```

% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
    \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
        #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
      shortInstrumentName = "Left"
    }

    { c''1 \break c''1 }

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #CENTER
      instrumentName = \markup \center-column {
        Centered
        "instrument name"
      }
      shortInstrumentName = "Centered"
    }

    { g'1 g'1}

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #RIGHT
      instrumentName = \markup \right-column {
        "Right aligned"
        "instrument name"
      }
      shortInstrumentName = "Right"
    }

    { e'1 e'1 }

  >>
```

```
\layout {
    ragged-right = ##t
    indent = 4\cm
    short-indent = 2\cm
}
}
```

Aligning objects created with the \mark command

By default the \mark command centers objects over a bar line. This behavior can be modified to align at right or left.

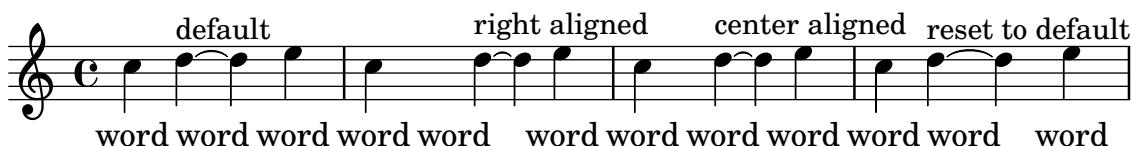

```
\relative c' {
    c1 \mark "(Center)"
    c1
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark "(Left)"
    c4 c c c
    c4 c c c
    \once \override Score.RehearsalMark.self-alignment-X = #RIGHT
    \mark "(Right)"
    c1
}
```

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
  <<
  \new Staff {
    \relative c' {
      \new Voice = "vocal" {
        c d^~\markup default d e
        c d^~\markup "right aligned" d e
        c d^~\markup "center aligned" d e
        c d^~\markup "reset to default" d e
      }
    }
    \new Lyrics \lyricsto "vocal" {
      word word word
      \set lyricMelismaAlignment = #RIGHT
      word word word
      \set lyricMelismaAlignment = #CENTER
      word word word
      \unset lyricMelismaAlignment
      word word word
    }
  }
  >>
}
```

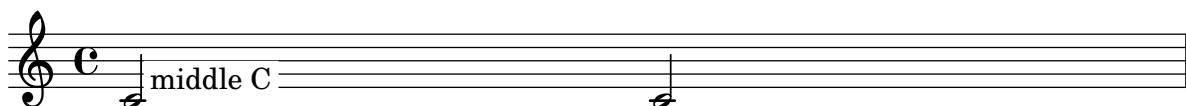

Blanking staff lines using the \whiteout command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```

hairpinWithCenteredText =
#(define-music-function (text) (markup?))
#{{
  \once \override Voice.Hairpin.after-line-breaking =
  #(lambda (grob)
    (let* ((stencil (ly:hairpin::print grob))
           (par-y (ly:grob-parent grob Y))
           (dir (ly:grob-property par-y 'direction))
           (new-stencil (ly:stencil-aligned-to
                         (ly:stencil-combine-at-edge

      (ly:grob-set-property! grob 'Y-offset 0)
      (ly:grob-set-property! grob 'stencil
        (ly:stencil-translate-axis
          new-stencil
          x-shift X))))
  #})
}

hairpinMolto =
\hairpinWithCenteredText \markup { \italic molto }

hairpinMore =
\hairpinWithCenteredText \markup { \larger moltissimo }

```

```
\layout { ragged-right = ##f }

\relative c' {
    \hairpinMolto
    c2< c\f
    \hairpinMore
    c2\ppppp< c\f
    \break
    \hairpinMolto
    c2^< c\f
    \hairpinMore
    c2\ppppp< c\f
}
}
```

The musical score consists of two staves. The top staff begins with a note, followed by a hairpin labeled "molto" leading to a forte dynamic "f". This is followed by a note with a hairpin labeled "ppppp" leading to a dynamic bracket labeled "moltissimo" with "f" at its end. The bottom staff begins with a measure labeled "molto", followed by a note. The next measure shows a note with a hairpin labeled "ppppp" leading to a dynamic bracket labeled "moltissimo" with "f" at its end.

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```
{
  c'2
  \ottava #1
  \set Staff.ottavation = #"8"
  c''2
  \ottava #0
  c'1
  \ottava #1
  \set Staff.ottavation = #"Text"
  c'''1
}
```

The musical score shows a staff with two notes. The first note is followed by an 8va dynamic bracket above it, labeled "8-1". The second note is followed by a dynamic bracket labeled "Text-1".

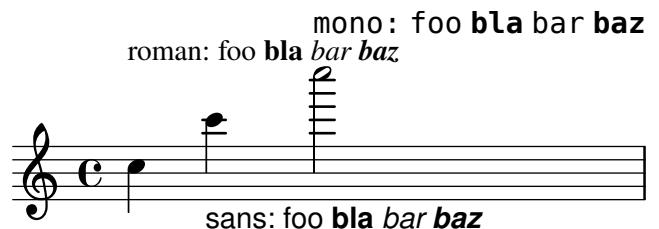

Changing the default text font family

The default font families for text can be overridden with `make-pango-font-tree`.

```
\paper {
    % change for other default global staff size.
    myStaffSize = #20
    %{
        run
            lilypond -dshow-available-fonts
            to show all fonts available in the process log.
    %}

    #(define fonts
        (make-pango-font-tree "Times New Roman"
            "Nimbus Sans,Nimbus Sans L"
            "Luxi Mono"
        ;;
            "Helvetica"
        ;;
            "Courier"
        (/ myStaffSize 20)))
    }

\relative c' {
    c4^\markup {
        roman: foo \bold bla \italic bar \italic \bold baz
    }
    c'4_^\markup {
        \override #'(font-family . sans)
        {
            sans: foo \bold bla \italic bar \italic \bold baz
        }
    }
    c'2^\markup {
        \override #'(font-family . typewriter)
        {
            mono: foo \bold bla \italic bar \italic \bold baz
        }
    }
}
```

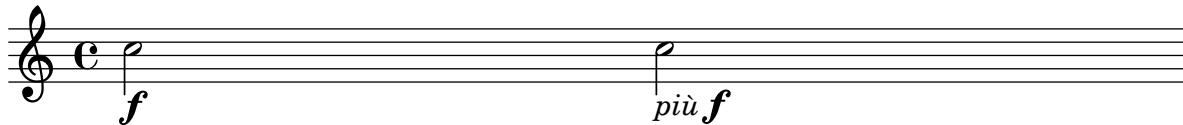

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
piuF = \markup { \italic più \dynamic f }
```

```
\layout { ragged-right = ##f }

\relative c' {
  c2\f c-\piuF
}
```

Combinare due parti sullo stesso rigo

Lo strumento di unione delle parti (il comando `\partCombine`) permette di combinare varie parti sullo stesso rigo. Indicazioni testuali come "solo" e "a2" sono aggiunte automaticamente; per toglierele basta impostare la proprietà `printPartCombineTexts` su `f`. Per le partiture vocali (inni), non c'è bisogno di aggiungere i testi "solo/a2", quindi dovrebbero essere disattivati. Tuttavia potrebbe convenire non usarlo se c'è una qualche parte solista, perché non verrebbe indicata. In tali casi è preferibile usare la notazione polifonica normale.

Questo frammento illustra i tre modi con cui due parti possono essere stampate su uno stesso rigo: normale polifonia, `\partCombine` senza testo e `\partCombine` con testo.

```
%% Combining pedal notes with clef changes
```

```
musicUp = \relative c' {
  \time 4/4
  a4 c4.( g8) a4 |
  g4 e' g,( a8 b) |
  c b a2.
}

musicDown = \relative c' {

Standard polyphony

PartCombine without text

PartCombine with text

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{
      \markup \concat {
        \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #!(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
    }
    #})))
}

\relative c' {
  c4)paren\f c c \dynamicUp c)paren\p
}
```

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one `RehearsalMark` object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column.

This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

```
{
    \key a \major
    \set Score.markFormatter = #format-mark-box-letters
    \once \override Score.RehearsalMark.outside-staff-priority = #5000
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
    \mark \markup { \bold { Senza denti } }

    % the hidden measure and bar line
    % \cadenzaOn turns off automatic calculation of bar numbers
    \cadenzaOn
    \once \override Score.TimeSignature.stencil = ##f
    \time 1/16
    s16 \bar ""
    \cadenzaOff

    \time 4/4
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark \markup { \box \bold Intro }
    d'1
    \mark \default
    d'1
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
    \override TextSpanner.bound-details.left.text = #"bla"
    \override TextSpanner.bound-details.right.text = #"blu"
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'line
```

```

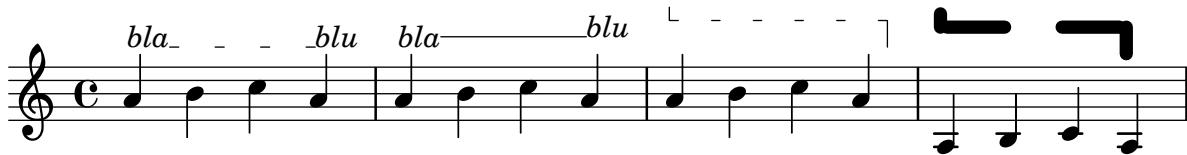

\once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
a4 \startTextSpan
b4 c
a4 \stopTextSpan

\override TextSpanner.style = #'dashed-line
\override TextSpanner.bound-details.left.text =
  \markup { \draw-line #'(0 . 1) }
\override TextSpanner.bound-details.right.text =
  \markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2

a4 \startTextSpan
b4 c
a4 \stopTextSpan

\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

Demonstrating all headers

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

```

\relative c' {
  a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
  -\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke " }
}

```

```
b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
s2
a'1
}
```

Formattazione delle sillabe del testo vocale

La modalità markup può essere usata per formattare le singole sillabe del testo vocale.

```
mel = \relative c' { c4 c c c }
lyr = \lyricmode {
  Lyrics \markup { \italic can } \markup { \with-color #red contain }
  \markup { \fontsize #8 \bold Markup! }
}

<<
  \new Voice = melody \mel
  \new Lyrics \lyricsto melody \lyr
>>
```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
  wa~o~a
}
```

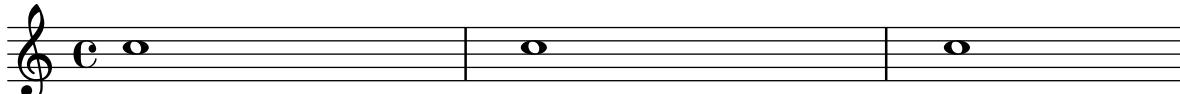

wa o a

Allineamento del testo vocale

L'allineamento orizzontale del testo vocale si imposta attraverso la proprietà `self-alignment-X` dell'oggetto `LyricText`. `#-1` è sinistra, `#0` è centro e `#1` è destra; si possono usare anche `#LEFT`, `#CENTER` e `#RIGHT`.

```
\layout { ragged-right = ##f }
\relative c' {
  c1
  c1
  c1
}
\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "This is left-aligned"
```

```
\once \override LyricText.self-alignment-X = #CENTER
"This is centered"
\once \override LyricText.self-alignment-X = #1
"This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned

Markup list

Text that can spread over pages is entered with the \markuplist command.

Il y avait en Westphalie, dans le château de M. le baron de Thunder-ten-tronckh, un jeune garçon à qui la nature avait donné les mœurs les plus douces. Sa physionomie annonçait son âme. Il avait le jugement assez droit, avec l'esprit le plus simple ; c'est, je crois, pour cette raison qu'on le nommait Candide. Les anciens domestiques de la maison soupçonnaient qu'il était fils de la sœur de monsieur le baron et d'un bon et honnête gentilhomme du voisinage, que cette demoiselle ne voulut jamais épouser parce qu'il n'avait pu prouver que soixante et onze quartiers, et que le reste de son arbre généalogique avait été perdu par l'injure du temps.

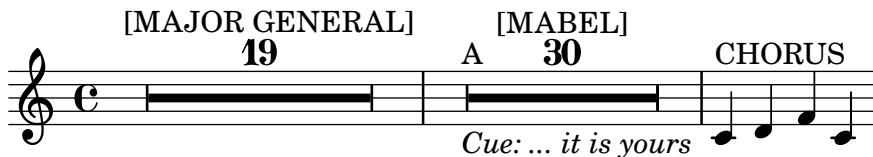

Monsieur le baron était un des plus puissants seigneurs de la Westphalie, car son château avait une porte et des fenêtres. Sa grande salle même était ornée d'une tapisserie. Tous les chiens de ses basses-cours comptaient une meute dans le besoin ; ses palefreniers étaient ses piqueurs ; le vicaire du village était son grand-aumônier. Ils l'appelaient tous monseigneur, et ils riaient quand il faisait des contes.

Testo a margine delle pause multiple

Il testo a margine di una pausa multipla viene centrato sopra o sotto di essa. Se il testo è lungo, la misura non si espanderà. Per espandere la pausa multipla in modo che si allinei col testo, conviene usare un accordo vuoto con del testo attaccato prima della pausa multipla.

Il testo così attaccato a una nota spaziatrice viene allineato a sinistra della posizione in cui la nota sarebbe posta nella misura, ma se la lunghezza della misura è determinata dalla lunghezza del testo, il testo verrà centrato.

```
\relative c' {
    \compressMMLRests {
        \textLengthOn
        <>^\markup { [MAJOR GENERAL] }
        R1*19
        <>_^\markup { \italic { Cue: ... it is yours } }
        <>^\markup { A }
        R1*30^\markup { [MABEL] }
        \textLengthOff
        c4^\markup { CHORUS } d f c
    }
}
```

Of the ubiquity of markup objects

Text objects are entered either as simple strings between double quotes or as `\markup` blocks that can accept a variety of advanced text formatting and graphical enhancements.

As such, markup blocks may be used:

- in any `TextScript` object (attached to notes with `-`, `^` or `_`),
- any `RehearsalMark` introduced with the `\mark` keyword, or other similar objects such as `MetronomeMark` introduced with `\tempo`,
- as standalone markup blocks, entered at the top level outside of any `\score` block,
- in any definition inside the `\header` block (e.g. title, subtitle, composer) or in some variables defined inside the `\paper` block such as `evenHeaderMarkup` for page numbers.

`\markup` may additionally be used for lyrics, in chord names, and as dynamics. In fact, it is possible to use `\markup` to customize the appearance of virtually any object, as demonstrated in this example using various methods.

```
%% Thanks to Aaron Hill https://lists.gnu.org/archive/html/lilypond-user/2019-01/msg00437.h
```

```
\paper {
    paper-width = 8\cm paper-height = 8\cm
}
\header {
    title = \markup "Header"
    tagline = \markup "(tagline)"
}
\markup "Top-level markup"
```

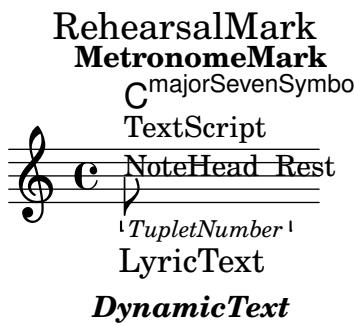

```

dyn = #(make-dynamic-script #{
  \markup \text "DynamicText"
})
\score {
  <<
  \new ChordNames
  \with { majorSevenSymbol = \markup "majorSevenSymbol" }
  \chordmode { c1:maj7 }
  \new Staff {
    \tempo \markup "MetronomeMark"
    \mark \markup "RehearsalMark"
    \once \override TupletNumber.text = \markup "TupletNumber"
    \tuplet 3/2 {
      \once \override NoteHead.stencil = #ly:text-interface::print
      \once \override NoteHead.text = \markup \lower #0.5 "NoteHead"
      c'8^{\markup "TextScript"
      \once \override Rest.stencil = #(lambda (grob)
        (grob-interpret-markup grob #{
          \markup "Rest"
        })))
      r4
    }
  }
  \new Lyrics \lyricmode { \markup "LyricText" 1 }
  \new Dynamics { s1\dyn }
  >>
}

```

Header

Outputting the version number

By putting the output of `lilypond-version` into a lyric, it is possible to print the version number of LilyPond in a score, or in a document generated with `lilypond-book`. Another possibility is to append the version number to the doc-string, in this manner:

```

\score {
  \new Lyrics {
    \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark #(string-append "Processed with LilyPond version " (lilypond-version))
    s2
  }
}

```

```
}
```

Processed with LilyPond version 2.22.0

Modello per pianoforte con testo al centro

Invece di destinare un rigo a parte alla linea melodica e al suo testo, è possibile collocare il testo al centro di un doppio pentagramma per pianoforte.

```
upper = \relative c' {
    \clef treble
    \key c \major
    \time 4/4

    a4 b c d
}

lower = \relative c {
    \clef bass
    \key c \major
    \time 4/4

    a2 c
}

text = \lyricmode {
    Aaa Bee Cee Dee
}

\score {
    \new PianoStaff <<
        \new Staff = upper { \new Voice = "singer" \upper }
        \new Lyrics \lyricsto "singer" \text
        \new Staff = lower { \lower }
    >>
    \layout { }
    \midi { }
}
```

Stampare i numeri di battuta a intervalli regolari variabili

L'intervallo dei numeri di battuta può essere modificato cambiando la funzione di contesto `{set-bar-number-visibility}`.

```
\relative c' {
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
```

```
\context Score \applyContext #(set-bar-number-visibility 4)
\repeat unfold 10 c'1
\context Score \applyContext #(set-bar-number-visibility 2)
\repeat unfold 10 c
}
```

The image shows two staves of music. The top staff starts with a treble clef and a 'C' key signature. It has five open circles representing notes. Above the staff, the number '5' is centered above the third note, and '9' is centered above the eighth note. The bottom staff starts with a treble clef and a 'C' key signature. It has ten open circles representing notes. Above the staff, the numbers '11', '13', '15', '17', and '19' are positioned above the first, third, fifth, seventh, and ninth notes respectively.

Posizionare le indicazioni alla fine di una linea

È possibile posizionare le indicazioni alla fine della linea corrente, invece che all'inizio della linea successiva. In tali casi, può essere preferibile allineare l'estremità destra dell'indicazione alla stanghetta.

```
\relative c' {
  g2 c
  d,2 a'
  \once \override Score.RehearsalMark.break-visibility =
    #end-of-line-visible
  \once \override Score.RehearsalMark.self-alignment-X =
    #RIGHT
  \mark "D.C. al Fine"
  \break
  g2 b,
  c1 \bar "||"
}
```

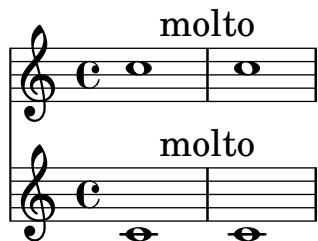

The image shows a single staff of music. The first note is a quarter note with a stem pointing down. To its right, the text 'D.C. al Fine' is placed at the end of the note's stem. The second note is a short vertical line. The third note is a short vertical line. The fourth note is a short vertical line.

Stampare le indicazioni su ogni rigo

Sebbene le indicazioni testuali siano di norma collocate solo sopra il rigo più alto, è possibile farle apparire su ogni rigo.

```
\score {
  <<
    \new Staff { c''1 \mark "molto" c'' }
    \new Staff { c'1 \mark "molto" c' }
  >>
  \layout {
```

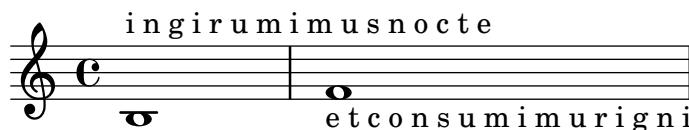

```
\context {
    \Score
    \remove "Mark_engraver"
    \remove "Staff_collecting_engraver"
}
\context {
    \Staff
    \consists "Mark_engraver"
    \consists "Staff_collecting_engraver"
}
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```
<<
\new Staff <(
    \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
)>
\new Lyrics \with {
    \override LyricText.extra-offset = #'(0 . 8.6)
    \override LyricExtender.extra-offset = #'(0 . 8.6)
    \override LyricHyphen.extra-offset = #'(0 . 8.6)
```

```

} \lyricsto "voc" { La la -- la __ _ la }
>>

```

Testo separato su due colonne

Il testo separato può essere disposto su varie colonne con i comandi di \markup:

```

\markup {
  \fill-line {
    \hspace #1
    \column {
      \line { O sacrum convivium }
      \line { in quo Christus sumitur, }
      \line { recolitur memoria passionis ejus, }
      \line { mens impletur gratia, }
      \line { futurae gloriae nobis pignus datur. }
      \line { Amen. }
    }
    \hspace #2
    \column \italic {
      \line { O sacred feast }
      \line { in which Christ is received, }
      \line { the memory of His Passion is renewed, }
      \line { the mind is filled with grace, }
      \line { and a pledge of future glory is given to us. }
      \line { Amen. }
    }
    \hspace #1
  }
}

```

O sacrum convivium
in quo Christus sumitur,
recolitur memoria passionis ejus,
mens impletur gratia,
futurae gloriae nobis pignus datur.
Amen.

*O sacred feast
in which Christ is received,
the memory of His Passion is renewed,
the mind is filled with grace,
and a pledge of future glory is given to us.
Amen.*

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```

stringNumberSpanner =
#(define-music-function (StringNumber) (string?)
#{ 
  \override TextSpanner.style = #'solid
}

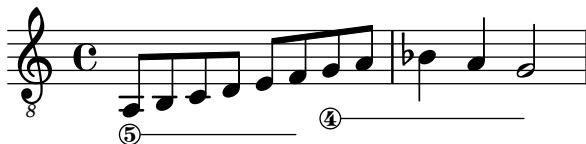

```

```

\override TextSpanner.font-size = #-5
\override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
\override TextSpanner.bound-details.left.text =
  \markup { \circle \number $StringNumber }
#}

\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}

```

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil
                   (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

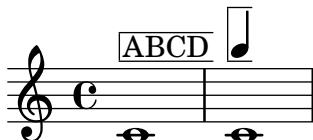

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?))
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
  @code{box-padding} and @code{font-size} properties to determine line
  thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))

```

```
(NWS-box-stencil m thickness pad)))
```

```
% Test it:
```

```
\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note {4} #1.0 }
}
```

UTF-8

Various scripts may be used for texts (like titles and lyrics) by entering them in UTF-8 encoding, and using a Pango based backend. Depending on the fonts installed, this fragment will render Bulgarian (Cyrillic), Hebrew, Japanese and Portuguese.

```
% end verbatim - this comment is a hack to prevent texinfo.tex
% from choking on non-European UTF-8 subsets
```

```
%% Edit this file using a Unicode aware editor, such as GVIM, GEDIT, Emacs
```

```
%{
```

Volta text markup using repeatCommands

Though volte are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' {
  c1
  \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

Vocal music

Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `convUpStaffBarLine` and `convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
(#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?))

```

The image shows three staves of vocal music. The top staff is for Soprano (S A) in treble clef, with notes labeled 'c' and 'd'. The middle staff is for Tenor/Bass (T B) in bass clef, also with notes 'c' and 'd'. The bottom staff is divided into two sections: Alto (SI SII) and Bass (AI AII), both in treble clef, with notes labeled 'e', 'f', 'g', and 'h'. The bottom section of the staff (Bass) has notes 'e', 'f', 'g', and 'h'. The third staff is for Tenor/Bass (T B) in bass clef, with notes labeled 'i', 'j', 'k', and 'l'. The bottom section of this staff also has notes 'i', 'j', 'k', and 'l'.

Aggiungere citazioni orchestrali a una partitura vocale

L'esempio seguente mostra un approccio per simplificare l'aggiunta di citazioni orchestrali a una riduzione per pianoforte di una partitura vocale. La funzione musicale `\cueWhile` prende quattro argomenti: la musica da cui prendere la citazione, come è definita da `\addQuote`, il nome da inserire prima delle notine, poi o `#UP` o `#DOWN` per specificare o `\voiceOne` col nome sopra il rigo o `\voiceTwo` col nome sotto il rigo, e infine la musica per pianoforte che deve apparire in parallelo alle notine. Il nome dello strumento citato è posto a sinistra delle notine. Molti passaggi possono essere citati, ma non possono sovrapporsi l'un l'altro nel tempo.

```

cueWhile =
#define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
      <>- \markup { \tiny #name }
      $music
    }
  }

```

```
        }
    #})}

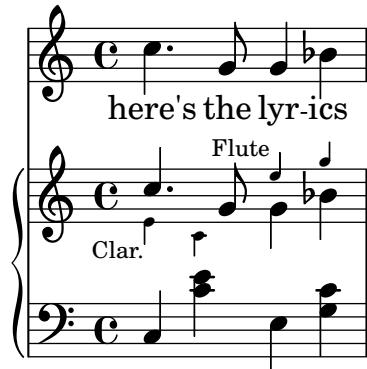

flute = \relative c' {
    \transposition c'
    s4 s4 e g
}
\addQuote "flute" { \flute }

clarinet = \relative c' {
    \transposition bes
    fis4 d d c
}
\addQuote "clarinet" { \clarinet }

singer = \relative c' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c' {
    \transposition c'
    \cueWhile "clarinet" "Clar." #DOWN { c4. g8 }
    \cueWhile "flute" "Flute" #UP { g4 bes4 }
}

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```
% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
  #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
  <<
  \new Staff {
    \relative c'
```

```
\new Voice = "vocal" {
    c d^~\markup default d e
    c d^~\markup "right aligned" d e
    c d^~\markup "center aligned" d e
    c d^~\markup "reset to default" d e
}
}

\new Lyrics \lyricsto "vocal" {
    word word word
    \set lyricMelismaAlignment = #RIGHT
    word word word
    \set lyricMelismaAlignment = #CENTER
    word word word
    \unset lyricMelismaAlignment
    word word word
}
>>
}
```

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface` (see Sezione “Graphical Object Interfaces” in *Guida al Funzionamento Interno* for a list of possible values for `grob-interface`). A common use case is printing the ambitus between key signature and time signature.

```
\new Staff \with {
    \consists Ambitus_engraver
} \relative {
    \ambitusAfter key-signature
    \key d \major
    es'8 g bes cis d2
}
```

Ambitus su più voci

Se si aggiunge l’incisore `Ambitus_engraver` al contesto `Staff` viene creato un solo ambitus per il rigo, anche nel caso di righi che hanno più voci.

```
\new Staff \with {
    \consists "Ambitus_engraver"
}
<<
    \new Voice \relative c' {

```

```
\voiceOne
c4 a d e
f1
}
\new Voice \relative c' {
  \voiceTwo
  es4 f g as
  b1
}
>>
```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. AmbitusNoteHead grobs also have ledger lines.

```
\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>
```

A musical staff with two staves. The top staff starts on C4 and has a note on F. The bottom staff starts on E5 (es4) and has a note on B1. Both staves have a 2/4 time signature.

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
\include "gregorian.ly"
```

```

```

    vocation * and as in the \bold day of tempt- \tick
}
\line {
    -ation \tick in the \tick wilderness.
}
}
}
}
}
```

O come let us **sing** | unto • the | Lord : let
us heartily **rejoice** in the | strength of | our
sal | vation.

8. Today if ye will hear his voice *
harden' not your' hearts : as in the pro-
vocation * and as in the **day** of tempt-'
-ation' in the' wilderness.

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```

\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
```

```

s1 | \break
% ...

\voiceOne
s2 a'8^aliceSings a' b'4 |
\oneVoice
g'1
}
\new Voice = "eve" {
s1 |
a'2^eveSings g' |
s1 |
a'2^eveSings g'
% ...

\voiceTwo
f'4^eveSings a'8 g' f'4 e' |
\oneVoice
s1
}
>>
\new Lyrics \lyricsto "alice" {
may -- be
sec -- ond
% ...
Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
that the
words are
% ...
...and then I was like--
}
>>

```

The musical score shows two staves. The top staff (Alice) starts with a quarter note followed by a dash, then a quarter note. The bottom staff (Eve) starts with a half note. The lyrics for Alice are: 'may - be', 'that the', 'sec - ond', and 'words are'. The lyrics for Eve are: '...and then I', 'Shut up, you', 'like-', and 'fool!'. The vocal parts are indicated by the names above the notes.

Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

```
\relative c' {
```

```
\time 3/4
g2 e4
a2 f4
g2.
}
\addlyrics {
  \set stanza = #1. "
  Hi, my name is Bert.
}
\addlyrics {
  \override StanzaNumber.font-name = #"DejaVu Sans"
  \set stanza = #2. "
  \override LyricText.font-family = #'typewriter
  Oh, ché -- ri, je t'aime
}
```

1. Hi, my name is Bert.
2. Oh, ché -- ri, je t'aime

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```
stemOff = \hide Staff.Stem
stemOn = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \bar "||"
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \bar "||"
    \stemOff a'\breve^\markup { \italic flexe }
    \stemOn g'2 \bar "||"
  }
}
```

Forcing hyphens to be shown

If LilyPond does not think there is space for a hyphen, it will be omitted. The behaviour can be overridden with the `minimum-distance` property of `LyricHyphen`.

```
\relative c' {
  % code here
}
```

```

c32 c c c
c32 c c c
c32 c c c
c32 c c c
}
\addlyrics {
    syl -- lab word word
    \override LyricHyphen.minimum-distance = #1.0
    syl -- lab word word
    \override LyricHyphen.minimum-distance = #2.0
    syl -- lab word word
    \revert LyricHyphen.minimum-distance
    syl -- lab word word
}

```

Formattazione delle sillabe del testo vocale

La modalità markup può essere usata per formattare le singole sillabe del testo vocale.

```

mel = \relative c' { c4 c c c }
lyr = \lyricmode {
    Lyrics \markup { \italic can } \markup { \with-color #red contain }
    \markup { \fontsize #8 \bold Markup! }
}

<<
    \new Voice = melody \mel
    \new Lyrics \lyricsto melody \lyr
>>

```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```

\lyrics {
    wa~o~a
}

```

wa o a

Modello per inno

Il codice seguente presenta un modo di impostare un inno in cui ogni verso inizia e finisce con una misura parziale. Mostra anche come aggiungere delle strofe come testo separato sotto la musica.

```

 And the last line of the same

Allineamento del testo vocale

L'allineamento orizzontale del testo vocale si imposta attraverso la proprietà `self-alignment-X` dell'oggetto `LyricText`. `#-1` è sinistra, `#0` è centro e `#1` è destra; si possono usare anche `#LEFT`, `#CENTER` e `#RIGHT`.

```
\layout { ragged-right = ##f }
\relative c' {
  c1
  c1
  c1
}
\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "This is left-aligned"
  \once \override LyricText.self-alignment-X = #CENTER
  "This is centered"
  \once \override LyricText.self-alignment-X = #1
  "This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned

Marking notes of spoken parts with a cross on the stem

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

```
speakOn = {
\override Stem.stencil =
#(lambda (grob)
  (let* ((x-parent (ly:grob-parent grob X))
         (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
    (if is-rest?
        empty-stencil
        (ly:stencil-combine-at-edge
          (ly:stem::print grob)
          Y
          (- (ly:grob-property grob 'direction))
          (grob-interpret-markup grob
            (markup #:center-align #:fontsize -4
```

```

        #:musicglyph "noteheads.s2cross"))
-2.3)))))

}

speakOff = {
    \revert Stem.stencil
    \revert Flag.stencil
}

\score {

Ottenere la spaziatura del testo della vecchia versione 2.12

Il motore di spaziatura verticale è cambiato a partire dalla versione 2.14. Ciò può far sì che il testo vocale abbia un posizionamento diverso.

È possibile impostare delle proprietà dei contesti `Lyric` e `Staff` che facciano sì che il motore di spaziatura si comporti come nella versione 2.12.

}

```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```

<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }

```

}
```

The musical score consists of four staves. The top two staves are in treble clef (G-clef), and the bottom two are in bass clef (F-clef). The Tenor voice (top staff) has a dynamic marking of **p** followed by **f**. The Bass voice (second staff) has a dynamic marking of **p**. The Alto voice (third staff) has a dynamic marking of **mp**. The Soprano voice (bottom staff) has a dynamic marking of **mf**. The lyrics are written below each note: 'do do do do' for Tenor, 're re re re' for Bass, 'mi mi mi mi' for Alto, and 'mi mi mi mi' for Soprano.

Single staff template with notes, lyrics, chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
  \set stanza = #"1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = #"2."
  This is the second verse.
}

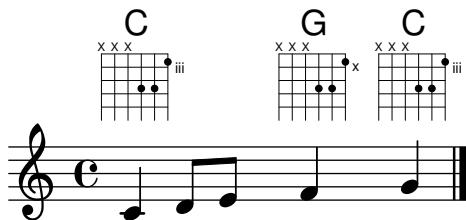

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
  c4 d8 e f4 g
  \bar "|."
}

\score {
  <<
  \context ChordNames { \theChords }
  \context FretBoards { \theChords }
  \new Staff {

```

```
\context Voice = "voiceMelody" { \staffMelody }
}
\new Lyrics = "lyricsI" {
  \lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
  \lyricsto "voiceMelody" \verseII
}
>>
\layout { }
\midi { }
}
```

1. This is the first verse
2. This is the second verse.

Modello di rigo singolo con note e testo

Questo piccolo modello presenta una semplice linea melodica con un testo. Copialo e incollalo, aggiungi le note e le parole. Questo esempio disabilita la disposizione automatica delle travature, come è consuetudine per le parti vocali. Per usare la disposizione automatica delle travature, cambia o commenta la relativa linea di codice.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

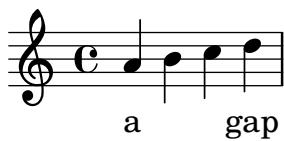

Skips in lyric mode (2)

Although **s** skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (") or underscores (_) are available.

So for example:

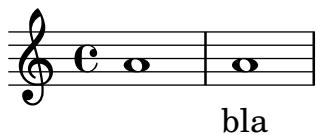

```
<<
\relative c'' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Skips in lyric mode

The **s** syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
\relative c'' { a1 | a }
\new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

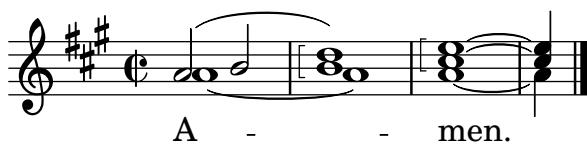

Usare arpeggioBracket per rendere i divisi più visibili

Si può usare `arpeggioBracket` per indicare la divisione delle voci quando non ci sono gandi che forniscono questa informazione. Questo caso è frequente nella musica corale.

```
\include "english.ly"
```

```
\score {
\relative c'' {
\key a \major
\time 2/2
<<
\new Voice = "upper"
<<
{ \voiceOne \arpeggioBracket
a2( b2
<b d>1\arpeggio)
<cs e>\arpeggio ~
<cs e>4
}
\addlyrics { \lyricmode { A -- men. } }
>>
}
```

```
\new Voice = "lower"
{ \voiceTwo
  a1 ~
  a
  a ~
  a4 \bar "| ."
}
>>
}
\layout { ragged-right = ##t }
}
```

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente

Usando le etichette (tag), è possibile usare la stessa musica per produrre sia la musica mensurale che quella moderna. In questo frammento, viene introdotta la funzione `menrest`, che permette alle pause mensurali di essere posizionate precisamente sul rigo come nell'originale, ma con le pause moderne nella posizione standard. Le etichette vengono usate per produrre diversi tipi di stanghetta alla fine della musica, ma possono essere usate anche quando sono necessarie altre differenze: per esempio se si vogliono usare “pause d’intero” (`R1`, `R\breve`, etc.) nella musica moderna, ma pause normali (`r1`, `r\breve`, etc.) nella versione mensurale. La conversione di musica mensurale nel suo equivalente moderno viene solitamente chiamata **trascrizione**.

```
menrest = #(define-music-function (note)
  (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #})

MensStyle = {
  \autoBeamOff
  \override NoteHead.style = #'petrucci
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
}

finalis = {
  \once \override BreathingSign.stencil = #ly:breathing-sign::finalis
  \once \override BreathingSign.Y-offset = #0
  \once \override BreathingSign.minimum-X-extent = #'(-1.0 . 0.0)
  \once \override BreathingSign.minimum-Y-extent = #'(-2.5 . 2.5)

  \breathe
}

Music = \relative c' {
  % musical content
}
```

```

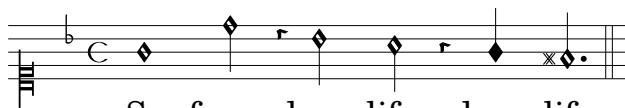

\set Score.tempoHideNote = ##
\key f \major
\time 4/4
g1 d'2 \menrest bes4 bes2 a2 r4 g4 fis2.
\tag #'mens { \finalis }
\tag #'mod { \bar "||" }
}

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```
\paper {
    ragged-right = ##t
}

\relative c' <<
    \new Staff = "1" { c4 c s2 }
    \new Staff = "2" { c4 c s2 }
    \new Staff = "3" { c4 c s2 }
    { \skip 2
        <<
        \lyrics {
            \set alignBelowContext = #"1"
            lyrics4 below
        }
        \new Staff \with {
            alignAboveContext = #"3"
            fontSize = #-2
            \override StaffSymbol.staff-space = #(magstep -2)
            \remove "Time_signature_engraver"
        } {
            \tuplet 6/4 {
                \override TextScript.padding = #3
                c8[{"ossia above" d e d e f}]
            }
        }
    >>
}
>>
```

Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:

```
dropLyrics = {
    \override LyricText.extra-offset = #'(0 . -4.5)
    \override LyricHyphen.extra-offset = #'(0 . -4.5)
    \override LyricExtender.extra-offset = #'(0 . -4.5)
    \override StanzaNumber.extra-offset = #'(0 . -4.5)
}

raiseLyrics = {
    \revert LyricText.extra-offset
    \revert LyricHyphen.extra-offset
    \revert LyricExtender.extra-offset
    \revert StanzaNumber.extra-offset
}

skipFour = \repeat unfold 4 { \skip 8 }

lyricsA = \lyricmode {
    The first verse has
    \dropLyrics
    \set stanza = #" All:"
    the com -- mon __ words
    \raiseLyrics
    used in all four.
}

lyricsB = \lyricmode { In stan -- za two, \skipFour al -- so ap -- pear. }

lyricsC = \lyricmode { By the third verse, \skipFour are get -- ting dull. }

lyricsD = \lyricmode { Last stan -- za, and \skipFour get used once more. }

melody = \relative c' {
    c4 d e f |
    g f e8( e f) d |
    c4 e d c |
}

\score {
    <<
    \new Voice = m \melody
    \new Lyrics \lyricsto m \lyricsA
    \new Lyrics \lyricsto m \lyricsB
    \new Lyrics \lyricsto m \lyricsC
    \new Lyrics \lyricsto m \lyricsD
    >>
}
```

The first verse has used in all four.
In stan - za two, al - so ap - pear.
By the third verse, All: the common words are get - ting dull.
Last stan - za, and get used once more.

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

```

  % again, we could replace the line above this with the line below.
  % \new Lyrics \lyricsto "basses" \bassWords
>>
}

```

The musical score shows two staves. The top staff (soprano/alto) has a treble clef and a 'C' for common time. It contains four groups of four eighth notes each, labeled 'hi' above the notes. The bottom staff (bass/tenor) has a bass clef and a 'C' for common time. It contains four groups of four eighth notes each, labeled 'ha', 'hu', and 'ho' respectively. Vertical bar lines separate the groups of four notes.

Modello per gruppo vocale con strofa e ritornello

Questo modello crea una partitura che inizia con una sezione solistica e prosegue in un ritornello a due voci. Illustra anche l'uso delle pause spaziatrici all'interno della variabile \global per definire i cambi di tempo (e altri elementi comuni a tutte le parti) nel corso di tutta la partitura.

```

```

Modello per complesso vocale

Ecco una tipica partitura corale a quattro parti, SATB. Se il complesso è più ampio, è spesso comodo scrivere gli elementi comuni in un'unica sezione, che verrà poi inclusa in tutte le parti. Ad esempio, l'indicazione di tempo e l'armatura di chiave sono quasi sempre le stesse per tutte le parti. Come nel modello dell'“Inno”, le quattro voci sono ripartite in due soli righi.

```

```

A musical score for four voices (Soprano, Alto, Tenor, Bass) in common time (C). The Soprano part (top staff) sings "hi" four times. The Alto part (second staff) sings "ha" four times. The Tenor part (third staff) sings "hu" four times. The Bass part (bottom staff) sings "ho" four times. The music is in C major, indicated by the key signature and the letter 'C' at the beginning of each staff.

Chords

Sezione “Chord notation” in *Guida alla Notazione*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
    e d8 c d2
}

continuo = \figuremode {
    <_>4 <6>4 <5/>4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    \%bassFigureStaffAlignmentUp
    < _+ >4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    \%bassFigureStaffAlignmentDown
    <4>4. <4>8 <_+>4
}

\score {
    <<
        \new Staff = bassStaff \bass
        \context Staff = bassStaff \continuo
    >>
}
```

Aggiungere stanghette al contesto ChordNames

Per mostrare le stanghette nel contesto `ChordNames`, aggiungere l’incisore `Bar_engraver`.

```
\new ChordNames \with {
    \override BarLine.bar-extent = #'(-2 . 2)
    \consists "Bar_engraver"
}

\chordmode {
    f1:maj7 f:7 bes:7
}
```

Cambiare la posizione delle alterazioni del basso continuo

Le alterazioni e i segni più possono apparire prima o dopo i numeri, a seconda delle proprietà `figuredBassAlterationDirection` e `figuredBassPlusDirection`.

```

\figures {
<6\+> <5+> <6 4-> r
\set figuredBassAlterationDirection = #RIGHT
<6\+> <5+> <6 4-> r
\set figuredBassPlusDirection = #RIGHT
<6\+> <5+> <6 4-> r
\set figuredBassAlterationDirection = #LEFT
<6\+> <5+> <6 4-> r
}

```

+6 #5 6
 4 +6 5# 6
 4b 6+ 5# 6
 4b 6+ #5 6
 4

Eccezioni dei nomi degli accordi

La proprietà `chordNameExceptions` permette di salvare un elenco di notazioni speciali per accordi specifici.

```
% modify maj9 and 6(add9)
```

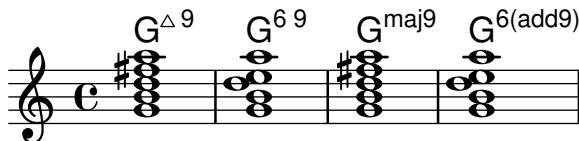

```
% Exception music is chords with markups
chExceptionMusic = {
  <c e g b d'>1-\markup { \super "maj9" }
  <c e g a d'>1-\markup { \super "6(add9)" }
}

% Convert music to list and prepend to existing exceptions.
chExceptions = #(append
  (sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}

\layout {
  ragged-right = ##t
}

<<
  \new ChordNames \theMusic
  \new Voice \theMusic
>>
```

Nome dell'accordo di settima maggiore

La formattazione dell'accordo di settima maggiore può essere regolata con la proprietà `majorSevenSymbol`.

```
\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}
```

C[△] C^{j7}

Chord names alternative

Chord names are generated from a list of pitches. The functions which construct these names can be customised.

Here are shown chords following Ignatzek (pp. 17-18, 1995), used by default since LilyPond 1.7.20, compared with an alternative Jazz chord notation and Harald Banter's (1987) notation. A smaller font is used in the latter case, as these tend to be overly verbose.

This mirrors the mechanism originally used in early LilyPond versions (pre-1.7); not having been properly maintained, however, some features have been lost (mainly chord exception lists) and bugs have been introduced.

```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property `maximumFretStretch` is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

```
%% The code below will print two warnings, which may be omitted by uncommenting:
%#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))
```

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
```

```

<c'\2 bes'\1>
}

<<
\new FretBoards \mus
\new TabVoice \mus
>>

```

Clusters

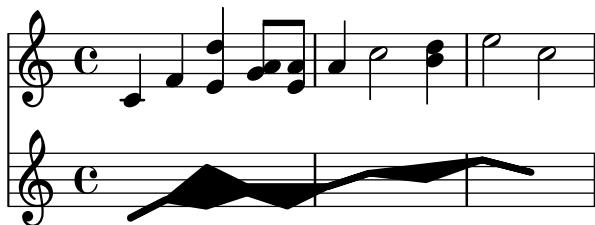

Clusters are a device to denote that a complete range of notes is to be played.

```

fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
\new Staff \fragment
\new Staff \makeClusters \fragment
>>

```

Controllare il posizionamento delle diteggiature di un accordo

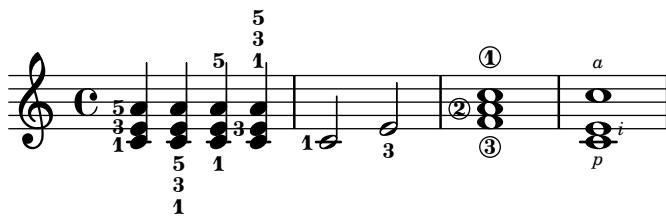

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)

\set strokeFingerOrientations = #'(down right up)
<c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
    \relative c' {
      <<
        { r4
          \override Stem.cross-staff = ##t
          \override Stem.length = #19 % this is in half-spaces,
            % so it makes stems 9.5 staffspaces long
          \override Stem.Y-offset = #-6 % stems are normally lengthened
            % upwards, so here we must lower the stem by the amount
            % equal to the lengthening - in this case (19 - 7) / 2
            % (7 is default stem length)
          e e e }
        { s4
          \change Staff = "bottom"
          \override NoteColumn.ignore-collision = ##t
          c, c c
        }
      >>
    }
  \new Staff = bottom
    \relative c' {
      \clef bass
      \voiceOne
      g8 a g a g a g a
    }
>>
```

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```
fixA = {
    \once \override Stem.length = #11
}

fixB = {
    \once \override NoteHead.X-offset = #1.7
    \once \override Stem.length = #7
    \once \override Stem.rotation = #'(45 0 0)
    \once \override Stem.extra-offset = #'(-0.1 . -0.2)
    \once \override Flag.style = #'no-flag
    \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
    << { \fixA <b d!>8 } \\ { \voiceThree \fixB dis } >> s
}
```

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. However, in this case lilypond is in greedy-mode and uses extenders whenever possible. To break individual extenders, one can simply use a modifier `\!` to a number, which breaks any extender attributed to that number right before the number.

```
bassfigures = \figuremode {
    \set useBassFigureExtenders = ##t
    <6 4>4 <6 4\!> <6 4\!> <6 4\!> | <6\! 4\!> <6 4> <6 4\!> <6 4>
}

<<
    \new Staff \relative c'' { c1 c1 }
    \new FiguredBass \bassfigures
>>
```

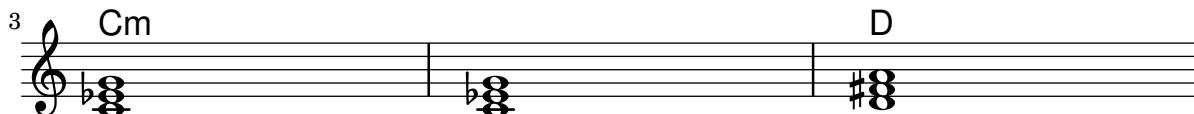

Mostrare gli accordi nei cambi

Per impostazione predefinita, ogni accordo inserito viene visualizzato; tale comportamento può essere modificato in modo che i nomi degli accordi siano mostrati solo all'inizio delle linee e quando l'accordo cambia.

```
harmonies = \chordmode {
    c1:m c:m \break c:m c:m d
}
```

```
<<
\new ChordNames {
    \set chordChanges = ##t
    \harmonies
}
\new Staff {
    \relative c' { \harmonies }
}
>>
```

Canzoniere semplice

Mettendo insieme nomi degli accordi, melodia e testo si ottiene un canzoniere (in inglese “lead sheet”):

```
<<
\chords { c2 g:sus4 f e }
\new Staff \relative c' {
    a4 e c8 e r4
    b2 c4( d)
}
\addlyrics { One day this shall be free __ }
>>
```

Modello di rigo singolo con note, testo e accordi

Ecco il modello di un comune spartito semplificato (lead sheet): include linea melodica, testo vocale e sigle degli accordi.

```
melody = \relative c' {
```

```

\clef treble
\key c \major
\time 4/4

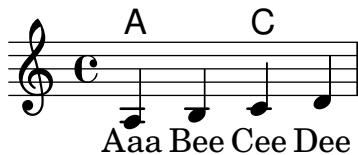

a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

harmonies = \chordmode {
  a2 c
}

\score {
  <<
  \new ChordNames {
    \set chordChanges = ##t
    \harmonies
  }
  \new Voice = "one" { \autoBeamOff \melody }
  \new Lyrics \lyricsTo "one" \text
  >>
  \layout { }
  \midi { }
}

```

Single staff template with notes, lyrics, chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
  \set stanza = #"1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = #"2."
  This is the second verse.
}

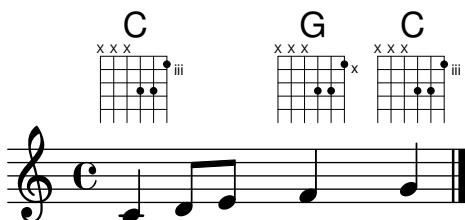

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {

```

```
\key c \major
\clef treble
% Type notes for melody here
c4 d8 e f4 g
\bar "|."
}

\score {
<<
\context ChordNames { \theChords }
\context FretBoards { \theChords }
\new Staff {
\context Voice = "voiceMelody" { \staffMelody }
}
\new Lyrics = "lyricsI" {
\lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
\lyricsto "voiceMelody" \verseII
}
>>
\layout { }
\midi { }
}
```

1. This is the first verse
2. This is the second verse.

Modello di rigo singolo con note e accordi

Vuoi preparare uno spartito semplificato (lead sheet) con melodia e accordi? La tua ricerca è finita!

```
melody = \relative c' {
\clef treble
\key c \major
\time 4/4

f4 e8[ c] d4 g
a2 ~ a
}

harmonies = \chordmode {
c4:m f:min7 g:maj c:aug
d2:dim b4:5 e:sus
}
```

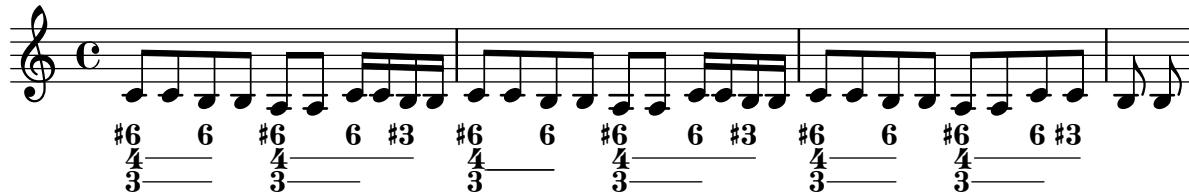

```
\score {
  <<
    \new ChordNames {
      \set chordChanges = ##t
      \harmonies
    }
    \new Staff \melody
  >>
  \layout{ }
  \midi{ }
}
}
```

Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to true, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to true.

```
<<
\relative c' {
  c8 c b b a a c16 c b b
  c8 c b b a a c16 c b b
  c8 c b b a a c c b b
}
\figures {
  \set useBassFigureExtenders = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##f
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>8
}
>>
```

Volta sotto gli accordi

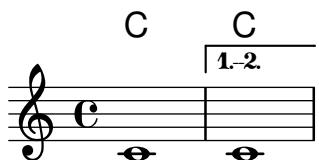

Aggiungendo l'incisore `Volta_engraver` al rigo, è possibile inserire le volte sotto gli accordi.

```
\score {
```

```

<<
\chords {
  c1
  c1
}
\new Staff \with {
  \consists "Volta_engraver"
}
{
  \repeat volta 2 { c'1 }
  \alternative { c' }
}
>>
\layout {
  \context {
    \Score
    \remove "Volta_engraver"
  }
}
}

```

Accordion-discant symbols

This snippet has been obsoleted by predefined markup commands, see ‘Discant symbols’ in the Notation Reference. It’s still useful as a simple demonstration of how to combine symbols: the placement of the symbols added with \markup can be tweaked by changing the \translate-scaled arguments. \translate-scaled is used here rather than \translate in order to let the positioning of the symbol parts adapt to changes of font-size.

```

discant = \markup {
  \musicglyph "accordion.discant"
}

dot = \markup {
  \musicglyph "accordion.dot"
}

\layout { ragged-right = ##t }

% 16 voets register

The musical score consists of five staves of music. Each staff begins with a treble clef and a 'C' key signature. The first staff starts with a note followed by a rest, then a series of eighth notes. Above each note is a small circle with a dot. The second staff continues with eighth notes, with the first one having a circle with two dots above it. The third staff has eighth notes with circles containing three dots above them. The fourth staff has eighth notes with circles containing a horizontal line above them. The fifth staff has eighth notes with circles containing a vertical line above them.

Simboli di registro della fisarmonica

I simboli di registro della fisarmonica sono disponibili sia come \markup sia come eventi musicali autonomi (perché i cambi di registro capitano solitamente tra reali eventi musicali). I registri bassi non sono troppo standardizzati. I comandi disponibili si trovano nella sezione «Registri della fisarmonica» della Guida alla notazione.

```

}
>>
```

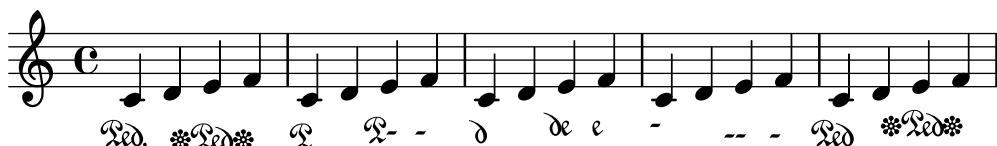

Changing the text for sustain markings

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }

\relative c' {
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("P" "P-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("d" "de" "e")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("M" "M-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
  \sustainNotes
}
```

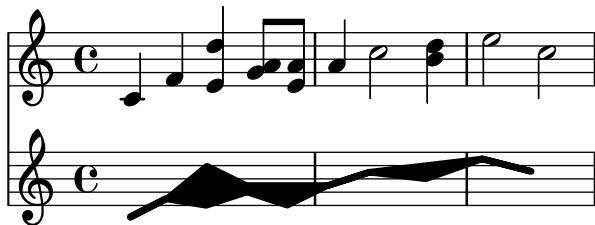

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

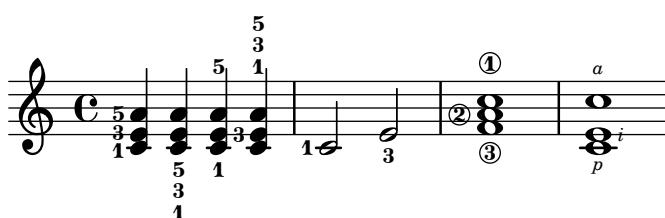

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaconna from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\
  {
    \slurUp
    bes,16[ s e]( 
      \hideNotes a)
    \unHideNotes f[( 
      \hideNotes a)
    \unHideNotes fis]( 
      \hideNotes a)
    \unHideNotes g[( 
      \hideNotes a)
    \unHideNotes gis]( 
      \hideNotes a)
  }
  >>
}
```

Cross-staff chords - beaming problems workaround

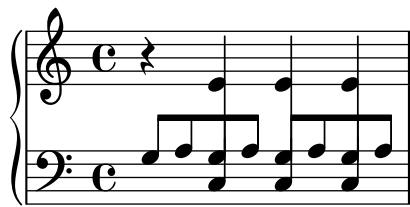

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
    { r4
      \override Stem.cross-staff = ##t
      \override Stem.length = #19 % this is in half-spaces,
        % so it makes stems 9.5 staffspaces long
      \override Stem.Y-offset = #-6 % stems are normally lengthened
        % upwards, so here we must lower the stem by the amount
        % equal to the lengthening - in this case (19 - 7) / 2
        % (7 is default stem length)
    }
  }
>>
```

```

    e e e }
{ s4
\change Staff = "bottom"
\override NoteColumn.ignore-collision = ##t
c, c c
}
>>
}
\new Staff = bottom
\relative c' {
\clef bass
\voiceOne
g8 a g a g a g a
}
>>

```

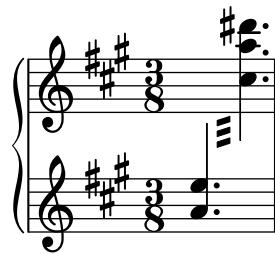

Tremoli attraverso i righi

Dato che \repeat tremolo si aspetta esattamente due argomenti musicali per i tremoli di accordi, la nota o l'accordo che cambiano rigo in un tremolo che attraversa i righi devono essere posti tra parentesi graffe insieme al comando \change Staff.

```

\new PianoStaff <<
\new Staff = "up" \relative c' {
\key a \major
\time 3/8
s4.
}
\new Staff = "down" \relative c' {
\key a \major
\time 3/8
\voiceOne
\repeat tremolo 6 {
<a e'>32
{
\change Staff = "up"
\voiceTwo
<cis a' dis>32
}
}
>>

```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```
\paper { ragged-right = ##f }
\relative c'' {
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
  c2\sostenutoOn c
  c2\sostenutoOff c
}
```

Indicare accordi trasversali al rigo con la parentesi quadrata dell'arpeggio

Una parentesi quadrata dell'arpeggio può indicare che delle note su due righi diversi devono essere suonate con la stessa mano. Per farlo, bisogna far sì che `PianoStaff` accetti gli arpeggi trasversali ai righi e gli arpeggi siano impostati nella forma della parentesi quadrata nel contesto `PianoStaff`.

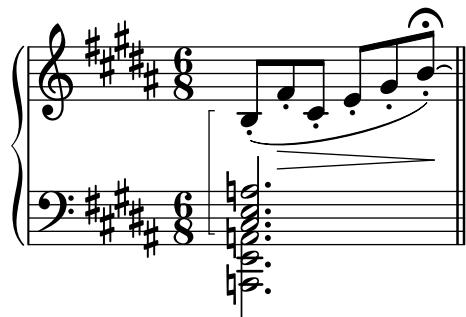

(Debussy, *Les collines d'Anacapri*, m. 65)

```
\new PianoStaff <<
  \set PianoStaff.connectArpeggios = ##t
  \override PianoStaff.Arpeggio.stencil =
    #ly:arpeggio::brew-chord-bracket
  \new Staff {
    \relative c' {
      \key b \major
      \time 6/8
      b8-. (\arpeggio fis'-. \> cis-.
        e-. gis-. b-.) \! \fermata^\laissezVibrer \bar "||"
    }
  }
  \new Staff {
    \relative c' {
      \clef bass
      \key b \major
      <<
    }
  }
```

```

    <a e cis>2.\arpeggio
}
\\
{
    <a, e a,>2.
}
>>
}
}
>>

```

Modello per combo jazz

Ecco un modello piuttosto complesso, per un gruppo jazz. Si noti che tutti gli strumenti sono in \key c \major. Si tratta della tonalità reale; sarà trasposta automaticamente includendo la musica all'interno di una sezione \transpose.

```

\header {
    title = "Song"
    subtitle = "(tune)"
    composer = "Me"
    meter = "moderato"
    piece = "Swing"

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

Percussion

Sezione “Percussion” in *Guida alla Notazione*

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```

drh = \drummode {
    cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
    hhc4 r4 r2
}
drl = \drummode {
    bd4 sn8 bd bd4 << bd ss >>
    bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
    timh4 ssh timl8 ssh r timh r4
    ssh8 timl r4 cb8 cb
}

\score {
<<
\new DrumStaff \with {
    instrumentName = "timbales"
    drumStyleTable = #timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
}
<<
\timb
>>
\new DrumStaff \with { instrumentName = "drums" }
<<
\new DrumVoice { \stemUp \drh }
\new DrumVoice { \stemDown \drl }
>>
>>
\layout { }
\midi { \tempo 4 = 120 }
}
}
```

The image shows a musical score with two staves. The top staff is labeled 'timbales' and features a clef with a vertical line through the middle. It contains several note heads: a solid black circle, an 'x', a 'p', an 'x', a 'y', a 'p', a 'z', a 'p', a 'z', and a 'p'. Below these are labels: 'crash' with a small cymbal icon, 'h.h.' with a small hi-hat icon, '+', '+', 'o', '+', '+', and 'z'. The bottom staff is labeled 'drums' and also has a clef with a vertical line through the middle. It consists of a series of note heads, mostly 'x's and 'p's, with some 'z' and '-' symbols interspersed, creating a rhythmic pattern.

Customized drum notation in printed and MIDI output

Customized drum “pitch” names (suitable for a custom drum style, for example) may be used both in printed and MIDI output by defining such variables as `drumPitchNames`, `drumStyleTable` and `midiDrumPitches`, as demonstrated here. In short, this snippet:

- defines some “pitch” names
- defines how they will be rendered
- tell LilyPond to use them for layout
- assigns pitches to the names
- tell LilyPond to use them for MIDI output

```
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#cust

%%%%%%%%%%%%%
%%%
%%% To use custom drum-pitch-names for your score and midi you need to follow
%%% this route:
%%%
%%%%%%%%
%% LAYOUT:
%%%%%%%%
%%%
%%% (1) Define a name and put it in `drumPitchNames'
%%      This can be done at toplevel with
%%%          drumPitchNames.my-name = #'my-name
%%      It's possible to add an alias as well.
%%% (2) Define how it should be printed
%%      Therefore put them into a toplevel-list, where each entry should look:
%%%          (my-name
%%%              note-head-style-or-default
%%%              articulation-string-or-#f
%%%              staff-position)
%% Example:
%%%     #(define my-style
%%%         '(
%%%             (my-name default "tenuto" -1)
%%%             ; ...
%%%         ))
%%% (3) Tell LilyPond to use this custom-definitions, with
%%%      drumStyleTable = #(alist->hash-table my-style)
%%%      in a \layout or \with
%%%
%%%      Now we're done for layout, here a short, but complete example:
%%%          \new DrumStaff
%%%              \with { drumStyleTable = #(alist->hash-table my-style) }
%%%                  \drummode { my-name }
%%%
%%%%%%%%
%% MIDI:
%%%%%%%%
```

```
%%
%% (1) Again at toplvel, assign a pitch to your custom-note-name
%%     midiDrumPitches.my-name = ges
%%     Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%%     drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%% Example:
%%     \score {
%%         \new DrumStaff
%%         \with {
%%             drumStyleTable = #(alist->hash-table my-style)
%%             drumPitchTable = #(alist->hash-table midiDrumPitches)
%%         }
%%         \drummode { my-name4 }
%%         \layout {}
%%         \midi {}
%%     }
%%
%%%%%
%% TESTING
%%%%%
%%
%% To test whether all is fine, run the following sequence in terminal:
%%     lilypond my-file.ly
%%     midi2ly my-file.midi
%%     gedit my-file-midi.ly
%%
%% Which will do:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%     (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%
%%%%%
%%%%%

```

B♭ Sop.

The musical score consists of four staves. The top staff is for soprano (B♭) and starts with a treble clef, a key signature of one sharp (F♯), and a time signature of common time (indicated by a 'C'). It features a series of eighth-note patterns: a dotted half note followed by a sixteenth-note rest, then a sixteenth-note followed by a sixteenth-note rest, repeated eight times. The second staff begins at measure 2 with a treble clef, one sharp, and common time. It shows a continuous eighth-note pattern: a dotted half note followed by a sixteenth-note rest, then a sixteenth-note followed by a sixteenth-note rest, repeated eight times. The third staff begins at measure 4 with a treble clef, one sharp, and common time. It shows a continuous eighth-note pattern: a dotted half note followed by a sixteenth-note rest, then a sixteenth-note followed by a sixteenth-note rest, repeated eight times. The bottom staff is for drums and starts at measure 6. It has a bass clef, one sharp, and common time. It shows a continuous eighth-note pattern: a dotted half note followed by a sixteenth-note rest, then a sixteenth-note followed by a sixteenth-note rest, repeated eight times. Measures 6 through 9 are indicated by three vertical dots above the staff, followed by a double bar line and repeat dots. The drums' staff ends with a double bar line and repeat dots.

Modello per combo jazz

Ecco un modello piuttosto complesso, per un gruppo jazz. Si noti che tutti gli strumenti sono in \key c \major. Si tratta della tonalità reale; sarà trasposta automaticamente includendo la musica all'interno di una sezione \transpose.

```

Percussion beaters

Graphic symbols for percussion instruments are not natively supported; however it is possible to include such symbols, either as an external EPS file or as embedded PostScript code inside a markup, as demonstrated in this example.

```
stick = \markup {
  \with-dimensions #'(0 . 5) #'(0 . 5)

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the `Score` level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
\paper {
    indent = #0
    ragged-right = ##t
}

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

\layout {

Musical score for Bassclarinet and Percussion. The score consists of two staves. The top staff is for the Bassclarinet, and the bottom staff is for Percussion. Both staves use a bass clef. The time signature changes between common time (indicated by a 'C') and 2/4 time (indicated by a '2'). Measures 1-3 are in common time, and measure 4 is in 2/4 time. The Bassclarinet part includes slurs and grace notes. The Percussion part includes sustained notes and slurs.

Tam-tam example

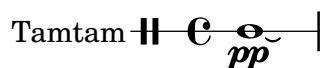

A tam-tam example, entered with 'tt'

```
#(define mydrums '((tamtam default #t 0)))
```

```
\new DrumStaff \with { instrumentName = #"Tamtam" }
```

```
\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \override Staff.StaffSymbol.line-positions = #'( 0 )
  \override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)

  tt 1 \pp \laissezVibrer
}
```

Fretted strings

Sezione “Fretted string instruments” in *Guida alla Notazione*

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' {
    c4-1 d-2 f-4 e-3
}
```

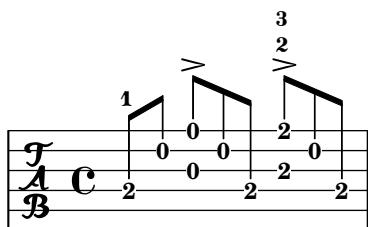

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of \markup and \finger.

```
one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
    \override #'(baseline-skip . 2)
    \column {
        \finger 3
        \finger 2
    }
}
threeFour = \markup {
    \override #'(baseline-skip . 2)
    \column {
        \finger 3
        \finger 4
    }
}

\score {
    \new TabStaff {
        \tabFullNotation
        \stemUp
        e8\4^one b\2 <g\3 e'\1>[ b\2 e\4]
        <a\3 fis'\1>^\\threeTwo[ b\2 e\4]
    }
}
```

Adding markups in a tablature

By default markups does not show in a tablature.

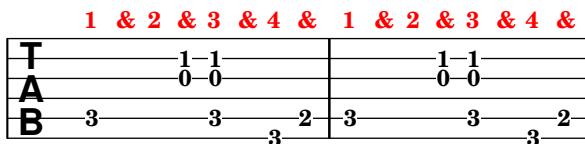

```
To make them appear, simply use the command \revert TabStaff.TextScript.stencil
%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014
```

```
high = { r4 r8 <g c'> q r8 r4 }

low = { c4 r4 c8 r8 g,8 b, }

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\ \low \\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #(ly:make-moment 1/8)
    }
  }
}
```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
```

```
\override Fingering.add-stem-support = ##f
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = ##t
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = #only-if-beamed
a[-1 b]-2 g-0 r
}
```

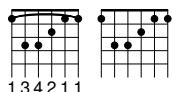

Barres in automatic fretboards

When automatic fretboards are used, barre indicators will be drawn whenever one finger is responsible for multiple strings.

If no finger indications are given in the chord from which the automatic fretboard is created, no barre indicators will be included, because there is no way to identify where barres should be placed.

```
\new FretBoards {
  <f,-1 c-3 f-4 a-2 c'-1 f'-1>1
  <f, c f a c' f'>1
}
```

Bar chords notation for Guitar (with Text Spanner)

Here is how to print bar chords (or barre chords) or half-bar chords (just uncomment the appropriate line for to select either one).

The syntax is : \bbarre #"fret_number" note(s)

```
%%%%%%%%%%%%%%%
%% %%%%/%/%% Cut here ----- Start 'bbarred.ly'
```

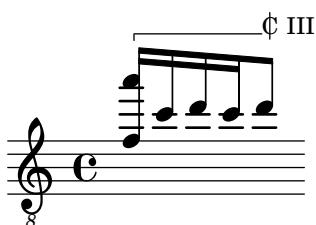

```
%% C with slash -----
cWithSlash = \markup {

Cambiare l'orientamento della tastiera

I diagrammi dei tasti possono essere orientati in tre modi.

```
\include "predefined-guitar-fretboards.ly"
```

```
<<
\chords {
  c1
  c1
  c1
}
```

```
\new FretBoards {
    \chordmode {
        c1
        \override FretBoard.fret-diagram-details.orientation =
            #'landscape
        c1
        \override FretBoard.fret-diagram-details.orientation =
            #'opposing-landscape
        c1
    }
}
\new Voice {
    c'1
    c'1
    c'
}
>>
```

Glissando di accordi in intavolatura

I glissati (o slide) di accordi vengono indicati sia nel rigo (contesto `Staff`) sia nell'intavolatura (contesto `TabStaff`). I numeri di corda sono necessari per `TabStaff`, perché i calcoli automatici della corda sono diversi per gli accordi e per le note singole.

```
myMusic = \relative c' {

Cambi di accordo nei diagrammi dei tasti

Si può impostare il contesto FretBoards in modo che mostri il diagramma solo quando l'accordo cambia o all'inizio di una nuova linea.

```
\include "predefined-guitar-fretboards.ly"
```

```

myChords = \chordmode {
  c1 c1 \break
  \set chordChanges = ##t
  c1 c1 \break
  c1 c1
}

```

```

<<
  \new ChordNames { \myChords }
  \new FretBoards { \myChords }
  \new Staff { \myChords }
>>

```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property `maximumFretStretch` is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

```
%% The code below will print two warnings, which may be omitted by uncommenting:
%#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))
```

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}

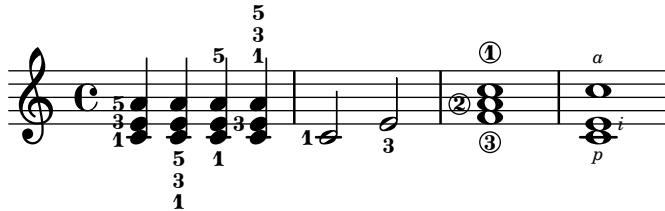

<<
  \new FretBoards \mus
  \new TabVoice \mus
>>
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
```

```
\set fingeringOrientations = #'(down)
<e-3>2
\set stringNumberOrientations = #'(up left down)
<f\3 a\2 c\1>1
\set strokeFingerOrientations = #'(down right up)
<c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
```

Personalizzare la tastiera del diagramma dei tasti

Le proprietà del diagramma dei tasti possono essere impostate tramite 'fret-diagram-details'. Per i diagrammi dell'oggetto FretBoard, gli override vengono applicati all'oggetto FretBoards.FretBoard. Come Voice, FretBoards è un contesto di basso livello, dunque può essere omesso negli override delle proprietà.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
    #guitar-tuning
    #"x;1-1-(;3-2;3-3;3-4;1-1-);"

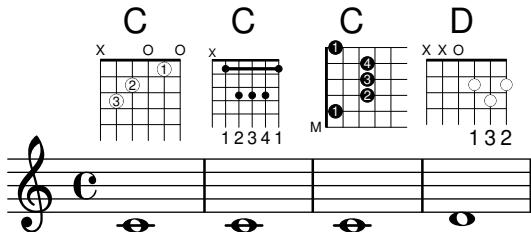

% shorthand
oo = #(define-music-function
    (grob-path value)
    (list? scheme?)
    #{ \once \override $grob-path = #value #})

<<
\new ChordNames {

Definire diagrammi dei tasti predefiniti per altri strumenti

Si possono aggiungere diagrammi dei tasti predefiniti per nuovi strumenti oltre a quelli standard per chitarra. Questo frammento mostra come farlo definendo una nuova accordatura e alcuni diagrammi predefiniti per il *cuatro* venezuelano.

Mostra anche come includere le diteggiature negli accordi usati come punti di riferimento per la consultazione degli accordi e come mostrarle nel diagramma dei tasti e in TabStaff, ma non nella musica.

Questi diagrammi non sono trasponibili perché contengono informazioni sulle corde. È prevista una correzione in futuro.

```
% add FretBoards for the Cuatro
% Note: This section could be put into a separate file
%       predefined-cuatro-fretboards.ly
%       and \included into each of your compositions
```

```
cuatroTuning = #'(,(ly:make-pitch 0 6 0)

```

The image shows a musical staff with a treble clef and a key signature of one sharp. Above the staff, the notes D⁶, D, A^Δ, D^Δ, and G are listed. Below the staff, there are five sets of guitar fretboard diagrams. The first diagram shows open strings. The second has a dot at the 3rd fret. The third has dots at the 2nd and 3rd frets. The fourth has dots at the 1st and 2nd frets. The fifth has dots at the 1st and 2nd frets, with a circled 'o' above it. Below each diagram is a tablature line with four horizontal lines. The first line has a '0' at the start and a '3' at the end. The second line has a '0' at the start and a '1' at the end. The third line has a '0' at the start and a '2' at the end. The fourth line has a '0' at the start and a '0' at the end. The fifth line has a '0' at the start and a '2' at the end.

Faking a hammer in tablatures

A hammer in tablature can be faked with slurs.

```
\score {
  \new TabStaff {
    \relative c' {
      \tabFullNotation
      c4( d) d( d)
      d2( c)
    }
  }
}
```

The tablature shows a sequence of six vertical strings. The first string has a '8' at the top. The second string has a '10' at the top. The third string has a '10' at the top. The fourth string has a '10' at the top. The fifth string has a '10' at the top. The sixth string has an '8' at the top. There are slurs connecting the '10's on the second, third, and fourth strings, and another slur connecting the '10' on the fifth string and the '8' on the sixth string.

Diteggiature, indicazioni di corda e diteggiature della mano destra

Questo esempio combina la diteggiatura per la mano sinistra, le indicazioni di stringa e la diteggiatura della mano destra.

```
#(define RH rightHandFinger)
```

```
\relative c {
  \clef "treble_8"
  <c-3\5\rh #1 >4
  <e-2\4\rh #2 >4
  <g-0\3\rh #3 >4
  <c-1\2\rh #4 >4
}
```

The image shows a musical staff with a treble clef and a key signature of one sharp. The notes are indicated by numbers above the staff: 5, 4, 3, 2, 0, 1. Below the staff, there are six vertical strings. The first string has a '3' at the bottom and a 'p' below it. The second string has a '2' at the bottom and an 'i' below it. The third string has a '0' at the bottom and an 'm' below it. The fourth string has a '1' at the bottom and an 'a' below it. The fifth string has a '0' at the bottom. The sixth string has a '2' at the bottom.

Flamenco notation

For flamenco guitar, special notation is used:

- a *golpe* symbol to indicate a slap on the guitar body with the nail of the ring finger
- an arrow to indicate (the direction of) strokes
- different letters for fingering ("p": thumb, "i": index finger, "m": middle finger, "a": ring finger and "x": little finger)

- 3- and 4-finger *rasgueados*; stroke upwards with all fingers, ending with an up- and down using the index finger
- *abanicos*: strokes (in tuples) with thumb (down), little and index finger (both up). There's also an *abanico 2* where middle and ring finger are used instead of the little finger.
- *alza pua*: fast playing with the thumb

Most figures use arrows in combination with fingering; with abanicos and rasgueados, note-heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as ‘flamenco.ly’ and included in source files.

```
%%%%%% Cut here ----- Start 'flamenco.ly'
```

```

Tabelle alternative per i diagrammi dei tasti

Si possono creare tabelle alternative per i diagrammi dei tasti. Queste possono essere usate per avere diagrammi alternativi per uno stesso accordo.

Per poter usare una tabella alternativa, deve prima essere creata. Quindi si aggiungono i diagrammi alla tabella.

La tabella può essere vuota oppure ricopiata da una tabella esistente.

La tabella da usare nel mostrare i diagrammi predefiniti viene selezionata dalla proprietà `\predefinedDiagramTable`.

```
\include "predefined-guitar-fretboards.ly"
```

```
% Make a blank new fretboard table
#define custom-fretboard-table-one
  (make-fretboard-table)

% Make a new fretboard table as a copy of default-fret-table
#define custom-fretboard-table-two
  (make-fretboard-table default-fret-table)

% Add a chord to custom-fretboard-table-one
\storePredefinedDiagram #custom-fretboard-table-one
  \chordmode {c}
  #guitar-tuning
```

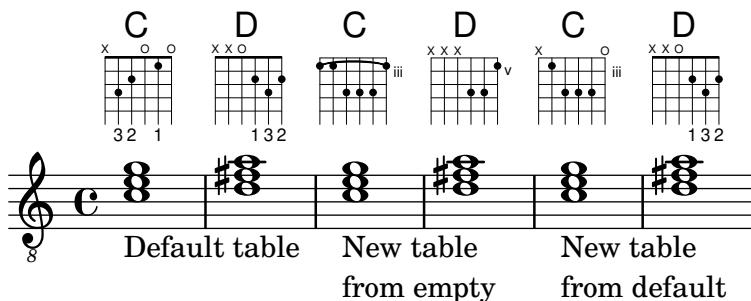

```

"3-(;3;5;5;5;3-);"

% Add a chord to custom-fretboard-table-two

Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

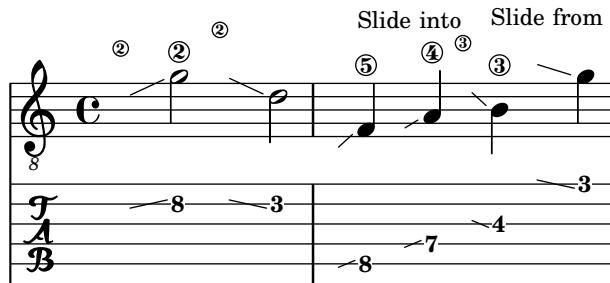

```
%% Hide fret number: useful to draw slide into/from a casual point of
%% the fretboard.
hideFretNumber = {
  \once \hide TabNoteHead
  \once \hide NoteHead
  \once \hide Stem
  \once \override NoteHead.no-ledgers = ##t
  \once \override Glissando.bound-details.left.padding = #0.3
}

music= \relative c' {
  \grace { \hideFretNumber d8\2 \glissando s2 } g2\2
  \grace { \hideFretNumber g8\2 \glissando s2 } d2 |

  \grace { \hideFretNumber c,8 \glissando s } f4\5^\markup \tiny { Slide into }
  \grace { \hideFretNumber f8 \glissando s } a4\4
  \grace { \hideFretNumber e'8\3 \glissando s } b4\3^\markup \tiny { Slide from }

    This is my song.
    I like to sing.
  }
}
>>

```

The image shows a musical score for fretted strings. It includes four chords: C, F, G, and C. Each chord is accompanied by a fretboard diagram and tablature. Below the chords are two staves of musical notation: a treble clef staff with eighth-note patterns and a bass clef staff with quarter-note patterns. The lyrics 'This is my song. I like to sing.' are written below the notation.

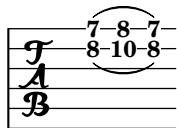

Martellato e strappato usando accordi

Quando il martellato o lo strappato si applicano a delle note in un accordo, viene disegnato un solo arco. Ma è possibile avere un “doppio arco” impostando la proprietà `doubleSlurs` su `#t`.

```

\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}

```

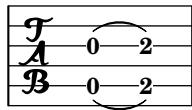

Martellato e strappato usando le voci

L’arco del martellato o dello strappato è rivolto in alto nella prima e terza voce, mentre è rivolto in basso nella seconda e quarta voce.

```

\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}

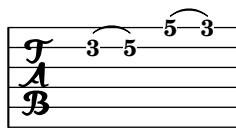

```

Martellato e strappato

Il martellato (hammer on) e lo strappato (pull off) si possono ottenere con le legature di portamento.

```
\new TabStaff {
    \relative c' {
        d4( e\2)
        a( g)
    }
}
```

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```
harmonies = \chordmode
{
    a8:13
    % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
    \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
    b8:13 s2.
    % THIS LINE IS THE SECOND METHOD
    s4 s4 b4:13
}

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration'.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #`((-7 . ,DOWN)
      (-5 . ,DOWN)
      (-3 . ,UP)
      (-1 . ,UP))
  <c d e f>4\laissezVibrer r
}
```

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost-context-property`. For a context-wide setting this could be done in `layout` as well.

```
%\layout {
%  \context {
%    \Score
%      stringOneTopmost = ##f
%  }
%  \context {
%    \TabStaff
%      tablatureFormat = #fret-letter-tablature-format
%  }
%}

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "|"
}

<<
  \new Staff { \clef "G_8" >_ "default" \m >_ "italian (historic)" \m }
  \new TabStaff
  {
    \m
    \set Score.stringOneTopmost = ##f
    \set TabStaff.tablatureFormat = #fret-letter-tablature-format
    \m
  }
>>
```

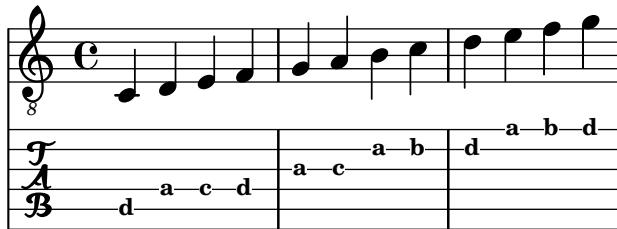

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
music = \relative c {
  c4 d e f
  g4 a b c
  d4 e f g
}
```

```
<<
    \new Staff {
        \clef "G_8"
        \music
    }
    \new TabStaff \with {
        tablatureFormat = #fret-letter-tablature-format
    }
{
    \music
}
>>
```

Posizionamento delle diteggiature della mano destra

È possibile avere un maggior controllo sul posizionamento delle diteggiature della mano destra impostando una specifica proprietà, come illustrato nell'esempio seguente.

```
#(define RH rightHandFinger)

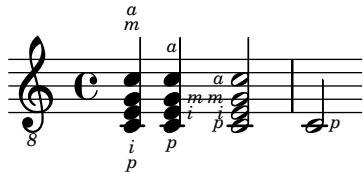

\relative c {
  \clef "treble_8"

  \set strokeFingerOrientations = #'(up down)
  <c\RH #1 e\RH #2 g\RH #3 c\RH #4 >4

  \set strokeFingerOrientations = #'(up right down)
  <c\RH #1 e\RH #2 g\RH #3 c\RH #4 >4

  \set strokeFingerOrientations = #'(left)
  <c\RH #1 e\RH #2 g\RH #3 c\RH #4 >2

  \set strokeFingerOrientations = #'(right)
  c\RH #1
}
```

Polifonia in intavolatura

La polifonia in TabStaff funziona proprio come nel rigo normale.

```
upper = \relative c' {
    \time 12/8
    \key e \minor
    \voiceOne
    r4. r8 e, fis g16 b g e e' b c b a g fis e
}

lower = \relative c {
    \key e \minor
    \voiceTwo
    r16 e d c b a g4 fis8 e fis g a b c
}

\score {
    <<
    \new StaffGroup = "tab with traditional" <<
        \new Staff = "guitar traditional" <<
            \clef "treble_8"
            \new Voice = "upper" \upper
            \new Voice = "lower" \lower
        >>
        \new TabStaff = "guitar tab" <<

  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}
```

Unfretted strings

Sezione “Unfretted string instruments” in *Guida alla Notazione*

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\
  {
    \slurUp
    bes,16[ s e]( 
    \hideNotes a)
    \unHideNotes f[( 
    \hideNotes a)
    \unHideNotes fis]( 
    \hideNotes a)
    \unHideNotes g[( 
    \hideNotes a)
    \unHideNotes gis]( 
    \hideNotes a)
  }
  >>
}
```

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

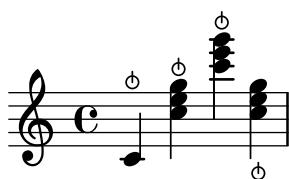

```
\relative c''' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}
```

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4^{\snappizzicato}
  <c, e g>4_\snappizzicato
}
```

Modello per quartetto d'archi (semplice)

Questo modello presenta un semplice quartetto d'archi. Impiega anche una sezione \global per definire il tempo e l'armatura di chiave.

```
global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c'' {
  c2 d
  e1
  \bar "|."
}

violinTwo = \new Voice \relative c'' {
  g2 f
  e1
  \bar "|."
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|."
}

cello = \new Voice \relative c' {
  \clef bass
  c2 b
}
```

```

a1
\bar "|."
}

\score {

    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}

```

A musical score for a string quartet. It features four staves: Violin 1, Violin 2, Viola, and Cello. Each staff starts with a note (C) and continues with a series of eighth notes. The staves are grouped together by a vertical brace.

Modello per quartetto d'archi con parti separate

Il frammento di codice del “Modello per quartetto d’archi” crea un bel quartetto, ma cosa fare se si ha bisogno di creare le singole parti? Questo nuovo modello mostra come usare la funzionalità `\tag` per dividere facilmente un pezzo in parti staccate.

Occorre dividere questo modello in file separati; i nomi dei file sono indicati nei commenti all’inizio di ogni file. `piece.ly` contiene tutte le definizioni musicali. Gli altri file – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly` e `vlc.ly` – creano ciascuna parte.

Non dimenticare di togliere i commenti quando usi i file separati!

```

A musical score for four string instruments: Violin 1, Violin 2, Viola, and Cello. The score consists of four staves grouped together by a brace. The Violin 1 staff is in treble clef, G clef, and common time. The Violin 2 staff is in treble clef, G clef, and common time. The Viola staff is in bass clef, F clef, and common time. The Cello staff is in bass clef, F clef, and common time. The music is divided into measures by vertical bar lines. Measure 1: Violin 1 has two eighth notes. Violin 2 has two eighth notes. Viola has one eighth note. Cello has one eighth note. Measure 2: Violin 1 has one eighth note. Violin 2 has one eighth note. Viola has one eighth note. Cello has one eighth note.

Elenco delle chiavi dei diagrammi per legni

Il seguente frammento produce un elenco di tutte le possibili chiavi e delle loro impostazioni per i diagrammi per legni, come sono definite in `scm/define-woodwind-diagrams.scml`. L'elenco

sarà visualizzato nel file di log, ma non nello spartito. Se si desidera che l'output appaia nella console, omettere dai comandi (`current-error-port`).

```
#(print-keys-verbose 'piccolo (current-error-port))

Ancient notation

Sezione “Ancient notation” in *Guida alla Notazione*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
    e d8 c d2
}

continuo = \figuremode {
    <_>4 <6>4 <5/>4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    \%bassFigureStaffAlignmentUp
    < _+>4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    \%bassFigureStaffAlignmentDown
    <4>4. <4>8 <_+>4
}

\score {
    <<
        \new Staff = bassStaff \bass
        \context Staff = bassStaff \continuo
    >>
}
```

```

The image shows two staves of musical notation. The top staff consists of five horizontal lines. It contains various musical elements such as note heads, stems, and rests, all rendered in black. There are also some non-standard symbols like asterisks (*), crosses (x), and diamonds (◊). The bottom staff also consists of five horizontal lines and contains similar musical elements, including a clef symbol and a key signature indicator (a single sharp sign). The notation is highly stylized and appears to be a representation of ancient or neomensural music.

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
\include "gregorian.ly"
```

```

Incipit

Quando si trascrive musica mensurale, un incipit all'inizio del brano è utile per indicare il tempo e l'armatura di chiave originali. I musicisti oggi sono abituati alle stanghette, ma queste non erano note all'epoca della musica mensurale. Come compromesso, spesso le stanghette vengono poste tra i righi, uno stile di formattazione chiamato mensurstriche.

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui righi viene nascosta con `\hide Staff.BarLine`.

```
global = {
    \hide Staff.BarLine
    s1 s
    % the final bar line is not interrupted
    \undo \hide Staff.BarLine
    \bar "|."
}

\new StaffGroup \relative c' {
    <<
        \new Staff { << \global { c1 c } >> }
        \new Staff { << \global { c c } >> }
    >>
}
```

Stili di pausa

Esistono vari stili di pausa.

```
\new Staff \relative c {

```

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente

Usando le etichette (tag), è possibile usare la stessa musica per produrre sia la musica mensurale che quella moderna. In questo frammento, viene introdotta la funzione `menrest`, che permette alle pause mensurali di essere posizionate precisamente sul rigo come nell'originale, ma con le pause moderne nella posizione standard. Le etichette vengono usate per produrre diversi tipi di stanghetta alla fine della musica, ma possono essere usate anche quando sono necessarie altre differenze: per esempio se si vogliono usare “pause d’intero” (`R1`, `R\breve`, etc.) nella musica moderna, ma pause normali (`r1`, `r\breve`, etc.) nella versione mensurale. La conversione di musica mensurale nel suo equivalente moderno viene solitamente chiamata **trascrizione**.

```

menrest = #(define-music-function (note)
  (ly:music?)

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
\tweak stencil
#(lambda (grob)
  (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
\stopped
```

```
\relative c' {  
  a'4^\upline a( c d')_-\upline  
}
```

World music

Sezione “World music” in *Guida alla Notazione*

Improvvisazione araba

Per improvvisazioni o *taqasim* a tempo libero, si può omettere l’indicazione di tempo e usare \cadenzaOn. Può essere necessaria la modifica dello stile delle alterazioni, perché l’assenza delle stanghette farà sì che l’alterazione sia contrassegnata una volta sola. Ecco un esempio di quello che potrebbe essere l’inizio di un’improvvisazione *hijaz*:

```
\include "arabic.ly"
```

```
\relative sol' {
    \key re \kurd
    \accidentalStyle forget
    \cadenzaOn
    sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol
}
```

Esempio di makam

Makam è un tipo di melodia proveniente dalla Turchia che usa alterazioni microtonali di 1/9. Consultare il file di inizializzazione ‘ly/makam.ly’ per vedere come sono definiti i nomi delle altezze e le alterazioni.

```
% Initialize makam settings
\include "makam.ly"
```

```
\relative c' {
    \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
    c4 cc db fk
    gbm4 gfc gfb efk
    fk4 db cc c
}
```

Armature di chiave non tradizionali

Il comando \key comunemente usato imposta la proprietà **keyAlterations** del contesto **Staff**. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```
\set Staff.keyAlterations = #`(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)
```

dove, per ogni elemento della lista, **ottava** indica l’ottava (0 è l’ottava dal Do centrale al Si precedente), **grado** indica la nota all’interno dell’ottava (0 significa Do e 6 significa Si) e **alterazione** può essere ,SHARP ,FLAT ,DOUBLE-SHARP etc.

Altrimenti, usando il formato breve per ogni elemento della lista, (**grado . alterazione**), ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonalidove un “diesis” non è 100 centesimi, **alterazione** si riferisce alla proporzione di un duecentesimo di tono intero.

```

\include "arabic.ly"
\relative do' {
    \set Staff.keyAlterations = #'((0 . ,SEMI-FLAT)
                                    (1 . ,SEMI-FLAT)
                                    (2 . ,FLAT)
                                    (5 . ,FLAT)
                                    (6 . ,SEMI-FLAT))
% \set Staff.extraNatural = ##f
    re reb \dwn reb resd
    dod dob dosd \dwn dob |
    dobsb dodsd do do |
}

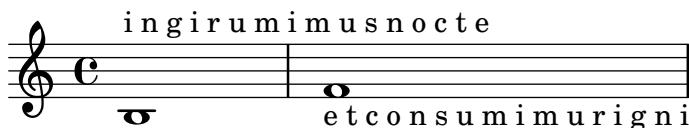

```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{  
  b1^\"markup {  
    \line { i n g i r u m i m u s n o c t e }  
  }  
  f'_\"markup {  
    \override #'(text-direction . -1)  
    \line { i n g i r u m i m u s n o c t e }  
  }  
}
```

Turkish Makam example

This template uses the start of a well-known Turkish Saz Semai that is familiar in the repertoire in order to illustrate some of the elements of Turkish music notation.

```
% Initialize makam settings
\include "turkish-makam.ly"

\header {
    title = "Hüseyni Saz Semaisi"
    composer = "Lavtacı Andon"
}

\relative {
```

```
\set Staff.extraNatural = ##f
\set Staff.autoBeaming = ##f

\key a \huseyni
\time 10/8

a'4 g'16 [fb] e8. [d16] d [c d e] c [d c8] bfc |

g4 g16 [fb] fb8. [e16] e [g fb e] e4 r8 |
}
```

Hüseyni Saz Semaisi

Lavtacı Andon

The musical score consists of two staves of music. The top staff begins with a quarter note followed by a sixteenth-note pattern of (b, f, b). This is followed by a eighth-note (d), a sixteenth-note pattern of (c, d, e), another eighth-note (c), a sixteenth-note pattern of (d, c, g), and a sixteenth-note (b). The bottom staff begins with a quarter note followed by a sixteenth-note pattern of (b, f, b). This is followed by an eighth-note (c), a sixteenth-note pattern of (d, c, g), another eighth-note (c), a sixteenth-note pattern of (d, c, g), and a sixteenth-note (b).

Contexts and engravers

Sezione “Changing defaults” in *Guida alla Notazione*

Sezione “Contexts and engravers” in *Manuale di Apprendimento*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
    e d8 c d2
}

continuo = \figuremode {
    <_>4 <6>4 <5/>4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    \%bassFigureStaffAlignmentUp
    < _+ >4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    \%bassFigureStaffAlignmentDown
    <4>4. <4>8 <_+>4
}

\score {
    <<
        \new Staff = bassStaff \bass
        \context Staff = bassStaff \continuo
    >>
}
```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```
\score {
    \new StaffGroup \relative c' {
        \new Staff
        \key f \major
```

```

c1 c^"Unwanted extra space" \break
<< { c1 | c }
  \new Staff {
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
>>
c1 | c^"Fixed here" \break
<< { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
>>
}
}
}

```

The image displays three staves of music. The top staff has a treble clef, a key signature of one flat, and two measures of quarter notes. It is labeled "Unwanted extra space". The middle staff has a treble clef, a key signature of one flat, and four measures of quarter notes. It is labeled "Fixed here". The bottom staff has a treble clef, a key signature of one flat, and two measures of quarter notes. It is identical to the top staff.

Adding an extra staff

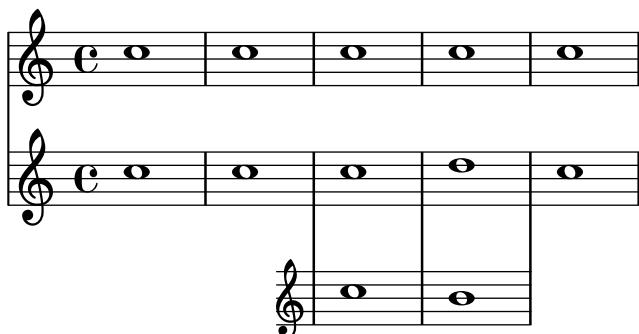

An extra staff can be added (possibly temporarily) after the start of a piece.

```

\score {
  <<
  \new Staff \relative c' {
    c1 | c | c | c | c
  }
  \new StaffGroup \relative c' {
    \new Staff {
      c1 | c
      <<

```

```
{
  c1 | d
}
\new Staff {
  \once \omit Staff.TimeSignature
  c1 | b
}
>>
c1
}
}
>>
}
```

Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia

LilyPond può modificare la direzione del gambo della nota centrale di un rigo in modo che segua la melodia: occorre aggiungere l'incisore `Melody_engraver` al contesto `Voice` e sovrascrivere la proprietà `neutral-direction` di `Stem`.

```
\relative c' {
  \time 3/4
  a8 b g f b g |
  c b d c b c |
}

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
    \override Stem.neutral-direction = #'()
  }
}
```

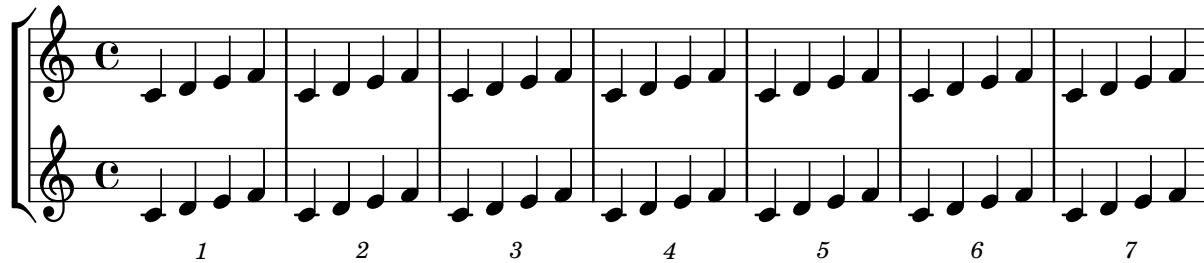

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
\new Dynamics {
  \startMeasureCount
  s1*7
  \stopMeasureCount
}
>>
```

Impostare l'output MIDI su un canale per voce

Nella creazione del file di output MIDI, il comportamento predefinito prevede che ogni rigo sia assegnato a un canale MIDI, con tutte le voci del rigo amalgamate in un canale. Ciò diminuisce il rischio di esaurire i canali MIDI disponibili, dato che ce ne sono solo 16 per traccia.

Tuttavia, spostando `Staff_performer` nel contesto `Voice`, ogni voce in un rigo può avere il proprio canale MIDI, come è illustrato nell'esempio seguente: sebbene le voci siano sullo stesso rigo, vengono creati due canali MIDI, ciascuno con un diverso strumento MIDI (`midiInstrument`).

```
\score {
    \new Staff <<
        \new Voice \relative c''' {
            \set midiInstrument = #"flute"
            \voiceOne
            \key g \major
            \time 2/2
            r2 g-"Flute" ~
            g fis ~
            fis4 g8 fis e2 ~
            e4 d8 cis d2
        }
        \new Voice \relative c' {
            \set midiInstrument = #"clarinet"
            \voiceTwo
            b1-"Clarinet"
            a2. b8 a
            g2. fis8 e
            fis2 r
        }
    >>
    \layout { }
    \midi {
        \context {
            \Staff
            \remove "Staff_performer"
        }
        \context {
            \Voice
            \consists "Staff_performer"
        }
        \tempo 2 = 72
    }
}
```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Default_bar_line_engraver"
  }
  \context {
    \Staff
    \consists "Timing_translator"
    \consists "Default_bar_line_engraver"
  }
}

<<
\new Staff {
  \scaleDurations 8/5 {
    \time 6/8
    \set Timing.measureLength = #(ly:make-moment 6/5)
    b8 b b b b b
    \time 2/4
    \set Timing.measureLength = #(ly:make-moment 4/5)
    b4 b
  }
}
\new Staff {
  \clef bass
  \time 2/4
  c2 d e f
}
>>
```

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff

\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \bar "||"
```

```
\stemOff a'\breve g'4 a'4
\stemOn f'2 \bar "||"
\stemOff a'\breve^markup { \italic flexe }
\stemOn g'2 \bar "||"
}
}
```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

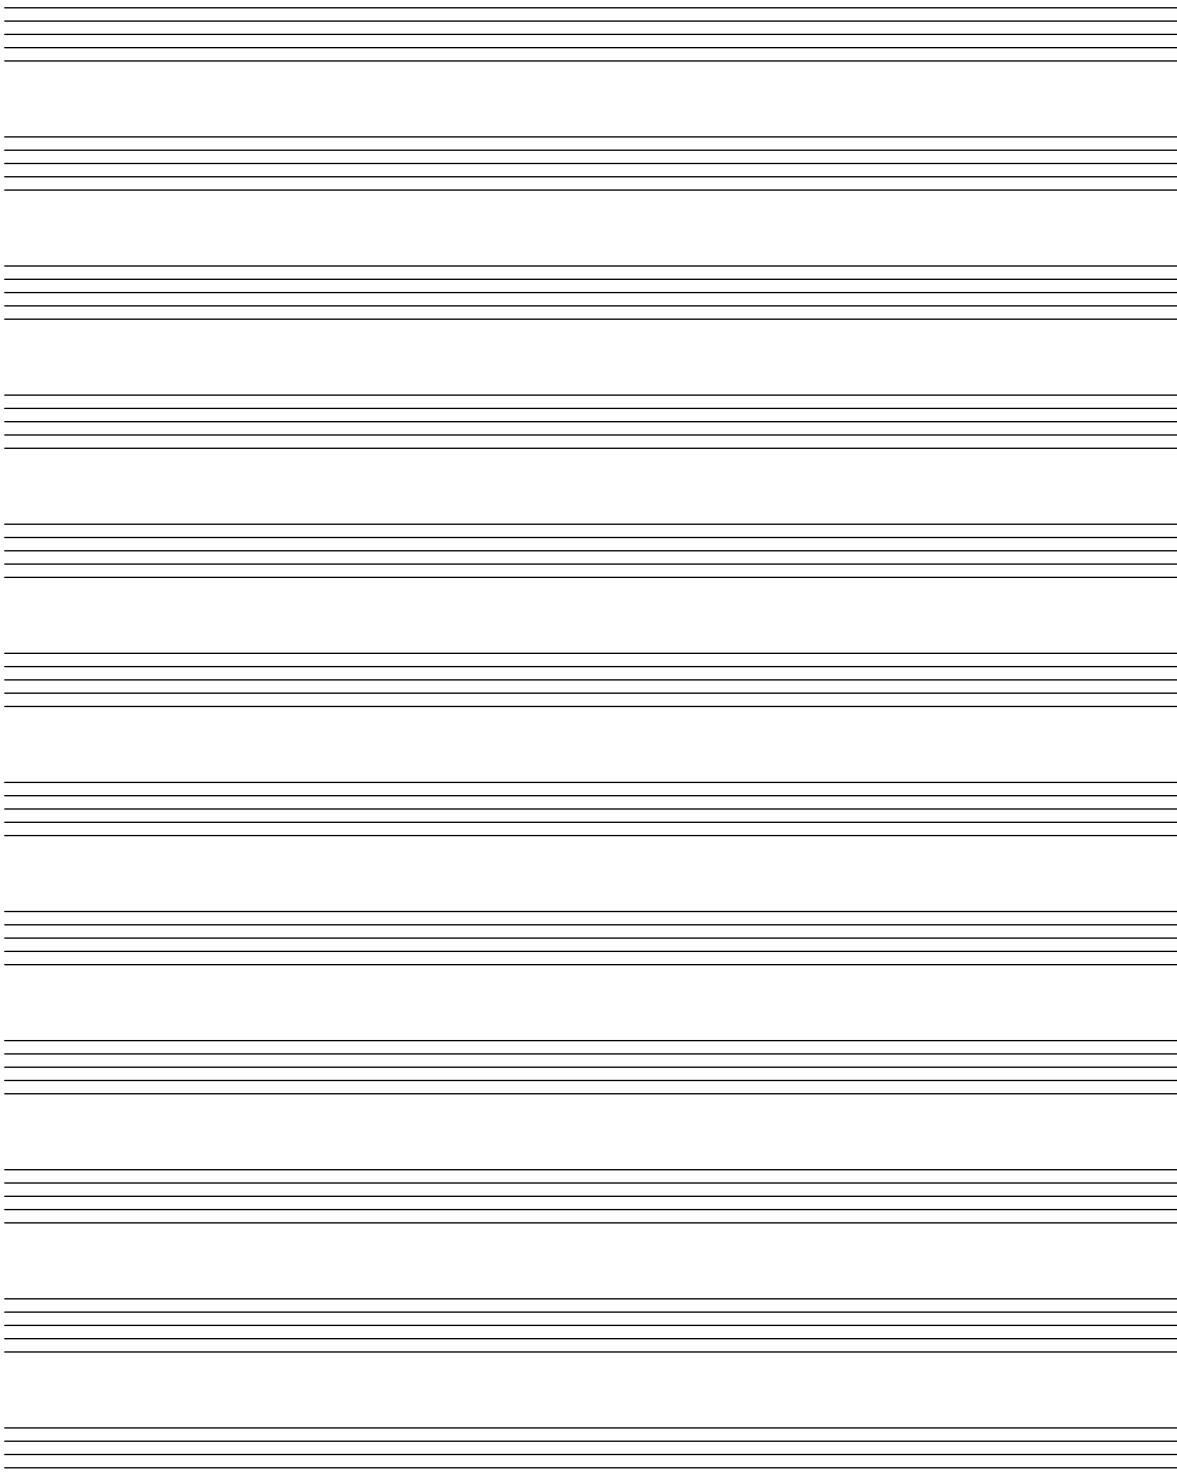

```
#(set-global-staff-size 20)
```

```
\score {
{
    \repeat unfold 12 { s1 \break }
}
\layout {
    indent = 0\in
    \context {
        \Staff
        \remove "Time_signature_engraver"
        \remove "Clef_engraver"
        \remove "Bar_engraver"
    }
    \context {
        \Score
        \remove "Bar_number_engraver"
    }
}
}

% uncomment these lines for "letter" size
%{
\paper {
    #(set-paper-size "letter")
    ragged-last-bottom = ##f
    line-width = 7.5\in
    left-margin = 0.5\in
    bottom-margin = 0.25\in
    top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
```

```
#(set-paper-size "a4")
ragged-last-bottom = ##f
line-width = 180
left-margin = 15
bottom-margin = 10
top-margin = 10
}
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{
    \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
  #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Cross staff stems

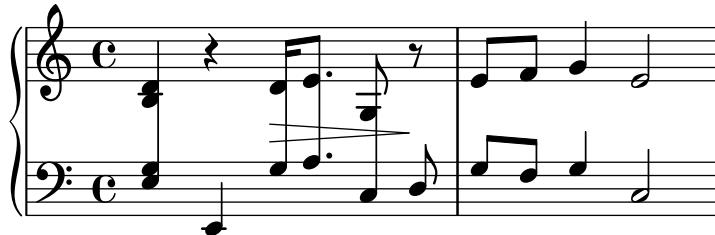

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```
\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

{
  \new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16> e'8. g8 r\!
    e'8 f' g'4 e'2
  }
}
```

```
\new Staff {
    \clef bass
    \voiceOne
    \autoBeamOff
    \crossStaff { <e g>4 e, g16 a8. c8} d
    \autoBeamOn
    g8 f g4 c2
}
>>
}
```

Defining an engraver in Scheme: ambitus engraver

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver.

This is basically a rewrite in Scheme of the code from `lily/ambitus-engraver.cc`.

```
#(use-modules (oop goops))

%%% Grob utilities
%%%
%%% These are literal rewrites of some C++ methods used by the ambitus engraver.

#(define (ly:separation-item::add-conditional-item grob grob-item)

Displaying a whole GrandStaff system if only one of its staves is alive

In orchestral scores sometimes single or groups of instruments are silent for a while and their staves can be removed for that time (with `\removeEmptyStaves`).

When they play again it is often preferred to show the staves of *all instruments of such a group*. This can be done adding the `Keep_alive_together_engraver` in the grouper (e.g., a GrandStaff or a StaffGroup).

In the example the violins are silent in the 2nd system and in the 3rd system. Only the first violin plays the last measure but the staff of the second violin is also displayed.

```

Flute

Violin I

Violin II

Cello

4

Fl

Ce

A musical score for system 7. It features four staves: Flute (Fl) in treble clef, Violin I (Vi I) in treble clef, Violin II (Vi II) in treble clef, and Cello (Ce) in bass clef. The score is divided into three measures by vertical bar lines. In measure 1, the Flute has eighth notes. In measure 2, the Violin I part consists of sixteenth-note patterns. In measure 3, the Cello has sustained notes.

Engravers one-by-one

The notation problem, creating a certain symbol, is handled by plugins. Each plugin is called an Engraver. In this example, engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature and key signature.

Engravers are grouped. For example, note heads, slurs, beams etc. form a `Voice` context. Engravers for key signature, accidentals, bar line, etc. form a `Staff` context.

```

The image shows six staves of music. The first staff has no staff lines. The second staff has solid horizontal lines. The third staff has a treble clef and solid horizontal lines. The fourth staff has a treble clef and a single solid horizontal line. The fifth staff has a treble clef and a single solid horizontal line with a brace underneath. The sixth staff has a treble clef and a single solid horizontal line with a brace underneath.

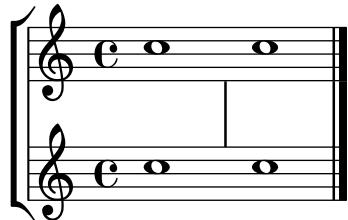

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui righi viene nascosta con `\hide`.

```
global = {
  \hide Staff.BarLine
  s1 s
  % the final bar line is not interrupted
  \undo \hide Staff.BarLine
  \bar "|."
}

\new StaffGroup \relative c' {
  <<
```

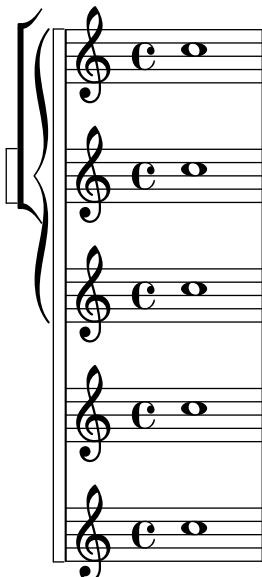

```
\new Staff { << \global { c1 c } >> }
\new Staff { << \global { c c } >> }
>>
}
```

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
\relative c' <<
  \override StaffGroup.SystemStartSquare.collapse-height = #4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
                                              (SystemStartSquare b) ) c ) d)
  \new Staff { c1 }
  \new Staff { c1 }
>>
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}
```

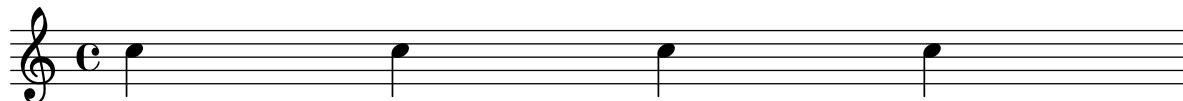

Togliere i numeri di battuta da uno spartito

I numeri di battuta possono essere tolti rimuovendo l'incisore `Bar_number_engraver` dal contesto `Score`.

```
\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    \%remove "Bar_number_engraver"
  }
}

\relative c' {
  c4 c c c \break
  c4 c c c
}
```

Usare una parentesi quadra all'inizio di un gruppo di righi

Si può usare il segno `SystemStartSquare` (uno dei segni che delimitano l'inizio del sistema) impostandolo esplicitamente in un contesto `StaffGroup` o `ChoirStaff`.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```

Using marklines in a Frenched score

Using `MarkLine` contexts (such as in LSR1010 (<http://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```

bars = {
    \tempo "Allegro" 4=120
    s1*2
    \repeat unfold 5 { \mark \default s1*2 }
    \bar "|"
    \tempo "Adagio" 4=40

Tweaks and overrides

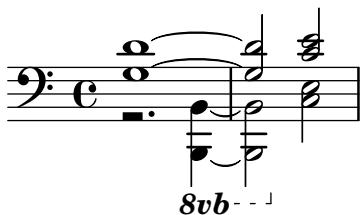

Sezione “Changing defaults” in *Guida alla Notazione*

Sezione “Tweaking output” in *Manuale di Apprendimento*

Aggiungere un segno di ottava a una sola voce

Se il rigo ha più di una voce, l’ottavazione in una voce trasporrà la posizione delle note in tutte le voci per la durata della parentesi dell’ottava. Se si intende applicare l’ottavazione a una sola voce, si possono impostare esplicitamente middleCPosition e la parentesi di ottava. In questo frammento, la chiave di basso ha di norma il MiddleCPosition impostato su 6, ovvero sei posizioni sopra la linea centrale, dunque nella porzione con l’ottava il MiddleCPosition è più alto di sette posizioni (un’ottava).

```
{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \set Staff.ottavation = #"8vb"
    \once \override Staff.OttavaBracket.direction = #DOWN
    \set Voice.middleCPosition = #(+ 6 7)
    <b,,, b,,,>4 ~ |
    q2
    \unset Staff.ottavation
    \unset Voice.middleCPosition
    <c e>2
  }
  >>
}
```

Adding links to objects

To add a link to a grob-stencil you could use `add-link` as defined here. Works with `\override` and `\tweak`.

Drawback: `point-and-click` will be disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```
 #(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (begin
            (let* (

```

```

(x-ext (ly:stencil-extent stil X))
(y-ext (ly:stencil-extent stil Y))
(url-expr `(url-link url-strg ,x-ext ,y-ext))
(new-stil (ly:stencil-add
  (ly:make-stencil url-expr x-ext y-ext) stil)))
  (ly:grob-set-property! grob 'stencil new-stil)))
#f)))))

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
    \revert NoteColumn.glissando-skip
    \undo \hide NoteHead
    \revert NoteHead.no-ledgers
}

\relative c' {

    \glissandoSkipOn
    f4 g a a8\noBeam
    \glissandoSkipOff
    a8

    r8 f8\glissando
    \glissandoSkipOn
    g4 a8
    \glissandoSkipOff
    a8 |

    r4 f\glissando \l
    \glissandoSkipOn
    a4\f \r
    \glissandoSkipOff
    b8!\r |
}
```

Adjusting grace note spacing

The space given to grace notes can be adjusted using the `spacing-increment` property of `Score.GraceSpacing`.

```
graceNotes = {
    \grace { c4 c8 c16 c32 }
    c8
}
```

```
\relative c' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}
```

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```
% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

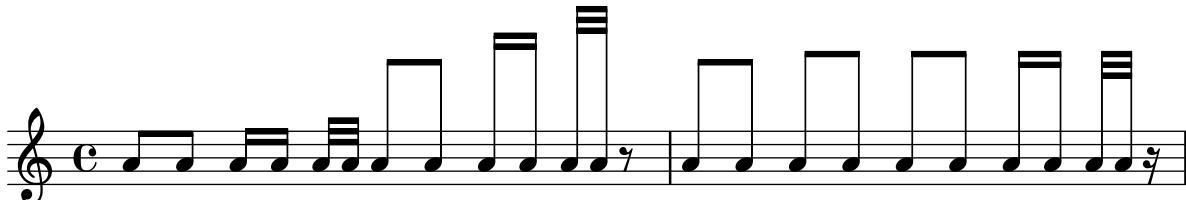

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
  #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the `details` of the `Stem`. If a single value is used as an argument, the length applies to all stems.

When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

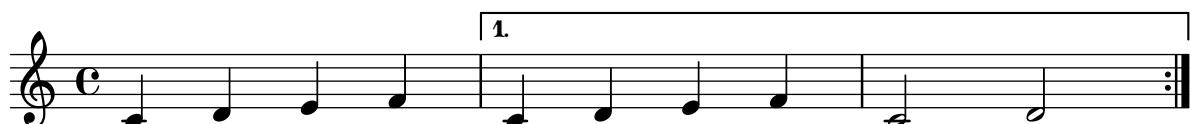

```
\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
  \override Stem.details.beamed-lengths = #'(8.5)
  a8[ a]
  \revert Stem.details
  a8[ a] a16[ a] a32[ a] r16
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```
\relative c'{
  \set Score.alternativeNumberingStyle = #'numbers
  \repeat volta 3 { c4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1 \break
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \repeat volta 3 { c,4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1
}
```

The image displays six musical staves, each with a different horizontal bracketing configuration. Staves 2, 3, 5, and 6c feature brackets positioned below the staff, with some having vertical bar lines. Staff 2 and 3 include a treble clef and a double bar line. Staff 6b shows a bracket placed above the staff. These examples illustrate various ways to use horizontal brackets in musical notation.

Parentesi analitiche sopra il rigo

Delle semplici parentesi analitiche orizzontali vengono aggiunte, per impostazione predefinita, sotto il rigo. L'esempio seguente mostra un modo per posizionarle sopra il rigo.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

Parentesi analitiche con etichette

Si può aggiungere del testo alle parentesi analitiche tramite la proprietà `text` del grob `HorizontalBracketText`. L'aggiunta di vari frammenti di testo alle parentesi che iniziano nello stesso momento musicale richiede l'uso del comando `\tweak`. Dopo un'interruzione di linea il testo viene messo tra parentesi.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
```

```

\override HorizontalBracket.direction = #UP
}
}

{
\once\override HorizontalBracketText.text = "a"
c'''\startGroup d'''\\stopGroup
\once\override HorizontalBracketText.text = "a''"
e'''\\startGroup d'''\\stopGroup |
c'''-\\tweak HorizontalBracketText.text
    \\markup \\bold \\huge "b" \\startGroup
    -\\tweak HorizontalBracketText.text "a" \\startGroup
    d'''\\stopGroup
e'''-\\tweak HorizontalBracketText.text "a'" \\startGroup
d'''\\stopGroup\\stopGroup |
c'''-\\tweak HorizontalBracketText.text foo \\startGroup
    d''' e''' f''' | \\break
g''' a''' b''' c'''\\stopGroup
}

```

The musical score consists of two staves. The top staff is in common time (C) and shows a sequence of notes grouped by horizontal brackets. The first group is labeled 'a' with a bracket over two notes. The second group is labeled 'a'' with a bracket over two notes. The third group is labeled 'a' with a bracket over two notes, followed by another labeled 'a''. The fourth group is labeled 'foo' with a bracket over three notes. The note 'b' is positioned above the third group. The bottom staff is in 4/4 time and shows a sequence of notes grouped by slurs. The first group is labeled '(foo)' with a slur over four notes. The second group is a single note.

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```

\\relative c' {
    \\stemDown
    \\slurUp
    \\slurNotes
    \\once \\override Slur.eccentricity = #3.0
    \\slurNotes
}

```

The musical score shows a staff with notes grouped by slurs. The slurs are curved and do not follow a straight line, matching the asymmetric pattern of the notes below them. The notes are grouped into pairs by slurs.

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breathe mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}
```

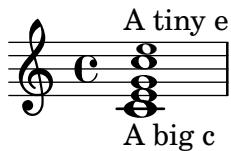

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #-2 c e g c
  \tweak font-size #2 e>1
  ^\markup { A tiny e } _\markup { A big c }
}
```

Changing beam thickness and spacing

To make beams thicker or thinner alter the `Beam.beam-thickness` property. To adjust the spacing between beams alter the `Beam.length-fraction` property.

```
\relative f' {
  \time 1/8
  \override Beam.beam-thickness = #0.4
```

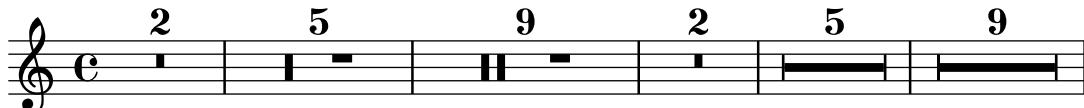

```
\override Beam.length-fraction = #0.8
c32 c c c
\revert Beam.beam-thickness % 0.48 is default thickness
\revert Beam.length-fraction % 1.0 is default spacing
c32 c c c
\override Beam.beam-thickness = #0.6
\override Beam.length-fraction = #1.3
c32 c c c
}
```

Modificare la forma delle pause multiple

Se la pausa multipla dura dieci misure o un numero inferiore a dieci, nel rigo apparirà una serie di pause di longa e di breve (chiamate in tedesco “Kirchenpausen” - pause ecclesiastiche); altrimenti apparirà una semplice linea. Il numero predefinito di dieci può essere cambiato sovrascrivendo la proprietà `expand-limit`.

```
\relative c' {
  \compressMMLRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = #3
    R1*2 | R1*5 | R1*9
  }
}
```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

```
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
      grob 'stencil
      (grob-interpret-markup grob
        #{
          \markup \lower #0.5
          #(case sp
            ((-5) "m")
            ((-3) "c ")
            ((-2) #{
              \markup \teeny \bold 2 #
              (else "bla")) #})))))

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

```
}
```

Nascondere la linea di estensione per le dinamiche testuali

Il testo usato per i *crescendo* e i *decrescendo* può essere cambiato modificando le proprietà di contesto `crescendoText` e `decrescendoText`.

Lo stile della linea dell'estensore può essere cambiato modificando la proprietà `'style` di `DynamicTextSpanner`. Il valore predefinito è `'dashed-line`; gli altri valori possibili sono `'line`, `'dotted-line` e `'none`.

```
\relative c' {
    \set crescendoText = \markup { \italic { cresc. poco } }
    \set crescendoSpanner = #'text
    \override DynamicTextSpanner.style = #'dotted-line
    a2\< a
    a2 a
    a2 a
    a2 a\mf
}
```

Changing the default text font family

The default font families for text can be overridden with `make-pango-font-tree`.

```
\paper {
    % change for other default global staff size.
    myStaffSize = #20
    %{
        run
        lilypond -dshow-available-fОНts
        to show all fonts available in the process log.
    %}

    #(define fonts
        (make-pango-font-tree "Times New Roman"
            "Nimbus Sans,Nimbus Sans L"
            "Luxi Mono"
        ;;
            "Helvetica"
        ;;
            "Courier"
        (/ myStaffSize 20)))
    }

\relative c' {
    c4^\markup {
        roman: foo \bold bla \italic bar \italic \bold baz
    }
}
```

```

}
c'4_\markup {
  \override #'(font-family . sans)
{
  sans: foo \bold bla \italic bar \italic \bold baz
}
}
c'2^\markup {
  \override #'(font-family . typewriter)
{
  mono: foo \bold bla \italic bar \italic \bold baz
}
}
}
}

```

mono: foo **bla** bar **baz**
 roman: foo **bla** *bar* **baz**

sans: foo **bla** bar **baz**

Changing the staff size

Though the simplest way to resize staves is to use #(set-global-staff-size xx), an individual staff's size can be changed by scaling the properties 'staff-space and fontSize.

```

<<
\new Staff {
  \relative c' {
    \dynamicDown
    c8\ff c c c c c c c
  }
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\f c c c
}
>>

```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
    \new Staff \relative c' {
        \tempo 4 = 160
        c4 e g b
        c4 b d c
        \set Score.tempoHideNote = ##t
        \tempo 4 = 96
        d,4 fis a cis
        d4 cis e d
    }
    \layout { }
    \midi { }
}
```

Changing the text for sustain markings

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }
```

```
\relative c' {
    \sustainNotes
    \set Staff.pedalSustainStrings = #'("P" "P-" "-")
    \sustainNotes
    \set Staff.pedalSustainStrings = #'("d" "de" "e")
    \sustainNotes
    \set Staff.pedalSustainStrings = #'("M" "M-" "-")
    \sustainNotes
    \set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
    \sustainNotes
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the `after-line-breaking` callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper { ragged-right = ##t }

\relative c' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
  % show glissando
  \override Glissando.after-line-breaking = ##t
  f2\glissando
  \break
  f,1\!\\stopTextSpan
}
```

Controllo dell'ordine verticale degli script

L'ordine verticale degli script è determinato dalla proprietà 'script-priority'. Più il numero è piccolo, più sarà posto vicino alla nota. In questo esempio, il simbolo di *diesis* (oggetto `TextScript`) ha prima la priorità più bassa, dunque è posto più in basso nel primo esempio. Nel secondo, il *trillo* (oggetto `Script`) ha la priorità più bassa, quindi si trova all'interno. Quando due oggetti hanno la stessa priorità, l'ordine in cui sono inseriti determina quale viene prima.

```
\relative c''' {
  \once \override TextScript.script-priority = #-100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = #-100
  a2^\prall^\markup { \sharp }
}
```

Controllare la visibilità della parentesi del gruppo irregolare

Il comportamento predefinito relativo alla visibilità della parentesi quadra del gruppo irregolare è di mostrare una parentesi a meno che non ci sia una travatura della stessa lunghezza del gruppo.

Per controllare la visibilità di tale parentesi, si imposta la proprietà `'bracket-visibility` su `#t` (mostra sempre la parentesi), `'if-no-beam` (mostra la parentesi solo se non c'è una travatura, che è il comportamento predefinito) o `#f` (non mostrare mai la parentesi). L'ultima opzione equivale a omettere l'oggetto `@code{TupletBracket}` dall'output.

```
music = \relative c' {
    \tuplet 3/2 { c16[ d e ] f8]
    \tuplet 3/2 { c8 d e }
    \tuplet 3/2 { c4 d e }
}

\new Voice {
    \relative c' {
        << \music s4^"default" >>
        \override TupletBracket.bracket-visibility = #'if-no-beam
        << \music s4^"'if-no-beam" >>
        \override TupletBracket.bracket-visibility = ##t
        << \music s4^"#t" >>
        \override TupletBracket.bracket-visibility = ##f
        << \music s4^"#f" >>
        \omit TupletBracket
        << \music s4^"omit" >>
    }
}
}
```

The musical score consists of two staves. The top staff is in common time (C) and the bottom staff is in 3/4 time (3). Measure 1 (labeled 'default') contains three groups of three eighth notes each, with a bracket underneath the first group. Measure 2 (labeled "'if-no-beam'") contains three groups of three eighth notes each, with no bracket. Measure 3 (labeled '#t') contains three groups of three eighth notes each, with a bracket underneath the first group. Measure 4 (labeled '#f') contains three groups of three eighth notes each, with no bracket. Measure 5 (labeled 'omit') contains three groups of three eighth notes each, with no bracket.

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `#f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando le frazioni 2/3 e 1/3 si aggiusta la posizione orizzontale.

```
\relative c'' {
    c2*2/3 ( s2*1/3\turn d4) r
    <<
    { c4.( d8) }
    { s4 s\turn }
    >>
    \transpose c d \relative c'' <<
    { c4.( d8) }
```

```
{
  s4
  \once \set suggestAccidentals = ##t
  \once \override AccidentalSuggestion.outside-staff-priority = ##f
  \once \override AccidentalSuggestion.avoid-slur = #'inside
  \once \override AccidentalSuggestion.font-size = -3
  \once \override AccidentalSuggestion.script-priority = -1
  \single \hideNotes
  b8-\turn \noBeam
  s8
}
>>
}
```

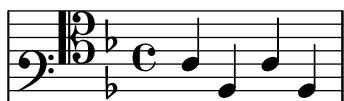

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{
    \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
  #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

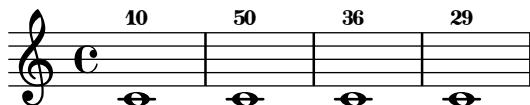

{
  \key d\minor
  f bes, f bes,
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
    c1-10
    c1-50
    c1-36
    c1-29
}
```

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one `RehearsalMark` object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column.

This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

```
{
    \key a \major
    \set Score.markFormatter = #format-mark-box-letters
    \once \override Score.RehearsalMark.outside-staff-priority = #5000
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
    \mark \markup { \bold { Senza denti } }

    % the hidden measure and bar line
    % \cadenzaOn turns off automatic calculation of bar numbers
    \cadenzaOn
    \once \override Score.TimeSignature.stencil = ##f
    \time 1/16
    s16 \bar ""
    \cadenzaOff

    \time 4/4
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark \markup { \box \bold Intro }
    d'1
    \mark \default
    d'1
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

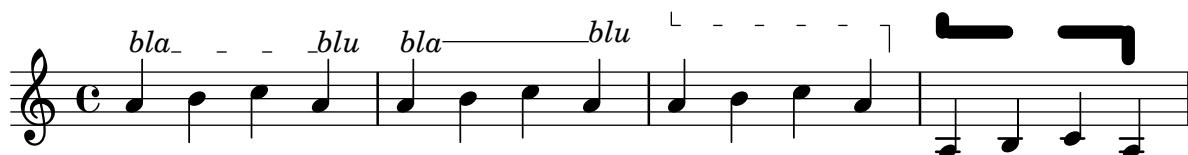

\relative c' {
    \override TextSpanner.bound-details.left.text = #"bla"
    \override TextSpanner.bound-details.right.text = #"blu"
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'line
    \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'dashed-line
    \override TextSpanner.bound-details.left.text =
        \markup { \draw-line #'(0 . 1) }
    \override TextSpanner.bound-details.right.text =
        \markup { \draw-line #'(0 . -2) }
    \once \override TextSpanner.bound-details.right.padding = #-2

    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \set Staff.middleCPosition = #-13
    \override TextSpanner.dash-period = #10
    \override TextSpanner.dash-fraction = #0.5
    \override TextSpanner.thickness = #10
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
    \relative c' {
      <<
        { r4
          \override Stem.cross-staff = ##t
          \override Stem.length = #19 % this is in half-spaces,
            % so it makes stems 9.5 staffspaces long
          \override Stem.Y-offset = #-6 % stems are normally lengthened
            % upwards, so here we must lower the stem by the amount
            % equal to the lengthening - in this case (19 - 7) / 2
            % (7 is default stem length)
          e e e }
        { s4
          \change Staff = "bottom"
          \override NoteColumn.ignore-collision = ##t
          c, c c
        }
      >>
    }
  \new Staff = bottom
  \relative c' {
    \clef bass
    \voiceOne
    g8 a g a g a g a
  }
>>
```

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

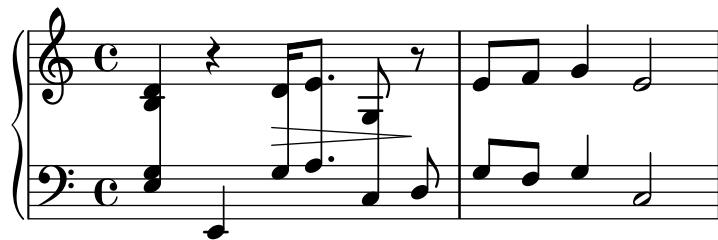

```
\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

{
  \new PianoStaff <<
    \new Staff {
      <b d'>4 r d'16\> e'8. g8 r\!
    }
}
```

```

e'8 f' g'4 e'2
}
\new Staff {
  \clef bass
  \voiceOne
  \autoBeamOff
  \crossStaff { <e g>4 e, g16 a8. c8} d
  \autoBeamOn
  g8 f g4 c2
}
>>
}

```

Custodes

Custodes may be engraved in various styles.

```

\layout { ragged-right = ##t }

\new Staff \with { \consists "Custos_engraver" } \relative c' {
  \override Staff.Custos.neutral-position = #4

  \override Staff.Custos.style = #'hufnagel
  c1^"hufnagel" \break
  <d a' f'>1

  \override Staff.Custos.style = #'medicea
  c1^"medicea" \break
  <d a' f'>1

  \override Staff.Custos.style = #'vaticana
  c1^"vaticana" \break
  <d a' f'>1

  \override Staff.Custos.style = #'mensural
  c1^"mensural" \break
  <d a' f'>1
}

```

Personalizzare la tastiera del diagramma dei tasti

Le proprietà del diagramma dei tasti possono essere impostate tramite 'fret-diagram-details'. Per i diagrammi dell'oggetto FretBoard, gli override vengono applicati all'oggetto FretBoards.FretBoard. Come Voice, FretBoards è un contesto di basso livello, dunque può essere omesso negli override delle proprietà.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
    #guitar-tuning
    #"x;1-1-(;3-2;3-3;3-4;1-1-);"

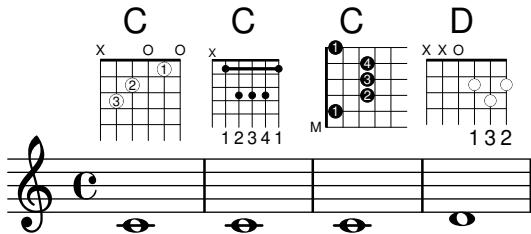

% shorthand
oo = #(define-music-function
    (grob-path value)
    (list? scheme?)
    #{ \once \override $grob-path = #value #})

<<
\new ChordNames {
    \chordmode { c1 | c | c | d }
}
\new FretBoards {
    % Set global properties of fret diagram
    \override FretBoards.FretBoard.size = #'1.2
    \override FretBoard.fret-diagram-details.finger-code = #'in-dot
    \override FretBoard.fret-diagram-details.dot-color = #'white
    \chordmode {
        c
        \oo FretBoard.size #'1.0
        \oo FretBoard.fret-diagram-details.barre-type #'straight
        \oo FretBoard.fret-diagram-details.dot-color #'black
        \oo FretBoard.fret-diagram-details.finger-code #'below-string
        c'
        \oo FretBoard.fret-diagram-details.barre-type #'none
        \oo FretBoard.fret-diagram-details.number-type #'arabic
        \oo FretBoard.fret-diagram-details.orientation #'landscape
        \oo FretBoard.fret-diagram-details.mute-string #"M"
```

```

\oo FretBoard.fret-diagram-details.label-dir #LEFT
\oo FretBoard.fret-diagram-details.dot-color #'black
c'
\oo FretBoard.fret-diagram-details.finger-code #'below-string
\oo FretBoard.fret-diagram-details.dot-radius #0.35

```

Mostrare la parentesi anche se c'è un solo rigo nel sistema

Se c'è un solo rigo in uno dei tipi di rigo `ChoirStaff` o `StaffGroup`, la parentesi e la stanghetta iniziale non appaiono. Si può modificare questo comportamento predefinito sovrascrivendo `collapse-height` e impostando un valore inferiore al numero di linee del rigo.

Nei contesti `PianoStaff` e `GrandStaff`, dove i sistemi iniziano con una parentesi graffa invece di una parentesi quadra, occorre impostare un'altra proprietà, come si vede nel secondo sistema dell'esempio.

```
\score {
    \new StaffGroup <<
        % Must be lower than the actual number of staff lines
        \override StaffGroup.SystemStartBrace.collapse-height = #4
        \override Score.SystemStartBar.collapse-height = #4
        \new Staff {
            c'1
        }
    >>
}
\score {
    \new PianoStaff <<
        \override PianoStaff.SystemStartBrace.collapse-height = #4
        \override Score.SystemStartBar.collapse-height = #4
        \new Staff {
            c'1
        }
    >>
}
```

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob's ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob's ancestry that can lead to confusion:

- The types of parents a grob has may depend on context.
- For some grobs, the X- and Y-parents are the same.
- A particular *ancestor* may be related to a grob in multiple ways.

- The concept of *generations* is misleading.

For example, the `System` grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a `VerticalAlignment` grob.

This macro prints (to the console) a textual representation of a grob's ancestry.

When called this way:

```
{ \once \override NoteHead.before-line-breaking = #display-ancestry c }
```

The following output is generated:

```
NoteHead
X,Y: NoteColumn
  X: PaperColumn
    X,Y: System
  Y: VerticalAxisGroup
    X: NonMusicalPaperColumn
      X,Y: System
    Y: VerticalAlignment
      X: NonMusicalPaperColumn
        X,Y: System
      Y: System

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```

\relative c''' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}

```

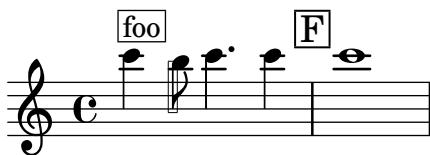

Drawing boxes around grobs

The `\print`-function can be overridden to draw a box around an arbitrary grob.

```
\relative c' {
    \override TextScript.stencil =
        #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
    c'4^"foo"

    \override Stem.stencil =
        #(make-stencil-boxer 0.05 0.25 ly:stem::print)
    \override Score.RehearsalMark.stencil =
        #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
    b8

    \revert Stem.stencil
    \revert Flag.stencil
    c4. c4
    \mark "F"
    c1
}
```

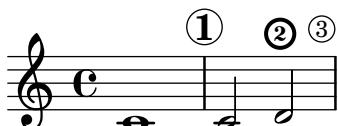

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
    c1
    \set Score.markFormatter =
        #(lambda (mark context)
            (make-circle-markup (format-mark-numbers mark context)))
    \mark \default

    c2 d^\markup {
        \override #'(thickness . 3) {
            \circle \finger 2
        }
    }
    \override Score.BarNumber.break-visibility = #all-visible
    \override Score.BarNumber.stencil =
        #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Estensore testuale della dinamica personalizzato

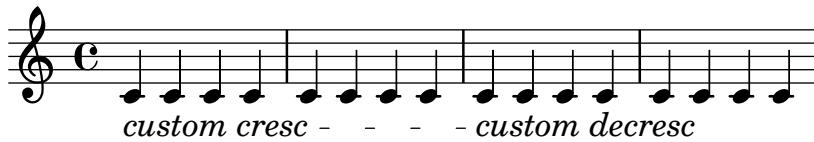

Funzioni postfix per estensori testuali personalizzati del crescendo. Gli estensori devono iniziare sulla prima nota della misura; e bisogna usare `-\mycresc`, altrimenti l'inizio dell'estensore viene assegnato alla nota successiva.

```
% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.

mycresc =
#(define-music-function (mymarkup) (markup?))
  (make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))

mydecresc =
#(define-music-function (mymarkup) (markup?))
  (make-music 'DecrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))

\relative c' {

  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}
```

Estensore testuale della dinamica personalizzato

Si possono definire estensori testuali personalizzati che fanno uso delle forcine e dei crescendo testuali. `\<` e `\>` generano le forcine, `\cresc` etc. generano gli estensori testuali.

```
% Some sample text dynamic spanners, to be used as postfix operators

crpoco =
#(make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text "cresc. poco a poco")

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decresc c4\!
}
```

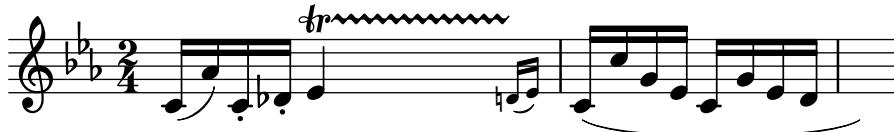

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `#ly:spanner::set-spacing-rods`.

```
\relative c' {
  \key c\minor
  \time 2/4
  c16( as') c,-. des-.
  \once\override TrillSpanner.minimum-length = #15
  \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4
  \startTrillSpan { d16[ ( \stopTrillSpan es)] }
  c( c' g es c g' es d
  \hideNotes
  c8)
}
```

Estendere i glissandi sulle volte delle ripetizioni

Un glissando che si estende in vari blocchi `\alternative` può essere simulato aggiungendo all'inizio di ogni blocco `\alternative` una nota di abbellimento nascosta da cui inizia un glissando. La nota di abbellimento deve avere la stessa altezza della nota da cui parte il glissando iniziale. In questo frammento si usa una funzione musicale che prende come argomento l'altezza della nota di abbellimento.

Attenzione: nella musica polifonica la nota di abbellimento deve avere una nota di abbellimento corrispondente in tutte le altre voci.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
    = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = #3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
```

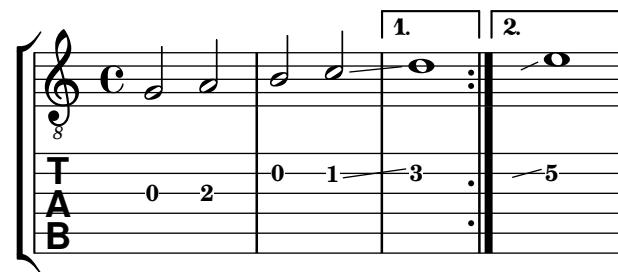

```

>>
\new TabStaff <<
\new TabVoice { \clef "moderntab" \music }
>>
>>
}
}

```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```

\paper { ragged-right = ##f }
\relative c' {
c2\sostenutoOn c
c2\sostenutoOff c
\once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
c2\sostenutoOn c
}

```

```
c2\sostenutoOff c
\once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
c2\sostenutoOn c
c2\sostenutoOff c
}
```

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

```
%% http://lsr.di.unimi.it/LSR/Item?id=1031
```

```
#(define ((flared-tie coords) grob)

}
```

The image displays six musical staves, each consisting of five horizontal lines. Staff 1 shows a tie from a note at the bottom of the staff to a note at the top, with a flared end. Staff 2 shows a similar tie but with a straighter, more rounded end. Staff 3 shows a standard straight tie. Staff 4 shows another standard straight tie. Staff 5 shows yet another standard straight tie. Staff 6 shows a flared tie again.

Force a cancellation natural before accidentals

The following example shows how to force a natural sign before an accidental.

```
\relative c' {
  \key es \major
  bes c des
  \tweak Accidental.restore-first ##t
  eis
}
```

Forzare lo spostamento orizzontale delle note

Quando il motore tipografico non riesce a risolvere una situazione, si può usare la sintassi che sovrascrive le decisioni tipografiche. L'unità di misura usata è lo spazio del rigo.

```
\relative c' <<
{
  <d g>2 <d g>
}
\\
{
  <b f'>2
  \once \override NoteColumn.force-hshift = #1.7
  <b f'>2
}
>>
```

Fret diagrams explained and developed

Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p")

Some dynamic expressions involve additional text, like “sempre pp”. Since dynamics are usually centered under the note, the \pp would be displayed way after the note it applies to.

To correctly align the “sempre pp” horizontally, so that it is aligned as if it were only the \pp, there are several approaches:

- * Simply use \once\override DynamicText.X-offset = #-9.2 before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...

- * Add some padding (#:hspace 7.1) into the definition of your custom dynamic mark, so that after lilypond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.

- * Shift the dynamic script \once\overrideX-offset = ... Drawback: \once\override is needed for every invocation!

- * Set the dimensions of the additional text to 0 (using #:with-dimensions '(0 . 0) '(0 . 0)). Drawback: To LilyPond “sempre” has no extent, so it might put other stuff there and create collisions (which are not detected by the collision detection!). Also, there seems to be some spacing, so it’s not exactly the same alignment as without the additional text

- * Add an explicit shifting directly inside the scheme function for the dynamic-script.

- * Set an explicit alignment inside the dynamic-script. By default, this won’t have any effect, only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of pp.

```
\paper {
    ragged-right = ##f
    indent = 2.5\cm
}

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }

% Solution 2: Using a dynamic script & shifting with
%             \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp")))

% Solution 3: Padding the dynamic script so the center-alignment
%             puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
```

```

#:italic "sempre"
#:dynamic "pp"
#:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
semppM =

Normal

Normal markup

Explicit shifting

Right padding

Set dimension to zero

Shift inside dynamics

Alignment inside dynamics

The figure consists of two sets of two measures each, separated by a vertical bar. The left set is in common time (indicated by a 'C') and the right set is in 2/4 time (indicated by a '2'). Each measure contains four notes. In the first measure of each set, the first note is at dynamic level 'pp', the second at 'p', the third at 'ff', and the fourth at 'pp'. In the second measure, the first note is at 'ff' and the second at 'sempre pp'. The labels on the left side correspond to different layout configurations for the second measure.

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

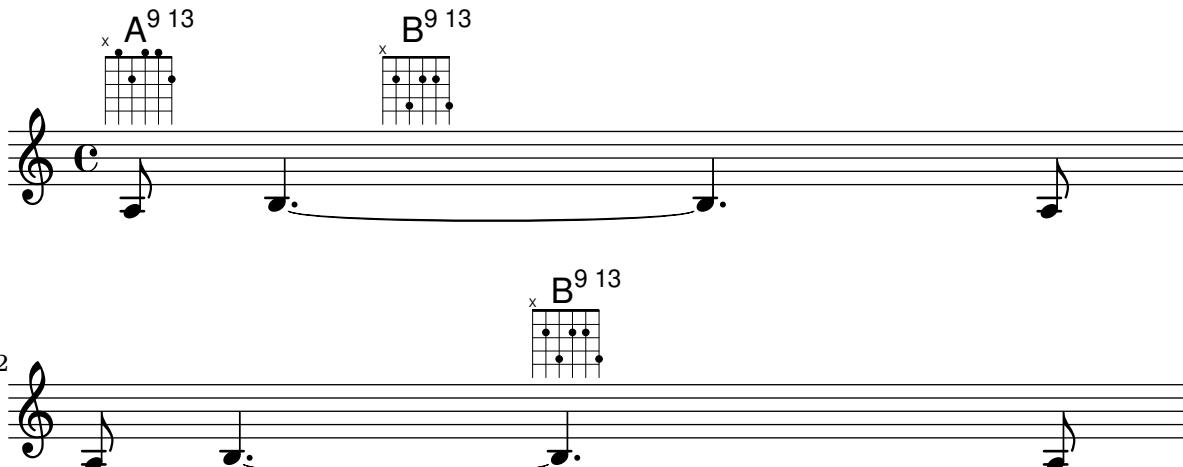

If you need to move the fret according with a rythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```

harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4  b4:13
}

```

```
\score

  }
  >>
}
```

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 (<http://lsr.di.unimi.it/LSR/Item?id=1>) will allow you to position two marks at the end of a line as well.

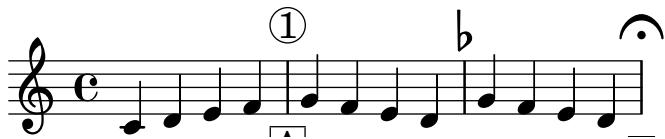

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
```

```

c d e f |
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
\once \override Score.RehearsalMark.baseline-skip = #9
\mark \markup \center-column { \circle 1 \box A }
g f e d |
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)

\mark \markup \center-column { \flat { \bold \small \italic Fine. } }
g f e d |
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
\once \override Score.RehearsalMark.baseline-skip = #9
\override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
\mark \markup \center-column { \fermata \box z }
}

```

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```

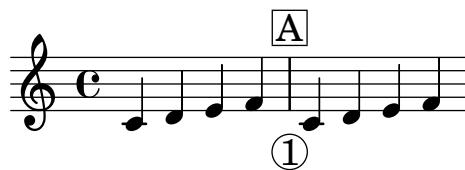

\score {
  \relative c'
  <<
  \new Staff {
    <<
    \new Voice \with {
      \consists Mark_engraver
      \consists "Staff_collecting_engraver"

Inserire una cesura

I segni di cesura possono essere creati sovrascrivendo la proprietà `'text` dell'oggetto `BreathingSign`. È disponibile anche un segno di cesura curvo.

```

\relative c' {
  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.straight"
  }
  c8 e4. \breathe g8. e16 c4

  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.curved"
  }
  g8 e'4. \breathe g8. e16 c4
}

```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

```

\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
}

```

```
c1
\clef "treble"
c1
\revert Staff.Clef.full-size-change
\clef "bass"
c1
\clef "treble"
c1
}
```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```
\relative c' {
    \override TextSpanner.bound-padding = #1.0
    \override TextSpanner.style = #'line
    \override TextSpanner.bound-details.right.arrow = ##t
    \override TextSpanner.bound-details.left.text = #"fof"
    \override TextSpanner.bound-details.right.text = #"gag"
    \override TextSpanner.bound-details.right.padding = #0.6

    \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

    \override Glissando.bound-details.right.arrow = ##t
    \override Glissando.arrow-length = #0.5
    \override Glissando.arrow-width = #0.25

    a8\startTextSpan gis a4 b\glissando b,
    g'4 c\stopTextSpan c2
}
```

Making an object invisible with the 'transparent' property

Setting the `transparent` property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
    \time 2/4
    <<
```

```
{
  \once \hide Stem
  \once \override Stem.length = #8
  b'8 ~ 8\noBeam
  \once \hide Stem
  \once \override Stem.length = #8
  g8 ~ 8\noBeam
}
\\
{
  b8 g g e
}
>>
}
```

Lasciare che i glissandi vadano a capo

Per permettere a un glissando di andare a capo se capita su un'interruzione di riga, si impostano le proprietà `breakable` e `after-line-breaking` su `#t`:

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

\relative c' {
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  f1\glissando |
  \break
  a4 r2. |
  f1\glissando
  \once \glissandoSkipOn
  \break
  a2 a4 r4 |
}
```

The image shows three staves of musical notation. Staff 1 starts with a bass clef, then changes to a treble clef. It contains a glissando from f1 to a2, followed by a break, then a glissando from f1 to a4. Staff 2 starts with a treble clef and contains a glissando from f1 to a2, followed by a break, then a glissando from f1 to a4. Staff 3 starts with a treble clef and contains a glissando from f1 to a2, followed by a break, then a glissando from f1 to a4.

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the `positions` setting of the Beam grob.

```
\relative c' {
    \time 2/4
    % from upper staff-line (position 2) to center (position 0)
    \override Beam.positions = #'(2 . 0)
    c8 c
    % from center to one above center (position 1)
    \override Beam.positions = #'(0 . 1)
    c8 c
}
```

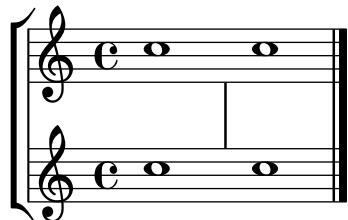

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando StaffGroup al posto di ChoirStaff. La stanghetta sui righi viene nascosta con `\hide`.

```
global = {
    \hide Staff.BarLine
    s1 s
    % the final bar line is not interrupted
    \undo \hide Staff.BarLine
    \bar "|."
}

\new StaffGroup \relative c'' {
    <<
        \new Staff { << \global { c1 c } >> }
        \new Staff { << \global { c c } >> }
    >>
}
```

Modificare l'inclinazione dell'estensore dell'ottava

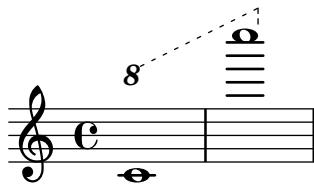

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

```
\relative c'' {
    \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
    \override Staff.OttavaBracket.bound-details =

```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter

values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```
\relative c' {
    \stemDown
    e4( a)
    \override Slur.positions = #'(1 . 1)

    \stemUp
    \override Slur.positions = #'(-5 . -5)
    e4( a)
    \stemDown
    \revert Slur.positions
    e4( a)
}
```

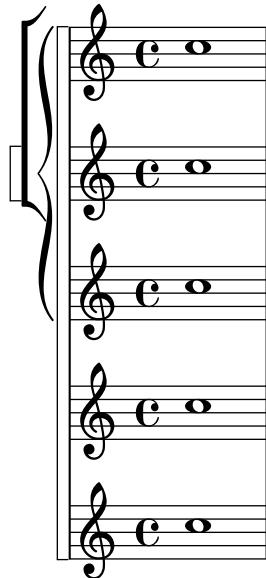

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
\relative c'' <<
  \override StaffGroup.SystemStartSquare.collapse-height = #4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'( SystemStartSquare ( SystemStartBrace ( SystemStartBracket a
                                                ( SystemStartSquare b ) ) c ) d )
  \new Staff { c1 }
  \new Staff { c1 }
```

>>

Overriding articulations of distinct type

Sometimes you may want to affect a single articulation-type. Although it is always possible to use \tweak, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom-settings. One use-case might be to create a style-sheet.

With 2.16.2 it is possible to put the proposed function, \customScripts, into a \layout-block.

% Code by David Nalesnik and Thomas Morley

```
#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:prob-property
                  (ly:grob-property grob 'cause)
                  'articulation-type))
           (tweaks (assoc-ref ls type)))
      (if tweaks
          (for-each
            (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
            tweaks)))))

customScripts =
#(define-music-function (settings)(list?)
#{ 
  \override Script.before-line-breaking =
  #(custom-script-tweaks settings)
#})

revertCustomScripts = { \revert Script.before-line-breaking }

%%%%%%%%%%%%%
% Example:
```

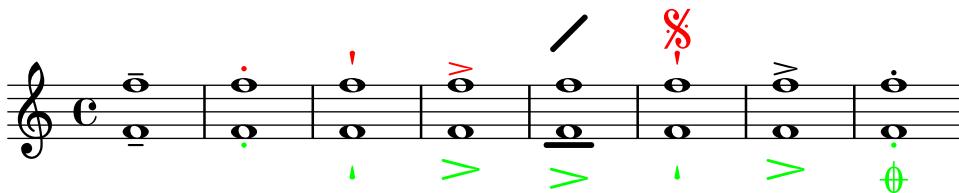

```
%%%%%%%
% Predefine a list of desired tweaks.
#define my-settings-1
'(
  ("staccato" . ((color . (1 0 0))(padding . 0.5)))
  ("accent" . ((font-size . 0)(color . (1 0 0))))
  ("tenuto" . ((rotation . (45 0 0)) (padding . 2)(font-size . 10)))
  ("staccatissimo" . ((padding . 1) (color . (1 0 0))))
  ("segno" . ((font-size . 0)(color . (1 0 0))))
)

#define my-settings-2
'(
  ("staccato" . ((color . (0 1 0))))
  ("accent" . ((font-size . 4)(color . (0 1 0))(padding . 1.5)))
  ("tenuto" . ((font-size . 10)))
  ("staccatissimo" . ((padding . 2) (color . (0 1 0))))
  ("coda" . ((color . (0 1 0)) (padding . 1)))
)

one =
\relative c'' {
  f1--
  \customScripts #my-settings-1
  f-. f-! f-> f-- f-!\segno
  \revertCustomScripts
  f-> f-.
}

two =
\relative c' {
  f1--
  \customScripts #my-settings-2
  f-. f-! f-> f---> f-!
  f-> f-.\coda
}

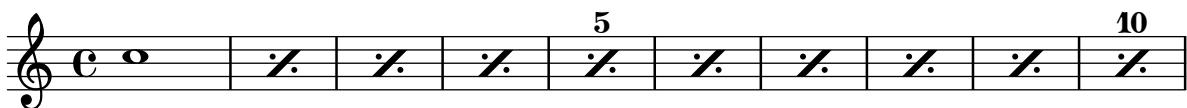

\new Staff <<
  \new Voice { \voiceOne \one }
  \new Voice { \voiceTwo \two }
>>
```

Visibilità del conto della ripetizione con segno percentuale

I contatori della ripetizione con segno percentuale possono essere mostrati a intervalli regolari impostando la proprietà di contesto `repeatCountVisibility`.

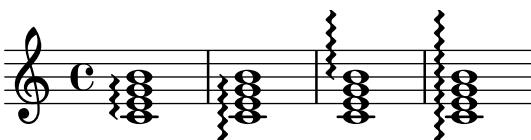

```
\relative c' {
    \set countPercentRepeats = ##t
    \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
    \repeat percent 10 { c1 } \break
    \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
    \repeat percent 6 { c1 d1 }
}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
    <c e g b>1\arpeggio
    \once \override Arpeggio.positions = #'(-5 . 0)
    <c e g b>1\arpeggio
    \once \override Arpeggio.positions = #'(0 . 5)
    <c e g b>1\arpeggio
    \once \override Arpeggio.positions = #'(-5 . 5)
    <c e g b>1\arpeggio
}
```

Posizionamento delle pause multiple

Diversamente dalle pause normali, non esiste un comando predefinito per cambiare la posizione sul rigo di un simbolo di pausa multipla di qualsiasi tipo connettendolo a una nota. Tuttavia, nella musica polifonica le pause multiple nelle voci dispari e pari sono separate verticalmente. Il posizionamento delle pause multiple si controlla nel modo seguente:

```
\relative c' {
    % Multi-measure rests by default are set under the fourth line
    R1
    % They can be moved using an override
    \override MultiMeasureRest.staff-position = #-2
    R1
    \override MultiMeasureRest.staff-position = #0
```

```

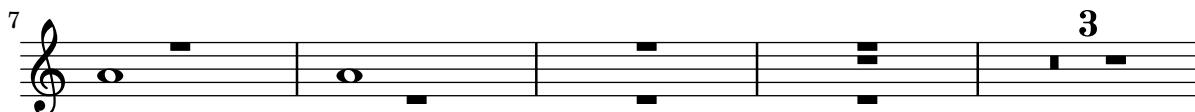

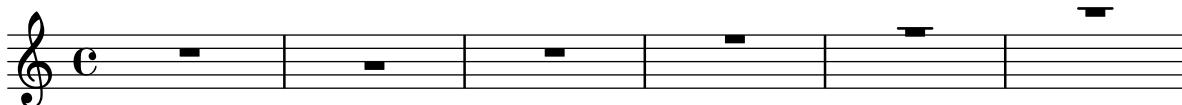

R1
\override MultiMeasureRest.staff-position = #2
R1
\override MultiMeasureRest.staff-position = #3
R1
\override MultiMeasureRest.staff-position = #6
R1
\revert MultiMeasureRest.staff-position
\break

% In two Voices, odd-numbered voices are under the top line
<< { R1 } \\ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \\ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \\ { R1 } >>

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \\ { R1 } \\
    \once \override MultiMeasureRest.staff-position = #0
    { R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMLRests
<<
    \revert MultiMeasureRest.direction
    { R1*3 }
    \\
    \revert MultiMeasureRest.direction
    { R1*3 }
>>
}

```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```

\relative c' {
    \override TextScript.avoid-slur = #'inside
    \override TextScript.outside-staff-priority = ##f

```

```
c2(^\\markup { \\halign #-10 \\natural } d4.) c8
}
```

Numeri di battuta racchiusi in rettangoli o cerchi

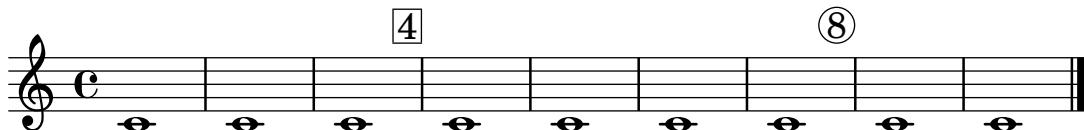

I numeri di battuta possono apparire anche all'interno di rettangoli o cerchi.

```
\relative c' {
    % Prevent bar numbers at the end of a line and permit them elsewhere
    \\override Score.BarNumber.break-visibility = #end-of-line-invisible
    \\set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

    % Increase the size of the bar number by 2
    \\override Score.BarNumber.font-size = #2

    % Draw a box round the following bar number(s)
    \\override Score.BarNumber.stencil
        = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \\repeat unfold 5 { c1 }

    % Draw a circle round the following bar number(s)
    \\override Score.BarNumber.stencil
        = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
    \\repeat unfold 4 { c1 } \\bar "|."
}
```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

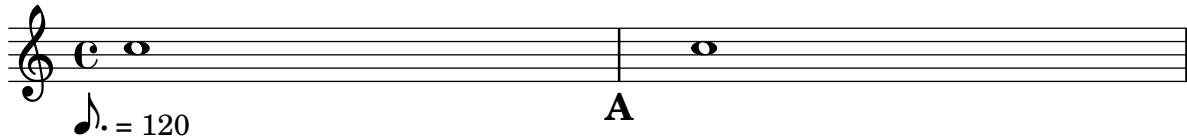

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```
\layout {
    indent = 0
    ragged-right = ##f
}

{
    % Metronome marks below the staff
    \\override Score.MetronomeMark.direction = #DOWN
    \\tempo 8. = 120
    c ''1

    % Rehearsal marks below the staff
```

```
\override Score.RehearsalMark.direction = #DOWN
\mark \default
c''1
}
```

Printing note names with and without an octave marker

The `NoteNames` context can be used to print the text value of notes. The `printOctaveNames` property turns on or off the representation of the octave of the note.

```
scale = \relative c' {
  a4 b c d
  e4 f g a
}

\new Staff {
  <<
  \scale
  \context NoteNames {
    \set printOctaveNames = ##f
    \scale
  }
  >>
  R1
  <<
  \scale
  \context NoteNames {
    \set printOctaveNames = ##t
    \scale
  }
  >>
}
```

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c'' <<
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
  \new Staff {
```

```

c8[ c \clef alto c c \grace { d16 } c8 c] c4
c2 \grace { c16[ c16] } c2
}
\new Staff {
c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
c1
}
>>

```

Removing brace on first line of piano score

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`.

It may be useful when cutting and pasting the engraved image into existing music.

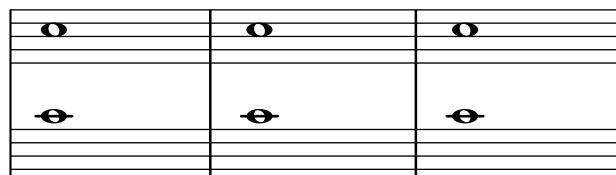

It uses `\alterBroken`.

```

someMusic = {
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
    indent=75
    \context {
      \PianoStaff
      \alterBroken transparent #'(##t) SystemStartBrace
    }
  }
}

```

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves, i.e. a SpanBar is printed. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
    \new StaffGroup <<
        \new Staff {
            e1 | e
            \once \override Staff.BarLine.allow-span-bar = ##f
            e1 | e | e
        }
        \new Staff {
            c1 | c | c
            \once \override Staff.BarLine.allow-span-bar = ##f
            c1 | c
        }
        \new Staff {
            a1 | a | a | a | a
        }
    >>
}
```

Eliminare la prima linea vuota

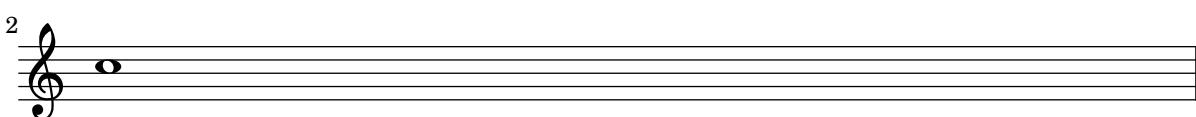

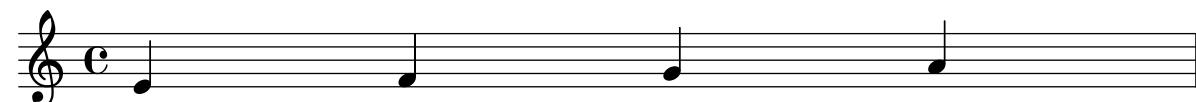

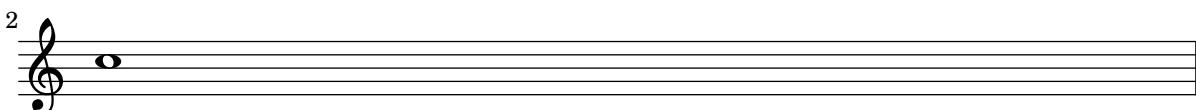

Il primo rigo vuoto si può togliere dalla partitura impostando la proprietà `remove-first` di `VerticalAxisGroup`. Questa impostazione agisce a livello globale se posta nel blocco `\layout`, a livello locale se posta nel rigo specifico che deve essere tolto. Nel secondo caso, si deve specificare il contesto (`Staff` si applica solo al rigo corrente) prima della proprietà.

Il rigo inferiore del secondo gruppo di righi non viene rimosso, perché l'impostazione ha effetto solo sul rigo in cui si trova.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}

\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>

\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>
```

Stili di pausa

Esistono vari stili di pausa.

```
\new Staff \relative c {
    \omit Score.TimeSignature
    \cadenzaOn

    \override Staff.Rest.style = #'mensural
    r\maxima^\markup \typewriter { mensural }
    r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'neomensural
    r\maxima^\markup \typewriter { neomensural }
    r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'classical
    r\maxima^\markup \typewriter { classical }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'z
    r\maxima^\markup \typewriter { z-style }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'default
    r\maxima^\markup \typewriter { default }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}
```

The image shows four musical staves, each with a treble clef and a key signature of one sharp. The first staff, labeled "mensural", contains rests of increasing duration: a breve, two longas, a longa, a semibreve, a breve, a longa, a semibreve, and a breve. The second staff, labeled "neomensural", contains rests of increasing duration: a breve, two longas, a longa, a semibreve, a breve, a longa, a semibreve, and a breve. The third staff, labeled "classical", contains rests of increasing duration: a breve, two longas, a longa, a semibreve, a breve, a longa, a semibreve, and a breve. The fourth staff, labeled "z-style", contains rests of increasing duration: a breve, two longas, a longa, a semibreve, a breve, a longa, a semibreve, and a breve. The rests are represented by vertical bars of increasing height, corresponding to the values defined in the LilyPond code above.

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

The standard support for this using `\repeat percent` is unsuitable here since the first beat has to be an ordinary note or rest.

This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the `r4` in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
    \once \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
    \once \override Rest.thickness = #0.48
    \once \override Rest.slope = #1.7
    r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
  #{
    \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
    \override Rest.thickness = #0.48
    \override Rest.slope = #1.7
    \repeat unfold $count { r4 }
    \revert Rest.stencil
  }
)

\score {
  \relative c' {
    c4 d e f |
    \rs \rs \rs \rs |
    \comp #4 |
  }
}
```

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `'break-align-orders` property of the `BreakAlignment` grob.

The value of `'break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving `key-cancellation` before

`staff-bar`; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

```
\new Staff {
    \override Score.BreakAlignment.break-align-orders =
        #((left-edge ambitus breathing-sign clef staff-bar
            key-cancellation key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
            staff-bar key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
            key-signature staff-bar time-signature custos))

    \key des \major
    c'1
    \bar "|)"
    \key bes \major
    c'1
}
```

Impostare il comportamento delle forcelle sulle stanghette

Se la nota che termina una forcella si trova sul primo battito di una battuta, la forcella si ferma prima della stanghetta che precede la nota. Si può controllare questo comportamento modificando la proprietà `'to-barline'`.

```
\relative c' {
    e4< e2.
    e1\!
    \override Hairpin.to-barline = ##f
    e4< e2.
    e1\!
}
```

Setting system separators

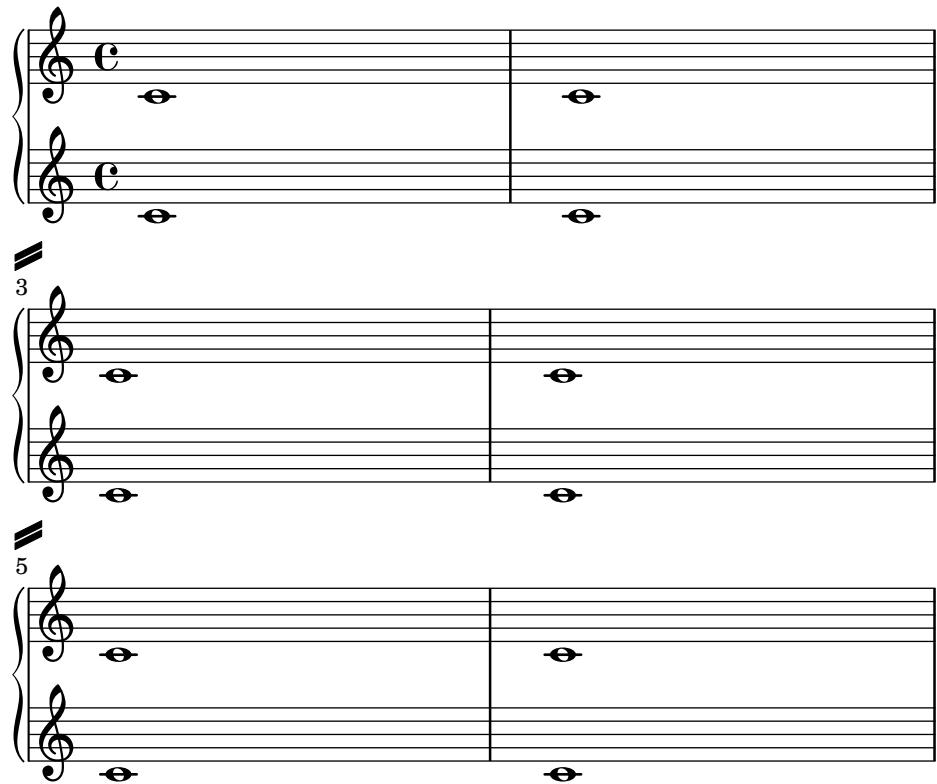

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
    system-separator-markup = \slashSeparator
    line-width = 120
}

notes = \relative c' {
```

```
c1 | c \break
c1 | c \break
c1 | c
}

\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` will only show a fermata below. The fermata above will simply be ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support' would be required.

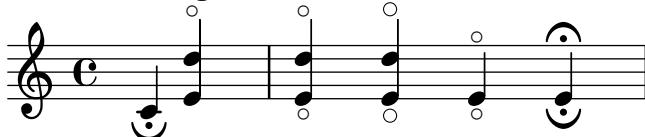

So, the solution is to write the note as a chord and add the articulations inside the `<...>`. The direction will always be above, but one can tweak this via a `\tweak: <c-\tweak direction #DOWN-\fermata^\fermata`

```
% The same as \flageolet, just a little smaller
smallFlageolet = \tweak font-size #-2 \flageolet
```

```
\relative c' {
  s4^"Wrong:"
  c4_\fermata^\fermata % The second fermata is ignored!
  <e d'>4^smallFlageolet_\smallFlageolet

  s4^"Works if written inside a chord:"
  <e_\smallFlageolet d'^\smallFlageolet>4
  <e_\flageolet d'^\flageolet>4
  <e_\smallFlageolet^\smallFlageolet>4
  <e_\fermata^\fermata>4
}
```

Wrong: Works if written inside a chord:

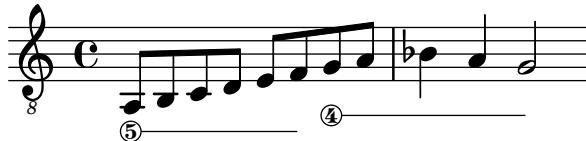

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
  #{
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.text =
      \markup { \circle \number $StringNumber }
  #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
```

```
\textSpannerDown
a8\startTextSpan
b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}
```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```
\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
        (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
    \time 2/4
    a4 b8 c
}
```

Indicazione di tempo che mostra solo il numeratore (invece della frazione)

Talvolta un'indicazione di tempo non deve mostrare la frazione intera (ad esempio 7/4), ma solo il numeratore (7 in questo caso). Si può ottenere facilmente con `\override Staff.TimeSignature.style = #'single-digit`, che cambia lo stile in modo permanente. Con `\revert Staff.TimeSignature.style`, questa impostazione può essere annullata. Per applicare lo stile a una sola indicazione di tempo, si usa il comando `\override` preceduto da `\once`.

```
\relative c' {
    \time 3/4
    c4 c c
    % Change the style permanently
    \override Staff.TimeSignature.style = #'single-digit
    \time 2/4
    c4 c
    \time 3/4
    c4 c c
    % Revert to default style:
    \revert Staff.TimeSignature.style
    \time 2/4
    c4 c
    % single-digit style only for the next time signature
    \once \override Staff.TimeSignature.style = #'single-digit
    \time 5/4
    c4 c c c c
    \time 2/4
    c4 c
}
```

Tuplet bracket and change staff

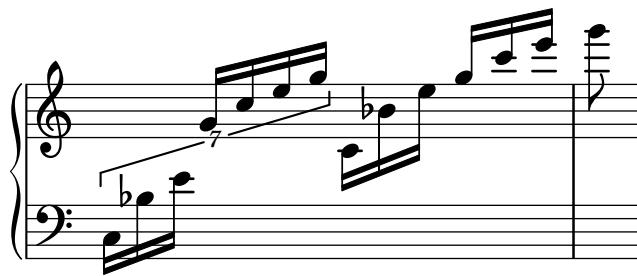

This snippet shows how to set a tuplet starting in a lower staff and finishing in the upper one.

```
aigues = \relative c' {
```

```
\time 6/8
s4.
\stemDown
c16[ bes' e]
\stemUp
g c e
\stemDown
g8
}

basses = \relative c {
\time 3/4
\clef F
\tweak positions #'(4.5 . 9.5)
\tweak edge-height #'(1 . -1)
\tuplet 7/6 {
  c16[ bes' e]
  \change Staff = md
  \stemUp
  g[ c e g]
}
s4.s8
}

\new PianoStaff
\with { \omit TimeSignature }
<<
\new Staff = md \aigues
\new Staff = mg \basses
>>
```

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```
{  
    % The default treble clef  
    \key f \major  
    c'1  
    % The standard bass clef  
    \set Staff.clefGlyph = #"clefs.F"  
    \set Staff.clefPosition = #2  
    \set Staff.middleCPosition = #6  
    \set Staff.middleCClefPosition = #6  
    \key g \major  
    c'1  
    % The baritone clef  
    \set Staff.clefGlyph = #"clefs.C"  
    \set Staff.clefPosition = #4  
    \set Staff.middleCPosition = #4  
    \set Staff.middleCClefPosition = #4  
    \key f \major  
    c'1  
    % The standard choral tenor clef  
    \set Staff.clefGlyph = #"clefs.G"  
    \set Staff.clefPosition = #-2  
    \set Staff.clefTransposition = #-7

\set Staff.middleCPosition = #0
c'1
}
```

Modificare l'aspetto degli abbellimenti di un intero brano

L'aspetto di tutte le espressioni contenute nei blocchi `\grace` di un brano può essere modificato con le funzioni `add-grace-property` e `remove-grace-property`. L'esempio seguente toglie la definizione della direzione di `Stem` nell'abbellimento, in modo che gli abbellimenti non siano sempre rivolti in su, e barra le teste di nota.

```
\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,,32 g a } e2
    }
  }
}
```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```
testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes

    \override Flag.stencil = #modern-straight-flag
    \testnotes
  }
}
```

```

\override Flag.stencil = #old-straight-flag
\testnotes

\override Flag.stencil = #flat-flag
\testnotes

\revert Flag.stencil
\testnotes
}

\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}
}
}

```

Using ly:grob-object to access grobs with \tweak

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob-interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a NoteHead callback, but the technique is not limited to NoteHeads. However, the NoteHead callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The example function defined below (“display-grobs”) is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

Example console output:

```

#Grob Accidental () #Grob Stem
#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)
  ;; notehead is grob
  (ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    
```

```
(ly:grob-object notecolumn 'stem))

#(define (display-grobs notehead)
  ;; notehead is grob
  (let ((accidental (notehead-get-accidental notehead))
        (arpeggio (notehead-get-arpeggio notehead))
        (stem (notehead-get-stem notehead)))
    (format (current-error-port) "~2&~a\n" (make-string 20 #\‐))
    (for-each
      (lambda (x) (format (current-error-port) "~a\n" x))
      (list accidental arpeggio stem)))

\relative c' {
  %% display grobs for each note head:
  \%override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}
```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```
parallelogram =
  #(ly:make-stencil (list 'embedded-ps
    "gsave
      currentpoint translate
      newpath
      0 0.25 moveto
      1.3125 0.75 lineto
      1.3125 -0.25 lineto
      0 -0.75 lineto
      closepath
      fill
      grestore" )
    (cons 0 1.3125)
    (cons -.75 .75))

myNoteHeads = \%override NoteHead.stencil = \parallelogram
normalNoteHeads = \%revert NoteHead.stencil

\relative c'' {
  \myNoteHeads
  g4 d'
```

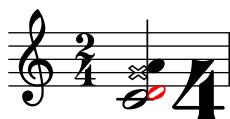

```
\normalNoteHeads
<f, \tweak stencil \parallelogram b e>4 d
}
```

Using the \tweak command to tweak individual grobs

With the `\tweak` command, every grob can be tuned directly. Here are some examples of available tweaks.

```
\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  <
    \tweak font-size #3 c
    \tweak color #red d-\tweak font-size #8 -4
    \tweak style #'cross g
    \tweak duration-log #2 a
  >2
}
```

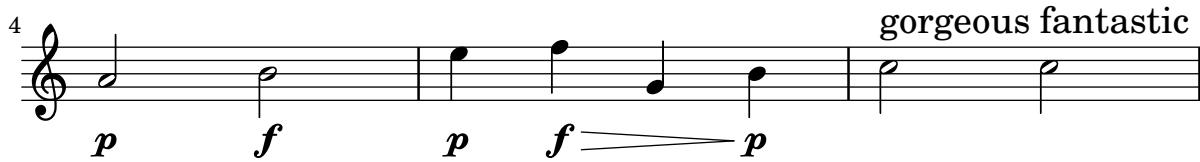

Dinamiche e segni testuali allineati verticalmente

Tutti gli oggetti `DynamicLineSpanner` (forcelle e testi di dinamica) sono posti a una distanza minima dal rigo determinata da `'staff-padding`. Se si imposta `'staff-padding` su un valore abbastanza grande, le dinamiche saranno allineate.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = #3
  \textLengthOn
  \override TextScript.staff-padding = #1
  \music
}
```

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```
\paper {
    ragged-right = ##t
}

\relative c' <<
    \new Staff = "1" { c4 c s2 }
    \new Staff = "2" { c4 c s2 }
    \new Staff = "3" { c4 c s2 }
    { \skip 2
      <<
      \lyrics {
          \set alignBelowContext = #"1"
          lyrics4 below
      }
      \new Staff \with {
          alignAboveContext = #"3"
          fontSize = #-2
          \override StaffSymbol.staff-space = #(magstep -2)
          \remove "Time_signature_engraver"
      } {
          \tuplet 6/4 {
              \override TextScript.padding = #3
              c8[^"ossia above" d e d e f]
          }
      }
    }
    >>
}
>>
```

Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to true, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to true.

```
<<
\relative c' {
  c8 c b b a a c16 c b b
  c8 c b b a a c16 c b b
  c8 c b b a a c c b b
}
\figures {
  \set useBassFigureExtenders = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##f
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>8
}
>>
```

Paper and layout

Sezione “Spacing issues” in *Guida alla Notazione*

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
    \new StaffGroup <<

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #LEFT
            instrumentName = \markup \left-column {
                "Left aligned"
                "instrument name"
            }
            shortInstrumentName = "Left"
        }

        { c'1 \break c'1 }

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #CENTER
            instrumentName = \markup \center-column {
                Centered
                "instrument name"
            }
            shortInstrumentName = "Centered"
        }

        { g'1 g'1}

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #RIGHT
            instrumentName = \markup \right-column {
                "Right aligned"
                "instrument name"
            }
            shortInstrumentName = "Right"
        }

        { e'1 e'1 }

    >>

    \layout {
        ragged-right = ##t
    }
}
```

```

    indent = 4\cm
    short-indent = 2\cm
}
}
}
```

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```

\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break
    % ...
  }
\voiceOne
```

```

s2 a'8^\aliceSings a' b'4 |
\oneVoice
g'1
}
\new Voice = "eve" {
s1 |
a'2^\eveSings g' |
s1 |
a'2^\eveSings g'
% ...

\voiceTwo
f'4^\eveSings a'8 g' f'4 e' |
\oneVoice
s1
}

>>
\new Lyrics \lyricsto "alice" {
may -- be
sec -- ond
% ...
Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
that the
words are
% ...
...and then I was like--
}
>>

```

The musical score shows two staves. The top staff (Alice) starts with a quarter note followed by a dash, then another quarter note. The bottom staff (Eve) starts with a half note. The lyrics are placed below the notes, aligned with the vocal parts. The vocal parts are labeled ALICE and EVE above the notes.

Book parts

\bookpart can be used to split a book into several parts. Each part last page can be affected by `ragged-last-bottom`. Header and footer markups can detect a part last page, and make the difference with the book last page.

```
#(set-default-paper-size "a6")
```

```
\book {
% book paper, which is inherited by all children bookparts
```

```
\paper {
    ragged-last-bottom = ##t
    %% Page footer: add a different part-tagline at part last page
    oddFooterMarkup = \markup {
        \column {
            \fill-line {
                %% Copyright header field only on book first page.
                \on-the-fly #first-page \fromproperty #'header:copyright
            }
            \fill-line {
                %% Part tagline header field only on each part last page.
                \on-the-fly #part-last-page \fromproperty #'header:parttagline
            }
            \fill-line {
                %% Tagline header field only on book last page.
                \on-the-fly #last-page \fromproperty #'header:tagline
            }
        }
    }
}

%% book header, which is inherited by the first bookpart
\header {
    title = "Book title"
    copyright = "Copyright line on book first page"
    parttagline = "Part tagline"
    tagline = "Book tagline"
}

\bookpart {
    %% a different page breaking function may be used on each part
    \paper { page-breaking = #ly:minimal-breaking }

Changing the staff size

Though the simplest way to resize staves is to use #(set-global-staff-size xx), an individual staff's size can be changed by scaling the properties 'staff-space and fontSize.

```
<<
\new Staff {
    \relative c' {
        \dynamicDown
        c8\ff c c c c c c c
    }
}
\new Staff \with {
    fontSize = #-3
    \override StaffSymbol.staff-space = #(magstep -3)
} {
    \clef bass
    c8 c c c c\f c c c
}
>>
```

Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with `-dclip-systems`; the snippets page may not adequately show the results.

The result will be files named ‘`base-from-start-to-end[-count].eps`’.

If system starts and ends are included, they include extents of the System grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

```
#(ly:set-option 'clip-systems)
#(define output-suffix "1")

origScore = \score {
  \relative c' {
    \new Staff \with { instrumentName = "Instrument" }
    c1
    d1
    \grace c16 e1
    \key d \major
    f1 \break
    \clef bass
    g,,1
    fis1
  }
}

\book {
  \score {
    \origScore
    \layout {
      % Each clip-region is a (START . END) pair
      % where both are rhythmic-locations.

      % (make-rhythmic-locations BAR-NUMBER NUM DEN)
      % means NUM/DEN whole-notes into bar numbered BAR-NUMBER

      clip-regions = #(list
        (cons
          (make-rhythmic-location 2 0 1)
          (make-rhythmic-location 4 0 1))

        (cons
          (make-rhythmic-location 0 0 1)
          (make-rhythmic-location 4 0 1)))
      )
    }
  }
}
```

```

        (cons
          (make-rhythmic-location 0 0 1)
          (make-rhythmic-location 6 0 1))
      )
    }
  }
}

#(ly:set-option 'clip-systems #f)
#(define output-suffix #f)

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

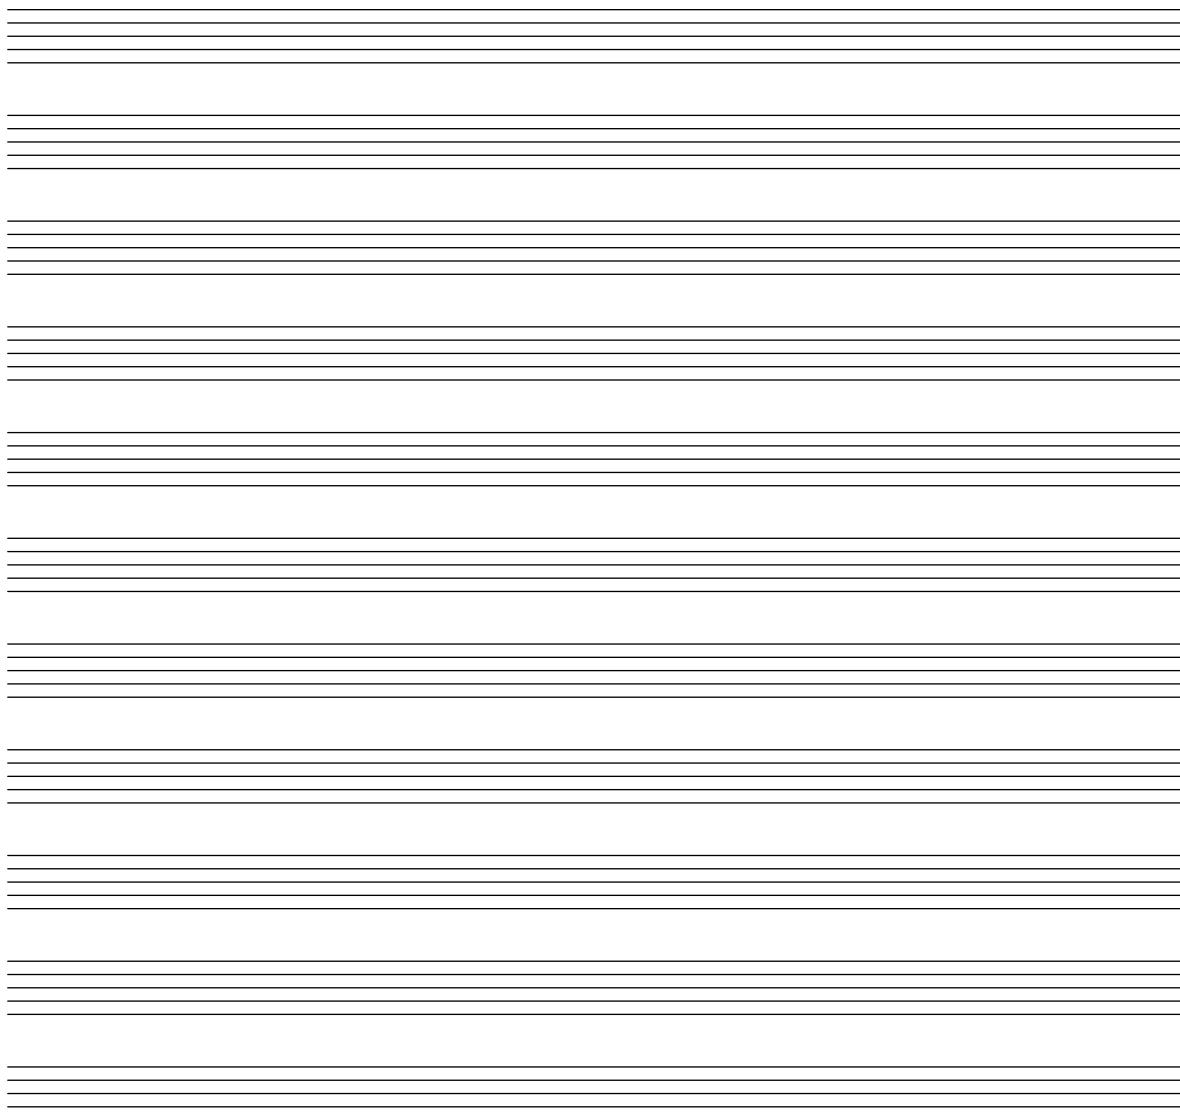

```
#(set-global-staff-size 20)

\score {
{
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Demonstrating all headers

All header fields with special meanings.

```
\header {
    copyright = "copyright"
    title = "title"
    subtitle = "subtitle"
    composer = "composer"
    arranger = "arranger"
    instrument = "instrument"
    metre = "metre"
    opus = "opus"
    piece = "piece"
    poet = "poet"
    texidoc = "All header fields with special meanings."
    copyright = "public domain"
    enteredby = "jcn"
    source = "urtext"
}
```

```
\layout {
    ragged-right = ##f
}

\score {
    \relative c' { c1 | c | c | c }
}

\score {
    \relative c' { c1 | c | c | c }
    \header {
        title = "localtitle"
        subtitle = "localsubtitle"
        composer = "localcomposer"
        arranger = "localarranger"
        instrument = "localinstrument"
        metre = "localmetre"
        opus = "localopus"
        piece = "localpiece"
        poet = "localpoet"
        copyright = "localcopyright"
    }
}

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
    system-separator-markup = \slashSeparator
    line-width = 120
}
```

```
notes = \relative c' {
    c1 | c \break
    c1 | c \break
    c1 | c
}

\book {
    \score {
        \new GrandStaff <<
            \new Staff \notes
            \new Staff \notes
        >>
    }
}
```

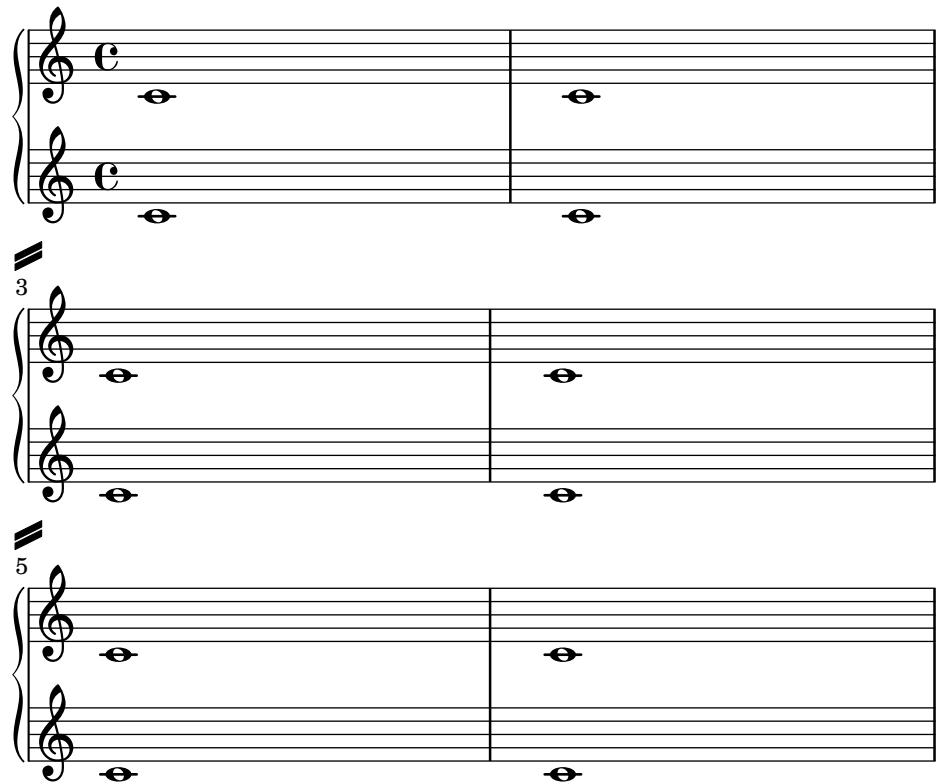

Table of contents

A table of contents is included using `\markuplist \table-of-contents`. The TOC items are added with the `\tocItem` command.

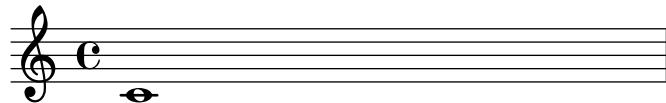

```
#(set-default-paper-size "a6")

\book {
  \markuplist \table-of-contents
  \pageBreak
  \tocItem \markup { The first score }
  \score {
    {
      c'1 \pageBreak
      \mark "A" \tocItem \markup { Mark A }
      d'1
    }
  }
  \pageBreak
  \tocItem \markup { The second score }
  \score {
    { e'1 }
    \header { piece = "Second score" }
  }
}
```

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

A musical score for two voices (Soprano and Bass) and piano. The key signature is common C. The vocal parts enter at the beginning with quarter notes. The piano accompaniment consists of sustained notes and chords. The lyrics are: Wer nur den lieben - ben Gott lässt wal - . The piano part continues with a bass line and chords.

Pupil: Here's my version!

A musical score for two voices (Soprano and Bass) and piano. The key signature is common C. The vocal parts enter with eighth-note patterns. The piano accompaniment includes eighth-note chords. The lyrics are: Wer nur den lieben - ben Gott lässt wal - . The piano part features a more active bass line and chords.

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

A musical score for two voices (Soprano and Bass) and piano. The key signature is common C. The vocal parts enter with eighth-note patterns. The piano accompaniment includes eighth-note chords and a more complex bass line. The lyrics are: Wer nur den lieben - ben Gott lässt wal - . The piano part features a more intricate bass line and chords.

The image shows three staves of musical notation, likely for a three-part setting (e.g., Soprano, Alto, Bass). The music is in common time, with a key signature of one sharp (F#). The lyrics are written below the notes in a German poem:

ten und hof - fet auf ihn al - le Zeit

The first staff consists of quarter notes. The second staff adds eighth-note patterns. The third staff adds sixteenth-note patterns, starting with a bass note.

Titles

Sezione “Titles and headers” in *Guida alla Notazione*

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
% first, define a variable to hold the formatted date:
date = #(strftIME "%d-%m-%Y" (localTIME (current-time)))

% use it in the title block:
\header {
    title = "Including the date!"
    subtitle = \date
}

\score {
    \relative c' {
        c4 c c c
    }
}
% and use it in a \markup block:
\markup {
    \date
}
```

Including the date!

14-01-2021

14-01-2021

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
    \new StaffGroup <<

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #LEFT
            instrumentName = \markup \left-column {
                "Left aligned"
                "instrument name"
            }
        }
    >>
}
```

```

}

shortInstrumentName = "Left"
}

{ c''1 \break c''1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    "Right aligned"
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ e'1 e'1 }

>>

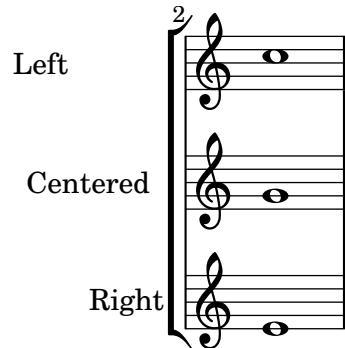

\layout {
  ragged-right = ##t
  indent = 4\cm
  short-indent = 2\cm
}
}

Outputting the version number

By putting the output of `lilypond-version` into a lyric, it is possible to print the version number of LilyPond in a score, or in a document generated with `lilypond-book`. Another possibility is to append the version number to the doc-string, in this manner:

```
\score {
  \new Lyrics {
    \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark #(string-append "Processed with LilyPond version " (lilypond-version))
    s2
  }
}
```

Processed with LilyPond version 2.22.0

Spacing

Sezione “Spacing issues” in *Guida alla Notazione*

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```
<<
\new Staff \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
    \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
        #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
    <c-1 e-2 g-3 b-5>2
    \override Fingering.staff-padding = #'()
    <c-1 e-2 g-3 b-5>4 g'-0
    a8[-1 b]-2 g-0 r
```

```
\override Fingering.add-stem-support = ##f
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = ##t
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = #only-if-beamed
a[-1 b]-2 g-0 r
}
```

Page label

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c' {
    \override Score.SpacingSpanner.strict-note-spacing = ##t
    \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
    \new Staff {
        c8[ c \clef alto c c \grace { d16 } c8 c] c4
        c2 \grace { c16[ c16] } c2
    }
    \new Staff {
        c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
        c1
    }
}
>>
```

Dinamiche e segni testuali allineati verticalmente

Tutti gli oggetti `DynamicLineSpanner` (forcelle e testi di dinamica) sono posti a una distanza minima dal rigo determinata da '`staff-padding`'. Se si imposta '`staff-padding`' su un valore abbastanza grande, le dinamiche saranno allineate.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = #3
  \textLengthOn
  \override TextScript.staff-padding = #1
  \music
}
```

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```
\paper {
  ragged-right = ##t
}

\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
  { \skip 2
    <<
    \lyrics {
```

```
\set alignBelowContext = #'1"
lyrics4 below
}
\new Staff \with {
    alignAboveContext = #'3"
    fontSize = #-2
    \override StaffSymbol.staff-space = #(magstep -2)
    \remove "Time_signature_engraver"
} {
    \tuplet 6/4 {
        \override TextScript.padding = #3
        c8[{"ossia above" d e d e f]
    }
}
>>
}
>>
```

MIDI

Sezione “Creating MIDI output” in *Guida alla Notazione*

Impostare l’output MIDI su un canale per voce

Nella creazione del file di output MIDI, il comportamento predefinito prevede che ogni rigo sia assegnato a un canale MIDI, con tutte le voci del rigo amalgamate in un canale. Ciò diminuisce il rischio di esaurire i canali MIDI disponibili, dato che ce ne sono solo 16 per traccia.

Tuttavia, spostando `Staff_performer` nel contesto `Voice`, ogni voce in un rigo può avere il proprio canale MIDI, come è illustrato nell’esempio seguente: sebbene le voci siano sullo stesso rigo, vengono creati due canali MIDI, ciascuno con un diverso strumento MIDI (`midiInstrument`).

```
\score {
    \new Staff <<
        \new Voice \relative c''' {
            \set midiInstrument = #"flute"
            \voiceOne
            \key g \major
            \time 2/2
            r2 g-"Flute" ~
            g fis ~
            fis4 g8 fis e2 ~
            e4 d8 cis d2
        }
        \new Voice \relative c'' {
            \set midiInstrument = #"clarinet"
            \voiceTwo
            b1-"Clarinet"
            a2. b8 a
            g2. fis8 e
            fis2 r
        }
    >>
    \layout { }
    \midi {
        \context {
            \Staff
            \remove "Staff_performer"
        }
        \context {
            \Voice
            \consists "Staff_performer"
        }
        \tempo 2 = 72
    }
}
```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout {}
  \midi {}
}
```

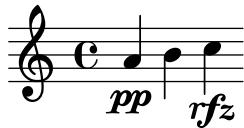

Creare dinamiche personalizzate nell'output MIDI

L'esempio seguente mostra come creare un segno di dinamica, non incluso nell'elenco predefinito, e assegngargli un valore specifico così che possa essere usato per cambiare l'output MIDI.

Al segno di dinamica `\rfz` viene assegnato il valore 0.9.

```
#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
    0.9
    (default-dynamic-absolute-volume dynamic)))

\score {
  \new Staff {
    \set Staff.midiInstrument = #"cello"
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics
    \new Voice {
      \relative {
        a'4\pp b c-\rfz
      }
    }
  }
  \layout {}
  \midi {}
}
```

Customized drum notation in printed and MIDI output

Customized drum “pitch” names (suitable for a custom drum style, for example) may be used both in printed and MIDI output by defining such variables as `drumPitchNames`, `drumStyleTable` and `midiDrumPitches`, as demonstrated here. In short, this snippet:

- defines some “pitch” names
- defines how they will be rendered
- tell LilyPond to use them for layout
- assigns pitches to the names
- tell LilyPond to use them for MIDI output

```
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#cust
%%%
%%%
%%% To use custom drum-pitch-names for your score and midi you need to follow
%%% this route:
%%%
%%% LAYOUT:
%%% %%%%%%%%
%%% (1) Define a name and put it in `drumPitchNames'
%%%     This can be done at toplevel with
%%%         drumPitchNames.my-name = #'my-name
%%%     It's possible to add an alias as well.
%%% (2) Define how it should be printed
%%%     Therefore put them into a toplevel-list, where each entry should look:
%%%         (my-name
%%%             note-head-style-or-default
%%%             articulation-string-or-#f
%%%             staff-position)
%%% Example:
%%%     #(define my-style
%%%         '(
%%%             (my-name default "tenuto" -1)
%%%             ; ...
%%%         ))
%%% (3) Tell LilyPond to use this custom-definitions, with
%%%     drumStyleTable = #(alist->hash-table my-style)
%%%     in a \layout or \with
%%% Now we're done for layout, here a short, but complete example:
%%%     \new DrumStaff
%%%         \with { drumStyleTable = #(alist->hash-table my-style) }
%%%             \drummode { my-name }
%%%
%%% %%%%%%%%
```

```
%% MIDI:
%%%%%
%%
%% (1) Again at toplvel, assign a pitch to your custom-note-name
%%      midiDrumPitches.my-name = ges
%%      Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%%      drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%% Example:
%%     \score {
%%         \new DrumStaff
%%         \with {
%%             drumStyleTable = #(alist->hash-table my-style)
%%             drumPitchTable = #(alist->hash-table midiDrumPitches)
%%         }
%%         \drummode { my-name4 }
%%         \layout {}
%%         \midi {}
%%     }
%%
%%%%%
%% TESTING
%%%%%
%%
%% To test whether all is fine, run the following sequence in terminal:
%%     lilypond my-file.ly
%%     midi2ly my-file.midi
%%     gedit my-file-midi.ly
%%
%% Which will do:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%     (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%

Modificare l'equalizzazione predefinita degli strumenti MIDI

L'equalizzatore predefinito degli strumenti MIDI può essere modificato impostando la proprietà `instrumentEqualizer` nel contesto `Score` come una procedura Scheme definita dall'utente che usi il nome dello strumento MIDI come argomento insieme a una coppia di frazioni indicanti i volumi minimi e massimi da applicare a quello specifico strumento.

L'esempio seguente imposta i volumi massimo e minimo per il flauto e per il clarinetto.

```
#(define my-instrument-equalizer-alist '())

#(set! my-instrument-equalizer-alist
  (append
   '(
     ("flute" . (0.7 . 0.9))
     ("clarinet" . (0.3 . 0.6)))
   my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
        (cdr entry)))

\score {
  <<
  \new Staff {
    \key g \major
    \time 2/2
    \set Score.instrumentEqualizer = #my-instrument-equalizer
    \set Staff.midiInstrument = "flute"
    \new Voice \relative {
      r2 g' '\mp g fis~
      4 g8 fis e2~
      4 d8 cis d2
    }
  }
  \new Staff {
    \key g \major
    \set Staff.midiInstrument = "clarinet"
    \new Voice \relative {
      b'1\p a2. b8 a
      g2. fis8 e
      fis2 r
    }
  }
  >>
  \layout { }
  \midi { }
}
```

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
\include "gregorian.ly"

chant = \relative c' {
    \set Score.timing = ##f
    f4 a2 \divisioMinima
    g4 b a2 f2 \divisioMaior

}
}
}
```

A musical score for two staves. The top staff uses a treble clef and has four measures. The first measure shows a bass note followed by three eighth notes. The second measure shows a bass note followed by a quarter note and a half note. The third measure shows a bass note followed by three eighth notes. The fourth measure shows a bass note followed by a quarter note and a half note. The bottom staff uses a bass clef and has four measures. The first measure shows a bass note followed by three eighth notes. The second measure shows a bass note followed by a quarter note and a half note. The third measure shows a bass note followed by three eighth notes. The fourth measure shows a bass note followed by a quarter note and a half note.

O come let us **sing** | unto • the | Lord : let
us heartily **rejoice** in the | strength of | our
sal | vation.

8. Today if ye will hear his voice *
harden' not your' hearts : as in the pro-
vocation * and as in the **day** of tempt-'
-ation 'in the' wilderness.

Modello per inno

Il codice seguente presenta un modo di impostare un inno in cui ogni verso inizia e finisce con una misura parziale. Mostra anche come aggiungere delle strofe come testo separato sotto la musica.

```

Score for diatonic accordion

A template to write a score for a diatonic accordion.

- There is a horizontal staff indicating if the accordion must be pushed (thick line) or pulled (thin line)
- There is a small rhythmic staff with lyrics that describes the bass buttons to press. The bar lines are made from gridlines
- The tabulator staff for diatonic accordions shows the geographic position of the buttons and not (as for every other instrument) the pitch of the notes; the keys on the melody-side of the accordion are placed in three columns and about 12 rows

In the tabulator staff notation the outermost column is described with notes between lines, the innermost column is described with notes between lines and a cross as accidental, and the middle column is described with notes on a line, whereby the row in the middle is represented on the middle line in the staff.

Some words to transpose piano notes to the diatonic accordion:

1. Every diatonic accordion is built for some keys only (for example, for the keys of C major and F major), so it is important to transpose a piano melody to match one of these keys.

Transpose the source code, not only the output because this code is required later on to translate it once more to the tabulator staff. This can be done with the command `displayLilyMusic`.

2. You have to alternate the push- and pull-direction of the accordion regularly. If the player has a too long part to pull the accordion gets broken. On the other hand, some harmonies are only available in one direction. Considering this, decide which parts of the melody are the push-parts and which the pull-parts.

3. For each pull- or push-part translate the piano notes to the according tabulature representation.

```

verse = \lyricmode { Wie gross bist du! Wie gross bist du! }

A musical score for two instruments: Voice and Accordion. The vocal line starts on C and moves to B, E♭, F, and B. The lyrics "Wie gross bist du! Wie gross bist du!" are written below the notes. The accordion part consists of chords and some decorative notes. Below the staff, the notes are labeled with their corresponding letter names: c, b, c.

Modello di rigo singolo con note, testo e accordi

Ecco il modello di un comune spartito semplificato (lead sheet): include linea melodica, testo vocale e sigle degli accordi.

```

melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4

    a4 b c d
}

text = \lyricmode {
    Aaa Bee Cee Dee
}

harmonies = \chordmode {
    a2 c
}

\score {
    <<
    \new ChordNames {
        \set chordChanges = ##t
        \harmonies
    }
    \new Voice = "one" { \autoBeamOff \melody }
    \new Lyrics \lyricsTo "one" \text
    >>
    \layout { }
    \midi { }
}

```

A single-line musical score. It starts with a C-clef, followed by a key signature of one sharp (F#). The melody consists of four quarter notes: A, C, C, C. Below the notes, the lyrics "Aaa Bee Cee Dee" are written.

Single staff template with notes, lyrics, chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
    \set stanza = #"1."
    This is the first verse
}

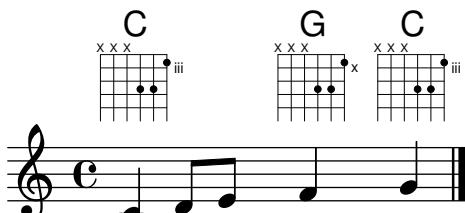

verseII = \lyricmode {
    \set stanza = #"2."
    This is the second verse.
}

theChords = \chordmode {
    % insert chords for chordnames and fretboards here
    c2 g4 c
}

staffMelody = \relative c' {
    \key c \major
    \clef treble
    % Type notes for melody here
    c4 d8 e f4 g
    \bar "|."
}

\score {
    <<
        \context ChordNames { \theChords }
        \context FretBoards { \theChords }
        \new Staff {
            \context Voice = "voiceMelody" { \staffMelody }
        }
        \new Lyrics = "lyricsI" {
            \lyricsto "voiceMelody" \verseI
        }
        \new Lyrics = "lyricsII" {
            \lyricsto "voiceMelody" \verseII
        }
    >>
    \layout { }
    \midi { }
}

```

1. This is the first verse
2. This is the second verse.

Modello di rigo singolo con note e accordi

Vuoi preparare uno spartito semplificato (lead sheet) con melodia e accordi? La tua ricerca è finita!

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  f4 e8[ c] d4 g
  a2 ~ a
}

harmonies = \chordmode {
  c4:m f:min7 g:maj c:aug
  d2:dim b4:5 e:sus
}

\score {
  <<
  \new ChordNames {
    \set chordChanges = ##t
    \harmonies
  }
  \new Staff \melody
  >>
  \layout{ }
  \midi { }
}
}
```

Modello di rigo singolo con note e testo

Questo piccolo modello presenta una semplice linea melodica con un testo. Copialo e incollalo, aggiungi le note e le parole. Questo esempio disabilita la disposizione automatica delle travature, come è consuetudine per le parti vocali. Per usare la disposizione automatica delle travature, cambia o commenta la relativa linea di codice.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}
```

```
\score{
  <<
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
}
```

Modello di rigo singolo con solo note

Questo modello molto semplice mette a disposizione un rigo con delle note ed è quindi adatto per uno strumento non accompagnato o per un frammento melodico. Copialo e incollalo in un file, aggiungi le note e hai finito!

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}
```

```
\score {
  \new Staff \melody
  \layout { }
  \midi { }
}
```

Modello per quartetto d'archi (semplice)

Questo modello presenta un semplice quartetto d'archi. Impiega anche una sezione `\global` per definire il tempo e l'armatura di chiave.

```
global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c'' {
```

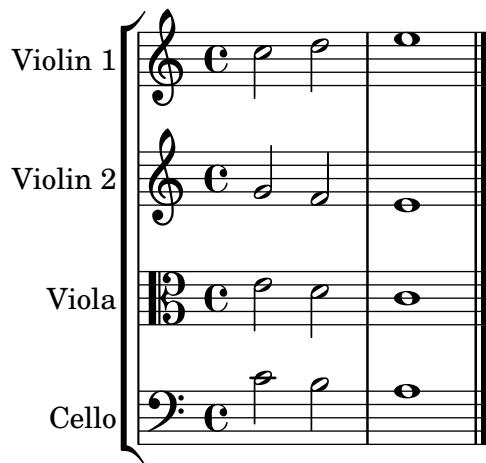

```
c2 d
e1
\bar "|."
}

violinTwo = \new Voice \relative c' {
g2 f
e1
\bar "|."
}

Modello per quartetto d'archi con parti separate

Il frammento di codice del “Modello per quartetto d’archi” crea un bel quartetto, ma cosa fare se si ha bisogno di creare le singole parti? Questo nuovo modello mostra come usare la funzionalità `\tag` per dividere facilmente un pezzo in parti staccate.

Occorre dividere questo modello in file separati; i nomi dei file sono indicati nei commenti all’inizio di ogni file. `piece.ly` contiene tutte le definizioni musicali. Gli altri file – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly` e `vlc.ly` – creano ciascuna parte.

Non dimenticare di togliere i commenti quando usi i file separati!

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

```

A musical score for four voices (Soprano, Alto, Tenor, Bass) in common time (4/4) and C major. The Soprano part has lyrics "hi hi hi hi" above the notes. The Alto part has lyrics "ha ha ha ha" above the notes. The Tenor part has lyrics "hu hu hu hu" above the notes. The Bass part has lyrics "ho ho ho ho" above the notes. The music consists of quarter notes and eighth-note pairs.

Modello per gruppo vocale con testo allineato sotto e sopra i righi

Questo modello è fondamentalmente analogo al semplice modello “Complesso vocale”, con l'unica differenza che qui tutti i versi del testo sono posizionati usando `alignAboveContext` e `alignBelowContext`.

```
global = {
    \key c \major
    \time 4/4

Modello per gruppo vocale con strofa e ritornello

Questo modello crea una partitura che inizia con una sezione solistica e prosegue in un ritornello a due voci. Illustra anche l'uso delle pause spaziatrici all'interno della variabile \global per definire i cambi di tempo (e altri elementi comuni a tutte le parti) nel corso di tutta la partitura.

```

global = {
  \key g \major

        }
    }
}

```

Modello per complesso vocale

Ecco una tipica partitura corale a quattro parti, SATB. Se il complesso è più ampio, è spesso comodo scrivere gli elementi comuni in un'unica sezione, che verrà poi inclusa in tutte le parti. Ad esempio, l'indicazione di tempo e l'armatura di chiave sono quasi sempre le stesse per tutte le parti. Come nel modello dell'“Inno”, le quattro voci sono ripartite in due soli righi.

```

```

A musical score for two voices: tenors and basses. The tenor voice (top) sings "hi" four times, followed by "ha" four times, then "hu" four times, and finally "ho" four times. The bass voice (bottom) sings "hi" four times, followed by "ha" four times, then "hu" four times, and finally "ho" four times. The music is in common time, C major, and consists of quarter notes.
